

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of the Securities Exchange Act 1934.

Yes No

Note — Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 13(a) of the Exchange Act.

† The term “new or revised financial accounting standard” refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued
by the International Accounting Standards Board

Other

If “Other” has been checked in response to the previous question, indicated by check mark which financial statement item the registrant has elected to follow.
 Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

INTRODUCTION

Unless the context otherwise requires, references in this annual report on Form 20-F to:

- “ADRs” are to the American depositary receipts, which, if issued, evidence our ADSs;
- “ADSs” are to our American depositary shares, each of which represents one ordinary share;
- “BDO” is to our independent auditor BDO China Shu Lun Pan Certified Public Accountants LLP;
- “CAGR” is to compound annual growth rate;
- “China” or the “PRC” are to the People’s Republic of China, excluding, for the purposes of this annual report only, Taiwan and the special administrative regions of Hong Kong and Macau;
- “NYSE” is to the New York Stock Exchange;
- “ordinary shares” are to our ordinary shares, par value \$0.001 per share;
- “RMB” and “Renminbi” are to the legal currency of China;
- “\$” and “U.S. dollars” are to the legal currency of the United States; and
- “we,” “us,” “our Company,” “our” and “New Borun” are to China New Borun Corporation and its consolidated subsidiaries.

Discrepancies in any table between the amounts identified as total amounts and the sum of the amounts listed therein are due to rounding.

We completed our initial public offering of 5,725,000 ADSs on June 16, 2010. Our ADSs are listed on the NYSE, under the symbol “BORN.”

Unless otherwise noted, all translations from RMB to U.S. dollars were made at a rate of RMB 6.937 to \$1.00 as published by the People’s Bank of China on December 31, 2016. We make no representation that the RMB amounts referred to in this annual report could have been or could be converted into U.S. dollars at any particular rate or at all. See also Item 3.A, “Key Information - Selected Financial Data - Exchange Rate Information.”

FORWARD-LOOKING STATEMENTS

This annual report on Form 20-F, including in particular Item 3.D, “Key information — Risk Factors,” Item 4, “Information on the Company” and Item 5, “Operating and Financial Review and Prospects,” contains statements that relate to future events, including our future operating results and conditions, our prospects and our future financial performance and condition. These statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward- looking statements.

In some cases, these forward-looking statements can be identified by words or phrases such as “anticipates,” “believes,” “continue,” “could,” “estimates,” “expects,” “intends,” “may,” “might,” “plans,” “possible,” “potential,” “predicts,” “projects,” “seeks,” “should,” “will,” “would,” negatives of such terms or other expressions. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. These forward-looking statements include, without limitation, statements relating to:

- the significant risks, challenges and uncertainties in the edible alcohol manufacturing industry and for our business generally, including our beliefs regarding the cost advantages and scalability provided by our manufacturing methods and processes;
- supply and demand in the edible alcohol industry in China;
- our ability to offset anticipated increases in raw material and other costs that could compress or decrease our gross margins;
- our current expansion strategy, including our ability to expand production capacity and outputs;

[Table of Contents](#)

- market and industry demand, including demand for our products by our customers that incorporate our products into other products in the food and beverage, medical and health and chemical industries;
- the global economic downturn and its effect on our business and operations;
- our beliefs regarding our strengths and strategies;
- our ability to maintain strong relationships with suppliers or customers;
- our beliefs as to the regulatory environment in China and in other jurisdictions in which we sell our products;
- our ability to comply with all relevant environmental, health and safety laws and regulations;
- our beliefs regarding the competitiveness of our products;
- market acceptance of our products and our ability to attract new customers;
- our ability to effectively protect our intellectual property and trade secrets and not infringe on the intellectual property and trade secrets of others;
- our ability to obtain or maintain permits and licenses to carry on our business;
- our success in the acquisition of new production facilities; and
- our future prospects, business development, results of operations and financial condition.

The forward-looking statements contained in this annual report speak only as of the date of this annual report or, if obtained from third-party studies or reports, the date of the corresponding study or report, and are expressly qualified in their entirety by the cautionary statements in this annual report. Since we operate in an emerging and evolving environment and new risk factors emerge from time to time, you should not rely upon forward-looking statements as predictions of future events. Except as otherwise required by the securities laws of the United States, we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, to reflect events or circumstances after the date of this annual report or to reflect the occurrence of unanticipated events. All forward-looking statements contained in this annual report are qualified by reference to this cautionary statement.

A. Selected Financial Data

The following selected audited consolidated statements of income data for each of the years ended December 31, 2014, 2015 and 2016, and the selected audited balance sheet data as of December 31, 2015 and 2016 are derived from our audited consolidated financial statements, which are included elsewhere in this annual report. The selected historical consolidated statements of income data for the years ended December 31, 2012 and 2013 and the selected historical consolidated balance sheet data as of December 31, 2012, 2013 and 2014 set forth below are derived from our audited historical consolidated financial statements, which are not included in this annual report. Historical results are not necessarily indicative of the results of operations for future periods. The following data is qualified in its entirety by and should be read in conjunction with Item 5, “Operating and Financial Review and Prospects” and our consolidated financial statements and related notes included elsewhere in this annual report. Our audited consolidated financial statements for the years ended December 31, 2014, 2015 and 2016 are prepared in accordance with U.S. Generally Accepted Accounting Principles (U.S. GAAP), and have been audited by

Exchange Rate Information

Our business is conducted in China and all of our revenue and the majority of our expenses are denominated in Renminbi. This annual report contains translations of Renminbi amounts into U.S. dollars at specified rates. Unless otherwise noted, all translations from Renminbi to U.S. dollar amounts were made at a rate of RMB 6.937 to USD 1.00 as published by the People's Bank of China on December 31, 2016. We make no representation that the Renminbi or U.S. dollar amounts referred to in this annual report could have been or could be converted into U.S. dollars or Renminbi, as the case may be, at any particular rate or at all.

The following table sets forth information concerning exchange rates between the Renminbi and the U.S. dollars for the periods indicated. These rates are provided solely for your convenience and are not necessarily the exchange rates that we used in this annual report or will use in the preparation of our periodic reports or any other information to be provided to you. The exchange rate of Renminbi per U.S. dollar as published by the People's Bank of China was RMB6.8792 to \$1.00 as of April 20, 2017.

Period	Exchange Rate			
	Period End	Average ⁽¹⁾	Low	High
(RMB per \$1.00)				
Year ended December 31,				
2012	6.2855	6.3108	6.3449	6.2787

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

An investment in the ADSs involves significant risks. You should consider carefully the material risks described below and all of the information contained in this annual report before deciding whether to purchase any ADSs. Our business, financial condition or results of operations could be materially adversely affected by these risks if any of them actually occur. The trading price of the ADSs could decline due to any of these risks, and an investor may lose all or part of his investment. This filing also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the risks described below and elsewhere in this annual report.

RISKS RELATED TO OUR COMPANY

If we fail to accurately project demand for our key products, i.e., edible alcohol and its by-products, we may encounter problems of over capacity, which would materially and adversely affect our business, financial condition and results of operations, as well as damage our reputation and brand.

Historically, edible alcohol production capacity has exceeded actual market demand. We have planned our expansion assuming a reduction in market supply based on the national industry policies to close “backward” smaller manufacturers with a production capacity of less than 30,000 tons per year (see Item 4.B, “Information on the Company — Business Overview — Regulation”), the in-principle suspension in approvals for new corn deep-processing production projects, and the growth in demand for edible alcohol driven by the PRC Chinese *baijiu* industry. If supply of edible alcohol in the PRC is not in fact reduced or if the PRC government begins to approve new edible alcohol production capacities or there is no, or little, growth in demand for edible alcohol, we may encounter difficulties in selling our increased production capacity, which would materially and adversely affect our business, financial condition and results of operations.

Currently, purchase orders from our customers are typically placed on a monthly basis, and we take such orders into account when we formulate our overall operation plans. We project demand for our products based on rolling projections from our customers and customer inventory levels. The varying sales and purchasing cycles of our customers, however, make it difficult for us to accurately forecast future demand for our products. Our inability to accurately predict and to timely meet demand, could materially and adversely affect our business, financial condition and results of operations.

Although we were able to operate at full capacity from 2007 to 2011, we did not fully utilize our production capacity for the four years ended December 31, 2016. Starting from the fourth quarter of 2012, the industry faced headwind from a PRC government ban on serving high-end *baijiu* at official banquets as well as consumers’ concerns caused by media reports of traces of plasticizers found in bottled *baijiu*, which resulted in a decline in sales of *baijiu* and also the demand for edible alcohol. In 2016, we reached approximately 88.9% of our total production capacity. If the demand for edible alcohol does not increase or at a slower pace, we may encounter difficulties in selling our increased production, which would materially and adversely affect our business, financial conditions and results of operations.

10

[Table of Contents](#)

Our inability to expand or to manage the expansion of our production capacity and growth could materially adversely affect our business, financial condition and results of operations, and result in a loss of business opportunities.

We might continue to expand our production capacity. However, we may be unsuccessful in the timely or cost-efficient expansion of our production capacity. This project and others may not be constructed on the anticipated timetable or within budget. Any material delay in completing these projects, or any substantial increase in costs or quality issues in connection with these projects, could materially and adversely affect our business, financial condition and results of operations, and result in a loss of business opportunities.

Furthermore, we have limited operational, administrative and financial resources, which may be inadequate to sustain the growth we want to achieve. We have experienced a period of rapid growth and expansion that has placed, and will continue to place, strain on our management personnel, systems and resources. To accommodate our growth pursuant to our strategies, we anticipate that we will need to implement a variety of new and upgraded operational and financial systems, procedures and controls, and improve our accounting and other internal management systems, all of which require substantial management efforts and financial resources. We will also need to continue to expand, train, manage and motivate our workforce, and effectively manage our relationships with our customers and suppliers. All of these endeavors will require substantial management effort and skills and the incurrence of additional

expenditures. We cannot assure you that we will be able to efficiently or effectively implement our growth strategies and manage the growth of our operations, and any failure to do so may limit our future growth and hamper our business strategy.

Rising prices of our raw materials for our key products could yield lower margins if we are unable to pass such rising prices on to our customers, which could reduce our profitability and have a material adverse effect on our business.

The key raw materials used in the production of our key products are corn and coal. Changes in the prices for these raw materials would significantly affect our cost of goods sold. In general, rising prices of corn and coal will produce lower profit margins for us if we are unable to pass such rising costs on to our customers. Whether we can pass most of the rising costs on to our customers depends on a variety of factors, including but not limited to corn and coal pricing and consumer market conditions. The price of corn is influenced by weather conditions and other factors affecting crop yields, farmer planting decisions and general economic, market and regulatory factors. These factors include government policies and subsidies with respect to agriculture and international trade, and global and local demand and supply. The price of coal is influenced by a variety of factors, including market conditions, mine operating costs, coal quality, transportation costs and fluctuations in demand by other industry sectors, such as power plants, and the cost of alternative fuels. The significance and relative effect of these factors on the price of corn and coal is difficult to predict. In addition, although our supply contracts provide us access to corn at prices which we believe have historically been below the spot market price in the off season and times of high price volatility (due to crop failure and other factors), we have no contracts or derivative instruments in place that effectively hedge against the fluctuations in the price of our raw materials as our corn purchase and edible alcohol sales contracts are priced based on market conditions. Any event that tends to negatively affect the supply of these raw materials could increase prices and potentially harm our business. To the extent that we cannot fully pass on the price increases in raw materials to our customers, or at all, our business and profitability would be materially and adversely affected.

11

[Table of Contents](#)

If we are unable to access corn of the quality required to meet our production standards for our key products, or if we are unable to obtain a sufficient supply of raw materials from our suppliers, or at all, our business, financial condition and results of operations may suffer.

From time to time we may be unable to access corn of the quality and type that meets our production standards, which could adversely affect our financial performance. For example, if the corn is too wet or if the starch content of the corn is too low, we would be required to purchase and then process larger quantities of such lower-quality corn in order to maintain the same quality in the production of our edible alcohol, and such increased raw material cost, as well as increased energy costs of burning more coal in order to process the increased amount of corn, would reduce our profit margins. Our extended inability to obtain and process corn of the required quality would also reduce our annual production. Furthermore, if we experience a shortage in our supply of corn in the future, irrespective of quality, our production capacities and results of operations would be materially and adversely affected.

12

[Table of Contents](#)

In addition, we rely on a steady supply of coal to power our production facilities. If we experience a shortage of coal, our business could be adversely affected. We currently have relationships with eight suppliers of coal, however we do not have any long-term supply agreements in place with these suppliers and we cannot guarantee that such suppliers will continue to do business with us. In the event that our coal suppliers stop doing business with us, we would be forced to find replacement coal suppliers, or increase our coal uptake from existing suppliers, which could take time to locate and secure. If we experience any extended period of time without coal, we would need to obtain power from the local electricity grid, if available, which would have a material adverse effect on our business, financial condition and results of operations. See “Risk Factors - Risks Related To Our Company -Interruptions with our coal-fired power-generating systems, whether planned or unexpected, may have an adverse effect on our business, financial condition and results of operations.”

If we experience problems with our product quality, customer satisfaction with respect to pricing of our products or the timely delivery of our products, we could lose our customers and market acceptance, which would negatively affect our sales and have an adverse effect on our business, financial condition and results of operations.

Our growth and sales primarily depend on our maintenance of quality control, customer satisfaction with respect to pricing and the punctual availability and delivery of our products. If we fail to deliver the same quality of our products with the same punctuality and pricing which our customers have grown accustomed to, or in accordance with the terms of our sales agreements, we could damage our customer relations and market acceptance which will affect sales and our business in general. For example, as we advance and improve our methods of producing higher quality products such as Grade A and Grade B edible alcohol, it may become more difficult to maintain our quality standards at all times. Additionally, if we are ever forced to down-grade our edible alcohol, this could also affect the future improvement of our profit margins. If we experience deterioration in the performance or quality of any of our products, whether due to problems internally or externally, it could result in delays in delivery, cancellations of orders or customer complaints, loss of goodwill, diversion of the attention of our senior personnel and harm to our brand and reputation. Any and all of these results would have an adverse effect on our business, financial condition and results of operations.

Governmental authorities within the PRC periodically set corn prices and enact general industry policies that limit production capacity and use of raw materials. A significant increase in the market price of corn as a result of such governmental efforts would increase our cost of sales, and we may not be able to pass those increased costs on to our customers. Such increased costs and other policy initiatives could limit our growth and have a material adverse effect on our business, financial condition and results of operations.

The PRC government has the power to intervene in the price of important types of grain (including corn) under certain circumstances, such as when a material change occurs to the market supply and demand and/or the grain price increases significantly, or may increase significantly, in order to protect the interests of farmers. In practice, the PRC government will periodically purchase a large amount of corn from farmers and set the price for the corn purchased by the government, resulting in effective guidance of the market price by the PRC government. This has a significant impact on the market price of corn for the following year, but does not constitute a legally mandated price for corn. A significant increase in the market price of corn as a result of such governmental efforts would increase our cost of sales, and we may not be able to pass those increased costs on to our customers. Such increased costs could have a material adverse effect on our business, financial condition and results of operations.

13

[Table of Contents](#)

The PRC government requires all producers of edible alcohol to obtain production permits which set forth limitations on how much edible alcohol we can produce per annum. Our Shouguang facility has a government permit to produce 160,000 tons of edible alcohol per year and our Daqing facility has a government permit to process up to 1,000,000 tons of corn, which can produce approximately 330,000 tons of edible alcohol. If our permits are revoked for whatever reason, or if the PRC decides to revise its industry policies to our detriment, we could be forced to curtail or cease our operations.

Furthermore, in order to secure the supply of food and feed, PRC governmental entities set limitations on the use of certain raw materials. For instance, according to the 12th Five- Year Plan of Processing Industry of Grain and Oil, the PRC government continued to impose strict control on the amount of corn used for deep-processing. Any further downward limitation may adversely affect our ability to obtain an adequate level of corn at favorable prices.

In addition, the PRC government has in principle suspended the approval of applications for building new ethyl alcohol production projects. Our growth could be limited if we fail to obtain government approval for new capacity or to expand through acquisitions in other geographical areas. In addition, we could face penalties and other enforcement actions if our production levels exceed our approved production levels. The realization of any of the foregoing risks could have a material adverse effect on our business, financial condition and results of operations.

Any interruption in our manufacturing operations or production and distribution processes could impair our financial performance and negatively affect our brand.

Our production operations involve the coordination of raw materials, internal production processes and external distribution processes. We may experience difficulties in coordinating the various aspects of our production processes, thereby causing downtime and delays. We produce and store almost all of our products, as well as conduct some of our development activities, at our Shouguang and Daqing facilities. We do not maintain back-up facilities, so we depend on these facilities for the continued operation of our business.

[Table of Contents](#)

A delay or stoppage of production caused by adverse weather, natural disaster or other unanticipated catastrophic event, including, without limitation, power interruptions, water shortage, storms, fires, earthquakes, terrorist attacks and wars, could significantly impair our ability to produce our products and operate our business, as well as delay our research and development activities. Our facilities and certain equipment located in these facilities would be difficult to replace and could require substantial replacement lead- time. Catastrophic events may also destroy any inventory located in our facilities. The occurrence of such an event could materially and adversely affect our business. Any stoppage in production, even if temporary, or delay in delivery to our customers could severely affect our business or reputation. We currently do not have business interruption insurance to offset these potential losses and any interruption in our production operations or production and distribution processes could impair our financial performance and negatively affect our brand.

Interruptions with our coal-fired power-generating systems, whether planned or unexpected, may have an adverse effect on our business, financial condition and results of operations.

Our production facilities require a significant amount of electricity in order to operate at full capacity. Both our Shouguang and Daqing facilities were designed and built to be self-sufficient in power supply through the construction of their own coal-fired power- generating systems. We are also connected to the national power grid at both facilities as a backup measure in the event we experience unanticipated interruptions to our electricity generation and for when we carry out our annual full-scale inspection and maintenance program for our electricity supply systems (see “Business Overview - Our Supply of Electricity”). If the power-generating systems at our Shouguang facility or our Daqing facility experience unexpected stoppage due to mechanical failure or regulatory action, or when we schedule our annual inspection of our supply systems, we must negotiate with the government for the purchase of electricity to be supplied through the relevant grid until our power- generating systems become operational. During such negotiations, we could be forced to accept pricing terms which are not favorable to us. Furthermore, such negotiations could be time-consuming which could cause a diversion of resources and time of our senior management personnel. Furthermore, we cannot assure you that there will be no interruptions or shortages in the national or local grid electricity supply or that there will be sufficient electricity available to us to meet our needs.

There have been shortages in electricity supply in various regions across China, especially during periods of severe winter weather and during the summer peak season. Therefore, if either of our production facilities were to experience any significant downtime, we would be unable to meet our production targets and our business would suffer. Any disruption at our facilities would have a material adverse effect on our business, financial condition and results of operations.

[Table of Contents](#)

Transportation delays, including as a result of disruptions to infrastructure, could adversely affect our business, results of operations and financial condition.

Our business depends on the availability of rail, road and boat distribution infrastructure for the delivery of raw materials and for the delivery of our products to our customers. Any disruptions in this infrastructure network, whether caused by earthquakes, storms, other natural disasters or human error or malfeasance, could materially impact our business. Therefore, any unexpected delay in transportation of our raw materials or in the delivery of our products to our customers could result in significant disruption to our operations, including the closure of our facilities. We will also rely upon others to maintain rail lines and roads from our production facilities to national rail, road and shipping networks, and any failure on their part to maintain such transportation systems could impede the delivery of our raw materials to us and our products to our customers, impose additional costs on us or otherwise cause our business, results of operations and financial condition to suffer.

If we fail to continue to develop and introduce new products and technologies, our business, results of operations and financial condition could be materially adversely affected.

We intend to continue to develop new products and technologies to broaden our product line. The planned timing or introduction of new products and technologies is subject to risks and uncertainties. Actual timing may differ materially from original plans.

Unexpected technical, operational, distribution or other problems could delay or prevent the introduction of one or more of our new products or technologies. Moreover, we cannot be sure that any of our new products or technologies will achieve widespread market acceptance or generate incremental revenue. If our efforts to develop, market and sell new products to the market and apply new technologies are not successful, our business, financial condition and results of operations could be materially adversely affected.

[Table of Contents](#)

Our operations are subject to various risks associated with our use, handling, storage and disposal of hazardous materials, some of which are toxic and flammable. If we are found liable for contamination, injury to employees or others, or other harms related to our use, handling, storage and disposal of hazardous materials, our business, reputation, financial condition and results of operations may be adversely affected.

We use, handle, store and dispose of hazardous materials in our operations. Our wastewater may contain toxins and our edible alcohol and methane produced in our operations is flammable. See Item 4.B, “Information on the Company — Business Overview — Environmental Protection.” We cannot completely eliminate the risks of contamination, injury to employees or others, or other harms related to our use, handling, storage and disposal of hazardous material. Although we have not experienced incidents in the past, there can be no assurance that we will not experience fires, leakages and other accidents. In the event of future incidents, we could be liable for any damages that may result, including potentially significant monetary damages for any civil litigation or government proceedings related to a personal injury claim, as well as other fines, penalties and other consequences, including suspension or revocation of our licenses or permits or suspending production or ceasing operations at our manufacturing facilities, all of which would have a material adverse effect on our business, reputation, financial condition and results of operations. Furthermore, we currently do not carry any insurance coverage for potential liabilities relating to the release of hazardous materials.

Our use, production and disposal of hazardous materials subjects us to stringent environmental, health and safety regulations. Any actual or alleged violation of these regulations could result in significant regulatory actions, fines and other penalties, including suspending production or ceasing operations, substantial civil or criminal claims resulting in potentially significant monetary damages, adverse publicity and other negative consequences to our business.

Because we use, produce and dispose of hazardous materials and our production processes generate noise, wastewater, gaseous and other industrial wastes, we are required to comply with national and local environmental, health and safety regulations applicable to us. Except as disclosed in this annual report, we believe we have complied with all applicable environmental, health and safety procedures and measures. However, we cannot completely eliminate the environmental, health and safety risks associated with our use, production and disposal of hazardous materials and we may experience environmental, health and safety incidents at our facilities, including fires, leakages and other accidents, which could result in regulatory actions requiring us to take corrective actions and subject us to fines and other penalties. In some cases, we could be required to temporarily suspend production or cease operations while we perform corrective actions.

Our operations are subject to various risks associated with our use, handling, storage and disposal of hazardous materials, some of which are toxic and flammable. If we are found liable for contamination, injury to employees or others, or other harms related to our use, handling storage and disposal of hazardous materials, our business, reputation, financial condition and results of operations may be adversely affected. Except as described in this annual report, we believe we are currently in compliance with applicable environmental, health and safety regulations in all material aspects and have all necessary environmental, health and safety permits to operate our business as it is presently conducted. However, if more stringent regulations are adopted in the future, the costs of compliance with these new regulations could be substantial. If we fail to comply with present or future environmental, health and safety regulations, we may be subject to significant regulatory actions, fines and other penalties, including suspending production or ceasing operations, substantial civil or criminal claims resulting in potentially significant monetary damages, adverse publicity, and other negative consequences to our business, all of which could have a material adverse effect on our business, reputation, financial condition and results of operations.

[Table of Contents](#)

Environmental compliance and remediation could result in substantially increased capital requirements and operating costs, which could adversely affect our business and results of operations.

We are subject to the PRC laws and regulations relating to the protection of the environment. These laws continue to evolve and are becoming increasingly stringent. The ultimate impact of complying with such laws and regulations is not always clearly known or determinable because regulations under some of these laws have not yet been promulgated or are undergoing revision. Our business and operating results could be materially and adversely affected if we were required to increase expenditures to comply with any new environmental regulations affecting our operations.

Our operations are subject to various risks associated with our use, handling, storage and disposal of edible alcohol, which is flammable. If we are found liable for contamination, injury to employees or others, or other harms related to our use, handling, storage and disposal of edible alcohol, our business, reputation, financial condition and results of operations may be adversely affected and our permits and licenses may be suspended or revoked by Chinese regulatory authorities.

Although we have designed and implemented procedures and measures to promote occupational health and safety, we cannot completely eliminate the risks of contamination, injury to employees or others, or other harms related to our use, handling, storage and disposal of edible alcohol. In the event of future incidents, we could be liable for any damages that may result, including potentially significant monetary damages for any civil litigation or government proceedings related to a personal injury claim, as well as other fines, penalties and other consequences, including suspension or revocation of our licenses or permits or suspending production or ceasing operations at our research and manufacturing facilities, all of which could have a material adverse effect on our business, reputation, financial condition and results of operations.

The expansion of our sales and marketing and distribution efforts in new provinces and regions may not be successful.

We plan to expand our sales and marketing and distribution efforts into provinces and regions beyond Shandong and Heilongjiang provinces in China, and have already commenced sales and marketing operations for edible alcohol in Sichuan Province, Anhui Province, Jiangsu Province, Hebei Province, Jilin Province and Liaoning Province. However, our experience in the sales and marketing and distribution of our products in Shandong and Heilongjiang Provinces may not be applicable in other parts of China. We cannot assure you that we will be able to leverage such experience to expand into other provinces and regions. When we enter new markets, we may face intense competition from other producers with established experience or presence in the geographical areas in which we plan to enter and from other edible alcohol producers with similar target customers. In addition, expansion of sales into new markets in new provinces will require the recruiting and training of a new sales force to market and sell our products in that region, the assimilation with the local business cultures of new regions which may be very different from the business cultures of Shandong and Heilongjiang provinces, and require a diversion of resources and time of our senior management personnel. If we fail to integrate effectively in new markets, our operating efficiency may be affected. Furthermore, because customers in new provinces may be far away from our production facilities, our profit margins may be lower because of increased costs in the transportation of our products. Demand and government regulation may also be different in other provinces. Our failure to manage our planned expansion of sales into new provinces may have a material adverse effect on our business, financial condition and results of operations and we may not have the same degree of success in other provinces that we have had so far to date, or at all.

18

[Table of Contents](#)

Our production activities are conducted and will continue to be conducted in concentrated locations. Damage to or disruptions at our production facilities could materially and adversely affect our business, financial condition and results of operations, especially since we do not have any business interruption insurance.

Our two operating production facilities are located in Shandong and Heilongjiang provinces, making our operations particularly vulnerable to natural and other disasters that may occur in those provinces. Operating hazards, natural disasters or other unanticipated or catastrophic events, including power interruptions, water shortages, storms, typhoons, fires, explosions, earthquakes, terrorist attacks, wars and labor disputes in and around these provinces could cause damage to or destroy our facilities or equipment therein. Any of these or similar events could significantly impair our ability to operate our business, as well as delay our research and development activities and commercial production. Our facilities and equipment are expensive and potentially difficult and time-consuming to repair or replace. Catastrophic events may also result in damage to or the destruction of inventory located in our production facilities. In addition, we do not carry any business interruption or other insurance that would compensate us in the event of a loss of this type. The occurrence of such an event could result in substantial costs and diversion of resources, and our business, financial condition and results of operations may be materially and adversely affected.

We rely on our relationships with customers with whom we have sale contracts, the termination of which could cause us to experience short-term or permanent losses that would have an adverse effect on our financial condition, results of operations and prospects.

Although during the years ended December 31, 2014, 2015 and 2016, there was no single customer from which we generated more than 10% of total sales, we do rely on our relationships with certain customers, mainly *baijiu* distilleries, which account for approximately 32.8% of our total revenues for the year ended December 31, 2016. Additionally, during the years ended December 31, 2014, 2015 and 2016, aggregate sales to our five largest customers represented 20.8%, 20.6% and 20.7% of our sales, respectively. If our relationships with our top customers terminate, or if our relationships with those customers with which we entered into sales contracts terminate, or if such customers decide not to abide by the sales agreements and fail to purchase our products thereunder, or if we are unable to renew the agreements for supply of our products with such customers in the future in a satisfactory manner, if at all, then we would be forced to identify and negotiate with new customers in order to replace the lost volume of sales. If we find ourselves having to replace these customers, this may require a diversion of resources and time of our senior management personnel as well as a short-term reduction in our revenues, or we may not be successful in identifying and negotiating with new customers at all, all of which would have a material adverse effect on our financial condition, our results of operations and prospects.

19

[Table of Contents](#)

Our business is capital intensive and our growth strategy may require additional capital, which may not be available on favorable terms or at all.

We may require additional cash resources due to changed business conditions, implementation of our strategy to expand our production capacity or potential investments or acquisitions we may pursue. We may need to sell debt securities or additional equity securities, or obtain additional credit facilities from banks in the PRC in order to implement our growth strategy or to otherwise meet our capital needs. The sale of additional equity securities could result in dilution of your holdings. The incurrence of indebtedness would result in increased debt service obligations and could require us to agree to operating and financial covenants that would restrict our operations. Financing may not be available in amounts or on terms acceptable to us, if at all. Any failure by us to raise additional funds on terms favorable to us, or at all, could limit our ability to expand our business operations and could harm our overall business prospects.

We may undertake acquisitions or invest in new products, which may distract our management, may not result in the benefits we had anticipated and may have unknown risks and liabilities associated with them.

Our growth strategy may involve acquisitions, the creation of strategic alliances in the edible alcohol production business and investments in new products. For example, in 2013 we have invested in and completed the construction of our new foam insulation and chlorinated polyethylene (“CPE”) manufacturing plant with an annual production capacity of 40,000 cubic meters of foam insulation products and 12,500 tons of CPE products. In 2014, we further expanded our investment in our CPE manufacturing plant through doubling our annual production capacity of CPE products to 25,000 tons. Any acquisition or an investment in new products could require that our management manage new business relationships, manage new facilities and attract new customers. Furthermore, significant attention from our management may be required, and the diversion of our management’s attention and resources could have a material adverse effect on our ability to manage our business. Future acquisitions or investments in new products may also expose us to potential risks, including risks associated with (1) the integration of new operations, services and personnel, (2) unforeseen or hidden liabilities, (3) the diversion of resources

from our existing businesses, (4) our inability to generate sufficient revenue to offset the costs of acquisitions or investments and (5) potential loss of, or harm to, relationships with employees or customers, any of which may have a material adverse effect on our ability to manage our business.

[Table of Contents](#)

We will continue to incur increased costs as a result of being a public company, which will adversely impact our results of operations.

We became a public company following the completion of our initial public offering in June 2010 and have incurred, and expect to continue to incur, significant legal, accounting and other expenses that we did not incur as a private company. Moreover, the Sarbanes-Oxley Act of 2002, the Dodd-Frank Wall Street Reform and Consumer Protection Act enacted in July 2010, as well as rules subsequently implemented by the U.S. Securities and Exchange Commission, or the SEC, and the New York Stock Exchange, or the NYSE, have imposed additional requirements on corporate governance practices of public companies. As we expected, these rules and regulations have increased our legal and financial compliance costs and have made some corporate activities more time-consuming and costly. For example, as a result of becoming a public company, we have added independent directors to our board and adopted policies regarding internal controls and disclosure controls and procedures. See also the risk factor entitled, “As a company incorporated in the Cayman Islands, we may adopt certain home country practices in relation to corporate governance matters. These practices may afford less protection to shareholders than they would enjoy if we complied fully with the NYSE corporate governance listing standards.”

In addition, we incur costs associated with our public company reporting requirements. It may also be difficult for us to attract and retain qualified persons to serve on our board of directors due to increased risks of liability to our directors under the rules and regulations. We are currently evaluating and monitoring developments with respect to these rules and regulations, and we cannot predict or estimate with any degree of certainty the amount or timing of additional costs we may incur.

Although our results of operations, cash flows and financial condition reflected in our consolidated financial statements include all of the expenses allocable to our business, because of the additional administrative and financial obligations associated with operating as a publicly traded company, they may not be indicative of the results of operations that we would have achieved had we operated as a public entity for all periods presented or of future results that we may achieve as a publicly traded company with our current holding company structure. Such variations may be material to our business.

[Table of Contents](#)

We may be exposed to potential risks relating to our internal control over financial reporting.

We are subject to the Sarbanes-Oxley Act of 2002. As directed by Section 404 of the Sarbanes-Oxley Act of 2002, the SEC adopted rules requiring public companies to include a report of management on our internal controls over financial reporting in their annual reports. In addition, if we become an accelerated filer or a large accelerated filer for purposes of a future annual report, we will be required to include in such annual report a report of our independent registered public accounting firm that attests to and reports on management’s assessment of the effectiveness of our internal controls over financial reporting as well as the operating effectiveness of our internal controls. Our management may conclude that our internal controls over our financial reporting are not effective. Even if our management concludes that our internal controls over financial reporting are effective, our independent registered public accounting firm may, if we are required to include an attestation report from them, still decline to attest to our management’s assessment or may issue a report that is qualified if it is not satisfied with our controls or the level at which our controls are documented, designed, operated or reviewed, or if it interprets the relevant requirements differently from us.

We can provide no assurance that we will continue to be in compliance with all of the requirements imposed by Section 404 or that we will, if required, receive a positive attestation from our independent auditors. In the event we identify significant deficiencies or material weaknesses in our internal controls that we cannot remediate in a timely manner or we are unable, if required, to receive a positive attestation from our independent auditors with respect to our internal controls, investors and others may lose confidence in the reliability of our financial statements. Any of these possible outcomes could result in an adverse reaction in the financial marketplace due to a loss of investor confidence in the reliability of our reporting processes, which could adversely affect the trading price of the ADSs.

Unauthorized use of our Borun wet process patent of invention by third parties and the expenses incurred in protecting such patent may adversely affect our business.

We regard our Borun wet process patent of invention and our “Borun” trademark as important to our business. In January 2012, the State Intellectual Property Office awarded a patent to us for the Borun wet process, our proprietary manufacturing method. We believe we are the only corn-based edible alcohol producer in China using the Borun wet process and the market recognizes our brand name products. Infringements of relevant intellectual property rights may reduce our revenues and harm our reputation. We rely on intellectual property laws and contractual arrangements with our key employees and certain of our customers and others to protect our intellectual property rights. Policing unauthorized use of intellectual property is difficult and expensive, as are the steps necessary to prevent the misappropriation or infringement of our technology or trademark. Despite our precautions, it may be possible for third parties to obtain and use our Borun wet process method without authorization or sell their products under our “Borun” trademark. The validity, enforceability and scope of protection of intellectual property in many industries in China are uncertain and still evolving and may not protect intellectual property rights to the same extent as do the laws and enforcement procedures in the United States. Moreover, we may not prevail in any litigation that we undertake to enforce our intellectual property rights, and such litigation could result in substantial costs and diversion of our management resources. Our failure to adequately maintain and protect our intellectual property rights could lead to the loss of a competitive advantage or otherwise impair our ability to operate our business.

[Table of Contents](#)

Our business, financial condition and results of operations, as well as our ability to obtain financing, may be adversely affected by a downturn in the global or Chinese economy.

The global financial markets have experienced significant disruptions since 2008 and the effect of the crisis has persisted through to 2014, and consequently, China's economy has also faced challenges. To the extent that there have been improvements in some areas, it is uncertain whether such recovery is sustainable. The corn-based edible alcohol industry may be sensitive to economic downturns, and the macroeconomic environment in China may affect our business and prospects. A prolonged slowdown in China's economy may lead to a reduced level of corn-based edible alcohol purchases which could materially and adversely affect our business, financial condition and results of operations.

Moreover, a slowdown in the global or China's economy or the recurrence of any financial disruptions may have a material and adverse impact on financing available to us. The weakness in the economy could erode investors' confidence, which constitutes the basis of the credit markets. The recent financial turmoil affecting the financial markets and banking system may significantly restrict our ability to obtain financing in the capital markets or from financial institutions on commercially reasonable terms, or at all. Although we are uncertain about the extent to which the recent global financial and economic crisis and slowdown of China's economy may impact our business in the short term and long term, there is a risk that our business, results of operations and prospects will be materially and adversely affected by any ongoing global economic downturn or slowdown in China's economy.

We are dependent upon our existing management, and our business may be severely disrupted if we lose their services.

Our future performance depends substantially on the continued services of our executive officers, most notably our Chief Executive Officer ("CEO"), Mr. Jinmiao Wang ("Mr. Wang"). If one or more of our executive officers are unable or unwilling to continue in their present positions, we might not be able to replace them easily or at all. In addition, we do not have any key person insurance on the lives of such individuals and the loss of any of their services could materially and adversely affect us.

[Table of Contents](#)

If any of our executive officers joins a competitor or forms a competing company, we may lose know-how, key professionals and staff members as well as customers. These executive officers could develop products that could compete with and take market share away from us. Each of our executive officers has entered into an employment agreement with us, each of which contain non-competition provisions. However, if any dispute arises between our executive officers and us, these non-competition provisions may not be enforceable in China. If any of the foregoing were to happen, our competitive position and business prospects may be materially and adversely affected.

One of our shareholders has significant control over the outcome of our shareholder votes.

One shareholder, King River Holding Limited, or King River, beneficially owns 55.6% of our outstanding equity interests as of the date of this annual report. Accordingly, King River has significant control over the outcome of any corporate transaction or other matter submitted to our shareholders for approval, including the election of directors, mergers, consolidations and the sale of all or substantially all of our assets. This concentration of ownership in our ordinary shares by King River will limit your ability to influence corporate matters and may have the effect of delaying or preventing a third party from acquiring control over us.

Covenants and other restrictions in certain PRC loan agreements or bond indenture entered into by Shandong Borun Industrial Co., Ltd, or Shandong Borun, or Daqing Borun restrict our ability to engage in or enter into a variety of transactions, which may cause disruption in our business operations and have a material adverse effect on our business operations.

Shandong Borun and Daqing Borun have entered into PRC loan agreements with banks in the PRC which contain various covenants that may limit our discretion in operating the business of our operating subsidiaries.

Our lenders have rights that include the following:

- restricting us from using the loan proceeds for a purpose other than the one stated in the agreement;
- restricting us during the term of the loan from undertaking any shareholding change or restructuring without obtaining prior approval of the lender;
- restricting us from undertaking mergers and acquisitions or any other joint venture arrangement without prior approval of the lender;
- restricting us from undertaking withdraw of capital, asset transfer, or equity transfer;
- restricting us from undertaking major investment, asset transfer, leasing, pledging or mortgaging its assets without obtaining prior approval of the lender; and

The loan agreements contain the following financial covenants (as the case may be):

- at any time during the loan period, debt to asset ratio of Daqing Borun shall not be higher than 70%, the current ratio shall be less than 0.8 and contingent liabilities shall not exceed 50% of its total net assets and accumulated long-term investment shall not exceed 30% of its net assets; or
- debt-to-asset ratio of Shandong Borun shall not be higher than 70%; contingent liabilities of Shandong Borun shall not exceed 50% of its total net assets; and net operating cash flow shall not be negative for three consecutive years.

We obtained short-term bank loans totaling RMB250,000,000 (\$36,038,633) from China Construction Bank which were secured by pledges of equipment, buildings and land owned by Daqing Borun and guarantees by Shandong Borun, our CEO, Mr. Wang and three of his family members.

We obtained a short-term loan of RMB49,000,000 (\$7,063,572) from Daqing Rural Commercial Bank, which was guaranteed by a third party guarantor. Pursuant to the guarantee agreement we pledged certain of Daqing Borun's property, plant and equipment to the third party guarantor.

We also obtained a short-term loan of RMB51,000,000 (\$7,351,881) from Longjiang Bank, which was guaranteed by a third party guarantor, our CEO and one of his family member. Pursuant to the guarantee agreement we pledged certain of Daqing Borun's property, plant and equipment to the third party guarantor.

These restrictions on our business may cause disruption in our business operations. Our lenders may restrict us from disposing of or restructuring the ownership of our operation facilities and limit our ability to undertake any acquisition or major investment. If we should fail to obtain their approval for any such transaction, we must give timely notice of the transaction. However, the lender may still have the right to rescind the loan which may materially and adversely affect our future prospects and results of operations.

Shandong Borun issued bonds through private placements on November 2, 2016 with a principal amount of RMB300.0 million (\$43.2 million), which were registered with the Shanghai Stock Exchange (the "2016 Bonds"). The proceeds from the issuance of the 2016 Bonds were used for the Company's working capital and capital expenditures. The Bonds were issued at face value of RMB100 (\$14) each, bear a fixed annual interest rate of 6.5%, with maturity on November 2, 2021, RMB 100.0 million (\$14.4 million) should be repaid at the end of each of the third, fourth and fifth year life of the 2016 Bonds.

Our operating results for a particular period could fall below our expectations or the expectations of investors or research analysts, resulting in a decrease in the price of our ADSs.

Our operating results may vary significantly from period to period as a result of factors beyond our control, such as the recent slowdown in China's economic growth caused in part by the prolonged global crisis in the financial services and credit markets, and may be difficult to predict for any given period. Our past results may not be indicative of our future performance. If our operating results for any period fall below our expectations or the expectations of investors or research analysts, the price of our ADSs is likely to decrease.

[Table of Contents](#)

As a company incorporated in the Cayman Islands, we may adopt certain home country practices in relation to corporate governance matters. These practices may afford less protection to shareholders than they would enjoy if we complied fully with the NYSE corporate governance listing standards.

As a non-U.S. company with shares listed on the NYSE, we are subject to the NYSE corporate governance listing standards. However, in reliance on Section 303A.00 of the NYSE Listed Company Manual, which permits a foreign private issuer to follow the corporate governance practices of its home country, we may adopt certain corporate governance practices that differ significantly from the NYSE corporate governance listing standards. For example, we may include non-independent directors as members of our compensation committee and nominating and corporate governance committee, and our independent directors may not hold regularly scheduled meetings at which only independent directors are present. Such home country practice differs from the NYSE corporate governance listing standards, because there are no specific provisions under the Companies Law of the Cayman Islands imposing such requirements. Accordingly, executive directors, who may also be our major shareholders or representatives of our major shareholders, may have greater power to make or influence major decisions than they would if we complied with all the NYSE corporate governance listing standards. While we may adopt certain practices that are in compliance with the laws of the Cayman Islands, such practices may differ from more stringent requirements imposed by the NYSE Listed Company Manual and as such, our shareholders may be afforded less protection under Cayman Islands law than they would under the NYSE rules applicable to U.S. domestic issuers.

As a foreign private issuer we are exempt under the United States Securities Exchange Act of 1934, as amended, or the Exchange Act, from providing certain disclosure. As a result our shareholders may be afforded less protection than they would enjoy if we were a U.S. company.

As a foreign private issuer, we are exempt under the Exchange Act from, among other things, the rules prescribing the furnishing and content of proxy statements. In addition, our executive officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. Further, we are not required under the Exchange Act to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act. As a result, our shareholders may be afforded less protection than they would under the Exchange Act rules applicable to U.S. domestic issuers.

RISKS RELATED TO OPERATING IN CHINA

All of our assets are located in China and all of our revenues are derived from our operations in China. Accordingly, our business, financial condition, results of operations and prospects are subject to economic, political and legal developments in China generally and by continued economic growth in China as a whole.

[Table of Contents](#)

The PRC government exerts substantial influence over the manner in which we must conduct our business activities.

After decades of centralized control, China only recently has permitted provincial and local economic autonomy and private economic activities and, as a result, we are dependent on our relationship with the local government in the provinces in which we operate our business. The PRC government has exercised and continues to exercise substantial control over virtually every sector of the Chinese economy through regulation and state ownership. It also exercises significant control over China's economic growth through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies. These actions, as well as future actions and policies of the PRC government, could materially affect general economic conditions in China and our business and operations.

Our ability to operate in China may be harmed by changes in its laws and regulations, including those relating to taxation, production permits, import and export tariffs, environmental regulations, land use rights, property and other matters. Except as otherwise disclosed in this annual report, we believe our operations in China are in material compliance with all applicable legal and regulatory requirements. However, the central or local governments of these jurisdictions may impose new, stricter regulations or interpretations of existing regulations that would require additional expenditures and efforts on our part to ensure our compliance with such regulations or interpretations. Accordingly, government actions in the future, including any decision not to continue to support recent economic reforms and to return to a more centrally planned economy or regional or local variations in the implementation of economic policies, could have a significant effect on economic conditions in China or particular regions thereof, and could require us to divest ourselves of any interest we then hold in Chinese properties. In addition, the PRC government continues to play a significant role in regulating industry developments by imposing industrial policies, any of which could adversely impact our business.

Adverse changes in PRC economic and political policies could have a material adverse effect on the overall economic growth of China, which could reduce the demand for our products and materially and adversely affect our business.

Our operating business is based in China and all of our sales are made in China. As such, our business, financial condition, results of operations and prospects are affected significantly by economic, political and legal developments in China generally and by continued economic growth in China as a whole. The Chinese economy differs from the economies of most developed countries in many aspects, including the:

- level of government involvement;
- level of development;
- growth rate;
- level and control of capital investment;
- control of foreign exchange; and
- allocation of resources.

[Table of Contents](#)

While the Chinese economy has grown significantly in the past three decades, the growth has been uneven geographically, among various sectors of the economy and during different periods. We cannot assure you that the Chinese economy will continue to grow or to do so at the pace that has prevailed in recent years, or that if there is growth, such growth will be steady and uniform. In addition, if there is a slowdown, such slowdown could have a negative effect on our business. In 2010, the People's Bank of China ("PBOC") increased the statutory reserve ratio and interest rate in response to rapid domestic growth. However, the PBOC began to decrease the statutory reserve ratio since November 2011 and the interest rate since June 2012, and the continuation of such decreases may have a negative impact on the stability of China's economy. It is uncertain whether the PRC economic policies will be effective in sustaining stable economic growth in the future.

Although the Chinese economy has been transitioning from a planned economy to a more market-oriented economy, a substantial portion of the productive assets in China are still owned by the PRC government. The continued control of these assets and other aspects of the national economy by the PRC government could materially and adversely affect our business. The PRC government also exercises significant control over Chinese economic growth through allocating resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies. Any adverse change in the economic conditions or government policies in China could have a material adverse effect on the overall economic growth and the level of investments and expenditures in China, which in turn could lead to a reduction in demand for our products and consequently have a material adverse effect on our business.

[Table of Contents](#)

We may become subject to PRC taxation on our worldwide income, which could result in a material adverse effect on our financial results and might result in you becoming subject to withholding taxes on any dividends we may declare.

The PRC Enterprise Income Tax Law and Regulation on the Implementation of the Enterprise Income Tax Law of the PRC (which we collectively refer to as the "EIT Law") provides that enterprises established outside of China whose "de facto management bodies" are located in China are considered "resident enterprises" and are generally subject to the uniform 25% enterprise income tax rate as to their worldwide income. Currently, there are no further detailed rules or precedents applicable to us governing the procedures and specific criteria for determining "de facto management bodies" for companies like ours, uncertainty exists regarding the interpretation and implementation of the EIT Law, and as a result it is uncertain whether we will be deemed to be a PRC resident enterprise. Therefore, although substantially all of our operational management is currently based in the PRC, it is unclear whether PRC tax authorities would require (or permit) us to be treated as a PRC resident enterprise. Under the EIT Law, PRC income tax at the rate of 10% is applicable to dividends payable to investors that are "non-resident enterprises," which do not have an establishment or place of business in the PRC, or which have such establishment or place of business but the relevant income is not effectively connected with the establishment or place of business, to the extent such dividends have their sources within the PRC. Similarly, any gain realized on the transfer of shares (including ADSs) by such investors is also subject to 10% PRC income tax if such gain is regarded as income derived from sources within the PRC. If we are considered a PRC "resident enterprise," dividends we pay with respect to our ADSs, or the gain you may realize from the transfer of our ordinary shares or ADSs, may be treated as income derived from sources within the PRC and may be subject to PRC tax. It is also unclear whether, if we are considered a PRC "resident enterprise," holders of our ordinary shares or ADSs might be able to claim the benefit of income tax treaties entered into between China and other countries, including the United States. "Item 10.E. Additional Information — Taxation — People's Republic of China Taxation"

Uncertainties with respect to the Chinese legal system could have a material adverse effect on us.

We conduct substantially all of our operations through companies established in the PRC. Our principal operating subsidiaries located in China are generally subject to laws and regulations applicable to foreign investment in China. The PRC legal system is based on written statutes and their interpretation by the Supreme People's Court. Prior court decisions may be cited for reference but have limited precedential value. Since 1979, PRC legislation and regulations have significantly enhanced the protections afforded to various forms of foreign investments in China. However, since these laws and regulations are relatively new and the PRC legal system continues to rapidly evolve, the interpretations of many laws, regulations and rules are not always uniform and enforcement of these laws, regulations and rules involves uncertainties. We cannot predict the effect of future developments in the PRC legal system, including the promulgation of new laws, changes to existing laws or the interpretation or enforcement thereof, the preemption of local regulations by national laws, or the overturn of local government's decisions by the higher level government. Furthermore, the PRC legal system is based in part on government policies and internal rules, some of which are not published on a timely basis or at all and may have retroactive effect. As a result, we may not be aware of our violation of any of these policies and rules until sometime after the violation. In addition, any administrative and court proceedings in China may be protracted, resulting in substantial costs and diversion of resources and management attention.

[Table of Contents](#)

Fluctuations in the value of RMB will affect the amount of the value of, and dividends payable on, our ADSs in foreign currency terms.

The value of RMB depends, to a large extent, on China's domestic and international economic, financial and political developments and government policies, as well as the currency's supply and demand in the local and international markets. For over 10 years from 1994, the conversion of RMB into foreign currencies, including the U.S. dollar, was based on exchange rates set and published daily by the PBOC in light of the previous day's inter-bank foreign exchange market rates in China and the then current exchange rates on the global financial markets. The official exchange rate for the conversion of RMB into the U.S. dollar was largely stable until July 2005. On July 21, 2005, the PBOC revalued RMB by reference to a basket of foreign currencies, including the U.S. dollar, the floating range of the trading prices of the US Dollar against the RMB in the inter-bank spot foreign exchange market expanded from 0.3% to 0.5%. As a result, the value of RMB appreciated by 2% on that day. The PBOC allowed the official RMB exchange rate to float against a basket of foreign currencies, and the RMB has further appreciated significantly against the U.S. dollar. In April 2012, the PBOC issued an Announcement that the floating range of the trading price of the RMB against the U.S. dollar on the inter-bank spot foreign exchange market expanded from 0.5% to 1%. Between July 2008 and June 2010, this appreciation halted and the exchange rate between the Renminbi and the U.S. dollar remained within a narrow band. Since June 2010, the Renminbi appreciate slowly against the U.S. dollar again. Between August 2015 and January 2016, Renminbi depreciated over 7% against the U.S. dollar. It is difficult to predict how market forces or PRC or U.S. government policy may impact the exchange rate between the Renminbi and the U.S. dollar in the future.

All of our net revenues and most of our expenses are denominated in Renminbi. Any significant revaluation of Renminbi may materially and adversely affect our revenues, earnings and financial position, and the value of, and any dividends payable on, our ADSs in U.S. dollars. For example, an appreciation of Renminbi against the U.S. dollar would reduce the amount of Renminbi we would receive if we need to convert U.S. dollars into Renminbi. Conversely, a significant depreciation of the Renminbi against the U.S. dollar may significantly reduce the U.S. dollar equivalent of our earnings, which in turn could adversely affect the price of our ADSs.

Limited hedging transactions are available in China to reduce our exposure to exchange rate fluctuations. We did not enter into any hedging transactions to hedge our exposure to the risks relating to fluctuations in exchange rates. While we may decide to enter into hedging transactions in the future, the availability and effectiveness of these hedges may be limited, and we may not be able to successfully hedge our exposure at all. In addition, our currency exchange losses may be magnified by PRC exchange control regulations that restrict our ability to convert Renminbi into foreign currency.

[Table of Contents](#)

PRC regulations relating to offshore investment activities by PRC residents may increase the administrative burden we face and may subject our PRC resident beneficial owners to personal liabilities, limit or eliminate our PRC subsidiaries' ability to distribute profits to us, limit our ability to inject capital into our PRC subsidiaries, require changes in our ownership structure, or may otherwise expose us to liability under PRC law.

In October 2005, the PRC State Administration of Foreign Exchange, or SAFE, issued the "Notice on Relevant Issues Concerning Foreign Exchange Administration on Financing and Round-Trip Investment through offshore Special Purpose Vehicles by Domestic Residents," generally referred to as Circular 75, effective as of November 1, 2005. The policy announced in this notice and its implementation rules requires PRC residents to register with the relevant SAFE branch before establishing or controlling offshore special purpose vehicles, or SPVs, for the purpose of engaging in an equity financing outside of China on the strength of domestic PRC assets originally held by those residents. On 4 July 2014, the SAFE promulgated the Circular on Relevant Issues Concerning Foreign Exchange Administration of Overseas Investment and Financing and Round-Trip Investments Conducted by Domestic Residents Through Overseas Special Purpose Vehicles, or the SAFE Circular No. 37, which became effective and superseded the Circular 75 on the same date. Pursuant to Circular No. 37, (a) a PRC resident must register with the local SAFE branch before he or she contributes assets or equity interests in an overseas special purpose vehicle, that is directly established or controlled by the PRC resident for the purpose of conducting investment or financing; and (b) following the initial registration, the PRC resident is also required to register with the local SAFE branch for any major change, in respect of the SPV, including, among other things, a change of the SPV's PRC resident shareholder(s), name of the SPV, term of operation, or any increase or reduction of the SPV's registered capital, share transfer or swap, and merger or division. Failure to comply with the requirements of the above mentioned SAFE regulations may result in fines and other penalties under PRC laws for evasion of applicable foreign exchange restrictions. Any such failure could also result in the SPV's PRC affiliates being impeded or prevented from distributing their profits and the proceeds from any reduction in capital, share transfer or liquidation to such SPV.

We understand that none of our shareholders prior to our initial public offering was a PRC citizen. Our PRC counsel for our initial public offering had advised that none of these shareholders was subject to the requirement of the SAFE registration under Circular 75.

However, due to the vagueness and uncertainty as to how the SAFE regulations are interpreted and implemented and the possible amendments or changes to the SAFE regulations, we cannot provide any assurance that our shareholders who may spend a certain amount of their time in the PRC each year will not be required to make or obtain any applicable registrations pursuant to the SAFE regulations.

The failure or inability to comply with the registration procedures set forth therein may subject these shareholders to fines or legal sanctions, restrict our overseas or cross-border investment activities, limit or eliminate our PRC subsidiaries' ability to make distributions or pay dividends or require changes to our ownership structure, all of which could adversely affect our business and prospects and prevent you from receiving any dividends on your ADSs.

Furthermore, as these foreign exchange regulations are still relatively new and their interpretation and implementation has been constantly evolving, it is unclear how these regulations, and any future regulation concerning offshore or cross-border transactions, will be interpreted, amended and implemented by the relevant government authorities. For example, we may be subject to a more stringent review and approval process with respect to our foreign exchange activities, such as remittance of dividends and foreign- currency- denominated borrowings, which may adversely affect our financial condition and results of operations. In addition, if we decide to acquire a PRC domestic company, we cannot assure you that we or the owners of such company, as the case may be, will be able to obtain the necessary approvals or complete the necessary filings and registrations required by the foreign exchange regulations. This may restrict our ability to implement our acquisition strategy and could adversely affect our business and prospects.

[Table of Contents](#)

We may face regulatory uncertainties that could restrict our ability to issue equity compensation to our directors and employees and other parties who are PRC citizens or residents under PRC law.

In December 2006, the PBOC promulgated the Administrative Measures of Foreign Exchange Matters for Individuals, which set forth the respective requirements for foreign exchange transactions by individuals (both PRC or non-PRC citizens) under either the current account or the capital account. In January 2007, SAFE issued implementing rules for the Administrative Measures of Foreign Exchange Matters for Individuals, which, among other things, specified approval requirements for certain capital account transactions such as a PRC citizen's participation in the employee stock ownership plans or stock option plans of an overseas publicly-listed company. On February 15, 2012, SAFE issued the "Circular on the Foreign Exchange Administration of the Involvement of Domestic Individuals in the Share Incentive Plan of Overseas Listed Companies", also known as "Circular 7."

Pursuant to Circular 7, PRC citizens who participate in the share incentive plan of an overseas listed company are required, through a PRC subsidiary of such overseas listed company or other qualified PRC traders designated lawfully by the PRC subsidiary, to register with SAFE or its local branches and complete certain other procedures related to the share incentive plan. In addition, the PRC subsidiary or other qualified PRC agent is required to open foreign currency accounts to handle transactions relating to the share incentive plan. We may adopt an equity compensation plan after this annual report and may make option grants to some of our directors and senior officers, most of whom are PRC citizens. We believe the registration and approval requirements contemplated in Circular 7 will be burdensome and time-consuming. If it is determined that any of our equity compensation plans fail to comply with such provisions, this may subject us and recipients of such options to fines and legal sanctions and prevent us from being able to grant equity compensation to our PRC employees. In that case, our ability to compensate our employees and directors through equity compensation would be hindered and our business operations may be adversely affected.

We have limited business insurance coverage in China.

The insurance industry in China is still at an early stage of development. Insurance companies in China offer limited insurance products. As of December 31, 2016, we carried up to RMB2,065.0 million (\$297.7 million) of insurance coverage, which includes coverage for certain of our property, plant and equipment and inventory and for employee injury. We do not have insurance coverage on our other assets and we do not have insurance to cover our business or interruption of our business, litigation or product liability. We have determined that the costs of insuring for these risks and the difficulties associated with acquiring such insurance on commercially reasonable terms make it impractical for us to have such insurance. Any uninsured occurrence of loss or damage to property, litigation or business disruption may result in our incurring substantial costs and the diversion of resources, which could have an adverse effect on our operating results and financial condition.

Restrictions on currency exchange may limit our ability to utilize our revenues effectively.

The PRC government imposes controls on the convertibility of the Renminbi into foreign currencies and, in certain cases, the remittance of currency out of China. Substantially all of our revenues and operating expenses are denominated in Renminbi. The Renminbi is currently freely convertible under the "current account," which includes, among others, dividends, trade and service- related foreign exchange transactions, but not under the "capital account," which includes, among others, foreign direct investment and loans.

[Table of Contents](#)

Currently, Shandong Borun may purchase foreign exchange for settlement of "current account transactions," including payment of dividends to us. Shandong Borun may also retain foreign exchange in its current account, subject to a ceiling approved by SAFE or its local branches, to satisfy foreign exchange liabilities or to pay dividends. However, we cannot assure you that the relevant PRC governmental authorities will not limit or eliminate our ability to purchase and retain foreign currencies in the future.

Since a significant amount of our future revenues will be denominated in Renminbi, the existing and any future restrictions on currency exchange may limit our ability to utilize revenues generated in Renminbi to fund our business activities outside China, if any, or expenditures denominated in foreign currencies.

Foreign exchange transactions under the capital account are subject to limitations and require registration with or approval by the relevant PRC governmental authorities. In particular, if we finance our Chinese subsidiaries by means of foreign currency loans, those loans cannot exceed certain statutory limits and must be registered with SAFE or its local branches and, if we finance our Chinese subsidiaries by means of capital contributions, those capital contributions must be submitted for record-filing to the Ministry of Commerce or its local branches. Our ability to use the U.S. dollar proceeds of future financings to finance our business activities conducted through our Chinese subsidiaries will depend on our ability to obtain these governmental registrations or approvals. In addition, because of the regulatory issues related to foreign currency loans to, and foreign investment in, domestic PRC enterprises, we may not be able to finance our Chinese subsidiaries' operations by loans or capital contributions. We cannot assure you that we can obtain these governmental registrations or approvals on a timely basis, if at all.

The application of PRC regulations relating to the overseas listing of PRC domestic companies is uncertain, and we may be subject to penalties for failing to obtain approval of the PRC authorities prior to listing our ADSs in the United States.

On August 8, 2006, six PRC government agencies, namely, the Ministry of Commerce, or MOFCOM, the State-Owned Assets Supervision and Administration Commission, or SASAC, the State Administration of Taxation, or SAT, the State Administration for Industry and Commerce, or SAIC, the China Securities Regulatory Commission, or CSRC, and SAFE jointly issued the Regulations on Mergers and Acquisitions of Domestic Enterprises by Foreign Investors (the “M&A Rules”), which became effective on September 8, 2006 and was amended on June 22, 2009. The M&A Rules purport, among other things, to require offshore special purpose vehicles, or SPVs, that are (i) formed for the purpose of overseas listing of the equity interests of PRC companies via acquisition and (ii) are controlled directly or indirectly by PRC companies and/or PRC individuals, to obtain the approval of the CSRC prior to the listing and trading of their securities on overseas stock exchanges. On September 21, 2006, pursuant to the M&A Rules and other PRC laws, the CSRC published on its official website relevant guidance with respect to the listing and trading of PRC domestic enterprises’ securities on overseas stock exchanges (the “Related Clarifications”), including a list of application materials regarding the listing on overseas stock exchange by SPVs. Based on our understanding of current PRC laws and as advised by our PRC counsel for our initial public offering, we were and are not required to obtain the approval of CSRC under the M&A Rules in connection with our initial public offering due to the fact that (1) we were and are not an SPV and (2) the acquisitions among China High Enterprises Limited, or China High, WGC and Shandong Borun were subject to the PRC laws, regulations, rules and circulars related to foreign investment enterprises such as “Interim Provisions on Domestic Investments by Foreign Investment Enterprises” and “Provisions for the Alteration of Investors’ Equities in Foreign-funded Enterprises” instead of the New M&A Rules.

[Table of Contents](#)

However, there are substantial uncertainties regarding the interpretation, application and enforcement of these rules, and CSRC has yet to promulgate any written provisions or formally to declare or state whether the overseas listing of a PRC-related company structured similar to ours is subject to the approval of CSRC. Any violation of these rules could result in fines and other penalties on our operations in China, restrictions or limitations on remitting dividends outside of China, and other forms of sanctions that may cause a material and adverse effect to our business, operations and financial condition.

Compliance with certain PRC regulations with respect to acquisitions may be time-consuming, and any failure of which may result in our inability to undertake acquisitions and grow our business.

The M&A Rules also established additional procedures and requirements that are expected to make merger and acquisition activities by foreign investors more time-consuming and complex, including requirements in some instances that the Ministry of Commerce be notified in advance of any change-of-control transaction in which a foreign investor takes control of a PRC domestic enterprise that owns well-known trademarks or China’s traditional brands. In addition, Notice of the General Office of the State Council on the Establishment of the Security Review System for Mergers and Acquisitions of Domestic Enterprises by Foreign Investors and Provisions of the Ministry of Commerce on the Implementation of the Security Review System for Mergers and Acquisitions of Domestic Enterprises by Foreign Investors which respectively became effective on March 4, 2011 and September 1, 2011 require acquisitions by foreign investors of PRC companies engaged in military related industries or certain other industries that are crucial to national security and that the actual control right may be obtained by foreign investors be subject to security review before consummation of any such acquisition. We may grow our business in part by acquiring other businesses. Complying with the requirements of the M&A Rules and security review in completing these acquisitions could be time-consuming, and any required approval processes, including approval from CSRC, MOFCOM, State Administration of Foreign Exchange or SAT, may delay or inhibit our ability to complete such transactions, which could affect our ability to expand our business or maintain our market share.

Under the EIT Law, we may be classified as a PRC “resident enterprise,” which could result in unfavorable tax consequences to us and our shareholders and have a material adverse effect on our results of operations and the value of your investment.

Under the EIT Law, an enterprise established outside the PRC with “de facto management bodies” within the PRC should be considered a “PRC resident enterprise” and is generally subject to a uniform 25% enterprise income tax rate on its worldwide income. Under the implementation regulations to the EIT Law, a “de facto management body” is defined as a body that has material and overall management and control over the manufacturing and business operations, personnel and human resources, finances and properties of an enterprise. In addition, a circular issued by the State Administration of Taxation on April 22, 2009 known as Circular 82 sets out the standards and procedures for recognizing the location of the “effective management” of an enterprise registered outside of the PRC and funded by Chinese enterprises as controlling investors. This circular specifies that an offshore incorporated enterprise controlled by a PRC enterprise or a PRC enterprise group will be regarded as a PRC tax resident by virtue of having its “de facto management body” in China and will be subject to PRC enterprise income tax on its global income only if all of the following conditions are met: (i) the places where senior management and senior management departments that are responsible for daily production, operation and management of the enterprise perform their duties are mainly located within the territory of the PRC; (ii) decisions relating to the enterprise’s financial and human resource matters are made or are subject to approval by organizations or personnel located within the PRC; (iii) the enterprise’s primary assets, accounting books and records, company seals, and the files of the minutes of the board of directors and shareholders’ meetings, are located or maintained in the PRC; and (iv) at least 50% of voting board members or senior executives habitually reside in the PRC.

[Table of Contents](#)

Given that our Cayman holding company is incorporated and controlled by non-PRC citizens instead of PRC enterprises or PRC enterprise groups, it is unclear whether Circular 82 applies to us, and we are not aware of any clear guidance regarding the criteria pursuant to which the PRC tax authorities will determine the tax residency of an overseas company controlled by non-PRC citizens under the applicable PRC laws and regulations. Furthermore, we are not aware of any offshore holding company with a corporate structure similar to ours ever having been deemed a PRC resident enterprise by the PRC tax authorities. However, as the tax resident status of an enterprise is subject to determination by the PRC tax authorities, our subsidiaries all operate in the PRC and uncertainties remain with respect to the interpretation of the term “de facto management body” as applicable to our offshore entity, we may be considered a resident enterprise and may therefore be subject to the enterprise income tax at 25% on our global income. If we earn income outside of the PRC, the imposition of a tax on our global income could raise our effective tax rate and have a material adverse effect on our results of operations.

If we are classified as a PRC resident enterprise, dividends we pay to non-PRC resident enterprise shareholders will be subject to PRC withholding tax, and while our holding company is incorporated in the Cayman Islands, we expect that we would deduct the appropriate withholding taxes from any dividend that we paid. Further, foreign ADS holders may be subject to PRC tax on gains realized on the sale or other disposition of ADSs or ordinary shares, if such income is regarded as income sourced from within the PRC. Any such tax may reduce the returns on your investment in our ADSs. Although our company is incorporated in the Cayman Islands, it remains unclear whether gains realized by our foreign ADS holders will be regarded as income from sources within the PRC if we are classified as a PRC resident enterprise, and it is unclear whether our non-PRC shareholders would be able to claim the benefits of any tax treaties between their tax residence and the PRC in the event that we are treated as a PRC resident enterprise.

Substantial uncertainties exist with respect to the enactment timetable, interpretation and implementation of the draft PRC Foreign Investment Law and how it may impact the viability of our current corporate structure, corporate governance and business operations.

In January 2015, MOFCOM published a draft of the proposed Foreign Investment Law, or Draft FIL. If enacted, the Draft FIL would replace the major existing laws regulating foreign investment in China, such as the Law of the PRC on Sino-Foreign Equity Joint Ventures, the Law of the PRC on Sino-Foreign Contractual Joint Ventures, and the Law of the PRC on Wholly Foreign-Owned Enterprises, and harmonize the regulations governing both foreign invested enterprises and PRC domestic entities. According to the definition set forth in the draft Foreign Investment Law, FIEs refer to enterprises established in China pursuant to PRC law that are solely or partially invested by foreign investors. Once an entity falls within the definition of FIE, it may be subject to foreign investment “restrictions” or “prohibitions” set forth in a “negative list” to be separately issued by the State Council later. Such FIEs will be subject to entry clearance and other approvals that are not required for PRC domestic entities, unless, such foreign investors can demonstrate that the ultimate controlling person(s) is/are of PRC nationality (either a PRC citizen, or the PRC government and/or its branches or agencies). Because the negative list has yet to be published, it is unclear whether it will differ from the current list of industries subject to restrictions or prohibitions on foreign investment.

There is substantial uncertainty regarding the Draft FIL, including, the content of its final form and the timing of its adoption and implementation. If the enacted version of the Foreign Investment Law and the final “negative list” mandate further actions, such as MOFCOM market entry clearance, to be completed by companies with non-PRC shareholders like us, we face uncertainties as to whether such clearance can be timely obtained, or at all. The draft Foreign Investment Law, if enacted as proposed, may materially impact the viability of our current corporate structure, corporate governance and business operations in many aspects.

The draft Foreign Investment Law, if enacted as proposed, may also materially impact our corporate governance practice and increase our compliance costs. For instance, the draft Foreign Investment Law imposes stringent and periodic information reporting requirements on foreign investors and the applicable FIEs. Aside from investment implementation report and investment amendment report that are required at each investment and alteration of investment specifics, an annual report is mandatory, and large foreign investors meeting certain criteria are required to report on a quarterly basis. Any company found to be non-compliant with these information reporting obligations may potentially be subject to fines and/or administrative or criminal liabilities, and the persons directly responsible may be subject to criminal liabilities.

We rely on dividends and other distributions on equity paid by our subsidiaries for our cash needs.

We are a holding company organized under the laws of the Cayman Islands, and we conduct all of our operations through our operating subsidiaries in the PRC. We rely on dividends and other distributions on equity paid by our PRC subsidiaries for our cash needs, including the funds necessary to pay dividends and other cash distributions to our shareholders, to serve any debt we may incur and to pay our operating expenses. Current regulations in the PRC such as the Wholly-Foreign Owned Enterprise Law (1986), as amended, and the Wholly-Foreign Owned Enterprise Law Implementing Rules (1990), as amended and the Company Law of the PRC (1993), as amended, permit payment of dividends only out of accumulated profits as determined in accordance with PRC accounting standards and regulations. According to the laws mentioned above and the articles of association of our PRC subsidiaries, each of our PRC subsidiaries is required to set aside at least 10% of its after-tax profit based on the PRC accounting standards and regulations each year to its statutory reserve, until the balance in the reserve reaches 50% of the registered capital of the company. Funds in the reserve are not distributable to us in forms of cash dividends, loans or advances. In addition, if our PRC subsidiaries incur debt on their own behalf in the future, the instruments governing the debt may restrict their ability to pay dividends or make other distributions to us, which in turn will adversely affect our available cash.

[Table of Contents](#)

Dividends payable by us to our non-PRC resident shareholders may become subject to taxes under PRC tax laws.

The New Income Tax Law and the Regulation on the Implementation of the Enterprise Income Tax Law of the PRC provide that (1) if the enterprise that distributes the dividends is domiciled in the PRC, or (2) if capital gains are realized from the transfer of equity interests of enterprises domiciled in the PRC, then such dividends or capital gains are treated as PRC-sourced income, and PRC income tax at the rate of up to 10% is applicable to such dividends or capital gains payable to overseas investors that are “non-resident enterprises.” If we are considered a PRC-resident enterprise for tax purposes, any dividends distributed by us to our non-PRC resident enterprises shareholders as well as gains realized by such shareholders from the transfer of our shares may be regarded as China-sourced income and, as a result, may be subject to PRC withholding tax at the rate of up to 10%, depending on the provisions of any tax treaty between the PRC and the jurisdiction in which the non-PRC resident enterprises shareholder resides. It is unclear whether, if we are considered a PRC resident enterprise, holders of our ADSs or ordinary shares would be able to claim the benefit of income tax treaties or agreements entered into between China and other countries or areas (although we do not expect to withhold at treaty rates if any withholding is required).

It is uncertain as to how the aforementioned laws and regulations will be implemented by the relevant PRC tax authorities. If our dividend payments to our non-PRC resident shareholders are subject to PRC withholding tax, it may materially and adversely affect our shareholders’ return on and value of investment in our ADSs.

We face uncertainty from the Circular on Strengthening the Administration of Enterprise Income Tax on Non-resident Enterprises’ Share Transfer (“Circular 698”) released in December 2009 by SAT with retroactive effect from January 1, 2008 and Announcement on Several Issues concerning the Enterprise Income Tax on the Indirect Transfers of Properties by Non-Resident Enterprises released in February 2015 by SAT.

Pursuant to Article 5 and Article 6 of the Notice on Strengthening Administration of Enterprise Income Tax for Share Transfers by Non-PRC Resident Enterprises issued by SAT on December 10, 2009, or SAT Circular 698, where a non-resident enterprise transfers the equity interests of a PRC resident enterprise indirectly via disposing of the equity interests of an overseas holding company (referred to as an Indirect Transfer) and such overseas holding company is located in a tax jurisdiction that: (i) has an effective tax rate less than 12.5% or (ii) does not tax foreign income of its residents, the foreign

investor shall report to the competent tax authority of the PRC resident enterprise this Indirect Transfer. The PRC tax authority will examine the true nature of the Indirect Transfer and, if the tax authority considers that the foreign investor has adopted an abusive arrangement in order to avoid PRC tax, they will disregard the existence of the overseas holding company and re-characterize the Indirect Transfer and, as a result, gains derived from such Indirect Transfer may be subject to PRC withholding tax at the rate of up to 10%. On February 3, 2015, the SAT promulgated the Announcement on Several Issues concerning the Enterprise Income Tax on the Indirect Transfers of Properties by Non-Resident Enterprises, or SAT Announcement 7, which abolished Article 5 and Article 6 of Circular 698 and provides that where a non-resident enterprise indirectly transfers equities and other properties of a PRC resident enterprise to evade its obligation of paying enterprise income tax by implementing arrangements that are not for bona fide commercial purpose, such indirect transfer shall, in accordance with the provisions of EIT Law, be re-identified and recognized as a direct transfer of equities and other properties of the PRC resident enterprise, and, as a result, gains derived from such indirect transfer may be subject to PRC withholding tax at the rate of 10% or 25%. Circular 698 also provides that, where a non-PRC resident enterprise transfers its equity interests in a PRC resident enterprise to its related parties at a price lower than the fair market value which results in the decrease of taxable income, the competent tax authority has the power to make a reasonable adjustment to the taxable income of the transaction.

[Table of Contents](#)

SAT Circular 698 and SAT Announcement 7 may be determined by the tax authorities to be applicable to our private equity financing transactions where non-resident shareholders were involved, if any of such transactions were determined by the tax authorities to lack reasonable commercial purpose. Since Circular 698 has retroactive effect from January 1, 2008, we cannot assure you our reorganization will not be subject to examination by the PRC Subsidiaries' tax authorities and any direct or indirect transfer of our equity interests in our PRC subsidiaries via our overseas holding companies will not be subject to a PRC withholding tax.

Our certificates, permits and licenses related to our operations are subject to governmental control and renewal, and failure to obtain such certificates, permits and licenses or their renewals will cause all or part of our operations to be terminated.

Our operations require licenses, permits and in some cases renewals of these licenses and permits from various governmental authorities within the PRC. Our ability to obtain, sustain or renew such licenses and permits on acceptable terms is subject to change, as, among other things, the regulations and policies of applicable governmental authorities may change. If these permits expire without renewal, we may not be allowed to operate our business for an extended period of time, or our operations may cease entirely. Our inability to obtain, the loss of, or the denial of, extension as to any of these licenses or permits may have a material adverse effect on our operations and financial condition and could result in our being required to cease operations, incur fines and incur penalties.

If our land use rights are revoked, we would have no operational capabilities.

Under Chinese law, land is owned by the state or rural collective economic organizations. The state issues to the land users the land use right certificate. Land use rights may be revoked and the land users may be forced to vacate at any time when redevelopment of the land is in the public interest. The public interest rationale is interpreted quite broadly and the process of land appropriation may be less than transparent. Each of our two facilities rely on these land use rights as the cornerstone of their operations, and the loss of such rights would have a material adverse effect on our operations.

[Table of Contents](#)

Labor laws in the PRC may adversely affect our results of operations.

On June 29, 2007, the PRC government promulgated a new labor law, namely, the Labor Contract Law of the PRC, or the Labor Contract Law, which became effective on January 1, 2008 and was last amended on December 28, 2012. The Labor Contract Law imposes greater liabilities on employers and significantly affects the cost of an employer's decision to reduce its workforce. Further, it requires certain terminations be based upon seniority and not merit. In the event we decide to significantly change or decrease our workforce, the Labor Contract Law could adversely affect our ability to enact such changes in a manner that is most advantageous to our business or in a timely and cost-effective manner, thus materially and adversely affecting our financial condition and results of operations.

Our failure to fully comply with PRC labor laws exposes us to potential liability.

Companies operating in China must comply with a variety of labor laws, including certain social insurance, housing fund and other staff welfare-oriented payment obligations. There exist uncertainties as to the interpretation, implementation and enforcement of such obligations. If relevant governmental authorities determine that we have not complied fully with such obligations, we may be in violation of applicable PRC labor laws and we cannot assure you that PRC governmental authorities will not impose penalties on us for any failure to comply. In addition, in the event that any current or former employee files a complaint with relevant governmental authorities, we may be subject to making up such staff-welfare oriented obligations as well as paying administrative fines. In the past, we had been delinquent with respect to the payment of social insurance and housing fund payments. We may be liable for the payments and fines arising from such delinquent payments.

Future inflation in China may inhibit our ability to conduct business in China.

In recent years, the Chinese economy has experienced periods of rapid expansion and high rates of inflation. Rapid economic growth can lead to growth in the money supply and rising inflation. If prices for our products rise at a rate that is insufficient to compensate for the rise in the costs of supplies, it may have an adverse effect on profitability. These factors have led to the adoption by the PRC government, from time to time, of various corrective measures designed to restrict the availability of credit or regulate growth and contain inflation. High inflation may in the future cause the PRC government to impose controls on credit and/or prices, or to take other action, which could inhibit economic activity in China, and thereby harm the market for our products.

Our auditor, like other independent registered public accounting firms operating in the PRC, is not permitted to be subject to inspection by the Public Company Accounting Oversight Board, and as such, investors may be deprived of the benefits of such inspection.

The independent registered public accounting firm that issues the audit reports included in our annual reports filed with the SEC, as an auditor of companies that are traded publicly in the United States and a firm registered with the Public Company Accounting Oversight Board (United States), or the PCAOB, is required by the laws of the United States to undergo regular inspections by PCAOB to assess its compliance with the laws of the United States and relevant professional standards. However, as our auditor is located and performs audit work in the PRC, a jurisdiction where the PCAOB is currently unable to conduct inspections without the approval of the PRC authorities, our auditor, like other independent registered public accounting firms operating in the PRC, is currently not inspected by the PCAOB.

Inspections of other firms that the PCAOB has conducted outside of the PRC have identified deficiencies in those firms' audit procedures and quality control procedures, which may be addressed as part of the inspection process to improve future audit quality. The inability of PCAOB to conduct inspections of independent registered public accounting firms operating in the PRC makes it more difficult to evaluate the effectiveness of our auditor's audit procedures or quality control procedures. As a result, investors may be deprived of the benefits of the PCAOB inspections.

RISKS RELATED TO OUR ORDINARY SHARES AND ADSs

You may face difficulties in protecting your interests, and your ability to protect your rights through the U.S. federal courts may be limited because we are incorporated under Cayman Islands law, we conduct substantially all of our operations in China and substantially all of our directors and officers reside outside the United States.

We are incorporated in the Cayman Islands and conduct substantially all of our operations in China through our PRC subsidiaries and consolidated affiliated entity. Substantially all of our directors and officers reside outside the United States and a substantial portion of their assets are located outside of the United States. As a result, it may be difficult or impossible for you to bring an action against us or against these individuals in the Cayman Islands or in China in the event that you believe your rights have been infringed under the securities laws or otherwise. Even if you are successful in bringing an action of this kind, the laws of the Cayman Islands and China may render you unable to enforce a judgment against our assets or the assets of our directors and officers. There is no statutory recognition in the Cayman Islands of judgments obtained in the United States, although the courts of the Cayman Islands will generally recognize and enforce a non-penal judgment of a foreign court of competent jurisdiction without retrial on the merits.

Our corporate affairs are governed by our memorandum and articles of association, as amended and restated from time to time, and by the Companies Law (2010 Revision) and common law of the Cayman Islands. The rights of shareholders to take legal action against us and our directors, actions by minority shareholders and the fiduciary responsibilities of our directors are to a large extent governed by the common law of the Cayman Islands. The common law of the Cayman Islands is derived in part from comparatively limited judicial precedent in the Cayman Islands as well as from English common law, which provides persuasive, but not binding, authority in a court in the Cayman Islands. The rights of our shareholders and the fiduciary responsibilities of our directors under Cayman Islands law are not as clearly established as they would be under statutes or judicial precedents in the United States. In particular, the Cayman Islands has a less developed body of securities laws than the United States and provides significantly less protection to investors. In addition, shareholders in Cayman Islands companies may not have standing to initiate a shareholder derivative action in U.S. federal courts.

As a result, our public shareholders may have more difficulty in protecting their interests through actions against us, our management, our directors or our major shareholders than would shareholders of a corporation incorporated in a jurisdiction in the United States.

We believe we were a passive foreign investment company, or PFIC, for 2016 and we may be a PFIC for 2017, which could result in adverse U.S. tax consequences to U.S. investors.

Based on the projected composition of our income and valuation of our assets, we believe we were a passive foreign investment company, or a PFIC, for U.S. federal income tax purposes for our taxable year ended December 31, 2016, and we may be a PFIC for our taxable year ending December 31, 2017 or thereafter, although there can be no assurance in either regard. In general, we will be a PFIC for any taxable year in which at least 75% of our gross income is "passive income," as defined for this purpose, or at least 50% of the value of our assets (based on an average of the quarterly values) is attributable to assets that produce or are held for the production of "passive income." The determination of whether we are a PFIC must be made annually. The composition of our income and assets will be affected by how, and how quickly, we spend the proceeds of any debt issuance or other capital we may raise in the future. Assuming we are treated as a PFIC for any taxable year during which you hold our ADSs, you will be subject to special tax rules with respect to any "excess distribution" received and any gain realized from a sale or other disposition (including for this purpose any pledge) of our ADSs. Distributions received in a taxable year that are greater than 125% of the average annual distributions received during the shorter of the three preceding taxable years or your holding period in our ADSs will be treated as excess distributions. Under these special tax rules: the excess distribution or gain will be allocated ratably over your holding period in our ADSs; the amount allocated to the current taxable year will be treated as ordinary income; and the amount allocated to each other year will be subject to tax at the highest tax rate on ordinary income in effect for that year and that tax will be subject to an interest charge. In addition, non-corporate U.S. investors will not be eligible for the reduced rates of taxation applicable to "qualified dividends" received from us, if we are a PFIC in the taxable year in which such dividends are paid or in the preceding taxable year. In certain circumstances, in lieu of being subject to the excess distribution rules, you may make an election to include gain on the stock of a PFIC as ordinary income under a mark-to-market method, provided that such stock is regularly traded on a qualified exchange, including the New York Stock Exchange, although there can be no assurance that our ADSs will be "regularly traded" for purposes of the mark-to-market election. If you make a mark-to-market election, such election is generally irrevocable unless our ADSs cease to be regularly traded or the Internal Revenue Service consents to the revocation of the election. Additionally, assuming we are a PFIC for any taxable year during which you hold our ADSs, you will be subject to special information reporting requirements. For more information on the U.S. tax consequences arising from our classification as a PFIC, please see "Item 10.E. Additional Information — Taxation — United States Taxation — Passive Foreign Investment Company Considerations."

Our articles of association contain anti-takeover provisions that could discourage a third party from acquiring us, which could limit our shareholders' opportunity to sell their shares, including ordinary shares represented by our ADSs, at a premium.

Our articles of association contain certain provisions that could limit the ability of others to acquire control of our Company or cause us to engage in change-of-control transactions. These provisions could have the effect of depriving our shareholders of an opportunity to sell their shares at a premium over prevailing market prices by discouraging third parties from seeking to obtain control of our Company in a tender offer or similar transaction. For example, our board of directors has the authority, without further action by our shareholders, to issue preference shares. These preference shares may have better voting rights than our ordinary shares, in the form of ADSs or otherwise, and could be issued quickly with terms calculated to delay or prevent a change in control of our company or make removal of management more difficult. If our board of directors decides to issue preference shares, the price of our ADSs may fall and the voting rights of the holders of our ordinary shares and ADSs may be diluted.

Certain actions require the approval of a supermajority of at least two-thirds of the members of our board of directors which, among other things, would allow our non-independent directors to block a variety of actions or transactions, such as a merger, asset sale or other change of control, even if all of our independent directors unanimously voted in favor of such action, thereby further depriving our shareholders of an opportunity to sell their shares at a premium.

The market price for our ADSs has been and is likely to continue to be highly volatile, which could result in substantial losses to you.

The market price for our ADSs has been and is likely to continue to be highly volatile and subject to wide fluctuations in response to factors, many of which are beyond our control and which may occur regardless of our actual operating performance, including the following:

- announcements of technological or competitive developments;
- regulatory developments in China affecting us, our customers, our competitors or our industry;
- announcements regarding patent or other intellectual property litigation or the issuance of patents to us or our competitors or updates with respect to the enforceability of patents or other intellectual property rights generally in China or internationally;
- actual or anticipated fluctuations in our quarterly operating results and changes of our expected results;
- changes in financial estimates by securities research analysts;
- changes in the economic performance or market valuations of other edible alcohol producers;
- announcements by us or our competitors of new services, acquisitions, strategic relationships, joint ventures or capital investments; addition or departure of our executive officers, senior management personnel and key research personnel;
- detrimental negative publicity about us, our competitors or our industry;
- fluctuations of exchange rates between the Renminbi and the U.S. dollar;
- release or expiry of lock-up or other transfer restrictions on our outstanding ordinary shares or ADSs; and
- sales or perceived sales of additional ordinary shares or ADSs.

In addition, the securities market has, from time to time, experienced significant price and volume fluctuations that are not related to the operating performance of particular companies. Any of these factors could result in large and sudden changes in the volume and trading price of our ADSs and could cause holders of our ADSs to incur substantial losses. In the past, following periods of volatility in the market price of a company's securities, shareholders have often instituted securities class action litigation against that company. If we were involved in a class action suit or other securities litigation, it would divert the attention of our senior management, require us to incur significant expense and, whether or not adversely determined, could have a material adverse effect on our business, financial condition, results of operations and prospects.

Future issuances of ordinary shares or ADSs may depress the trading price of our ADSs.

Any issuance of equity securities could dilute the interests of our existing shareholders and could substantially decrease the trading price of our ADSs. We may issue equity securities in the future for a number of reasons, including to finance our operations and business strategy (including in connection with acquisitions and other transactions), to adjust our ratio of debt to equity, to satisfy our obligations upon the exercise of outstanding warrants or options or for other reasons.

Your right to participate in any future rights offerings may be limited, which may cause dilution to your holdings.

If we offer holders of our shares any rights to subscribe for additional shares or any other rights, the depositary may make these rights available to you if it is lawful and reasonably practicable. However, the depositary may allow rights that are not distributed or sold to lapse. In that case, you will receive no value for them. In addition, United States securities laws may restrict the sale, deposit, cancellation and transfer of the ADSs issued after exercise of rights. Under the deposit agreement, the depositary will not distribute rights to holders of ADSs unless the distribution and sale of rights and the securities to which these rights relate are either exempt from registration under the Securities Act of 1933, as amended, or the Securities Act, with respect to holders of ADSs, or are registered under the provisions of the Securities Act. We can give no assurance that we can establish an exemption from registration under the Securities Act, and we are under no obligation to file a registration statement with respect to these rights or underlying securities or to endeavor to have a registration statement declared effective. Accordingly, you may be unable to participate in our rights offerings and may experience dilution of your holdings as a result.

Holders of ADSs have fewer rights than shareholders and must act through the depositary to exercise their rights.

Holders of ADSs do not have the same rights of our shareholders and may only exercise voting rights with respect to the underlying ordinary shares in accordance with the provisions of the deposit agreement. Under our amended and restated memorandum and articles of association, the minimum notice period required to convene a general meeting is 21 days. When a general meeting is convened, you may not receive sufficient notice of a shareholders' meeting to permit you to withdraw your ordinary shares to allow you to cast your vote with respect to any specific matter. In addition, the depositary and its agents may not be able to send voting instructions to you or carry out your voting instructions in a timely manner. We will make all reasonable efforts to cause the depositary to extend voting rights to you in a timely manner, but we cannot assure you that you will receive the voting materials in time to ensure that you can instruct the depositary to vote your ADSs. Furthermore, the depositary and its agents will not be responsible for any failure to carry out any instructions to vote, for the manner in which any vote is cast or for the effect of any such vote. As a result, you may not be able to exercise your right to vote and you may lack recourse if your ADSs are not voted as you requested. In addition, in your capacity as an ADS holder, you will not be able to call a shareholders' meeting.

You may not receive distributions on our shares or any value for them if it is illegal or impractical for us to make them available to you.

The depositary has agreed to pay you the cash dividends or other distributions it or its custodian receives on our shares or other deposited securities after deducting its fees and expenses.

You will receive these distributions in proportion to the number of our shares your ADSs represent. However, the depositary is not responsible if it is unlawful or impractical to make a distribution available to any holders of ADSs. For example, it would be unlawful to make a distribution to a holder of ADSs if it consists of securities that require registration under the Securities Act but that are not properly registered or distributed pursuant to an applicable exemption from registration and the depositary may determine that it is not practicable to distribute certain property through the mail, or that the value of certain distributions may be less than the costs of mailing them. The depositary is not responsible for making a distribution available to any holders of ADSs if any government approval or registration is required for such distribution. We have no obligation to take any other action to permit the distribution of our ADSs, shares, rights or anything else to holders of our ADSs. This means that you may not receive the distributions we make on our shares or any value for them if it is illegal or impractical for us to make them available to you. These restrictions may have a material and adverse effect on the value of your ADSs.

[Table of Contents](#)

You may be subject to limitations on transfer of your ADSs.

Your ADSs are transferable on the books of the depositary. However, the depositary may close its transfer books at any time or from time to time when it deems expedient in connection with the performance of its duties. In addition, the depositary may refuse to deliver, transfer or register transfers of ADSs generally when our books or the books of the depositary are closed, or at any time if we or the depositary deem it advisable to do so because of any requirement of law or of any government or governmental body, or under any provision of the deposit agreement, or for any other reason.

We may need additional capital and may sell additional ordinary shares, ADSs or other equity securities or incur indebtedness, which could result in dilution to our shareholders or increase our debt service obligations.

We may require additional cash resources due to changed business conditions or other future developments, including any investments or acquisitions we may decide to pursue. If our cash resources are insufficient to satisfy our cash requirements, we may seek to sell additional equity or debt securities or obtain a credit facility. The sale of additional equity securities or equity-linked debt securities could result in additional dilution to our shareholders. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financing covenants that would restrict our operations. We cannot assure you that financing will be available in amounts or on terms acceptable to us, if at all.

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of the Company

Reorganization of Shandong Borun into China High

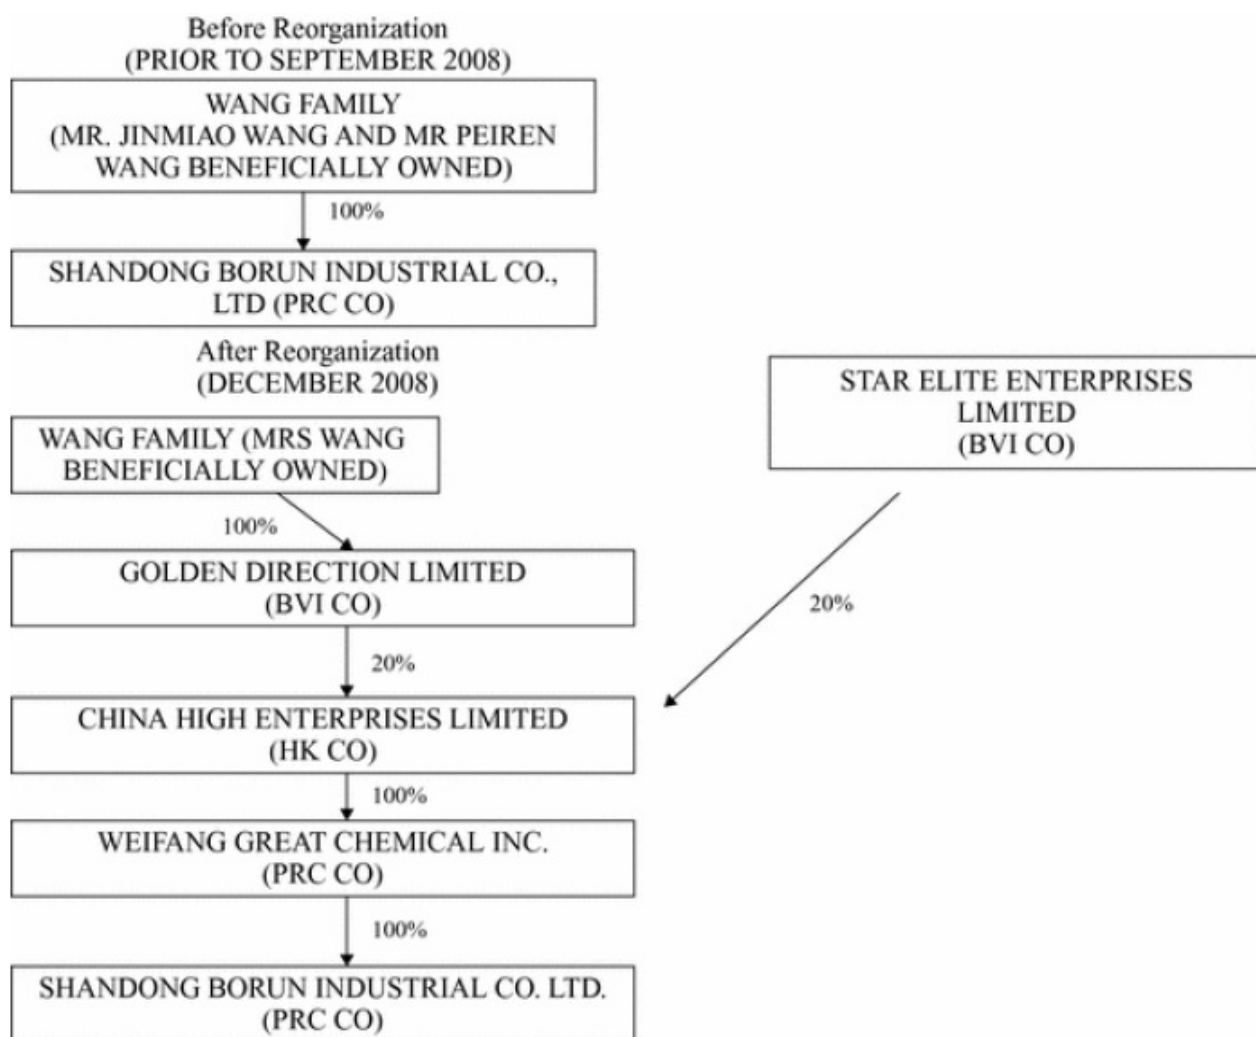

Shandong Borun, our predecessor company which had been controlled by our CEO, Mr. Wang and his father, Mr. Peiren Wang (together with Mr. Wang and Mrs. Shan Junqin ("Mrs. Wang"), the "Wang family"), since the incorporation of Shandong Borun, in December 2000, underwent a corporate reorganization between September and December 2008 for the purpose of facilitating investments into Shandong Borun by unrelated off-shore (non-PRC) private equity investors.

In September 2008, Golden Direction Limited, or Golden Direction, beneficially owned by Mr. Wang's mother, Mrs. Wang, acquired the sole share (an ordinary share) of capital of China High, a Hong Kong holding company, from an unrelated party, and in October 2008 China High issued an additional 7,999 ordinary shares to Golden Direction in preparation for and pursuant to the reorganization. China High was previously incorporated in Hong Kong's Special Administrative Region on July 15, 2008.

On September 30, 2008, China High acquired all of the equity interests of WGC, a PRC limited liability company, from an unrelated party pursuant to an equity interest acquisition agreement for cash consideration of \$160,000 and in October 2008 obtained all requisite approvals from the government for such transaction. WGC was previously established as a limited liability company on March 21, 2001 in China's Shandong Province under the laws of the PRC.

In December 2008, WGC acquired 100% of the equity interests in Shandong Borun. The cash consideration paid by WGC for Shandong Borun was equivalent not to the fair market value of Shandong Borun, but rather to the registered capital of Shandong Borun, or RMB76,500,000 (\$11,027,822). Such acquisition was approved by the PRC governmental authorities and no member of the Wang Family or any other party received any compensation or any return on investment in connection with the reorganization. Shandong Borun was originally incorporated in the city of Shouguang in China's Shandong Province on December 1, 2000 under the name "Shouguang Haihong Salt-Making Co., Ltd." Shandong Borun entered into the edible alcohol producing industry in June 2004 and, on March 13, 2006, changed its name to "Shandong Borun Industrial Co., Ltd." All operations unrelated to edible alcohol production were removed from Shandong Borun's business charter as of July 3, 2008.

The result of this reorganization was to maintain Wang Family control of Shandong Borun, while creating a corporate structure which allowed offshore foreign investment in us in compliance with PRC law. Set forth below are charts showing our corporate structure before and after the reorganization.

The 2008 reorganization enabled us to raise capital through the issuance of China High capital stock to our three previously unrelated private equity investors, namely (a) Star Elite Enterprises Limited, or Star Elite, which had made its investment in October 2008, (b) Earnstar Holding Limited, or Earnstar, which had made its investment in June 2009 and (c) TDR Advisors, Inc., or TDR, which had made its investment in September 2009. Prior to Star Elite's investment in October 2008, Golden Direction was the sole shareholder of China High since September 2008. These initial investments of approximately \$16.9 million made by Star Elite, Earnstar and TDR between October 2008 and September 2009 were made at arms' length by sophisticated investors after a series of negotiations and performance of due diligence, including reviews of our management accounts, and the per share price of capital stock in China High issued in connection with each investment was based on the price to earnings ratio at the time of issuance. Each of our investment transactions with Star Elite in October 2008, Earnstar in June 2009 and TDR in September 2009 was made at fair market value at the time of each investment or at a discount to fair market value with a beneficial conversion feature recognized for the intrinsic value of the conversion feature in accordance with accounting rule Accounting Standards Codification ("ASC") 470-20 (EITF 98-5 and 00-27).

On July 9, 2008, Shandong Borun completed its acquisition of all of the equity interests in Daqing Anxin Tongwei Alcohol Manufacturing Co., Ltd., or Anxin Tongwei, a limited liability company established under the laws of the PRC on September 20, 2004 in Daqing City, Heilongjiang Province, China. Anxin Tongwei applied for bankruptcy with the People's Court in Datong, Daqing City on July 26, 2007. The Court made the verdict to approve a procedure of reorganization on July 30, 2007 and to approve a plan of reorganization on November 30, 2007. On July 1, 2008, the Court made the verdict to approve that certain acquisition agreement between Shandong Borun and the then shareholders of Anxin Tongwei on June 26, 2008. On July 9, 2008, the parties completed the acquisition pursuant to which Anxin Tongwei became a wholly owned subsidiary of Shandong Borun. Shandong Borun paid a total cash consideration of RMB139,000,000 (\$20,037,480) for Daqing Borun.

Anxin Tongwei began production of edible alcohol in 2005; however due to operation and financing problems, Anxin Tongwei ceased production and applied for bankruptcy. As of the acquisition date, Anxin Tongwei had been idle for more than one year, with no management personnel or production, employees and no revenue. Subsequent to the acquisition, we spent more than a year and approximately RMB 110.0 million (\$15.9 million) in facility improvements, including improvements to machinery and equipment, in order to replace the previous owner's "dry" method manufacturing process with our in-house developed Borun wet process (see "Information on the Company — Business Overview — Our Key Production Technology" which compares our method with the traditional "dry" method). We also changed the name of Anxin Tongwei to Daqing Borun Biotechnology Co., Ltd., since we regard "corn deep-processing" as a part of the biotechnology field.

Reorganization of China High into New Borun

Effective as of March 31, 2010, our Hong Kong holding company, China High, and its controlling shareholder, Golden Direction, a company beneficially owned by Mrs. Wang, a member of the Wang Family, underwent a corporate reorganization with China High's minority shareholders Star Elite, Earnstar and TDR (further details of which are set out below) for purposes of listing our securities on a national securities exchange in the United States as a foreign private issuer and for other tax reasons. No member of the Wang Family or any other party received any compensation or any return on investment in connection with the reorganization.

In connection with such reorganization, Mrs. Wang, a member of the Wang Family, incorporated New Borun in the Cayman Islands on December 21, 2009, as a result of which Mrs. Wang ultimately received the sole initial subscriber share of New Borun. On March 9, 2010, Mrs. Wang transferred such sole share to King River, a British Virgin Islands company owned and controlled by Mrs. Wang.

By resolution of the shareholders passed on March 12, 2010, the authorized share capital of New Borun was converted from shares having a par value of \$1.00 to shares having a par value of \$0.001. As a consequence of this variation of share capital, the initial subscriber share (with a par value of \$1.00) held by King River was repurchased by New Borun, and one new share (with a par value of \$0.001) was issued by New Borun to King River.

[Table of Contents](#)

On March 15, 2010, New Borun signed, and effective as of March 31, 2010 New Borun consummated, a share exchange agreement with Golden Direction and King River, whereby New Borun acquired 100% of the voting share capital of Golden Direction from King River in exchange for the issuance by New Borun to King River of an additional 14,847,810 ordinary shares. Such additional shares were issued to King River on March 17, 2010, following which King River held 14,847,811 ordinary shares of New Borun, representing 100% of its issued share capital. As of the consummation of the share exchange pursuant to the share exchange agreement, Golden Direction became a wholly owned subsidiary of New Borun and Golden Direction held approximately 74.24% of the voting capital of China High.

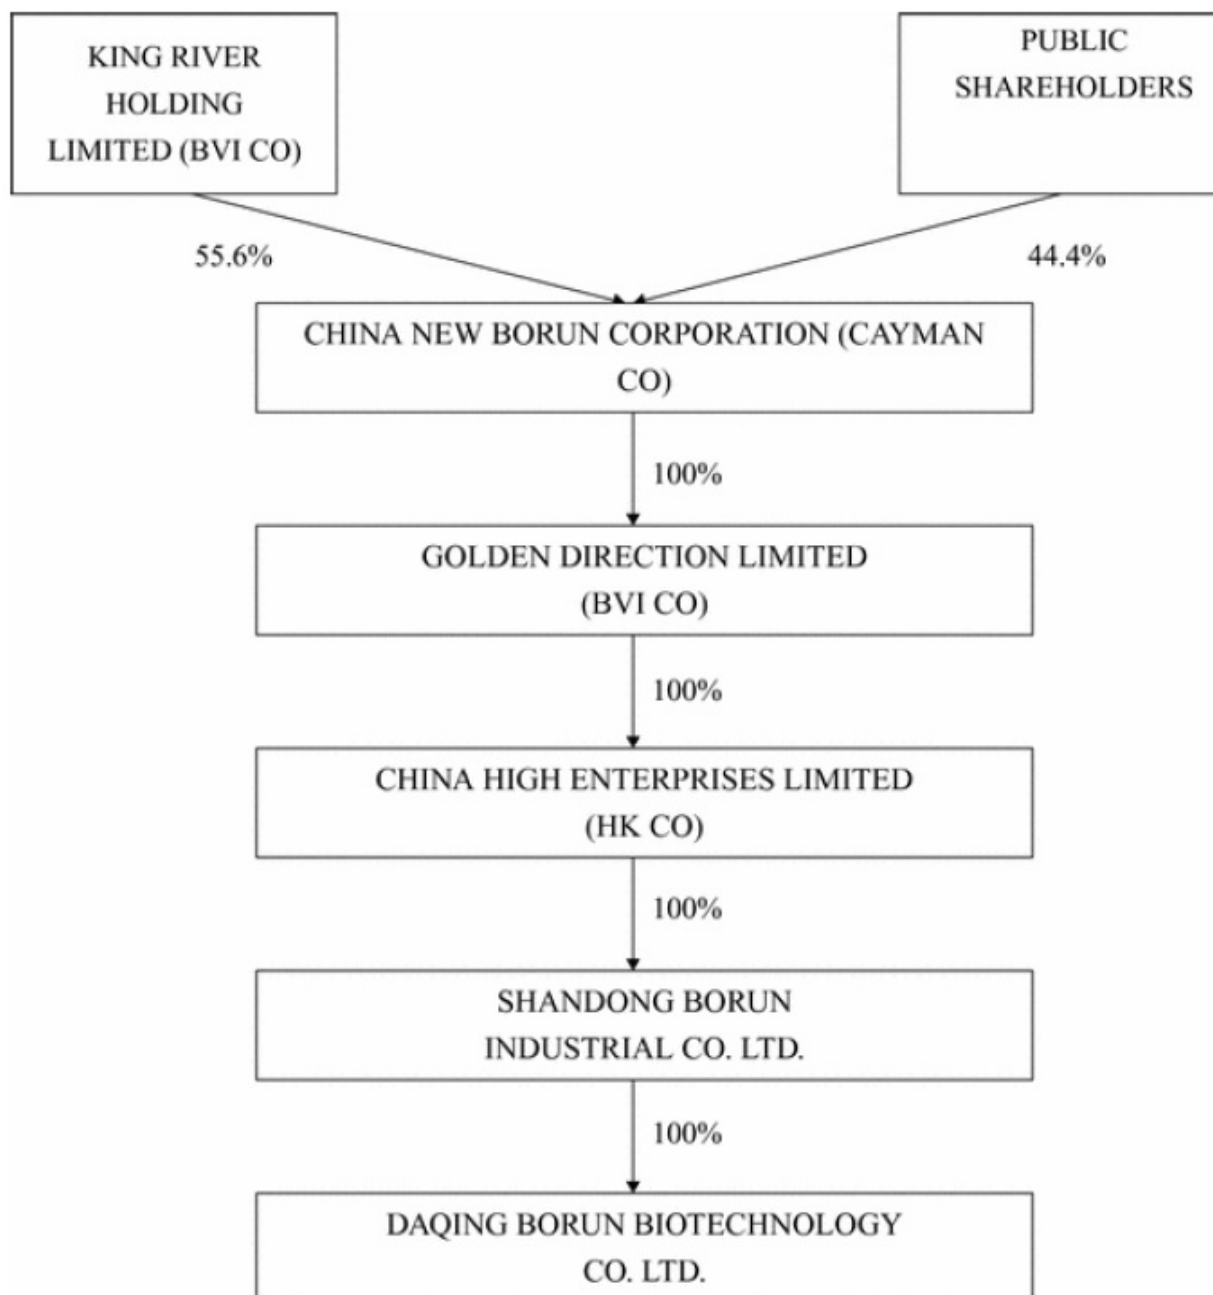

On February 28, 2010 New Borun and Golden Direction signed, and effective as of March 31, 2010 New Borun and Golden Direction consummated, a second share exchange agreement whereby Golden Direction acquired the remaining 25.76% (approximate) of China High. Upon closing that exchange, New Borun issued (i) 3,711,952 of its Class A convertible preference shares, which were automatically convertible into 3,711,952 of its ordinary shares upon the closing of the initial public offering, to Star Elite, one of our private equity investors which is wholly owned by Ms. Ping Chen, (ii) 1,065,330 shares of its Class B convertible preference shares, which were automatically convertible into 1,065,330 ordinary shares upon the closing of the initial public offering, to Earnstar, one of our private equity investors which is wholly owned by Ms. Yibin Wei, who became a Director of New Borun effective April 23, 2010 in connection with the exchange and (iii) 374,907 shares of its Class C convertible preference shares, which were automatically convertible into 374,907 ordinary shares upon the closing of the initial public offering to TDR, one of our private equity investors which is wholly owned by Mr. Ruiping Wang, who became a Director of New Borun effective April 23, 2010 in connection with the exchange. Such reorganization did not result in any change in control as the previous shareholders of China High received their pro rata ownership percentages in New Borun upon the completion of the reorganization.

In connection with and as contemplated by the exchange agreement described in the paragraph above, New Borun (i) entered into a shareholders agreement, effective as of March 31, 2010, with Star Elite, Earnstar, TDR and King River, which sets forth the preference rights held by each of Star Elite, Earnstar and TDR in New Borun and (ii) adopted its Amended and Restated Memorandum and Articles of Association with effect from March 30, 2010, which sets forth the rights attaching to the preference shares held by each of Star Elite, Earnstar and TDR. The shareholders agreement and the Amended and Restated Memorandum and Articles of Association provide for the automatic conversion of each Class A, B and C preference share into ordinary shares, and each of the preference shareholders have agreed to waive all conditions in the shareholders agreement and in the Amended and Restated Memorandum and Articles of Association so that all of their preference shares automatically convert into ordinary shares upon the closing of the initial public offering.

As of November 15, 2012, WGC has merged with and into Shandong Borun and Shandong Borun was reorganized into a wholly owned subsidiary of China High.

[Table of Contents](#)

We now function exclusively through (1) Golden Direction, (2) China High, (3) China High's wholly owned subsidiary and our chief operating company, Shandong Borun and (4) Shandong Borun's wholly owned subsidiary, Daqing Borun. We conduct all of our business in the PRC and do not have any off-shore operations.

Recent Development of our Business

Between January 1, 2016 and December 31, 2016, we:

- Fully repaid the remaining RMB320.0 million (\$46.1 million) in relation to our corporate bonds that were issued in 2013;
- Successfully issued on November 2, 2016 private placement bonds with a principal amount of RMB300.0 million (\$43.2 million), which we then registered with the Shanghai Stock Exchange on November 2, 2016.
- Successfully purchased 397,639 tons of corn from granaries pursuant to our framework agreements with them and local farmers in the harvest season of 2016.

[Table of Contents](#)

Between January 1, 2017 and April 25, 2017, we

- Successfully complete our corn sourcing plan by purchasing another 202,968 tons of corn from granaries pursuant to our framework agreements with them and local farmers.

Capital Expenditures

Our capital expenditures were RMB74.6 million (\$10.8 million), RMB22.5 million (\$3.2 million) and RMB3.6 million (\$0.5 million) in 2014, 2015 and 2016, respectively, which related primarily to purchasing equipment for expansion and upgrade of our edible alcohol facilities, plant and equipment for CPE plant at our Shouguang facility. We expect to incur capital expenditures ranging from RMB5.0 million (\$0.7 million) to RMB10.0 million (\$1.4 million) for 2017, which related primarily to the upgrade and the maintenance of our production facilities.

Our principal executive offices are located at Bohai Industrial Park (Yangkou Town), Shouguang, Shandong 262715, the People's Republic of China. Our telephone number is +86 (536) 5451199. Our registered office in the Cayman Islands is at c/o Maples Corporate Services Limited, P.O. Box 309, Ugland House, Grand Cayman, KY1-1104, Cayman Islands.

Investor inquiries should be directed to us at the address and telephone number of our principal executive offices set forth above. Our website is www.chinaneborun.com. The information contained on our website does not form part of this annual report.

[Table of Contents](#)

B. Business Overview

Overview

We are a leading producer and distributor of corn-based edible alcohol in the PRC based on tons of edible alcohol produced. Our edible alcohol products are primarily sold as an ingredient to producers of *baijiu* who further blend our products into finished products sold under various brand names throughout China. “*Baijiu*” is a grain-based alcoholic beverage, generally made from corn, wheat or barley, clear in color, with alcohol content ranging from 18% to 68%. *Baijiu* is sold throughout China in retail stores, bars, banquet halls, restaurants and other locations where alcoholic beverages are typically consumed. *Baijiu* is consumed in almost all the occasions in China where alcoholic beverages are desirable, from daily residential consumption, gatherings of family and friends, business and social occasions, to the Chinese Spring Festival celebrations. In China, consumption of *baijiu* is generally associated with a higher standard of living, and consumption of *baijiu* has grown with the expansion of the PRC economy.

We believe our in-house developed manufacturing process results in a cost effective, consistent and superior product widely sought by *baijiu* producers. Producers of *baijiu* often have distinctive taste and flavor profiles that are achieved through proprietary recipes and blending techniques. The consistency and quality of the edible alcohol we supply to them is critical to achieving these taste and flavor profiles.

During the production of edible alcohol, we also produce DDGS feed, corn germ, crude corn oil and liquid carbon dioxide as by-products which are sold separately from our edible alcohol. In July 2010, we completed construction of our liquid carbon dioxide plant at our Shouguang facility, which manufactures liquid carbon dioxide from waste carbon dioxide emitted during our production process, in order to create an additional stream of revenue. Our liquid carbon dioxide plant began contributing revenue in July 2010 and completed the improvement of our liquid carbon dioxide facility at Shouguang with 40,000 tons per annum capacity in August 2011. In March 2011, we completed the installation of our crude corn oil facility in our Daqing facility and started producing and selling crude corn oil by deep-processing corn germ into crude corn oil. Additionally, we completed the crude corn oil facility in our Shouguang facility and began producing and selling crude corn oil in September 2011. We ceased the production and sale of corn germ from September 2011.

In China, edible alcohol can be classified into Grades A, B and C. Currently, we sell all three Grades of edible alcohol. From August 2011, we began to produce Grade A edible alcohol at our Daqing facility by upgrading our Grade B edible alcohol after the completion of the Grade A edible alcohol facility with annual capacity of 50,000 tons.

In January 2012 the State Intellectual Property Office awarded a patent to us for the Borun wet process, our proprietary manufacturing method. Based upon our knowledge of our industry and the patent approval we obtained from the State Intellectual Property Office of the PRC of for the Borun wet process, we believe our in-house and exclusively developed Borun wet process has a higher production yield, is more environmentally friendly and has a higher energy efficiency as compared to other producers of commercially available corn-based edible alcohol in China. Based upon our knowledge of our industry and our approved patent, we believe we are the only corn-based edible alcohol producer in China utilizing our method.

In addition to the production of edible alcohol and the related by-products including DDGS, crude corn oil and liquid carbon dioxide, we started to produce and sell CPE products and foam insulation products in 2013. We completed the construction of our new CPE product manufacturing plant with an annual production capacity of 12,500 tons and our new foam insulation products manufacturing plant with an annual production capacity of 40,000 cubic meters, both situated at our Shouguang facility, in July and September 2013, respectively. In 2014, we further invested in our CPE production line and expanded the annual production capacity with additional 12,500 tons of CPE products. We began generating revenue from sales of our new CPE and foam insulation products in December 2013. However, due to the weak demand of our foam insulation products, in 2015, after a comprehensive review of the current market, we concluded that the foam insulation market will likely face intense price competition, while at the same, we would need to spend a significant amount of additional R&D in order to effectively compete in terms of product variety. Consequently, we disposed all long-lived assets related to foam business in 2016 and exited from the foam insulation business.

[Table of Contents](#)

We currently own and operate two facilities: one in Shouguang, Shandong Province, and the other in Daqing, Heilongjiang Province. Our Shouguang facility occupies a site area of 400,689.81 square meters and has an annual production capacity of 160,000 tons of corn-based edible alcohol (90,000 tons of Grade B edible alcohol and 70,000 tons of Grade C edible alcohol), 25,000 tons of CPE products. Our Daqing facility occupies a site area of 219,156.4 square meters and currently has an annual production capacity of 220,000 tons of corn-based edible alcohol (50,000 tons of Grade A edible alcohol, 140,000 tons of Grade B edible alcohol and 30,000 tons of Grade C edible alcohol). We expanded the production capacity of the Daqing facility with the use of the net proceeds from our June 2010 initial public offering, in addition to cash generated from our operations and bank loans, through the construction of Phase III. We believe our Shouguang and Daqing facilities are the largest privately owned corn-based edible alcohol producers in Shandong Province and Heilongjiang Province, respectively. Our Daqing facility is licensed to build up to 330,000 tons of production capacity of edible alcohol.

We believe we are the second largest edible alcohol producer in China, based on current total production capacity.

Corn, which we purchase from local farmers and distributors, is the most important raw material used in our production process. Prices of corn are generally higher during non-harvest season than the harvest season and are the lowest in the northeastern region of China. In order to minimize our corn cost

and secure supply during the non-harvest season, we secured corns in advance during the harvest season. In 2016, we continued to execute our sourcing strategy to pre-purchase corns in advance to meet our production needs during the non-harvest season. As of March 31, 2017, we have successfully purchased 600,607 tons of corn, which will substantially satisfy our corn consumption requirements at our Shouguang and Daqing facilities during the coming non-harvest season.

[Table of Contents](#)

Our Competitive Strengths

Leading Position in the Corn-Based Edible Alcohol Market in the PRC

We believe that we are currently the second largest producer of edible alcohol in China in terms of total production capacity and production output of edible alcohol. We believe our leading position plays an important role in negotiating and securing contracts with customers and suppliers and recruiting talent. We enjoy economies of scale over our competitors having a smaller production scale. Accordingly, we believe these enhance our overall competitiveness and are important to our future growth.

Efficient Production Technology

Our production management professionals have independently developed the Borun wet process for the production of edible alcohol. Based upon our knowledge of our industry and the patent we have already obtained from the State Intellectual Property Office of the PRC on our application for a patent of invention for our Borun wet process, we believe we are the only corn-based edible alcohol manufacturer that utilizes such a technology in China. Compared to the dry milling process used by other edible alcohol producers in China, our Borun wet process has a higher production yield and consumes less energy and water due to our higher degree of waste energy recovery. Corn germ produced by our Borun wet process is further refined into crude corn oil, providing an additional revenue stream.

Geographical Advantage of our Production Facilities

Our production facilities are situated in Shandong Province and Heilongjiang Province in the PRC. Heilongjiang Province is in the northeast region of the PRC and is one of the largest corn production provinces in the PRC. There are also a significant number of large and mid-sized local *baijiu* distilleries situated in Shandong and Heilongjiang provinces. The location of our production facilities in Shandong and Heilongjiang provinces enables us to gain access to the *baijiu* distilleries, potential customers as well as a stable supply and lower cost of corn, our primary raw material.

Licensed to Increase Production Capacity

Our Daqing facility has a government-issued production license to produce 330,000 tons of edible alcohol, including an additional 110,000 tons over the current production capacity of 220,000 tons. We believe the approved production license for our Daqing facility ensures that we can expand our capacity in order to capitalize on future market opportunities in the near future. We believe we are in an advantageous position in responding to the expected growing market demand for edible alcohol.

[Table of Contents](#)

Corn Sourcing Expertise

We secure corns in advance during the harvest season when the price of corn is historically the lowest during the year to meet our production needs. As of March 31, 2017, we have successfully purchased 600,607 tons of corn during the harvest season which should fully accommodate our production needs for in the rest of the year. We intend to continue this sourcing strategy in the future and we believe this will enable us to minimize our corn consumption costs and secure a sufficient corn supply through purchasing earlier in the year for the non-harvest season. Accordingly, we believe this arrangement enhances our price competitiveness.

Experienced Management Team

Our management team includes our founder, Mr. Wang, who has been engaged in the production of corn-based edible alcohol in the PRC since 2004. Such experience has enhanced Mr. Wang's knowledge and understanding of the corn processing industry and laid the foundation for his development of our edible alcohol business. We believe our management team's knowledge of the edible alcohol industry will enable us to continue to respond effectively to challenges created by changing market conditions.

Our Strategies

Continuously Improve Product Mix

We will shift our product mix to higher grade and higher price edible alcohol, as well as sell more valuable by-products. We completed construction of our Daqing Phase III facility to produce Grade B edible alcohol with additional annual capacity of 120,000 tons in January 2011. We upgraded our edible alcohol production at Daqing facility to Grade A edible alcohol with annual capacity of 50,000 tons and started producing and selling Grade A edible alcohol in August 2011. We also constructed in our Shouguang facility a system to produce liquid carbon dioxide using the carbon dioxide collected during the production of edible alcohol. The Phase I carbon dioxide facility was completed in July 2010 and the Phase II facility was completed in August 2011. In addition, we installed facilities in our Daqing facility and Shouguang facility to further process corn germ to crude corn oil. Crude corn oil has historically sold at higher prices than corn germ. In addition to shifting our product mix in line with our existing edible alcohol production facilities, we invested and completed the construction of our new foaming insulation and CPE plants in 2013 and 2014 to further improve and diversify our product mix. Due to the weak market demand, we exited the foam insulation business in 2016.

Customer Diversification

We currently sell a large portion of our corn-based edible alcohol in Shandong and Heilongjiang Provinces, and of which sales are mainly made to local distilleries of medium to high quality *baijiu*. We intend to continue to expand our sales of edible alcohol in western and southern provinces such as Sichuan, Anhui and Jiangsu Provinces where we believe the domestic edible alcohol production fails to meet local demand and prices for edible alcohol are significantly higher than the northern China region due to shortage of production. We also plan to expand our sales to other provinces to diversify our customer base.

54

[Table of Contents](#)

We believe Sichuan Province is the largest *baijiu* production base in China. From December 2009, we started selling edible alcohol to customers in Sichuan Province and we have achieved significant progress with our sales in Sichuan Province, particularly since 2012, as we significantly increased the volume of edible alcohol sales to this region. We started selling edible alcohol in Anhui and Jiangsu Provinces in 2010 and we aim to further expand our business in those regions.

In addition to the expansion of our customer base to distilleries of *baijiu* in different provinces, we also plan to expand to customers in different industries by selling more Grades A and B edible alcohol to large chemical and pharmaceutical companies.

To step up our marketing effort and enhance our reputation in the industry, we intend to increase our local marketing initiatives and set up regional sales offices in strategically important provinces.

Continuous Expansion of Production Capacity

Currently, we have total production capacity of 380,000 tons of corn-based edible alcohol per annum (consisting of 50,000 tons of Grade A edible alcohol, 230,000 tons of Grade B edible alcohol and 100,000 tons of Grade C edible alcohol) while we are permitted to build facilities to produce up to 490,000 tons of edible alcohol under our current production licenses. The 120,000 ton Grade B edible alcohol Phase III at our Daqing facility has commenced commercial production in January 2011, financed by the net proceeds from the initial public offering and our cash generated from our operations and bank loans. Our Grade A edible alcohol project, which is located at our Daqing facility, has a designed capacity of 50,000 tons per year and is currently producing approximately 4,000 tons per month. We intend to construct Phase IV at our Daqing facility in the future to bring the total production capacity of the Company to 490,000 tons of edible alcohol per annum. It is our intention that our future facilities will produce Grade A and Grade B edible alcohol which currently have higher selling prices than Grade C edible alcohol. However, we have not finalized the plan or entered into any agreements for the construction of such facility.

To diversify market concentration risk, we expanded our product mix by investing into new sectors - a new foam insulation and CPE manufacturing plant in 2013, with an annual production capacity of 40,000 cubic meters of foam insulation products and 12,500 tons of CPE products. In 2014, we further invested in our CPE manufacturing plant and doubled our annual production capacity of CPE products to 25,000 tons. We successfully ramped up this newly invested CPE production line in 2015 and will consider further installing additional production lines in the future. However, we have not finalized such expansion plan or enter into any agreements for the construction of such facility.

Opportunistic Acquisitions

As the PRC government, in principle, will not approve the construction of new corn deep-processing plants for edible alcohol according to current policies, we intend to look for acquisition opportunities to expand our production capacity. We will consider medium-sized dry milling edible alcohol production plants where we can improve the production technologies by converting their production processes to our patented, more advanced Borun wet process.

55

[Table of Contents](#)

By becoming one of the few listed edible alcohol producers in China with an efficient and environmental-friendly corn processing technology, we believe we will become one of the key consolidators in the edible alcohol industry. With our recent successful experience of acquiring the Daqing facility, we are confident in our ability to carry out similar acquisitions in China efficiently and effectively.

Continuous Improvement of our Borun Wet Process

Our production team has continued to enhance the process by varying conditions of our Borun wet process such as temperature, enzyme and acidity applied in the Borun wet process which has led to a consistently higher yield of edible alcohol from corn and lower energy consumption than what we believe is typical for the market.

Leveraging our current success, we intend to continue to invest in research and development, especially in process technology, to improve our products and sustain our competitive edge.

Our Products and Primary Markets

Our principal product is corn-based edible alcohol. In our production of corn-based edible alcohol, we also produce DDGS feed, corn germ and liquid carbon dioxide as by-products. In March 2011, we completed our crude corn oil facility in our Daqing facility and began to deep-process corn germ into crude corn oil. This eliminated corn germ production in our Daqing facility. In July 2011, with the completion of our crude corn oil facility in our Shouguang facility, we began producing and selling crude corn oil instead of corn germ. Based on our production record during the year ended December 31, 2016, approximately 3.01 tons of corn produced 1.0 ton of edible alcohol, 0.86 ton of DDGS feed, 0.86 ton of liquid carbon dioxide and 0.08 ton of crude corn oil.

With the completion of our new CPE and foam insulation facilities in July and September 2013, respectively, we began to produce and sell CPE products and foam insulation products. Due to the weak demand of our foam insulation products, in 2016, after a comprehensive review of the current market, we exited the foam insulation business.

Edible Alcohol

Edible alcohol is a colorless, transparent solution of ethanol or a mixed solution of water and ethanol that is produced through the filtration and refined distillation of fermented grain and yeast. We produce our edible alcohol through the distillation of fermented corn. Edible alcohol is an organic product used in various industries to produce a wide range of other products including alcoholic drinks, cleaning solvents, perfumes, cosmetics, dyes, medicines and fuel. The overwhelming majority of our customers are in the beverage and food industry, followed by the chemical industry and pharmaceutical industry. During the fiscal years ended December 31, 2014, 2015 and 2016, sales of edible alcohol accounted for 64.8%, 66.0% and 68.6% of our revenues, respectively.

56

[Table of Contents](#)

In the food and beverage industry, edible alcohol is used for the production of *baijiu*, sparkling and other fruit wines and as a food additive. We produce Grade A edible alcohol, which has alcohol concentration of 99.5%, at Phase II of our Daqing facility with the capacity of 50,000 tons. We produce Grade B edible alcohol, which has alcohol concentration of 95.5%, at Phase II of our Shouguang facility, Phase II of our Daqing facility and Phase III of our Daqing facility, with the capacities of 90,000 tons, 20,000 tons and 120,000 tons, respectively. In addition, we produce Grade C edible alcohol, which has alcohol concentration of 95%, at Phase I of our Shouguang facility with the capacity of 70,000 tons and at Phase I of our Daqing facility with the capacity of 30,000 tons. In general, higher grade edible alcohol commands a higher market price than lower grade edible alcohol. The principal market for our edible alcohol is comprised of sales to producers of intermediate and high grade *baijiu*. During the years ended December 31, 2014, 2015 and 2016, the sale of edible alcohol to distilleries of *baijiu* contributed to 59.7%, 49.9% and 47.8% of our edible alcohol sales revenue, respectively.

A portion of our customers are in the chemical industry and use edible alcohol for chemical products such as acetic acid and glycol. During the years ended December 31, 2014, 2015 and 2016, revenue generated from the sale of edible alcohol to the chemical industry contributed 38.7%, 46.9% and 46.6% of our edible alcohol sales revenue, respectively.

A small number of our customers are in the pharmaceutical industry, where edible alcohol is used as disinfectant, preservative or a feedstock to produce different organic agents. During the years ended December 31, 2014, 2015 and 2016, 0.6%, 2.4% and 5.6% of our edible alcohol sales revenues, respectively, were attributable to the sale of edible alcohol to the pharmaceutical industry.

The average selling price of our edible alcohol per ton for each of the years ended December 31, 2014, 2015 and 2016 was approximately, RMB5,174 (\$746), RMB5,105 (\$736) and RMB4,307 (\$621) respectively.

DDGS Feed

DDGS feed is a high-protein by-product of edible alcohol which contains rich proteins, fats, amino acid, vitamins and various kinds of minerals which are vital to animal growth and suitable for feeding poultry, livestock and fish. DDGS feed is a digestible protein and energy source for beef cattle, can be used in turkey and swine applications and acts as a feed for both feedlot and dairy cattle. DDGS feed is also fed to poultry and its use is increasing in the pork industry. DDGS feed is formed through a distillation, evaporation and drying process which occurs after microbial fermentation of corn in the process of edible alcohol production. In the production of edible alcohol, only starch from the corn is used and the remaining nutrients (such as protein, fiber and oil) are used to produce DDGS feed.

The main market for our DDGS feed is comprised of sales to feed processing factories which provide DDGS feed to poultry, livestock and fish. During the years ended December 31, 2014, 2015 and 2016, sales of DDGS feed contributed to 23.0%, 21.6% and 21.9% of our revenues, respectively. The average selling price of our DDGS feed per ton for each of the years ended December 31, 2014, 2015 and 2016 was approximately RMB2,161 (\$312), RMB1,885 (\$272) and RMB1,595 (\$230), respectively.

57

[Table of Contents](#)

Crude Corn Oil

Crude corn oil is used to produce edible corn oil, which is sold to corn oil producers. In 2011, we installed the crude corn oil facilities in both our Daqing and Shouguang facilities, and began producing crude corn oil by deep-processing corn germ into crude corn oil. During the years ended December 31, 2014, 2015 and 2016, the sales of crude corn oil contributed 7.1%, 6.5% and 3.9% of our revenue, respectively. The average selling price of our crude corn oil per ton for each of the years ended December 31, 2014, 2015 and 2016 was approximately RMB7,041 (\$1,015), RMB6,442 (\$929) and RMB6,370 (\$918), respectively.

Liquid Carbon Dioxide

Liquid carbon dioxide is used extensively in oil exploitation to enhance oil recovery, especially in the tertiary phase of oil exploitation, and as a food additive by the food and beverage industry. Our Shouguang facility has commenced production of liquid carbon dioxide from July 2010. In 2011, we installed the Phase II liquid carbon dioxide facility in our Shouguang facility, which began to generate revenue in August 2011. During the process of fermenting corn, waste carbon dioxide is generated and discharged into the atmosphere. During the years ended December 31, 2014, 2015 and 2016, sales of liquid carbon dioxide contributed to 1.6%, 0.9% and 1.0% of our revenues, respectively. The average selling price of our liquid carbon dioxide per ton for each of the years ended December 31, 2014, 2015 and 2016 was approximately RMB329 (\$47), RMB181 (\$26) and RMB 173 (\$25). Our liquid carbon dioxide production lines not only generate revenue but also serve to reduce air pollution by recycling carbon dioxide.

CPE

CPE products being special synthetic rubber are widely used as raw materials. We completed the construction of our CPE manufacturing plant in July 2013 with annual production capacity of 12,500 tons of CPE products at our Shouguang facility. We further expanded our CPE manufacturing plant and increased the annual production capacity of CPE products to 25,000 tons in 2014. For the year ended December 31, 2014, 2015 and 2016, sales of CPE products contributed to about 3.2%, 4.9% and 4.6% of our total revenues, respectively. The average selling price of our CPE products per ton for the year ended December 31, 2014, 2015 and 2016 was approximately RMB8,724 (\$1,258), and RMB8,547 (\$1,232), and RMB8,251(\$1,189), respectively.

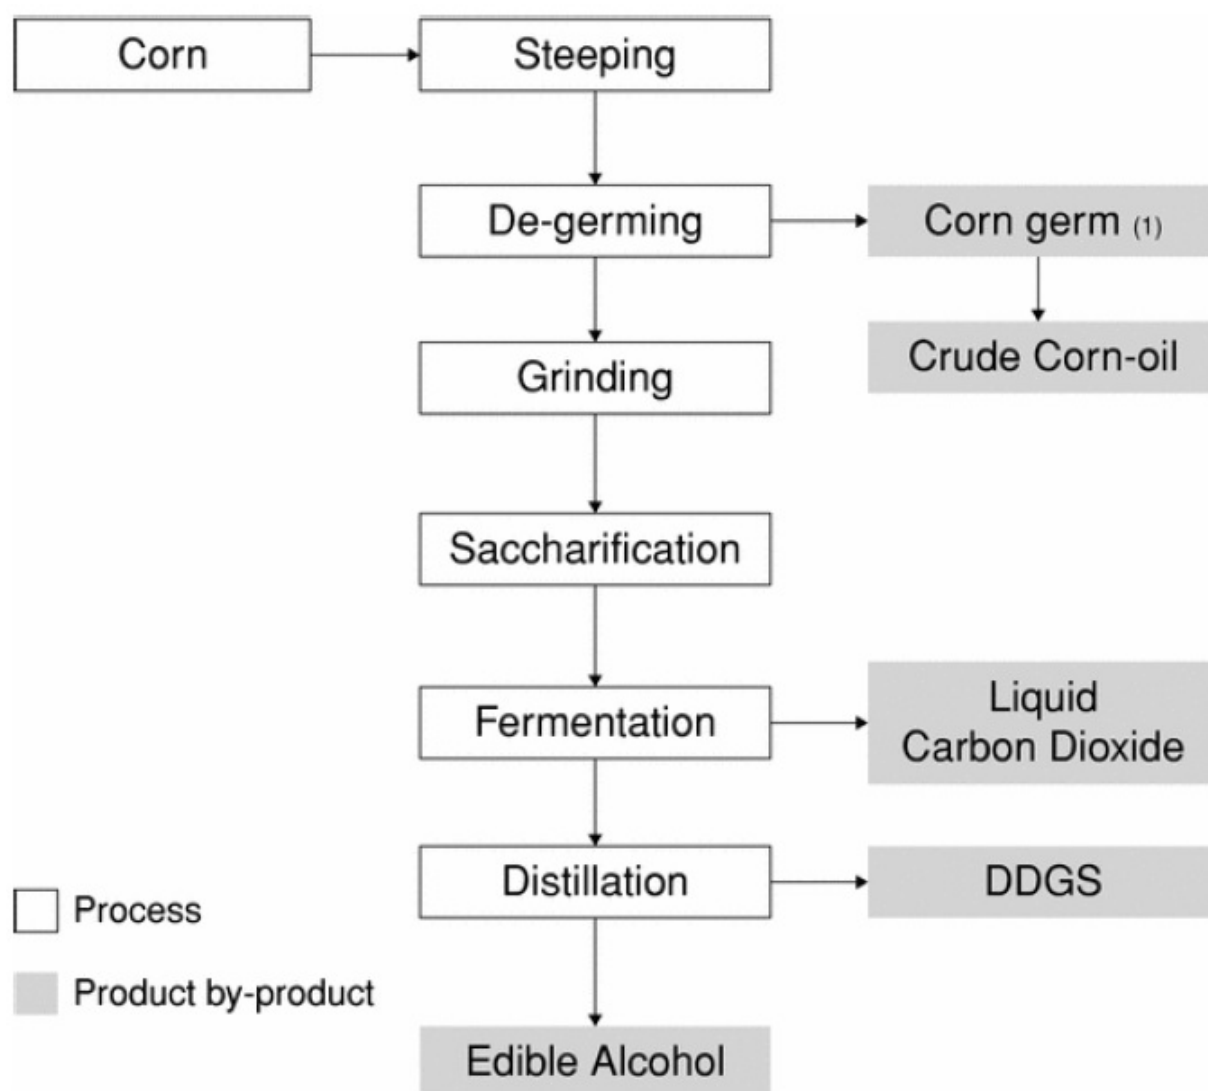

Foam Insulation

Foam insulation offers substantial benefits, such as heat insulation, anti-corrosion and oil resistance, and is widely used in a broad range of industries and products, including construction, textile, pharmaceutical chemicals, metallurgy, refrigeration facilities, electromechanical equipment, and fire retardants. We completed the construction of our foam insulation manufacturing plant at our Shouguang facility in September 2013. For the year ended December 31, 2014, 2015 and 2016, sales of foam insulation products contributed to 0.3%, 0.1% and 0.04% of our total revenues, respectively. After a comprehensive market review of foam insulation products, we took steps to fully write-down the production lines for foam insulation products as a one-time, non-cash impairment of approximately RMB7.0 million (\$1.0 million) in 2015 and, we disposed the production lines and exited the foam insulation business in 2016.

[Table of Contents](#)

Our Key Production Technology

Our production technology for our key product, edible alcohol, is a nimble departure from the traditional dry milling adopted in China comprising smashing dry grains and then adding water for size mixing prior to pulverization, fermentation and distillation. Our Borun wet process instead involves first steeping (approximately 30 hours) and then de-germing the corn kernel after which we smash the residual material with a colloid mill (a machine that is used to reduce the particle size of a solid which is suspended in a liquid) prior to fermentation (approximately 65 hours) and distillation. Below is a simplified flowchart of our Borun wet process.

Through the implementation of our self-developed production process we have the ability to extract corn germ from the corn, enabling us not only to generate revenue from the sale of such corn germ but also to save on energy costs by removing corn germ from the process. The extraction of corn germ reduces the content of fusil oil in the alcohol, which improves the purity of the product and taste. During the traditional method, corn germ remains in the process and is ultimately converted into corn germ lipids (fats), the presence of which during a later stage of waste water treatment inhibits the production and output of methane. Since we recycle methane through an anaerobic process to supplement our fuel needs (for heating our boilers, for example), the absence of corn germ (and, thus, corn germ lipids) in the Borun wet process during such water treatment stage increases our yield of methane, thereby reducing our dependence on coal for our energy needs.

[Table of Contents](#)

Our Borun wet process has been developed by our team of professional technicians through years of research and refinement. We believe the key to our gradual improvement on our production technology is our understanding and control of temperature and acidity as well as other key parameters during each stage of the production process. This understanding and application requires continuous and long-term research by our technical professionals as well as the timely inspection, adjustment and replacement of key components of our equipment. Although we understand that there are companies in other countries, such as the United States, that employ similar methods, based upon our knowledge of our industry and our patented Borun wet process, we believe we are the only edible alcohol manufacturer that utilizes such a technology in China. The State Intellectual Property Office of the PRC has approved our application for a patent of invention for our Borun wet process.

In addition to our production technology described above, we have modern production lines with state of the art equipment. For example, we now utilize six- tower fermentation and distillation equipment to produce Grade A edible alcohol and utilize five-tower fermentation and distillation equipment which enables us to produce Grade B edible alcohol as opposed to three-tower equipment which generally produces ordinary grade Grade C edible alcohol. Most edible alcohol producers in China have three-tower equipment and thus our Borun wet process produces a purer, higher quality product which we believe will increase our popularity among customers.

Our Supply of Electricity

Our Shouguang and Daqing facilities were designed and built to be self-sufficient in power supply through the construction of their own coal-fired power-generating systems. To satisfy the electricity demand from our Phase III Daqing facility, we constructed additional coal-fired power-generating systems. The new power-generating system for our Phase III Daqing facility will allow us to continue to be self-sufficient in power supply. Each of our Shouguang and Daqing facilities is connected to the national grids which allow us to access electricity from the local grid (to the extent available) when our turbines are under repair or their operations otherwise interrupted.

We carry out inspection, maintenance and repair works for our electricity supply system regularly to ensure a stable and continuous supply of electricity to our manufacturing facility and reduce the possibility of system failures. We carry out a full-scale inspection and maintenance program for our electricity supply system annually. This inspection and maintenance program takes approximately a week to complete. Once a stoppage in electricity occurs, our power-generating systems take a few hours to return to normal output efficiency levels.

Environmental Protection

We strive to meet all applicable environmental standards and seek to increase recycling and waste energy recovery. We believe our Borun wet process is an environmentally clean production technology with little pollution or discharge. We produce excess heat, solid waste (carbon soot, sulfur dioxide, nitrogenoxide) from coal burning, wastewater and generate carbon dioxide and methane in our production process. The solid waste and wastewater produced is subject to applicable national and local discharge limits.

[Table of Contents](#)

For example, due to the abundance of methane output, we can reach the discharge standard in the wastewater treatment as our COD content is less than 50 milliliters per cube, which exceeds the Chinese minimum national standard requirement of 100 milliliters (“COD” is often measured as a rapid indicator of organic pollutants in water, is typically measured in both municipal and industrial wastewater treatment plants and gives an indication of the efficiency of the treatment process). We also recycle methane produced in our wastewater treatment process to generate electricity.

We have a pollution control system in relation to our wastewater discharge installed in all of our production plants. These systems are connected directly to local environmental bureaus so that the local environmental bureaus can monitor whether our wastewater discharge is up to the relevant environmental standard. Except as otherwise disclosed in this annual report, we are currently in full compliance with relevant PRC environmental regulations.

In the process of burning coal to supply electricity, we produce solid waste which is sold normally for road building or as a type of construction material.

Quality Control Measures

We recognize the importance of stringent quality controls in our production and have established quality control departments responsible for implementing quality control measures and monitoring quality control policies and procedures. Quality control measures are in place throughout the production process to ensure that the finished products will meet our quality standards. We test raw materials, work-in-progress and finished products at our facilities throughout the production process.

Our quality control policies and procedures include: (1) a set of management policies for production, including the technical standards, detailed operational guidelines, procedures for updating technical data and on-going analyses of technical indicators; (2) detailed descriptions of the duties of each person involved in the production of our products, (3) the implementation of detailed reporting and transitional systems; (4) periodic assessments of the effectiveness of technical data and the quality of management;(5) the establishment of detailed operational procedures over key production cycles such as fermentation and distillation; and(6) incentive plans encouraging staff in the improvement of production quality and efficiency.

In addition, each of our quality control departments performs on-site inspection of corn at granaries or when raw materials are delivered to ensure that they meet the required standards.

Our Research and Development

We spent approximately RMB1,580,480 (\$227,833), RMB968,000 (\$139,542) and RMB1,066,400 (\$153,726), during the fiscal years ended December 31, 2014, 2015 and 2016, respectively, on Company-sponsored research and development activities, including, without limitation, all activities in respect of our in-house developed Borun wet process.

[Table of Contents](#)

We currently have a research and development department staffed with ten individuals that have qualifications in various disciplines including fermentation engineering, biological technology and applied biology and food engineering. Our research and development team is mainly responsible for the cultivation and selection of enzymes for fermentation, improvement of our production technique and processes, improvement of the quality of our products and collating industry standards and information and ensuring we are abreast of advance technologies.

We believe the key to our gradual improvement in our production technology is our understanding and control of temperature, enzyme and acidity as well as other key parameters during each stage of the production process. This understanding and application requires continuous and long-term research by our technical professionals as well as the timely inspection, adjustment and replacement of key components of our equipment.

Our Production Facilities and Current Production Capabilities

We have two production facilities, one in the city of Shouguang, Shandong Province (our Shouguang facility) and one in Daqing City in Heilongjiang Province (our Daqing facility). Our Shouguang facility is licensed to produce 160,000 tons of edible alcohol per year. Our Daqing facility has a government-issued production license to produce 330,000 tons of edible alcohol; however its current production capacity is 220,000 tons.

Our Shouguang facility is ten kilometers from the Yangkou Port, which is located in the northern part of the city of Shouguang, Shandong Province, at the mouth of Xiaoqinghe River on the southwest coast of Laizhou Bay of the Bohai Sea in eastern China. The facility occupies an area of 4,312,985 square feet (approximately 400,689.81 square meters) and employs 714 Company-trained employees. There are direct routes from the Yangkou Port to Japan, Korea, Singapore, Hong Kong, Macau and other countries and regions. The Bohai Sea Rim Economic Circle, where the port is situated, is one of the most active regions in China's economy.

At our Shouguang facility, we have two production lines in which the first production line was completed in 2006 to produce Grade C edible alcohol with a designed capacity of 70,000 tons per annum while the second production line was completed in August 2009 to produce Grade B edible alcohol with a designed capacity of 90,000 tons per annum. Currently, annual production capacity of our Shouguang facility is 160,000 tons of edible alcohol. We believe our Shouguang facility is the largest edible alcohol manufacturer in Shandong Province.

Our Daqing facility is located in the Corn Industrial Park of the Datong District of Daqing City in Heilongjiang Province in northeastern China. The facility occupies an area of 2,358,978 square feet (219,156.4 square meters) and employs 445 company-trained employees. Based on our understanding of this industry, we believe the Daqing facility is one of the largest private enterprises and edible alcohol manufacturers in Heilongjiang Province.

[Table of Contents](#)

We acquired our Daqing facility in July 2008 and placed this facility into production at the end of 2008 with one production line. Upon completion of Phase II at our Daqing facility in August 2009, our annual production capacity at that facility increased to 100,000 tons of edible alcohol. Upon completion of our Phase III Daqing facility in January 2011, our annual production capacity at that facility increased to 220,000 tons of edible alcohol.

In addition to the production facilities of edible alcohol and its by-products including DDGS feed, crude corn oil and liquid carbon dioxide, we completed the construction of our new CPE and foam insulation products manufacturing plants at our Shouguang facility with the annual production capacities of 12,500 tons and 40,000 cubic meters in July and September 2013, respectively. We further expanded our CPE manufacturing plant and increased the annual production capacity of CPE products to 25,000 tons in 2014.

The following table summarizes the actual production level for each of our products during the years ended December 31, 2014, 2015 and 2016:

	Year ended December 31,		
	2014	2015 (tons)	2016
Edible alcohol	309,145	343,840	337,959
DDGS feed	266,384	294,312	295,962
Liquid carbon dioxide	119,985	127,261	120,852
Crude corn oil	23,933	26,906	13,021
CPE	10,322	14,064	11,394
Foam insulation	8,218	457	—

Our Customers and Methods of Distribution of our Products

Our customers are primarily local *baijiu* distilleries and chemical industries in Shandong and Heilongjiang provinces. Currently, we sell over 67.3% of our edible alcohol to 26 customers mainly in Shandong and Heilongjiang provinces.

After our expansion of our Daqing facility in August 2009, we began using two railways and one 1,000 meter-long train station to deliver our products. The station is approximately five kilometers away from our Daqing facility. The railways and station were specifically designed for the transportation of edible alcohol from our Daqing facility. This allows us to transport our products to customers in Jiangsu, Zhejiang, Shanghai, Fujian, Guangdong, Sichuan and other regions in southern China. We started selling in and transporting our edible alcohol to Sichuan Province in December 2009. We have also successfully developed customers in Anhui, Jiangsu, Hebei, Jilin and Liaoning provinces.

[Table of Contents](#)

Most of our orders for edible alcohol are made by customers who arrange to come to our facilities to pick up their orders at our facilities. However, we do deliver to a certain portion of our edible alcohol customers who will be liable for the shipping costs under agreed special arrangements. For DDGS feed, crude corn oil, liquid carbon dioxide, CPE and foam insulation products, all of our customers come to our facilities to pick up their orders and we have never been responsible for delivery and transportation for such by-products. This is common and consistent with the terms of our contracts with such customers and such customers usually make payment after they acknowledge their acceptance of such products (usually within 60 days of receipt of the products by such customers).

Edible alcohol is transported using alcohol tankers for both road and rail. Generally, we will enter into a transportation contract with a delivery company and then we assign an escort to accompany the shipment in order to ensure the safe delivery of the product and to ensure our customers' satisfaction. The party who causes the loss during such transportation is responsible for the cost of such loss.

We have never had any significant delays in the delivery of our edible alcohol under such special arrangements and we believe our delivery customers have been satisfied with our service. We do not depend on any single delivery company or a few delivery companies such that the loss of any one or more of them would have a material adverse effect on our business.

Our Sales and Marketing

[Table of Contents](#)

We have a sales and marketing team of 39 employees, with a sales manager overseeing our overall sales and marketing initiatives.

We do not sell our products through distributors. Our sales teams in Shandong Province and Heilongjiang Province market our products directly to our customers. However, as part of our strategy to diversify the geographical spread of our customer base, we have expanded our sales of edible alcohol to customers in Sichuan, Anhui, Jiangsu, Hebei, Jilin and Liaoning provinces. We expect to continue to sell more edible alcohol to other provinces in the future.

We price our products based on their respective prevailing market prices taking into account factors such as our manufacturing costs and, to a lesser extent, order size. As corn and coal are the key materials for our production, any fluctuation in the supply or price of either of these have an impact on our pricing determination. We convene meetings regularly to determine the price of our products. The general manager, sales manager, financial controller and sourcing manager participate in these meetings. Our customers generally pay at the time of receipt of our delivery or within 60 days after their receipt of our products, resulting in a short accounts receivable cycle. For new customers, we may also require a prepayment before delivery of our products.

Our Suppliers and Raw Materials

We secure corns in advance during the harvest season.

Starting from November 2009, we entered into framework agreements with local granaries in Heilongjiang Province, as corn prices were generally the lowest in the Northeastern region of China, to engage them to purchase corn for us from local farmers during the harvest season and store them for subsequent delivery to substantially satisfy the corn requirements of our Shouguang facility and Daqing facility during the non-harvest season. Such supply contracts provide us access to corn at prices which we believe have historically been lower than the market price in the off season and times of high price volatility due to crop failures and other factors. Contractual terms under the framework agreements included, among others, basis of purchase price and additional costs, the total quantity of corn we intend to purchase in the coming harvest season, the standard of corn quality, the delivery schedule, and the payment milestones. These terms are to be re-negotiated, updated and agreed before the harvest season, usually around November, every year.

Starting from November 2013, we entered into new purchase arrangements with local granaries. We fully settled the corn price (i.e. purchase cost) before the granaries executed the procurements per our agreed schedule. In prior years, we did not pay for the corn (with the exception of a 10% deposit) until the corn was delivered to our manufacturing facilities, and the granaries retained the risks and rewards of ownership of the corns purchased under the framework agreement until our receipt of such delivery. Due to this change, we initiated a “bill and hold” arrangement with the granaries whereby we take possession of the corn upon purchase and storage of the corn by the granary. Under this new policy, after the corn is collected from the local farmers as planned, both the quantity and quality of corn is inspected and acknowledged by one of our employees assigned to the granaries’ warehouses. The corn is then separately stored and distinguished from other inventory of the granaries, and subject to supervision by our designated employee. Therefore, once the stock-in processes are completed, the granaries neither retain any specific performance obligations nor have the right to sell the collected corn on behalf of us to any third party. As the granaries’ sole obligation is to manage the storage of corn for us, the significant risks and rewards of ownership of the purchased corn are considered to be transferred to us upon our payment to the granaries. In addition, we also bear the risk of loss in the event of a decline in the market value of the collected corn. The custodial risks of the collected corn are properly insured by the granaries and us. Upon the delivery of corn, we pay to the granaries a fixed handling fee of RMB124 (\$17.9) per ton as stipulated in the framework agreement, mainly for the storage of our corn at the granaries’ warehouses.

As of December 31, 2016, 397,639 tons of corn were collected by the granaries on behalf of us, amounting to total purchase costs of RMB550.0 million (\$79.3 million) and recognized as inventory by us. By the end of the first quarter of 2017, we successfully purchased 600,607 tons of corn through the granaries and local farmers, which should substantially satisfy our corn consumption at our Shouguang and Daqing facilities during the coming non-harvest season.

[Table of Contents](#)

Formerly, we maintained an inventory of about half a month’s corn requirement at our Shouguang facility and Daqing facility. During the years ended December 31, 2014, 2015 and 2016, corn accounted for approximately 84.7% , 82.5% and 79.9% of our cost of goods sold, respectively.

In addition to corn, we rely on the supply of coal to power our production facilities. At our Shouguang facility, we purchase coal primarily from distributors who source their coal from Shanxi Province. At our Daqing facility, we purchase all of our coal from distributors who source their coal from Heilongjiang Province and the Inner Mongolia Autonomous Region. In general, from June through September, coal prices are lower as compared to coal prices from October through July. Therefore, we purchase larger quantities from June through September and stock our reserves. During the years ended December 31, 2014, 2015 and 2016, coal accounted for approximately 6.8%, 6.1% and 6.5% of our cost of goods sold, respectively.

Seasonality

We believe our business is not seasonal in nature.

Competition

There is no dominant leader in our industry in the PRC but there are a few manufacturers whose capacities are similar to ours. We compete primarily on the basis of customer recognition and industry reputation, product price and quality, ability to deliver our product on a timely basis, and a competitive cost structure. We believe we can continue to compete successfully with our competitors because of our product quality, competitive cost structure and timely delivery of our product. In order to maintain and enhance our competitive advantages, we must continue to focus on our competitive pricing through cost control, product quality and improving our proprietary production processes.

[Table of Contents](#)

We only compete with domestic companies and do not compete with any international producers. Our major competitors include the other top 10 edible alcohol producers in China such as Jilin New Tian Long, COFCO Zhaodong, Meihokou Fukang and Lianyungang Dongcheng.

Although we believe that our competitive strengths provide us with advantages over many of our competitors, some of our competitors may have stronger brand names, stronger customer bases, greater access to capital, longer operating histories, longer or more established relationships with their customers and greater marketing and other resources than we do. If we fail to maintain or improve our market position or fail to respond successfully to changes in the competitive landscape, our business, financial condition and results of operations may suffer.

Safety Procedures and Measures

Our edible alcohol and methane produced during our production process is flammable. We design and implement our production process with safety precautions against the flammable nature of edible alcohol and methane. We store produced edible alcohol in a warehouse away from our production facilities to reduce the risk of accidents (see Item 3.D, “Key Information — Risk Factors — *“Our operations are subject to various risks associated with our use, handling, storage and disposal of hazardous materials, some of which are toxic and flammable. If we are found liable for contamination, injury to employees or others, or other harms related to our use, handling, storage and disposal of hazardous materials, our business, reputation, financial condition and results of operations may be adversely affected”* and “Information on the Company — Business Overview — Regulation — Regulation On Safety Administration Of Dangerous Chemicals”).

The relevant safety law which governs us is the Production Safety Law of the PRC, which sets out the legal standard for safety measures in relation to the establishment, modification and expansion of production facilities. In case of any non-compliance, the relevant governmental body has the right to order the non-complying company to remedy such non-compliance within a given period of time, failing which, it may be subject to an order for cessation of production and penalty charges, and if it amounts to a criminal offense, such company will be prosecuted under the criminal laws.

We have implemented comprehensive occupational health and safety procedures and measures for our operations. Our management examined and scrutinized the internal industrial safety control measures and safety awareness of the workforce and supervisors in all plants and within the workstations. Safety-related training and education were provided periodically to promote safety awareness of the Group's management and employees.

We have internal safety operating manuals and risk approval procedures to ensure strict compliance with the internal rules and regulations by the employees. Our management and employees are trained and continually assessed so as to comply with all the required procedures and the relevant operating guidelines.

[Table of Contents](#)

Intellectual Property

We have obtained two Trademark Registration Certificates from the Trademark Office of the State Administration for Industry and Commerce in respect of our two trademark applications, respectively and our applications for other trademarks are still pending approval.

On January 11, 2012, the State Intellectual Property Office of the PRC approved our application for a patent of invention for our Borun wet process and based upon our knowledge of our industry, we believe we are the only corn-based edible alcohol producer in China using the Borun wet process. For a description of our Borun wet process technology, please see the subsection above entitled "Information on the Company — Business Overview — Our Key Production Technology".

Furthermore, we registered the domain name of www.chinaneborun.com, which is used to support our business and promote our Group.

Description of Properties: Land Use Rights

For our Shouguang facility, we have five Land Use Right Certificates covering an area of approximately 4,312,985 square feet (400,689.8 square meters) and 28 Property Ownership Certificates covering a construction area of approximately 377,489 square feet (35,070.0 square meters). For our Daqing facility, we have three Land Use Right Certificates covering an area of approximately 2,358,978 square feet (219,156.4 square meters) and 39 Property Ownership Certificates covering a construction area of approximately 1,011,825.56 square feet (94,000.9 square meters).

Under Chinese law land is owned by the State or rural collective economic organizations. The State issues to the land users the land use right Certificate. Land use rights can be revoked and the land users forced to vacate at any time when redevelopment of the land is in the public interest. The public interest rationale is interpreted quite broadly and the process of land appropriation may be less than transparent. According to the Land Administration Law of the People's Republic of China, in any of the following cases, the relevant land administrative department may recover the land use right of State-owned land where: (1) land is to be used for the sake of the public interest; (2) land is to be used for adjustment in re-building old city districts in order to implement urban construction plans; (3) when the term for the land use right expires according to what is agreed upon in the contract for compensated use of land and the land user has failed to apply for extension or failed to get approval for extension; (4) the use of land originally allocated has been stopped due to cancellation or removal of units; (5) roads, railways, airports and mining sites that have been approved to be abandoned. Proper compensation should be given to land use right users whereas the use right of State-owned land is recovered according to the provisions of (1) and (2) of the preceding paragraph.

[Table of Contents](#)

With respect to the expropriation of land by the State, local governments at or above the county level are required to make an announcement and to organize the implementation after such determination in accordance with the applicable legal procedures. Owners or users of the land expropriated should, within the time limit specified in the announcement, go through the compensation registration for expropriated land with the land administrative departments of the local people's governments on the strength of the land certificate. Each of our two facilities rely on these land use rights as the cornerstone of their operations, and the loss of such rights would have a material adverse effect on us.

Insurance

The insurance industry in China is still at an early stage of its development. Insurance companies in China offer limited business insurance products or offer them at a high price. Business interruption or similar types of insurance are not customary in China. We currently maintain insurance coverage on our property and facilities and machinery, which, as of December 31, 2016, were approximately RMB 1,865.0 million (\$268.8 million) on our property and facilities and machinery, and approximately RMB200.0 million (\$28.8 million) on our inventory. We do not carry any third-party liability insurance to cover claims in respect of personal injury, property or environmental damage arising from accidents on our property or relating to our operations other than on our transportation vehicles. We have not had a third-party liability claim filed against us during the last five years.

Employees

As of the date of this annual report, our Shouguang facility had 714 full-time employees and our Daqing facility had 445 full-time employees for a total of 1,159 full-time employees, which is comprised of 880 manufacturing staff, 240 management and administrative personnel, and 39 full-time employees in our sales department. We believe we have a good relationship with our employees, and we have never experienced a work stoppage or a labor dispute that has interfered with our operations. At our Daqing facility, we house our employees in Company-owned apartment buildings. With respect to our Shouguang facility, we have chosen a piece of land and intend to construct dormitories for our employees in the city of Shouguang. When complete, we will allocate housing for our employees and provide shuttle bus services to and from the Shouguang facility.

In the PRC, in accordance with the relevant labor and social welfare laws and regulations, we are required to pay, in respect of our employees in the PRC, various social insurance including pension insurance, medical insurance, unemployment insurance, and occupational injury insurance. In accordance with applicable PRC regulations on housing funds, we are also required to contribute to a housing fund for our employees. In the past, we had been delinquent with respect to the payment of social insurance and housing fund payments. We may be liable for the payments and fines arising from such delinquent payments. Such late payments were fully settled and clearance from the relevant authorities was obtained on January 2010. Since 2010, the Company made the monthly social insurance and housing fund payments in accordance with PRC laws and such payments were recorded as part of staff costs in our financial statements. Total contributions to such funds were approximately RMB9.8 million (\$1.4 million), RMB10.4 million (\$1.5 million) and RMB10.5 million (\$1.5 million) for the years ended December 31, 2014, 2015 and 2016, respectively. As of December 31, 2016, the Company has no payment obligation related to such social insurance which remains unpaid or is delinquent. We expect that the amount of our contribution to the government's social insurance funds will increase in the future as we expand our workforce and operations.

[Table of Contents](#)

For the year ended December 31, 2016, we have paid RMB64,260 (\$9,263) and RMB4,870,975 (\$702,173) for group casualty insurance and pension insurance, respectively.

Legal Proceedings

We are not a party to any material legal proceedings.

REGULATION

Introduction

Our primary production and operation entities are Shandong Borun and Daqing Borun, each of which is located in the PRC. These entities, with respect to their business operations, are subject to relevant laws, regulations, rules, industry policies and extensive government regulatory policies.

With respect to its current business operations, we are mainly subject to the following laws, regulations and rules:

Business Licenses

On December 1, 2000, the Shouguang Administration for Industry and Commerce granted Shandong Borun the right to operate for a period of three years from the date of Shandong Borun's incorporation and, on November 15, 2012, the Shouguang Administration for Industry and Commerce extended the business term of Shandong Borun to March 26, 2062. On July 9, 2008, the Daqing Administration for Industry and Commerce (Datong Branch) granted Daqing Borun the right to operate with no business term limitation.

Shandong Borun and Daqing Borun can only conduct business within their registered business scopes as specified on their business licenses. Shandong Borun's license includes production and sale of edible ethanol, food additives liquid carbon dioxide, corn oil, germ meal, single feed (maize alcohol lees), chlorinated polymer related product, sale of high-molecular polymer materials (exclusive of dangerous chemicals), wholesale of glucoamylase, amylase, the purchase of foodstuffs and the import and export of goods (exclusive of distribution business) subject to the approval of PRC government in case of quota license and special regulations of the PRC. Daqing Borun's license includes ethyl alcohol (Work Safety License expires on November 21, 2017), production and sale of edible alcohol, edible vegetable oil and single feed, purchase of corn, rice, soybean and coarse cereals, sale of grain, complex fertilizer, compound fertilizer and bulk-blended fertilizer, and the import and export business. Any further amendment to the scope of our business will require additional applications and government approval or registration.

[Table of Contents](#)

Industry Policy

On March 27, 2011, the National Development and Reform Commission of the PRC, or the NDRC, issued the Guidance Catalogue on the Adjustment of Industrial Structure (2011 Version) which was amended in 2013, in which the production of alcohol line falls under the restricted industry item and the production of alcohol line with production capacity less than 30,000 tons per year (except for alcohol extracted from waste sugar) falls under the eliminative industry item. According to the Interim Provisions on the Promotion of Adjustment of Industrial Structure promulgated by the State Council and implemented on December 2, 2005, investment into new projects of restricted industries is prohibited. Companies previously doing business in restricted industries may adopt measures to reform and upgrade.

On June 3, 2007, the State Council issued a "Notification on the Issuing of the Comprehensive Work Plan on Saving Energy and Reducing Emission" which stipulated the increasing elimination of "backward" production capacities in paper-making, alcohol, monosodium glutamate and citric acid industries. Alcohol manufacturers with "backward" production technologies and equipment, and those smaller manufacturers having a production capacity less than 30,000 tons per year of edible alcohol would thereafter be eliminated from competing in the alcohol industry during the 11th Five-Year Plan period (2006-2010), and 1.6 million tons of such "backward" production capacity in the alcohol industry are to be eliminated by the end of the 11th Five-Year Plan period. On August 6, 2012, the State Council issued a "Notification on the Issuing of 12th Five-Year Work Plan on Saving Energy and Reducing Emission" which stipulates the increasing elimination of alcohol line with production capacities less than 30,000 tons per year of edible alcohol (except for alcohol extracted from waste sugar) and the total target of elimination of 1 million tons during the 12th Five-Year Plan period (2011-2015).

The export rebate rate of alcohol was cut to zero from 13.0 percent in 2006, then raised to 5.0 percent in June 2009 to boost China's alcohol export. Seeing the great increase of alcohol export may endanger local supply, the government dropped the export rebate rate to zero in 2010. However, the export rebate rate of undenatured ethyl alcohol of an alcoholic strength by volume of 80% vol. or higher was raised again in 2015 and was 13.0 percent from January 1 to December 31 of 2015.

Starting from September 2010, the alcohol industry applies the Cleaner Production Standard for Alcohol Industry (HJ 581-2010) to regulate the pollution caused by the production process.

Overall, we believe such national industry policy will have a positive impact on our business and will continue to be a contributing factor to our growth and developmental potential. Since the implementation of this national industry policy, the production capacity of the whole alcohol industry has substantially decreased while recent market trends show that alcohol consumption continues to rise. Therefore, we have reason to believe the alcohol industry as a whole will continue to be a growth industry as demand continues to rise. However, such national industry policy may also have a negative impact on our business. According to the “Guidance Opinion on Promoting the Healthy Development of Corn Deep-Processing Industry” issued by the NDRC on September 5, 2007, the amount of corn used for “deep-processing” cannot exceed 26% of the total corn consumption in the 11th Five-Year Period. During the 11th Five-Year Period, construction projects for corn deep-processing which have received approval but have not begun shall discontinue plans for construction. Since the production of edible alcohol using corn is a form of “deep-processing” work, this policy may limit our ability to obtain our primary raw material (corn). We believe more than 30.0% of total corn consumption was used for corn deep-processing in 2011, which goes beyond the government plan to restrain the deep processing ratio below 26 percent. The State Administration of Grain issued the 12th Five-Year Plan for Grain and Oil Processing on January 13, 2012 (the “12th Five-Year Plan”) which requires the continuous control of the excessive corn deep-processing growth and the reasonable rate between the amount of total yield and the total corn consumption till the end of the 12th Five-Year. The 26% ratio has not been changed in the 12th Five-Year Plan, however, it is uncertain whether the PRC governmental entities will change the ratio or what ratio the PRC government is expected to apply in the next few years.

[Table of Contents](#)

Material Licenses Relating to Our Products

Alcohol and Liquid Carbon Dioxide Production

In accordance with the Regulations of the PRC on the Administration of Production License for Industrial Products promulgated by the State Council on July 9, 2005 and implemented on September 1, 2005, the Circular on Issues Concerning the Production License of Edible Alcohol Product issued by the General Administration of Quality Supervision, Inspection and Quarantine (AQSIQ) of PRC on December 29, 2010 and the Circular on the Promulgation of Catalogue of Products subject to Production License issued by AQSIQ of the PRC on December 5, 2007 and last amended in 2012, the State Council has put in place a production licensing system for enterprises which produce edible alcohol and liquid carbon dioxide.

Feed Production

According to the Administrative Measures on the Production License of Feed and Feed Additives issued on May 2, 2012 by the Ministry of Agriculture, as amended on December 31, 2013, and on May 1, 2016, an applicant for the establishment of a feed production enterprise shall obtain a production certificate. The feed and feed additives production enterprises also required an annual filing before the end of February each year. The Regulation on the Administration of Feeds and Feed Additives, issued on May 29, 1999 and last amended on March 1, 2017, further provides that feed products must be granted quality certificates before such products may be commercialized. According to the Administrative Measures on the Production License of Feed and Feed Additives issued on May 2, 2012 by the Ministry of Agriculture, as amended on December 31, 2013, and on May 1, 2016, an applicant for the establishment of a feed production enterprise shall obtain a production certificate. The feed and feed additives production enterprises also required an annual filing before the end of February each year. The Regulation on the Administration of Feeds and Feed Additives, issued on May 29, 1999 and last amended on March 1, 2017, further provides that feed products must be granted quality certificates before such products may be commercialized.

Food Additives Production

According to the Provisions on the Supervision and Administration of Production of Food Additives promulgated on April 4, 2010 by the AQSIQ, an applicant for the establishment of a food additives production enterprise shall obtain a production certificate.

Food Production

According to the Measures for the Administration of Food Production Licenses promulgated on April 7, 2010 by the AQSIQ and effective on June 1, 2010 and last amended in August 2015 and the Rules on the Review of Food Production License Regarding 26 Kinds of Food Such as Edible Vegetable Oil promulgated by the AQSIQ on December 27, 2006, and Administrative Measures for Food Production Licensing promulgated by the SFDA on August 31 2015 and became effective on October 1 2015, an applicant for the establishment of a vegetable oil production enterprise shall obtain a production certificate.

Grain Purchase

According to the Regulation on Administration of Grain Distribution promulgated by the State Council on May 26, 2004 and amended on July 18, 2013 and February 6, 2016, enterprises engaged in business of purchase, sale, storage, transport, processing as well as import and export of grain which includes wheat, rice, corn, coarse cereals shall obtain qualification for grain purchase. According to the Provisional Measures on Administration of Examination and Approval for Qualification of Grain Purchasers jointly promulgated by the State Grain Administration and State Administration of Industry and Commerce on July 9, 2004, enterprises engaged in grain purchase shall obtain a grain purchase certificate from the authority responsible for examination and approval of qualification of grain purchase at the level equal to the registration authority with which the enterprise shall go through the registration of establishment.

Environmental Regulations

Our production processes generate noise, wastewater, gaseous and other industrial wastes. The major PRC environmental regulations applicable to us include, among others, the Environmental Protection Law of the PRC, the Environmental Impact Appraisal Law of the PRC, the Law of the PRC on the Prevention and Control of Water Pollution, the Law of the PRC on Prevention and Control of Air Pollution, the Law of the PRC on Prevention and Control of Environmental Pollution Caused by Solid Waste and the Law of the PRC on Prevention and Control of Environmental Noise Pollution.

The Environmental Protection Law of the PRC sets out the legal framework for environmental protection in the PRC. The Ministry of Environmental Protection, or the MEP, of the PRC is primarily responsible for the supervision and administration of environmental protection work nationwide and formulating national waste discharge limits and standards. Local environmental protection authorities at the county level and above are responsible for environmental protection in their jurisdictions.

[Table of Contents](#)

Companies that discharge contaminants must report and register with the MEP or the relevant local environmental protection authorities. Companies discharging contaminants in excess of the discharge limits must obtain Pollution Discharging Permit from the competent authority and pay discharge fees for the excess in accordance with applicable regulations and are also responsible for the treatment of the excessive discharge. Government authorities can impose different penalties on individuals or companies in violation of the Environmental Protection Law of the PRC, depending on the individual circumstances of each case and the extent of contamination. Such penalties include but not limit to orders to make corrections, imposition of fines, consecutive punishment by day based on the original fines, orders to restrict production and suspend production for renovation, administrative actions against relevant responsible persons or companies, or orders to close down those enterprises. Where a violation is serious, the persons or companies responsible for the violation may be required to pay damages to victims of the contamination. Where serious environmental contamination occurs in violation of the provisions of the Environmental Protection Law of the PRC resulting in serious loss of public and private property, the persons or enterprises directly responsible for such contamination may be held criminally liable.

Regulation on Work Safety

We are subject to a variety of governmental regulations related to work safety. The major PRC regulations related to work safety applicable to us include Work Safety Law of the PRC and Regulation on Work Safety License.

Work Safety Law of the PRC

The Work Safety Law of the PRC, or the WSL, was adopted at the 28th meeting of the Standing Committee of the Ninth People's Congress on June 29, 2002, became effective as of November 1, 2002, and last amended on August 31, 2014. The WSL is applicable to the work safety of entities engaging in production and business operation activities within the PRC. Such entities must comply with the WSL and other relevant laws and regulations concerning work safety and must strengthen the administration of work safety, establish and perfect a system of responsibility for work safety, ensure conditions for safe production, and ensure safety in production.

The WSL and other provisions of the relevant laws and regulations create a system for attributing responsibility for work safety accidents and holding liable those found to be responsible for work safety accidents. Entities engaged in the production, operation and storage of hazardous substances, (1) must establish an administrative committee for work safety or have full-time personnel for the administration of work safety; (2) are subject to the examination and approval as well as the supervision and administration of relevant administrative departments, according to the provisions of relevant laws and regulations, national standards or industrial standards; (3) must have archive files for substantial hazardous sources, make regular checks, appraisals, supervisions and controls, make emergency plans, and inform employees and other relevant people of the emergency measures that should be taken under emergency circumstances; (4) must report, according to the relevant provisions of the state, the substantial hazardous sources and the corresponding safety measures and emergency measures to the administrative department and other relevant departments of the local people's government in charge of the supervision and administration of work safety for archive purposes; and (5) must have exits in the sites of production and the dormitories of the employees which meet the requirements for emergency dispersal of people, have highly visible marks and be clear of obstructions. Entities shall be prohibited from closing or obstructing the exits of the sites of production and business operation and the dormitories of the employees.

[Table of Contents](#)

Regulation on Work Safety Licenses

The Regulation on Work Safety Licenses, or RWSL, was promulgated by the State Council on January 13, 2004 and last amended in July, 2014. According to the RWSL, an enterprise engaging in the production of hazardous chemicals must apply for a work safety license before production.

To obtain a work safety license, an entity must satisfy certain work safety conditions, which mainly include: (1) establishing and improving a system for work safety, and formulating a complete set of work safety rules; (2) investing in safety satisfying applicable work safety requirements; (3) establishing administrative entities for work safety and installing full-time work safety administrative personnel, who have passed the appraisal conducted by the competent authority; (4) ensuring that special personnel have passed the appraisal conducted by the competent authority, and have obtained qualification certificates for special operations; (5) ensuring employees have gone through work safety education and training; (6) ensuring premises, work sites, safety facilities, equipment and technology meet the requirements of the relevant work safety laws, regulations, standards and rules; (7) providing employees with labor protection articles which are up to the national standards or standards of the industrial sector concerned; and (8) establishing emergency rescue plans for accidents, appointing entities or personnel specializing in emergency rescue, and providing necessary emergency rescue materials and equipment.

A work safety license is valid for three years. If a work safety license needs to be extended upon its expiration, an entity shall go through the extension procedures three months prior to such expiration with the administrative department from which the license is issued. If an enterprise strictly abides by the relevant laws and regulations on work safety and is free of any fatal accident during its work safety license validity period, it will be granted a review-free three-year license extension, with the consent of the administrative department from which the license is issued.

Regulation on Safety Administration of Dangerous Chemicals

The Regulation on Safety Administration of Dangerous Chemicals was promulgated by the State Council on January 26, 2002, and was amended in 2011. This regulation sets forth general requirements for the production and operation of certain chemicals that are considered dangerous and listed in the Dangerous Chemicals Catalogue. The Regulation on Safety Administration of Dangerous Chemicals was further supplemented and elaborated by subsequent regulations and rules. The State Administration of Work Safety of the PRC, or the SAWS, and other relevant state government authorities determine and from time to time adjust the chemicals included in the Dangerous Chemicals Catalogue. Under the PRC laws, the production, operation, storage, transportation of chemicals in the Dangerous Chemicals Catalogue and the industrial use of such chemicals require specific regulatory approval, licenses and permits. In addition, in order to strengthen the supervision and regulation of the safe operation and production of chemicals in the Dangerous Chemicals Catalogue, on July 1, 2012, the SAWS issued the Administration Rules for the Registration of Dangerous Chemicals, according to which the enterprises should complete

registration for the production and import of dangerous chemicals listed in the Dangerous Chemicals Catalogue. In addition, the SAWS issued the Administration Rules for the Operation License of Dangerous Chemicals on July 17, 2012 and amended in 2015, according to which, an Operation License is required for the operation of dangerous chemicals. Pursuant to these regulations, the producers of chemicals in the Dangerous Chemicals Catalogue will need to meet certain production safety requirements and pass a safety inspection conducted by the relevant government authorities. In addition, such producers will need to obtain the relevant work safety license prior to production.

[Table of Contents](#)

Regulation on Labor Protection

The Labor Contract Law of the PRC was promulgated on June 29, 2007 and amended on December 28, 2012. This law governs the establishment of employment relationships between employers and employees, and the conclusion, performance, termination of, and the amendment to employment contracts. To establish an employment relationship, a written employment contract must be signed. In the event that no written employment contract was signed at the time of establishment of an employment relationship, a written employment contract must be signed within one month after the date on which the employer starts engaging the employee.

PRC Patent Law

The PRC first allowed patents for the protection of proprietary rights, as set forth in the PRC Patent Law, in 1985.

Patent Prosecution

The patent prosecution system in China is different from the system in the United States in a number of significant ways. China, like most countries other than the United States, follows the “first to file” principle. In other words, when more than one person files a patent application for the same invention, the patent will be granted to the person who first filed the application. In addition, the PRC requires absolute novelty in order for an invention to be patentable. Pursuant to this requirement, generally, with limited exceptions, any prior written or oral publication in or outside the PRC, demonstration or use in the PRC before the patent application filing prevents an invention from being patented in the PRC. Patents issued in the PRC are not enforceable in Hong Kong, Taiwan or Macau, each of which has an independent patent system. The fact that a patent application is pending is no guarantee that a patent will be granted and, even if granted, the scope of a patent may not be as broad as that of the initial application.

[Table of Contents](#)

Patent Enforcement

When a patent infringement dispute arises, the patent holder or an interested party who believes the patent is being infringed may either file a civil lawsuit or file a complaint with the relevant authorities in charge of the patent administration. A PRC court may grant the patent holder’s or the interested party’s request for a preliminary injunction before the legal proceeding. Damages for infringement are calculated as either (1) the loss suffered by the patent holder or the interested party due to the infringement or (2) the benefit gained by the infringer from the infringement. If it is difficult to ascertain damages in this manner, damages may be determined by using a reasonable multiple of the license fee under a contractual license. Typically, a patent holder in the PRC has the burden of proving that the patent is being infringed. However, if the holder of a production process patent alleges infringement of such patent, the alleged infringing party which produces the same kind of products has the burden of proving that there has been no infringement.

Compulsory Licensing

Under the PRC Patent Law, in some circumstances, where any entity is qualified to utilize a patented technology, but fails to obtain the license from the patent holder on reasonable terms and in a reasonable period of time, the entity is entitled to apply to the State Intellectual Property Office for a compulsory license. A compulsory license can also be granted where a national emergency or any extraordinary state of affairs occurs, where the public interest so requires, or where a registered invention is substantially superior to a prior invention in connection with technology that has a notable economic significance and the application of the later invention relies on the application of the prior invention.

International Patent Treaties

The PRC is also a signatory to major intellectual property conventions, including the Paris Convention for the Protection of Industrial Property, Madrid Agreement on the International Registration of Marks and Madrid Protocol, Patent Cooperation Treaty, Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure and the Agreement on Trade-Related Aspects of Intellectual Property Rights, or TRIPs.

Although patent rights are national rights, there is a large amount of international co-operation under the Patent Cooperation Treaty, or the PCT, to which China is a signatory. Under the PCT, applicants in one country can seek patent protection for an invention simultaneously in a number of other member countries by initially filing a single international patent application pursuant to the PCT and then later filing individual country or region specific applications on the international patent application.

[Table of Contents](#)

Foreign Exchange Regulation

Pursuant to the Foreign Exchange Administration Rules promulgated on January 29, 1996 and amended on January 14, 1997 and August 5, 2008, and various regulations issued by the SAFE and other relevant PRC government authorities, RMB is freely convertible only with respect to current account items, such as trade-related receipts and payments, interest and dividends. Capital account items, such as direct equity investments, loans and repatriations of investments, require the prior approval of the SAFE or its local branches for conversion of RMB into foreign currency, such as U.S. dollars, and remittance of the foreign currency outside the PRC.

Pursuant to the SAFE's Notice on Relevant Issues Concerning Foreign Exchange Administration on Financing and Round-Trip Investment Through Offshore Special Purpose Vehicles by Domestic Residents, or the SAFE Circular No. 75, issued on October 21, 2005, a PRC resident must register with the local SAFE branch before establishing or controlling an overseas special purpose vehicle, or SPV, for the purpose of obtaining overseas equity financing using the assets of or equity interests in a domestic enterprise.

On 4 July 2014, the SAFE promulgated the Circular on Relevant Issues Concerning Foreign Exchange Administration of Overseas Investment and Financing and Round-Trip Investments Conducted by Domestic Residents Through Overseas Special Purpose Vehicles, or the SAFE Circular No. 37, which became effective and superseded the SAFE Circular No. 75 on the same date. Pursuant to Circular No. 37, (a) a PRC resident must register with the local SAFE branch before he or she contributes assets or equity interests in an overseas special purpose vehicle, that is directly established or controlled by the PRC resident for the purpose of conducting investment or financing; and (b) following the initial registration, the PRC resident is also required to register with the local SAFE branch for any major change, in respect of the SPV, including, among other things, a change of the SPV's PRC resident shareholder(s), name of the SPV, term of operation, or any increase or reduction of the SPV's registered capital, share transfer or swap, and merger or division.

Pursuant to Notice of the SAFE on Further Simplifying and Improving Policies for the Foreign Exchange Administration of Direct Investment, which was promulgated on February 13, 2015 and implemented on June 1, 2015, the initial foreign exchange registration for establishing or taking control of a SPV by domestic residents can be conducted with a qualified bank, instead of the local foreign exchange bureau.

We understand that none of our shareholders prior to our initial public offering was a PRC citizen. Our PRC counsel for our initial public offering advised that none of these shareholders was subject to the requirement of the SAFE registration under Circular No. 75. However, due to the vagueness and uncertainty as to how the SAFE regulations are interpreted and implemented and the possible amendments or changes of the SAFE regulations, we cannot provide any assurance that our shareholders who may spend a certain amount of their time in the PRC each year will not be required to make or obtain any applicable registrations pursuant to the SAFE regulations.

Dividend Distribution Regulation

The principal laws and regulations governing dividends paid by our PRC operating subsidiaries include the Company Law of the PRC (1993), amended on January 1, 2006 and 28 December 2013, Wholly Foreign Owned Enterprise Law (1986), as latest amended in 2016, Implementation Rules of Wholly Foreign Owned Enterprise Law (1990), as amended in 2001 and 2014, Chinese-Foreign Joint Venture Law (1979), as amended in 2001, and Implementation Regulation of Chinese-Foreign Joint Venture Law (1983), as amended in 2001, 2014 and 2016. Under these laws and regulations, each of our PRC subsidiaries, including WFOEs, joint venture enterprise and domestic companies in China may pay dividends only out of their accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. In addition, each of our PRC subsidiaries, including WFOEs, joint venture enterprise and domestic companies, is required to set aside at least 10.0% of its after-tax profit based on PRC accounting standards each year to its general reserves or statutory capital reserve fund until the accumulative amount of such reserve reaches 50.0% of its respective registered capital. These reserves are not distributable as cash dividends. Furthermore, each of our WFOEs and joint venture enterprises in China is also required to allocate a portion of its after-tax profits, as determined by its board of directors, to its staff welfare and bonus funds, which may not be distributed as cash dividends.

[Table of Contents](#)

Tax

The key taxes applicable to us in the PRC are enterprise income tax and value-added tax.

A. Pursuant to the Enterprises Income Tax Law of the PRC and its implementation regulations implemented on January 1, 2008, a resident enterprise is subject to enterprise income tax for the income derived from activities both inside and outside the territory of the PRC. If an organization or establishment is set up by a non-resident enterprise in the PRC, it is subject to enterprise income tax for the income derived from such organization or establishment in the PRC and the income derived from outside the PRC but only on those activities with actual connections to the organization or establishment in the PRC. For a non-resident enterprise which has not set up an organization or establishment in the PRC, or has set up an organization or establishment but the income derived has no actual connection with such organization or establishment, its income derived in the PRC will be subject to enterprise income tax.

The PRC enterprise income tax shall be levied at the rate of 25%. A non-resident enterprise without a permanent establishment in the PRC or such non-resident enterprise which has set up a permanent establishment in PRC but its earning income is not connected with the abovementioned permanent establishment will be subject to tax on their PRC-sourced income, which shall be taxed at the reduced rate up to 10%.

Pursuant to the Arrangement between the Mainland and the Hong Kong SAR for the Avoidance of Double Taxation and Tax Evasion on Income (referred to as the Tax Arrangement), where a Hong Kong enterprise directly holds at least 25% of shareholding of a PRC enterprise, the withholding tax rate in respect to the payment of dividends by such PRC enterprise to such Hong Kong enterprise is 5%. Otherwise, the withholding tax rate is 10% for the relevant dividends.

Pursuant to the Notice of the State Administration of Taxation on the Issues concerning the Application of the Dividend Clauses of Tax Agreements, or the Notice No. 81, residents of counter-parties to any tax treaties who own up to a certain proportion (25% or 10% in general) of the capital of a Chinese resident company paying dividends are subject to taxation on such dividends at the tax rates as arranged. Any residents of the counterparties qualifying to enjoy such tax benefits shall meet all of the following requirements: (1) be an enterprise subject to taxation on dividends in accordance to such tax arrangement; (2) directly own the required percentage in all equity interests and voting rights in such Chinese residents company; and (3) directly own such percentage in the Chinese resident company at anytime within the 12 consecutive months prior to the reception of such dividends.

[Table of Contents](#)

According to The Administrative Measures for Non-resident Enterprises to Enjoy Treatments under Tax Treaties (Trial) (referred to as the Administrative Measures) which came into force on October 1, 2009, in order for a non-resident enterprise (as defined under the PRC tax laws) that receives dividends from PRC resident enterprises, to enjoy the favorable tax benefits under the tax arrangements, it shall submit an application for approval to the competent tax authority. Without being approved, the non-resident enterprise may not enjoy the favorable tax treatments provided in the tax treaties. Accordingly, if the provisions of Notice 81 are satisfied and approvals under the Administrative Measures are obtained, the payments of dividends by the PRC subsidiaries to the Hong Kong subsidiaries shall be subject to a PRC withholding tax at the rate of 5% as stipulated in the Tax Arrangement. However, if the application to enjoy the favorable withholding tax under the Tax Arrangement is not approved, we may not enjoy the favorable withholding tax under the Tax Arrangement. In addition, according to Notice 81, if the primary purpose of our transactions or arrangements, in relation to the reorganization of the PRC subsidiaries, is deemed by the relevant authorities is to enjoy a favorable tax treatment, such favorable withholding tax enjoyed by us may be adjusted by the relevant authorities in the future.

B. Pursuant to the Interim Provisional Regulations of the People's Republic of China on Value-Added Tax as amended on November 10, 2008 by the State Council and implemented on January 1, 2009, and latest amended in February 2016, unless stated otherwise, for value-added tax payers who are selling or importing goods, and providing processing, repairs and replacement services in the PRC, the tax rate shall be 17%. The value-added tax rate for taxpayers selling and importing feed shall be 13%.

Provisions Regarding Mergers and Acquisitions of Domestic Enterprises by Foreign Investors

On August 8, 2006, six PRC regulatory agencies, including the Chinese Securities Regulatory Commission, or CSRC, promulgated the M&A Rules to more effectively regulate foreign investment in PRC domestic enterprises. The M&A Rules took effect on September 8, 2006 and was amended on June 22, 2009. The M&A Rules also contains a provision requiring SPVs formed for overseas listing purposes and controlled by PRC individuals to obtain the approval of the CSRC prior to publicly listing their securities on an overseas stock exchange.

The application of this M&A Rules is currently unclear. However, our PRC counsel for our initial public offering advised us that based on their understanding of the current PRC laws, rules and regulations and the M&A Rules, the M&A Rules does not require that we obtain prior CSRC approval for the listing and trading of our ADSs on the NYSE, because the acquisitions among China High, WGC and Shandong Borun are governed by the PRC laws, regulations, rules and circulars related to foreign investment enterprises instead of the M&A Rules.

Our PRC counsel for our initial public offering had further advised us that their opinions summarized above are subject to the timing and content of any new laws, rules and regulations or clear implementations and interpretations from the CSRC in any form relating to the M&A Rules. See Item 3.D, "Key Information — Risk Factors — Risks Related To Operating In China — *The application of PRC Regulations relating to the overseas listing of PRC domestic companies is uncertain, and we may be subject to penalties for failing to request approval of the PRC authorities prior to listing our ADSs in the United States.*"

[Table of Contents](#)

Tort Liability Law

The Tort Liability Law of the People's Republic of China, which was passed during the 12th Session of the Standing Committee of the 11th National People's Congress on December 26, 2009, states that manufacturers are liable for damages caused by defects in their products and sellers are liable for damages attributable to their fault. If the defects are caused by the fault of third parties such as the transporter or storekeeper, manufacturers and sellers are entitled to claim for compensation from these third parties after paying the compensation amount.

C. Organizational Structure

See Item 4.A, "History and Development of the Company" for more information.

D. Property, Plant and Equipment

See Item 4.B, "Business Overview" for more information.

ITEM 4A. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with Item 3.A. "Key Information — Selected Financial Data" and our consolidated financial statements and related notes included elsewhere in this annual report. The discussion in this section contains forward-looking statements that involve risks and uncertainties. See "Forward - Looking Statements." Our actual results and the timing of selected events could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under Item 3.D, "Key Information — Risk Factors" and elsewhere in this annual report.

A. Operating Results

Overview

We are a leading producer and distributor of corn-based edible alcohol in the PRC based on tons of edible alcohol produced. Our edible alcohol products are primarily sold as an ingredient to producers of *baijiu* who further blend our products into finished products sold under various brand names throughout

China. “*Baijiu*” is a grain-based alcoholic beverage, generally made from corn, wheat or barley, clear in color, with alcohol content ranging from 18% to 68%. *Baijiu* is sold throughout China in retail stores, bars, banquet halls, restaurants and other locations where alcoholic beverages are typically consumed. *Baijiu* is consumed in almost all the occasions in China where alcoholic beverage is desirable, from daily residential consumption, gatherings of family and friends, business and social occasions, to the Chinese Spring Festival celebrations. In China, consumption of *baijiu* is generally associated with a higher standard of living, and consumption of *baijiu* has grown with the expansion of the PRC economy.

[Table of Contents](#)

We believe our in-house developed manufacturing process results in a cost-effective, consistent and superior product widely sought by *baijiu* producers. Producers of *baijiu* often have distinctive taste and flavor profiles that are achieved through proprietary recipes and blending techniques. The consistency and quality of the edible alcohol we supply to them is critical to achieving these taste and flavor profiles.

During the production of edible alcohol, we also produce DDGS feed, liquid carbon dioxide, and crude corn oil as by-products which are sold separately from our edible alcohol.

In China, edible alcohol can be classified into Grades A, B and C. We currently own and operate two facilities: one in Shouguang, Shandong Province and the other in Daqing, Heilongjiang Province. Our Shouguang facility has an annual production capacity of 160,000 tons of corn-based edible alcohol including 90,000 tons of Grade B edible alcohol and 70,000 tons of Grade C edible alcohol. Our Daqing facility currently has an annual production capacity of 220,000 tons of corn-based edible alcohol including 50,000 tons of Grade A edible alcohol, 140,000 tons of Grade B edible alcohol and 30,000 tons of Grade C edible alcohol. We believe we are the largest corn-based edible alcohol private producer operating in Shandong Province and Heilongjiang Province. Our Daqing facility is licensed to build up to a production capacity of 330,000 tons of edible alcohol.

By September 2013, Shandong Borun had completed the construction of plants and production lines for our new CPE and foam insulation businesses. CPE can be used in a wide variety of applications, including cables & wires, flame-resistant acrylonitrile butadiene styrene thermoplastic elastomers, rubber products, magnetic rubber stripes and polyvinyl chloride profiles. Foam insulation can be formed in different shapes for various construction needs, and it offers excellent benefits, such as heat insulation, anti-corrosion and oil resistance. We expanded our CPE manufacturing plant, and increased our annual production capacity of CPE products by another 12,500 tons in 2014 and we currently have an annual production capacity of 25,000 tons of CPE. Due to the weak market demand, we fully wrote down of the production lines for foam insulation in 2015. We have disposed the production lines and exited the foam insulation business in 2016.

Principal Factors Affecting our Financial Performance

We believe the following factors will continue to affect our financial performance:

Utilization of Production Capacity

Currently, we have a total annual production capacity of 380,000 tons of edible alcohol. While the PRC edible alcohol market is characterized by total production capacity exceeding market demand, we operated our facilities at full capacity from 2007 to 2011. However, due to the challenging macro-economic conditions in the PRC and the weakening demand for edible alcohol, we were not able to fully utilize our optimal production capacity in 2014 and reached approximately 81.4%. Due to the recovering demand for edible alcohol in 2015 and 2016, we greatly improved our production utilization to approximately 90.4% and 88.9%, respectively. In addition to that, to date, we have not experienced any difficulty in selling 100% of our production output, even in the economic downturn. Sales to distilleries of *baijiu* contributed to most of our revenue generated from edible alcohol, representing 59.7%, 49.9% and 47.8% in 2014, 2015 and 2016, respectively. In addition, a portion of our customers are in the chemical industry and use edible alcohol for chemical products such as acetic acid and glycol. In 2014, 2015 and 2016, revenue generated from the sales of edible alcohol to the chemical industry contributed to 38.7%, 46.9% and 46.6% of our edible alcohol sales revenue, respectively.

[Table of Contents](#)

We believe we have been able to operate efficiently in recent years due to our large production volume and high quality of our product making us a key supplier for *baijiu* producers, who are willing to maintain long-term relationships with us in order to secure supply of our product.

Fluctuation of Demand for and Price of Edible Alcohol

The overall supply of edible alcohol outpaced the demand for edible alcohol, and there is excess production capacity in China currently. To control the over expansion of capacity in the edible alcohol industry, the PRC government has implemented a series of restrictive policies to control the industry’s capacity expansion since 2006. This was done primarily through the prohibition on accepting applications for the construction of new edible alcohol facilities and closing existing edible alcohol facilities with production capacity of less than 30,000 tons per annum. According to our knowledge of our industry, the PRC market is one in which large edible alcohol producers are able to maintain a high capacity utilization rate due to their large exposure to and close relationship with *baijiu* producers.

Our revenues are primarily derived from sales of edible alcohol and most of our sales of edible alcohol are to *baijiu* producers. During the past few years, the *baijiu* industry experienced rapid growth and industry demand for edible alcohol increased greatly and as a result, we were able to operate at full capacity from 2007 to 2011. However, in the fourth quarter of 2012, the PRC *baijiu* industry faced headwind from a government ban on serving high-end *baijiu* at official banquets as well as consumers’ concerns caused by media reports of traces of plasticizers found in bottled *baijiu*, which caused a sales decline for *baijiu* and reduced the demand for edible alcohol. As a result, there was downward pressure on the demand for edible alcohol in 2013 and 2014, moreover this trend continued in 2015. In 2015, we shifted our customers demographics partially from the *baijiu* industry to the chemical industry in order to improve our sales volume. In 2016, revenue generated from the sales of edible alcohol to the chemical industry contributed to 46.6% of our total edible alcohol sales revenue. However, *baijiu* being the most popular and traditional alcoholic beverage in China, consumption of *baijiu* is already associated with most of the people’s daily lives. Moreover, the primary consumer group of *baijiu* in China consists of the general population in the age group of 35 to 44 years, also the

PRC's largest population age group. Thus, we believe that the foregoing factors that have softened demand for *baijiu* are temporary and demand from *baijiu* will recover gradually.

Due to the weaker domestic macro-environment, the annualized average price of edible alcohol also will continue to be under some pressure in the short run, however, we believe that edible alcohol is an industry with a government imposed total maximum supply and with the gradual recovery of the *baijiu* industry, the average price of edible alcohol will recover eventually in the long run. We anticipate the future recovery in demand for and price of edible alcohol will bring about a significant improvement in our financial performance.

Fluctuations in the Price of Corn

The primary component of our cost of goods sold is corn. As such, any significant fluctuations in corn prices may have a significant impact on our financial performance.

82

[Table of Contents](#)

The PRC government used to coordinate the price of corn by annually setting the price for government-owned granaries to buy and sell corn. The market price of corn will normally fluctuate in a narrow band around the government price in response to market conditions. However, since April of 2016, the PRC government cancelled the national corn reserve purchase program, and the market price of corn decreased substantially in comparison with the same period in previous years. While any significant fluctuations in corn price due to severe weather conditions, massive crop failure or any other unforeseen circumstance may result in corn price increases too large to be passed on to our customers, we in general expect in the future we will continue to be able to upwardly adjust the price of our edible alcohol in response to increases in corn price. However, any inability to do so would directly impact our gross profit margins.

We secure corns in advance during the harvest season. Starting from November 2009, we entered into framework agreements with local granaries in Heilongjiang Province, as corn prices are generally the lowest in the Northeastern region of China, to engage them to purchase corn for us from local farmers during the harvest season and store them for subsequent delivery to us to substantially satisfy the corn requirements of our Shouguang facility and Daqing facility during the non-harvest season. Such supply contracts provide us access to corn at prices which we believe have historically been lower than the market price in the off season and times of high price volatility due to crop failures and other factors. Contractual terms under the framework agreements included, among others, basis of purchase price and additional costs, the total quantity of corn we intend to purchase in the coming harvest season, the standard of corn quality, the delivery schedule, and the payment milestones. These terms are to be re-negotiated, updated and agreed before the harvest season, usually around November, every year.

Starting from November 2013, we entered into new purchase arrangements with local granaries. We fully settled the corn price (i.e. purchase cost) before the granaries executed the procurements per our agreed schedule. In prior years, we did not pay for the corn (with the exception of a 10% deposit) until the corn was delivered to our manufacturing facilities, and the granaries retained the risks and rewards of ownership of the corns purchased under the framework agreement until our receipt of such delivery. Due to this change, we initiated a "bill and hold" arrangement with the granaries whereby we take possession of the corn upon purchase and storage of the corn by the granary. Under this new policy, after the corn is collected from the local farmers as planned, both the quantity and quality of corn is inspected and acknowledged by one of our employees assigned to the granaries' warehouses. The corn is then separately stored and distinguished from other inventory of the granaries, and subject to supervision by our designated employee. Therefore, once the stock-in processes are completed, the granaries neither retain any specific performance obligations nor have the right to sell the collected corn on behalf of us to any third party. As the granaries' sole obligation is to manage the storage of corn for us, the significant risks and rewards of ownership of the purchased corn are considered to be transferred to us upon our payment to the granaries. In addition, we also bear the risk of loss in the event of a decline in the market value of the collected corn. The custodial risks of the collected corn are properly insured by the granaries and us. Upon the delivery of corn, we pay to the granaries a fixed handling fee of RMB124 (\$17.9) per ton as stipulated in the framework agreement, mainly for the storage of our corn at the granaries' warehouses.

As of December 31, 2016, 397,639 tons of corn were collected by the granaries on behalf of us, amounting to total purchase costs of RMB550.0 million (\$79.3 million). By the end of the first quarter of 2017, we successfully purchased 600,607 tons of corn through the granaries, which will substantially satisfy our corn consumption requirements at our Shouguang and Daqing facilities during the coming non-harvest season.

Expansion of Our Product Mix and Sales Network

We have our own sales team to market our products, and we do not sell our products through any distributors currently. Our sales teams in Shandong Province and Heilongjiang Province market our products directly to our customers. Most of our existing customers of products produced at our Shouguang facility are located in Shandong Province, and most of our existing customers for products produced at our Daqing facility are located in Heilongjiang Province. Moreover, before 2009, we only sold Grade C edible alcohol which has an alcohol concentration of 95.0% and byproducts, including DDGS feed and corn germ.

As a part of our development strategy, we built Phase II of our Shouguang Facility and Phase II and Phase III of our Daqing Facility to produce Grade A and Grade B edible alcohol, which has an alcohol concentration of 99.5% and 95.5%, respectively, and began selling Grade A and Grade B edible alcohol in August 2011 and August 2009, respectively. The majority of our production capacity is used to produce Grade B edible alcohol. In connection with our business growth plan, we also intend to expand into key strategic markets for Grade B edible alcohol. We have already commenced sales operations in Sichuan, Jilin, Liaoning, Jiangsu, Anhui and Heibei provinces. We anticipate our results of operations will be positively affected as we improve our product mix and our sales network. As part of the expansion plan, our 100,000 ton liquid carbon dioxide production line in the Shouguang facility was completed and started to generate revenue in July 2010. In August 2011, we improved the liquid carbon dioxide production line in the Shouguang facility, which increased its annual production capacity to 140,000 tons. We also began deep-processing corn germ into crude corn oil in our Daqing facility from March 2011 and began producing crude corn oil in our Shouguang facility in September 2011, which further improved our product mix. In addition to modifying our product mix based on our existing edible alcohol production facilities, we have invested in our new foam insulation and CPE projects to further improve and diversify our product mix. Our new plants, completed in July and September 2013, respectively, currently have annual production capacities of 25,000 tons of CPE products and 40,000 cubic meters of foam insulation products. Due to the weak demand of our foam insulation products, in 2015, after a comprehensive review of the current market, we decided to exit from the foam business and disposed all long-lived assets related to foam business in 2016.

83

Component of Revenues and Expenses

Revenues

We derive revenues from sales of edible alcohol, which comprises the majority of our sales, and its by-products, including DDGS feed, liquid carbon dioxide and crude corn oil, together with our new CPE and foam insulation products.

Our revenues are significantly influenced by our pricing power and sales volumes of our products. We price our products based on several factors, including manufacturing costs, market conditions and, to a lesser extent, size of purchase orders.

Cost of Goods Sold

Cost of goods sold consists of raw material costs, utility costs, direct labor costs, material consumption in overhead, depreciation and other overhead. Our cost of goods sold is affected primarily by the cost of corn and coal, which made up 79.9% and 6.5% of our cost of goods sold in the year ended December 31, 2016, respectively. The cost of both corn and coal are volatile and can vary as a result of a wide variety of factors, including weather, market condition, government regulation and general economic conditions, all of which are outside of our control and individually or collectively, are able to result in a positive or negative impact on the price of corn. Based on our production record during the year ended December 31, 2016, approximately 3.01 tons of corn produced 1.0 ton of edible alcohol. Our average per unit corn price is RMB1,953 (\$301), RMB1,891 (\$291) and RMB1,639 (\$256) in 2014, 2015 and 2016, respectively.

Gross Profit

Our gross profit consists of revenues less cost of goods sold. Our gross profit margin is mainly affected by production efficiency, pricing conditions, volume of sales, raw material cost and also market conditions. We achieved gross profit margin of 10.7%, 10.5% and 8.5% for the years ended December 31, 2014, 2015 and 2016, respectively. The primary driver for our gross profit levels is our ability to maintain the pricing differential between our purchase price for corn and our sales price for edible alcohol. In 2016, the average selling price for edible alcohol and its by-products decreased and we also did not fully utilize our production capacity, both of which had a negative impact on our gross margin. However, in the same year, we maintained our production efficiency of using approximately 3.01 tons of corn to produce 1.0 ton of edible alcohol. Considering the combination of our production efficiencies, and our corn sourcing arrangements and production capacity, we believe that we are well able to effectively control our costs and protect our gross margins until the recovery of the edible alcohol market.

Operating Expenses

Our operating expenses primarily consist of selling expenses and general and administrative expenses.

Selling Expenses

Our selling expenses consist primarily of sales employee salaries, travelling and other business development expenses and other miscellaneous items.

General and Administrative Expenses

General and administrative expenses consist primarily of salary and benefits for our management and administrative personnel, office expenses, traveling and entertainment expenses, insurance premiums, amortization and depreciation on computers and other office equipment, consulting and auditing fees and other administrative costs and expenses.

Our general and administrative expenses has increased after our listing on the New York Stock Exchange, in connection with our obligation to comply with the reporting requirements under the Exchange Act as well as other requirements under the Sarbanes-Oxley Act. See Item 3.D, “Key Information — Risk Factors — *We incur increased costs as a result of being a public company, which adversely impact our results of operations.*”

Interest Expense

Interest expense consists of interest expense associated with short-term and long-term borrowings from banks and the private-placement bond, and the amortization of debt insurance costs of the private-placement bond.

Income Taxes

Hong Kong

In accordance with the relevant tax laws and regulations of Hong Kong, a company, irrespective of its place of incorporation, is subject to Hong Kong profits tax if it carries on a trade, profession or business in Hong Kong and accrues profits from such trade, profession or business. No profits tax is levied on profits arising offshore, even if they are remitted from offshore to or through Hong Kong. Therefore, our subsidiary, China High, was not subject to profits tax for the years ended December 31, 2014, 2015 and 2016 as it has no business in Hong Kong and all its profits were not Hong Kong-sourced, being derived from its direct and indirect subsidiaries in the PRC. The profits tax rate on corporations for the years 2014, 2015 and 2016 was a flat rate of 16.5% in Hong Kong.

China

In accordance with the relevant tax laws and regulations of the PRC, a company registered in the PRC is subject to enterprise income tax (“EIT”) at the applicable tax rate on its taxable income. The EIT was assessed at a rate of 25% of taxable income of Shandong Borun and Daqing Borun for the year of 2014, 2015 and 2016. There was no income tax incentive to our PRC entities from the local government in the years ended December 31, 2014, 2015 and 2016.

Critical Accounting Policies, Estimates and Assumptions

Principles of Consolidation and Presentation

Our consolidated financial statements have been prepared in accordance with U.S. GAAP. Our consolidated financial statements include the financial statements of New Borun, Golden Direction, China High, WGC, Shandong Borun and Daqing Borun. All significant inter-company transactions and balances have been eliminated upon consolidation.

Segment Reporting

We operate and manage our business as three reportable segments: “Corn-base edible alcohol and its by-products”, “CPE” and “Foam insulation”. Our reportable segments are strategic business units that require different technology and marketing strategies and offer different products and services. Our chief operating decision maker, the CEO receives and reviews the results of the operations of each separate segment, assesses and manages their performance and makes decisions. Most of the businesses were established as a unit, and the management at the time of the establishment was retained.

As we primarily generate our revenues from customers in the PRC, and all of our sales and all of our long-lived assets are located in the PRC, no geographical segments are presented.

Revenue Recognition

We recognize revenue in accordance with FASB ASC Topic 605, “Revenue Recognition”, when persuasive evidence of an arrangement exists, the price is fixed or determinable, collection is reasonably assured and delivery of products has occurred or services have been rendered. Delivery occurs upon receipt of products by the customers at the customers’ warehouse or designated destination, or at the time products are picked up by the customers at our warehouse.

Revenues presented on the consolidated statements of income and comprehensive income are net of sales taxes and surcharges.

Cost of Goods Sold

Our cost of goods sold includes product costs, shipping and handling costs, and costs related to inventory adjustments, including write downs for excess and obsolete inventory. Product costs include raw materials, production overhead costs, amortization of production license, and depreciation of property, plant and equipment used directly or indirectly for production.

Inventories

Our inventories are stated at the lower of cost or market determined using the weighted average method which approximates cost and estimated net realizable value. Cost of work in progress and finished goods comprise direct material, direct production costs and an allocated portion of production overhead costs based on normal operating capacity. From November 2013, we initiated a “bill and hold” arrangement with the granaries whereby we took the possession of the corn upon purchase and storage of the corn by the granaries. Purchased corn are recognized as our inventories when the significant risks and rewards of ownership are considered to be transferred to us upon full payment of the corn price made to the granaries and the quantity and quality of the purchased corn had been inspected and acknowledged by one of our employees assigned to the granaries’ warehouses.

Property, Plant, and Equipment, net

Property, plant and equipment are recorded at cost. Significant additions or improvements extending useful lives of assets are capitalized. Depreciation is calculated using the straight-line method (after taking into account their respective estimated residual value) over the estimated useful lives as follows:

Buildings and improvements	20 to 30 Years
Machinery	10 Years
Office equipment and furnishing	3 to 5 Years
Motor vehicles	4 to 5 Years

Maintenance and repairs are charged directly to expense as incurred, whereas improvements and renewals are generally capitalized in their respective property accounts. When an item is retired or otherwise disposed of, the cost and applicable accumulated depreciation are removed and the resulting gain or loss is recognized in the consolidated statements of income and comprehensive income.

[Table of Contents](#)

Income Taxes

We follow FASB ASC Topic 740, “Income Taxes”, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each period end based on enacted tax laws and statutory tax rates, applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

We have adopted FASB ASC Topic 740-10-25 since January 1, 2007, which provides criteria for the recognition, measurement, presentation and disclosure of uncertain tax position. We must recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate resolution. We performed self-assessment and our liability for income taxes includes the liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by taxing authorities. Audit periods remain open for review until the statute of limitations has passed, which in the PRC is usually five years. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to our liability for income taxes. Any such adjustment could be material to our results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. As of December 31, 2015 and 2016, the management considered that we had no additional liabilities for uncertain tax positions affecting our consolidated financial position and results of operations or cash flows, and will continue to evaluate for any uncertain position in the future. There are no estimated interest costs and penalties provided in our consolidated financial statements for the years ended December 31, 2014, 2015 and 2016, respectively. Our tax positions related to open tax years are subject to examination by the relevant tax authorities the main authority being the China Tax Authority.

Value Added Tax

All our subsidiaries in the PRC are subject to value added tax (“VAT”) imposed by the PRC government on the purchase and sales of goods, purchase of property, plant and equipment and freight expenses incurred. The output VAT is charged to customers who purchase goods from us and debited to trade accounts receivable and credited to VAT payable — output VAT. As of December 31, 2015 and 2016, the trade accounts receivable included the output VAT charged to customers amounted to RMB66,205,852 (\$9,543,874) and RMB53,388,567 (\$7,696,204), respectively. The input VAT is incurred when we purchase goods and property, plant and equipment from vendors and freight expenses incurred. The input VAT incurred is debited to VAT recoverable or VAT payable — input VAT and credited to payables accounts or cash and cash equivalent. VAT payable is computed on a monthly basis and payable in the following month based on the difference between the amount of output VAT and input VAT as of month-end. The applicable VAT rate ranges from 0% to 17% in general, depending on the type of product purchased and sold. If the amount of validated input VAT arising from purchasing goods and property, plant and equipment and freight expenses incurred exceeds that of output VAT for sales of goods during the month, the debit VAT payable balance as of month-end will be carried forward to be credited against future collection of output VAT in the following months, and will be reclassified as VAT recoverable under other receivables. In addition, input VAT is off-the-price and not included in the cost of inventory.

According to Cai Shui [2012] No. 38 issued by the PRC State Administration of Taxation, since July 2012, the input VAT paid for purchase of corns can only be offset against the output VAT when certain conditions are fulfilled and validated by the PRC Taxing Authority. Otherwise, the input VAT paid will be temporarily recorded as VAT recoverable under other receivables. As of December 31, 2015 and 2016, VAT recoverable consisted of input VAT paid for purchase of corn but not yet validated by the PRC Taxing Authority amounted to RMB50,059,386 (\$7,216,287) and RMB74,986,737 (\$10,809,678), respectively.

According to Cai Kuai [2013] No. 36, sales taxes and surcharges has been replaced with value-added taxes effective from May 1, 2016.

Disposal of Long-lived Assets of Foam Insulation Business Segment during the Year Ended December 31, 2016

During the year ended December 31, 2016, the Company has disposed all long-lived assets of foam insulation business segment and exited the business accordingly. The income (loss) before income tax expenses of foam insulation business segment for the years ended December 31, 2014, 2015 and 2016 were RMB1,383,439, RMB(6,891,333) and RMB810,840 (\$116,886), respectively, which represented 1%, (4%) and 1% to the Company’s consolidated income before income tax expenses for the years ended December 31, 2014, 2015 and 2016, respectively. The disposal of foam insulation business does not represent a strategic shift that had a major effect on our operations and financial results. As such, the disposal of long-lived assets of foam insulation business segment have not been reported in discontinued operations as required by FASB ASC Topic 205-20, “*Presentation of Financial Statements—Discontinued Operations*” in the consolidated financial statements for the periods presented.

Recently Issued Accounting Pronouncements

In January 2017, the FASB issued Accounting Standards Update (“ASU”) No. 2017-04, “*Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*” (“ASU 2017-04”), which removes Step 2 from the goodwill impairment test. An entity will apply a one-step quantitative test and record the amount of goodwill impairment as the excess of a reporting unit’s carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit. The new guidance does not amend the optional qualitative assessment of goodwill impairment. Public business entity that is a U.S. Securities and Exchange Commission filer should adopt the amendments in this ASU for its annual or any interim goodwill impairment test in fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We are currently evaluating the impact of the adoption of ASU 2017-04 on our consolidated financial statements.

Table of Contents

In November 2016, the FASB issued ASU No. 2016-18, “*Statement of Cash Flows (Topic 230): Restricted Cash*” (“ASU 2016-18”), which requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in this ASU do not provide a definition of restricted cash or restricted cash equivalents. The amendments in this ASU are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. We are currently evaluating the impact of the adoption of ASU 2016-18 on our consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, “*Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*” (“ASU 2016-15”), which addresses the following eight specific cash flow issues: debt prepayment or debt extinguishment costs; settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (including bank-owned life insurance policies); distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. The amendments in this ASU are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early

adoption is permitted, including adoption in an interim period. We are currently evaluating the impact of the adoption of ASU 2016-15 on our consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, *“Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments”* (“ASU 2016-13”). Financial Instruments—Credit Losses (Topic 326) amends guideline on reporting credit losses for assets held at amortized cost basis and available-for-sale debt securities. For assets held at amortized cost basis, Topic 326 eliminates the probable initial recognition threshold in current GAAP and, instead, requires an entity to reflect its current estimate of all expected credit losses. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial assets to present the net amount expected to be collected. For available-for-sale debt securities, credit losses should be measured in a manner similar to current GAAP, however Topic 326 will require that credit losses be presented as an allowance rather than as a write-down. ASU 2016-13 affects entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The amendments in this ASU will be effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. We are currently evaluating the impact of the adoption of ASU 2016-13 on our consolidated financial statements.

In April 2016, the FASB issued ASU No. 2016-09, *“Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting”* (“ASU 2016-09”), which simplifies several aspects of the accounting for employee share-based payment transactions. The areas for simplification in ASU 2016-09 include the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this ASU will be effective for annual periods beginning after December 15, 2016 and interim periods within those annual periods. Early adoption is permitted. The Company does not expect the adoption of ASU 2016-09 to have a material impact on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *“Leases (Topic 842)”* (“ASU 2016-02”). The amendments in this update create Topic 842, Leases, and supersede the leases requirements in Topic 840, Leases. Topic 842 specifies the accounting for leases. The objective of Topic 842 is to establish the principles that lessees and lessors shall apply to report useful information to users of financial statements about the amount, timing, and uncertainty of cash flows arising from a lease. The main difference between Topic 842 and Topic 840 is the recognition of lease assets and lease liabilities for those leases classified as operating leases under Topic 840. Topic 842 retains a distinction between finance leases and operating leases. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous leases guidance. The result of retaining a distinction between finance leases and operating leases is that under the lessee accounting model in Topic 842, the effect of leases in the statement of comprehensive income and the statement of cash flows is largely unchanged from previous GAAP. The amendments in ASU 2016-02 are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years for public business entities. Early application of the amendments in ASU 2016-02 is permitted. We are currently evaluating the impact of the adoption of ASU 2016-02 on our consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, *“Financial Instruments — Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities”* (“ASU 2016-01”). The amendments in this update require all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee). The amendments in this update also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition the amendments in this update eliminate the requirement for to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet for public entities. For public business entities, the amendments in ASU 2016-01 are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Except for the early application guidance discussed in ASU 2016-01, early adoption of the amendments in this update is not permitted. We do not expect the adoption of ASU 2016-01 to have a material impact on our consolidated financial statements.

[Table of Contents](#)

In November 2015, the FASB issued ASU No. 2015-17, *“Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes”* (“ASU 2015-17”). Topic 740, Income Taxes, requires an entity to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. Deferred tax liabilities and assets are classified as current or noncurrent based on the classification of the related asset or liability for financial reporting. Deferred tax liabilities and assets that are not related to an asset or liability for financial reporting are classified according to the expected reversal date of the temporary difference. To simplify the presentation of deferred income taxes, the amendments in ASU 2015-17 require that deferred income tax liabilities and assets be classified as noncurrent in a classified statement of financial position. For public business entities, the amendments in this update are effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. We do not expect the adoption of ASU 2015-17 to have a material impact on our consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-11, *“Inventory (Topic 330): Simplifying the Measurement of Inventory”* (“ASU 2015-11”). The amendments in this update require an entity to measure inventory within the scope of ASU 2015-11 (the amendments in ASU 2015-11 do not apply to inventory that is measured using last-in, first-out or the retail inventory method. The amendments apply to all other inventory, which includes inventory that is measured using first-in, first-out or average cost) at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is unchanged for inventory measured using last-in, first-out or the retail inventory method. The amendments in ASU 2015-11 more closely align the measurement of inventory in U.S. GAAP with the measurement of inventory in International Financial Reporting Standards (“IFRS”). ASU 2015-11 is effective for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The amendments in ASU 2015-11 should be applied prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. We do not expect the adoption of ASU No. 2015-11 to have a material impact on our consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *“Revenue from Contracts with Customers (Topic 606)”* (“ASU 2014-09”). ASU 2014-09 supersedes the revenue recognition requirements in “Revenue Recognition (Topic 605)”, and requires entities to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. The FASB issued ASU No. 2015-14, *“Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date”* (“ASU 2015-14”) in August 2015. The amendments in ASU 2015-14 defer the effective date of ASU 2014-09. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to annual reporting periods beginning after December 15, 2017, including interim reporting periods

within that reporting period. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. Further to ASU 2014-09 and ASU 2015-14, the FASB issued ASU No. 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)" ("ASU 2016-08") in March 2016, ASU No. 2016-10, "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing" ("ASU 2016-10") in April 2016, ASU No. 2016-12, "Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients" ("ASU 2016-12"), and ASU No. 2016-20, "Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers" ("ASU 2016-20"), respectively. The amendments in ASU 2016-08 clarify the implementation guidance on principal versus agent considerations, including indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customers. ASU 2016-10 clarifies guideline related to identifying performance obligations and licensing implementation guidance contained in the new revenue recognition standard. The updates in ASU 2016-10 include targeted improvements based on input the FASB received from the Transition Resource Group for Revenue Recognition and other stakeholders. It seeks to proactively address areas in which diversity in practice potentially could arise, as well as to reduce the cost and complexity of applying certain aspects of the guidance both at implementation and on an ongoing basis. ASU 2016-12 addresses narrow-scope improvements to the guidance on collectability, non-cash consideration, and completed contracts at transition. Additionally, the amendments in this ASU provide a practical expedient for contract modifications at transition and an accounting policy election related to the presentation of sales taxes and other similar taxes collected from customers. The amendments in ASU 2016-20 represents changes to make minor corrections or minor improvements to the Codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. The effective date and transition requirements for ASU 2016-08, ASU 2016-10, ASU 2016-12 and ASU 2016-20 are the same as ASU 2014-09. We are currently evaluating the impact of the adoption of ASU 2014-09, ASU 2016-08, ASU 2016-10, ASU 2016-12 and ASU 2016-20 on our consolidated financial statements.

Results of Operations for the Year Ended December 31, 2015 Compared to the Year Ended December 31, 2016

Revenues

Revenues decreased by RMB519.4 million (\$74.9 million), or 19.6%, to RMB2,132.7 million (\$307.4 million) for the year ended December 31, 2016 from RMB2,652.0 million (\$382.3 million) for the year ended December 31, 2015. The decrease was primarily due to the following:

- The decrease in our edible alcohol sales by approximately RMB287.0 million (\$41.4 million), or 16.4%, from RMB1,749.6 million (\$252.2 million) in the year ended December 31, 2015 to RMB1,462.6 million (\$210.8 million) in the year ended December 31, 2016, primarily due to the lower weighted average sales price of edible alcohol in 2016. The weighted average sales price of edible alcohol decreased substantially due to lower corn costs in 2016. We still did not operate at full capacity in 2016, and our actual production output for the year ended December 31, 2016 was 337,959 tons of edible alcohol, as compared to 343,840 tons for the year ended December 31, 2015, a decrease of 5,881 tons, or 1.7%.
- We sold approximately 339,620 tons of edible alcohol in the year ended December 31, 2016, compared to approximately 342,766 tons in the year ended December 31, 2015, a decrease of 3,146 tons or 0.9%. The decrease was primarily due to our decreased production volume of edible alcohol in 2016. The weighted average sales price of edible alcohol was approximately RMB4,307 (\$621) per ton in the year ended December 31, 2016 compared to RMB5,105 (\$736) per ton in the year ended December 31, 2015, a decrease of RMB798 (\$115) per ton, or 15.6%.

91

[Table of Contents](#)

- We currently sell Grade A, B and C edible alcohol. Due to the lower weighted average sales price of edible alcohol in 2016, our revenue for edible alcohol experienced a decrease in 2016. Our revenue from Grade A edible alcohol decreased by approximately RMB248.7 million (\$35.8 million) or 94.0% to RMB15.9 million (\$2.3 million) for the year ended December 31, 2016, as compared to RMB264.6 million (\$38.1 million) for the year ended December 31, 2015. The weighted average sales price of Grade A edible alcohol was approximately RMB 5,006 (\$722) per ton in the year ended December 31, 2016, compared to RMB5,363 (\$773) per ton in the year ended December 31, 2015, a decrease of RMB357 (\$51), or 6.7%. Our revenue from Grade B edible alcohol increased by approximately RMB37.2 million (\$5.4 million), or 3.3%, to RMB1,177.0 million (\$169.7 million) for the year ended December 31, 2016, as compared to RMB1,139.8 million (\$164.3 million) for the year ended December 31, 2015. The weighted average sales price of Grade B edible alcohol was approximately RMB4,303 (\$620) per ton in the year ended December 31,

2016, as compared to RMB5,061 (\$730) per ton in the year ended December 31, 2015, a decrease of RMB758 (\$109), or 15.0%. Our revenue from Grade C edible alcohol decreased by approximately RMB75.5 million (\$10.9 million), or 21.9%, to RMB269.7 million (\$38.9 million) for the year ended December 31, 2016, as compared to RMB345.2 million (\$49.8 million) for the year ended December 31, 2015. The weighted average sales price of Grade C edible alcohol was approximately RMB4,289 (\$618) per ton in the year ended December 31, 2016, as compared to RMB5,060 (\$729) per ton in the year ended December 31, 2015, a decrease of RMB771 (\$111) or 15.2%.

We sold approximately 3,186 tons of Grade A edible alcohol, 273,546 tons of Grade B edible alcohol and 62,888 tons of Grade C edible alcohol in the year ended December 31, 2016, as compared to approximately 49,348 tons of Grade A edible alcohol, 225,193 tons of Grade B edible alcohol and 68,225 tons of Grade C edible alcohol in the year ended December 31, 2015. The sharp decrease in our sales volume of Grade A edible alcohol and the increase in Grade B edible alcohol were primarily attributable to our shift in production from Grade A edible alcohol to Grade B edible alcohol since February 2016, because the demand for Grade A edible alcohol was facing challenges.

The decrease in our revenue from DDGS feed by approximately RMB105.6 million (\$15.2 million), or 18.4%, to RMB467.6 million (\$67.4 million) for the year ended December 31, 2016, as compared to RMB573.2 million (\$82.6 million) for the year ended December 31, 2015, was primarily due to the decrease in our sales volume. The weighted average sales price of DDGS feed was approximately RMB1,595 (\$230) per ton for DDGS feed sales in the year ended December 31, 2016, as compared to RMB1,885 (\$272) per ton in the year ended December 31, 2015, representing a decrease of RMB290 (\$42) per ton, or 15.4%. The decrease in average sales price was mainly due to the decrease in corn price. We sold approximately 293,058 tons of DDGS feed in the year ended December 31, 2016 compared to approximately 304,060 tons in the year ended December 31, 2015, a decrease of 11,002 tons, or 3.6%. The decrease in sales volume was mainly due to our lower production volume in 2016.

[Table of Contents](#)

Our revenue from liquid carbon dioxide decreased by approximately RMB2.1 million (\$0.3 million), or 9.2%, to RMB20.9 million (\$3.0 million) for the year ended December 31, 2016 to RMB23.1 million (\$3.3 million) for the year ended December 31, 2015, mainly due to the combined effect of a slight decrease in the weighted average sales price and a decrease in our sales volume. The weighted average sales price of liquid carbon dioxide decreased by RMB8 (\$1) or 4.4% to approximately RMB173 (\$25) per ton in the year ended December 31, 2016, as compared to RMB181 (\$26) per ton in the year ended December 31, 2015. We sold approximately 120,852 tons of liquid carbon dioxide in the year ended December 31, 2016 compared to approximately 127,754 tons in the year ended December 31, 2015, representing a decrease of 6,902 tons, or 5.4%.

Our revenue from crude corn oil decreased by approximately RMB90.4 million (\$13.0 million) or 52.1%, to RMB83.1 million (\$12.0 million) for the year ended December 31, 2016, compared to RMB173.5 million (\$25.0 million) for the year ended December 31, 2015, mainly due to suspension of crude corn oil production at the Daqing facility since March 2016 and we are currently in the progress of renewing the facility's production authorization. Our sales volume was approximately 13,049 tons for the year ended December 31, 2016, as compared to 26,939 tons for the year ended December 31, 2015, representing a decrease of 13,890 tons, or 51.6%. The weighted average sales price was RMB6,370 (\$918) per ton in the year ended December 31, 2016 compared to RMB6,442 (\$929) per ton in the year ended December 31, 2015, a decrease of RMB72 (\$10) per ton or 1.1%.

We began generating revenue from sales of our new CPE and foam insulation products in December 2013 and we expanded our CPE annual production volume to 25,000 tons in 2015. Revenue from CPE decreased by approximately RMB32.3 million (\$4.7 million) or 24.9%, to RMB97.4 million (\$14.0 million) for the year ended December 31, 2016, as compared to RMB129.8 million (\$18.7 million) for the year ended December 31, 2015. The sharp decrease in sales volume of CPE was mainly due to our temporary shutdown for maintenance and upgrades during the fourth quarter of 2016. Our sales volume was approximately 11,810 tons for the year ended December 31, 2016, as compared to 15,181 tons for the year ended December 31, 2015, representing a decrease of 3,371 tons, or 22.2%. The weighted average sales price was RMB8,251 (\$1,189) per ton in the year ended December 31, 2016 compared to RMB8,547 (\$1,232) per ton in the year ended December 31, 2015, a decrease of RMB296 (\$43) per ton or 3.5%.

We elected to temporarily exit the foam insulation business in 2015. After a comprehensive market review for foam insulation products, we concluded that the foam insulation market will likely face intense price competition, while simultaneously, we would need to invest a significant amount of additional R&D expenditure in order to effectively compete in terms of product variety. Consequently, we felt it was more prudent to exit the potentially challenging foam business. Accordingly, we took steps to fully write-down of the production lines for foam insulation products as a one-time, non-cash impairment and we disposed the production line in 2016. Revenue from foam insulation products and materials decreased by approximately RMB1.9 million (\$0.3 million) or 67.1%, to RMB0.9 million (\$0.1 million) for the year ended December 31, 2016, as compared to RMB2.9 million (\$0.4 million) for the year ended December 31, 2015. Revenue generated from sales of our foam insulation products is amounting to RMB0.9 million (\$0.1 million) in 2016, which represents the remaining inventory for foam insulation products after we fully wrote-down the production lines. Revenue generated from sales of our foam insulation products and its raw materials are amounting of RMB0.6 million (\$0.1 million) and RMB2.3million (\$0.3 million) in 2015, respectively. Our sales volume of foam insulation products were approximately 1,464 cubic meters for the year ended December 31, 2016, compared to 533 cubic meters for the year ended December 31, 2015, representing an increase of 931 cubic meters, or 174.7%. The weighted average sales price was RMB641 (\$92) per cubic meter in the year ended December 31, 2016, compared to RMB1,094 (\$158) in the year ended December 31, 2015, representing a decrease of RMB453 (\$66), or 41.4%.

Gross Profit

Gross profit decreased by RMB97.7 million (\$14.1 million), or 34.9%, to RMB182.1 million (\$26.2 million), or 8.5% of revenues, for the year ended December 31, 2016, from RMB279.8 million (\$40.3 million), or 10.5% of revenues, for the year ended December 31, 2015, mainly due to the steeper decrease in average selling price of edible alcohol and its by-products, compare with the decrease in average corn cost. The average price of our purchased corn was approximately RMB1,639 (\$256) per ton in the year ended December 31, 2016, a decrease of RMB252 (\$40) per ton, or 13.3%, from RMB1,891 (\$296) per ton in the year ended December 31, 2015. The weighted average sales price of edible alcohol was approximately RMB4,307 (\$621) per ton in the year ended December 31, 2016, compared to RMB5,105 (\$784) per ton in the year ended December 31, 2015, a decrease of RMB798 (\$115) per ton, or 15.6%.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased by RMB2.9 million (\$0.4 million), or 5.2%, to RMB52.6 million (\$7.6 million), for the year ended December 31, 2016, from RMB55.5 million (\$8.0 million), for the year ended December 31, 2015. The decrease was primarily due to the following:

Selling expenses decreased 20.1% from RMB5.2 million (\$0.8 million) for the year ended December 31, 2015 to RMB4.2 million (\$0.6 million) for the year ended December 31, 2016, in line with the decrease in revenue.

[Table of Contents](#)

General and administrative expenses decreased by RMB1.9 million (\$0.3 million), or 3.7%, from RMB50.3 million (\$7.2 million) for the year ended December 31, 2015 to RMB48.4 million (\$6.9 million) for the year ended December 31, 2016, primarily due to the decrease in professional expenses and salaries for senior management.

Impairment loss on Property, Plant and Equipment

We elected to temporarily exit the foam insulation business in 2015. After a comprehensive market review for foam insulation products, we concluded that the foam insulation market will likely face intense price competition, while simultaneously, we would need to invest a significant amount of additional R&D expenditure in order to effectively compete in terms of product variety. Consequently, we exited the foam insulation business in 2016. Accordingly, we took steps to fully write-down the production lines for foam insulation products as a one-time, non-cash impairment of approximately RMB7.0 million (\$1.0 million) for the year ended December 31, 2015.

Other Expenses

Other expenses were RMB44.5 million (\$6.4 million), primarily consisting of interest expense of RMB52.7 million (\$7.6 million), interest income of RMB4.0 million (\$0.6 million), non-operating income from the proceeds of equipment sales of RMB3.7 million (\$0.5 million), and other income of RMB0.2 million (\$0.1 million) for the year ended December 31, 2016, as compared to other income of RMB45.5 million (\$6.7 million) for the year ended December 31, 2015, which primarily consisted of government subsidies received in November 2015 and recognized in income for corn processing of RMB42.6 million (\$6.1 million), interest expense of RMB100.6 million (\$14.8 million), interest income of RMB12.7 million (\$1.8 million), and other expense of RMB0.2 million (\$0.1 million). Interest expense decreased to RMB52.7 million (\$7.6 million) for the year ended December 31, 2016 from RMB100.6 million (\$14.8 million) for the year ended December 31, 2015, primarily due to the retirement for our corporate bond of RMB320.0 million (\$46.1 million) in 2016.

Income Tax Expense

We recorded RMB21.2 million (\$3.1 million) in income tax expense for the year ended December 31, 2016, compared to income tax expense of RMB43.0 million (\$6.2 million) for the year ended December 31, 2015. Since the effective tax rate remained relatively stable, the decrease is consistent with the decrease of our income before income tax expenses.

Results of Operations for the Year Ended December 31, 2014 Compared to the Year Ended December 31, 2015

Revenues

Revenues increased by RMB218.2 million (\$31.5 million), or 9.0%, to RMB2,652.0 million (\$382.3 million) for the year ended December 31, 2015 from RMB2,433.8 million (\$350.8 million) for the year ended December 31, 2014. The increase was primarily due to the following:

An increase in our edible alcohol sales by approximately RMB171.6 million (\$24.7 million), or 10.8%, from RMB1,578.0 million (\$227.5 million) in the year ended December 31, 2014 to RMB1,749.6 million (\$252.2 million) in the year ended December 31, 2015, primarily due to the moderate recovery of demand from the chemical industry and our strategy of developing diversify a more diversified customer base to offset the adverse effect from intense competition in the *baiju* market in 2015. Although the market recovered slightly, we still did not operate at full capacity in 2015. Our actual production output for the year ended December 31, 2015 was 343,840 tons of edible alcohol, as compared to 309,145 tons for the year ended December 31, 2014, an increase of 34,695 tons, or 11.2%. We expect the market demand will improve further in 2016 if the current condition remained unchanged.

We sold approximately 342,766 tons of edible alcohol in the year ended December 31, 2015, compared to approximately 304,994 tons in the year ended December 31, 2014, an increase of 37,772 tons or 12.4%. The increase was primarily due to our increased production volume of edible alcohol in 2015. The weighted average sales price of edible alcohol was approximately RMB5,105 (\$736) per ton in the year ended December 31, 2015 compared to RMB5,174 (\$746) per ton in the year ended December 31, 2014, a slight decrease of RMB69 (\$10) per ton, or 1.3%.

[Table of Contents](#)

We currently sell Grade A, B and C edible alcohol. Due to the slight recovery of demand for edible alcohol, offset by a slight decrease in the weighted average sales prices of edible alcohol, our revenue for edible alcohol experienced an increase in 2015. Our revenue from Grade A edible alcohol increased by approximately RMB40.4 million (\$5.8 million) or 18.0% to RMB264.6 million (\$38.1 million) for the year ended December 31, 2015, as compared to RMB224.2 million (\$32.3 million) for the year ended December 31, 2014. The weighted average sales price of Grade A edible alcohol was approximately RMB 5,363 (\$773) per ton in the year ended December 31, 2015, compared to RMB5,393 (\$777) per ton in the year ended December 31, 2014, a decrease of RMB30 (\$4), or 0.6%. Our revenue from Grade B edible alcohol increased by approximately RMB158.8 million (\$22.9 million), or 16.2%, to RMB1,139.8 million (\$164.3 million) for the year ended December 31, 2015, as compared to RMB981.0 million (\$141.4 million) for the year ended December 31, 2014. The weighted average sales price of Grade B edible alcohol was approximately RMB5,061(\$730) per ton in the year ended December 31, 2015, as compared to RMB5,151 (\$743) per ton in the year ended December 31, 2014, a decrease of RMB90 (\$13), or 1.7%. Our revenue from Grade C edible alcohol decreased by approximately RMB27.6 million (\$4.0 million), or 7.4%, to RMB345.2 million (\$49.8 million) for the year ended December 31, 2015, as compared to RMB372.8 million (\$53.7 million) for the year ended December 31, 2014. The weighted average sales price of Grade C edible alcohol was approximately RMB5,060 (\$729) per ton in the year ended December 31, 2015, as compared to RMB5,109 (\$736) per ton in the year ended December 31, 2014, a decrease of RMB49 (\$7) or 1.0%.

We sold approximately 49,348 tons of Grade A edible alcohol, 225,193 tons of Grade B edible alcohol and 68,225 tons of Grade C edible alcohol in the year ended December 31, 2015, as compared to approximately 41,572 tons of Grade A edible alcohol, 190,453 tons of Grade B edible alcohol and 72,969 tons of Grade C edible alcohol in the year ended December 31, 2014. The increase in our sales volume was primarily attributable to the moderate recovery of market demand and our higher production output in 2015.

An increase in our revenue from DDGS feed by approximately RMB12.5 million (\$1.8 million), or 2.2%, to RMB573.2 million (\$82.6 million) for the year ended December 31, 2015, as compared to RMB560.7 million (\$80.8 million) for the year ended December 31, 2014, was primarily due to an increase in our sales volume. The weighted average sales price of DDGS feed was approximately RMB1,885 (\$272) per ton for DDGS feed sales in the year ended December 31, 2015, as compared to RMB2,161 (\$312) per ton in the year ended December 31, 2014, representing a decrease of RMB276 (\$40) per ton, or 12.8%. The decrease in average sales price was mainly due to the decrease in corn price. We sold approximately 304,060 tons of DDGS feed in the year ended December 31, 2015 compared to approximately 259,500 tons in the year ended December 31, 2014, an increase of 44,560 tons, or 17.2%. The increase in sales volume was mainly due to strong market demand in 2015.

[Table of Contents](#)

Our revenue from liquid carbon dioxide decreased by approximately RMB16.3 million (\$2.3 million), or 41.4%, to RMB23.1 million (\$3.3 million) for the year ended December 31, 2015 to RMB39.3 million (\$5.7 million) for the year ended December 31, 2014, mainly due to a decrease in the weighted average sales price, netting off an increase in our sales volume. The weighted average sales price of liquid carbon dioxide decreased by RMB148 (\$21) or 45.1% to approximately RMB181 (\$26) per ton in the year ended December 31, 2015, as compared to RMB329 (\$47) per ton in the year ended December 31, 2014. This was mainly due to weak market demand resulting from lesser infrastructural investments in the PRC during 2015. We sold approximately 127,754 tons of liquid carbon dioxide in the year ended December 31, 2015 compared to approximately 119,641 tons in the year ended December 31, 2014, representing an increase of 8,113 tons, or 6.8%.

Our revenue from crude corn oil increased by approximately RMB2.0 million (\$0.3 million) or 1.2%, to RMB173.5 million (\$25.0 million) for the year ended December 31, 2015, compared to RMB171.5 million (\$24.7 million) for the year ended December 31, 2014, mainly due to a decrease in the weighted average sales price of crude corn oil, netting off an increase in our sales volume. Our sales volume was approximately 26,939 tons for the year ended December 31, 2015, as compared to 24,356 tons for the year ended December 31, 2014, representing an increase of 2,583 tons, or 10.6%. The weighted average sales price was RMB6,442 (\$929) per ton in the year ended December 31, 2015 compared to RMB7,041 (\$1,015) per ton in the year ended December 31, 2014, a decrease of RMB599 (\$86) per ton or 8.5%.

We began generating revenue from sales of our new CPE and foam insulation products in December 2013 and we expanded our CPE annual production volume to 25,000 tons in 2015. Revenue from CPE increased by approximately RMB52.8 million (\$7.6 million) or 68.5%, to RMB129.8 million (\$18.7 million) for the year ended December 31, 2015, as compared to RMB77.0 million (\$11.1 million) for the year ended December 31, 2014. Our sales volume was approximately 15,181 tons for the year ended December 31, 2015, as compared to 8,825 tons for the year ended December 31, 2014, representing an increase of 6,356 tons, or 72.0%. The weighted average sales price was RMB8,547 (\$1,232) per ton in the year ended December 31, 2015 compared to RMB8,724 (\$1,258) per ton in the year ended December 31, 2014, a decrease of RMB177 (\$26) per ton or 2.0%.

Revenue from foam insulation products and materials decreased by approximately RMB4.5 million (\$0.6 million) or 61.2%, to RMB2.9 million (\$0.4 million) for the year ended December 31, 2015, as compared to RMB7.4 million (\$1.1 million) for the year ended December 31, 2014. Revenue generated from sales of our foam insulation products and its raw materials amounted to RMB0.6 million (\$0.1 million) and RMB2.3 million (\$0.3 million), respectively. Our sales volume of foam insulation products was approximately 533 cubic meters for the year ended December 31, 2015, compared to 6,715 cubic meters for the year ended December 31, 2014, representing a decrease of 6,182 cubic meters, or 92.1%. The weighted average sales price was RMB1,094 (\$158) per cubic meter in the year ended December 31, 2015, which was stable as compare to the year ended December 31, 2014. We elected to temporarily exit the foam insulation business in 2015. After a comprehensive market review for foam insulation products, we concluded that the foam insulation market will likely face intense price competition, while simultaneously, we would need to invest a significant amount of additional R&D expenditure in order to effectively compete in terms of product variety. Consequently, we felt it was more prudent to exit the potentially challenging foam business. Accordingly, we took steps to fully write-down of the production lines for foam insulation products as a one-time, non-cash impairment of approximately RMB7.0 million (\$1.0 million).

Gross Profit

Gross profit increased by RMB19.3 million (\$2.8 million), or 7.4%, to RMB279.8 million (\$40.3 million), or 10.5% of revenues, for the year ended December 31, 2015, from RMB260.4 million (\$37.5 million), or 10.7% of revenues, for the year ended December 31, 2014, mainly due to the combined effect of the decrease in the weighted average selling price for edible alcohol and the decrease in corn price. The average price of our purchased corn was approximately RMB1,891 (\$273) per ton in the year ended December 31, 2015, a decrease of RMB62 (\$9) per ton, or 3.2%, from RMB1,953 (\$282) per ton in the year ended December 31, 2014. The weighted average sales price of edible alcohol was approximately RMB5,105 (\$736) per ton in the year ended December 31, 2015, compared to RMB5,174 (\$746) per ton in the year ended December 31, 2014, a slight decrease of RMB69 (\$10) per ton, or 1.3%.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased by RMB7.2 million (\$1.0 million), or 14.8%, to RMB55.5 million (\$8.0 million), for the year ended December 31, 2015, from RMB48.3 million (\$7.0 million), for the year ended December 31, 2014. The increase was primarily due to the following:

Selling expenses increased 6.8% from RMB4.9 million (\$0.7 million) for the year ended December 31, 2014 to RMB5.2 million (\$0.7 million) for the year ended December 31, 2015, in line with the increase in revenue.

[Table of Contents](#)

General and administrative expenses increased by RMB6.9 million (\$1.0 million), or 15.7%, from RMB43.4 million (\$6.3 million) for the year ended December 31, 2014 to RMB50.3 million (\$7.3 million) for the year ended December 31, 2015, primarily due to the increase in professional expenses and

salaries for senior management.

Impairment loss on Property, Plant and Equipment

We elected to temporarily exit the foam insulation business in 2015. After a comprehensive market review for foam insulation products, we concluded that the foam insulation market will likely face intense price competition, while simultaneously, we would need to invest a significant amount of additional R&D expenditure in order to effectively compete in terms of product variety. Consequently, we felt it was more prudent to temporarily exit the potentially challenging foam business. Accordingly, we took steps to fully write-down the production lines for foam insulation products as a one-time, non-cash impairment of approximately RMB7.0 million (\$1.0 million) for the year ended December 31, 2015.

Other Expenses

Other expenses were RMB45.5 million (\$6.6 million), primarily consisting of government subsidies received in November 2015 and recognized in income for corn processing of RMB42.6 million (\$6.1 million), interest expense of RMB100.6 million (\$14.8 million), interest income of RMB12.7 million (\$1.8 million), and other expense of RMB0.2 million (\$0.1 million) for the year ended December 31, 2015, as compared to other expenses of RMB106.5 million (\$15.4 million) for the year ended December 31, 2014, which primarily consisted of interest expense of RMB108.0 million (\$15.5 million), interest income of RMB2.7 million (\$0.4 million), loss on sale of available for sale securities of RMB2.0 million (\$0.3 million) and other income of RMB0.8 million (\$0.1 million). Interest expense decreased to RMB100.6 million (\$14.8 million) for the year ended December 31, 2015 from RMB108.0 million (\$15.5 million) for the year ended December 31, 2014, primarily due to the settlement of our corporate bond of RMB180.0 million (\$25.9 million) in 2015.

Income Tax Expense

We recorded RMB43.0 million (\$6.2 million) in income tax expense for the year ended December 31, 2015, compared to income tax expense of RMB26.4 million (\$3.8 million) for the year ended December 31, 2014. Since the effective tax rate remained relatively stable, the increase is consistent with the increase of our income before income tax expenses.

B. Liquidity and Capital Resources

Cash generated from our business is our primary source of liquidity. As of December 31, 2014, 2015 and 2016, we had approximately RMB830.4 million (\$119.7 million), RMB495.6 million (\$71.4 million) and RMB795.3 million (\$114.7 million), respectively, in cash. Our cash represents cash on hand and in banks. We require cash to fund our ongoing business needs, particularly salary and benefits and costs and expenses of raw materials. Other cash needs include primarily the working capital for our daily operations and manufacturing activities, the purchase of equipment for our manufacturing facilities and expenditures related to the expansion of our manufacturing facilities.

The following table sets forth a summary of our cash flows for the periods indicated:

	Year-ended December 31,			
	2014	2015	2016	2016
	RMB	RMB	RMB	\$
Net cash provided by operating activities	70,814,481	70,843,702	159,931,964	23,054,919
Net cash used in investing activities	(78,452,281)	(53,792,018)	151,193	21,794
Net cash provided (used) by financing activities	316,800,000	(351,800,000)	139,615,291	20,126,177
Effect of foreign currency exchange translation	(2,831)	(51,245)	10	1
Net increase (decrease) in cash	309,159,369	(334,799,561)	299,698,458	43,202,891

Net Cash Provided by Operating Activities

Net cash provided by operating activities was RMB70.8 million (\$10.2 million) for the year ended December 31, 2014. Net cash provided by operating activities was RMB70.8 million (\$10.2 million) for the year ended December 31, 2015. Net cash provided by operating activities was RMB159.9 million (\$23.1 million) for the year ended December 31, 2016. The increase in cash provided by operating activities for the year ended December 31, 2016 compared to the year ended December 31, 2015 was primarily due to the decrease in accounts receivables and upfront payments made to granaries, offset by an increased balance of inventory and a decreased balance of accrued expenses and other payables and income tax payable. Cash provided by operating activities for the year ended December 31, 2015 remained stable with that of the year ended December 31, 2014. Net cash provided by operating activities for the year ended December 31, 2016 was primarily due to the decrease in advances to suppliers for the upfront payments made to the granaries and account receivable, being offset by increased inventory balance.

[Table of Contents](#)

Net Cash Provided by Financing Activities

Financing Activities—Net cash provided by financing activities was RMB316.8 million (\$45.7 million) for the year ended December 31, 2014. Net cash used by financing activities was RMB351.8 million (\$50.7 million) for the year ended December 31, 2015. Net cash provided by financing activities was RMB139.6 million (\$20.1 million) for the year ended December 31, 2016. For the year ended December 31, 2014, net cash provided consisted of net borrowing of RMB316.8 million (\$45.7 million). For the year ended December 31, 2015, net cash used consisted of net repayment of borrowings of RMB171.8 million (\$24.8 million) and settlement of corporate bonds of RMB180 million (\$25.9 million). For the year ended December 31, 2016, net cash provided consisted of net borrowings of RMB68.0 million (\$9.8 million), settlement of corporate bonds of RMB221.3 million (\$31.9 million) and issuance of new bond of RMB292.9 million (\$42.2 million).

Financing Agreement—As of December 31, 2014, 2015 and 2016, excluding bond payable of RMB300.0 million (\$42.3) we had approximately RMB1,009.0 million (\$145.5 million), RMB837.2 million (\$120.7 million) and RMB905.2 million (\$130.5 million) outstanding short-term and long-term borrowings, bearing weighted average interest rates at 6.43%, 5.77% and 4.83% per annum, respectively.

During the year ended December 31, 2016, one short-term loan of RMB 12,000,000 (\$1,729,854) obtained from the Industrial & Commercial Bank of China was still outstanding:

- *A short-term loan of RMB12,000,000 (\$1,729,854)*—The interest bearing at a fixed rate was thereon based on the loan prime rate published by the People’s Bank of China (the “PBOC”) for loans with the same or similar terms on the withdrawing date (5.39% per annum as of the December 31, 2016). As of December 31, 2016, no prepayment was made and RMB12,000,000 (\$1,729,854) was still outstanding which will be repayable on October 11, 2017. The borrowing under the loan agreement is guaranteed by a third party company.

During the year ended December 31, 2016, thirteen short-term loans of RMB353,200,000 (\$50,915,381) were obtained from the Agricultural Bank of China was outstanding:

- *Three short-term loans of RMB83,200,000 (\$11,993,657)*—The interest bearing at a fixed rate was thereon based on the prime rate published by the PBOC for loans with the same or similar terms on the contract date rise 5% (4.57% per annum as of December 31, 2016). As of December 31, 2016, no prepayment was made, and RMB83,200,000 (\$11,993,657) was still outstanding, of which RMB43,200,000 (\$6,227,476) will be repayable on January 12, 2017 and RMB40,000,000 (\$5,766,181) will be repayable on March 10, 2017. All borrowings under the loan agreements are guaranteed by third party companies. The loans contain the following financial covenants: at any time during the loan period, debt-to-asset ratio of Shandong Borun shall not be higher than 70%; contingent liabilities of Shandong Borun shall not exceed 50% of its total net assets; and net operating cash flow shall not be negative for three consecutive years. The Company was in compliance with the above financial covenants as of December 31, 2016.
- *Two short-term loans of RMB30,000,000 (\$4,324,636)*—The interest bearing at a fixed rate was thereon based on the prime rate published by the PBOC for loans with the same or similar terms on the contract date (4.35% per annum as of December 31, 2016). As of December 31, 2016, no prepayment was made, and RMB30,000,000 (\$4,324,636) was still outstanding, of which RMB20,000,000 (\$2,883,091) will be repayable on June 30, 2017 and RMB10,000,000 (\$1,441,545) will be repayable on July 7, 2017. Borrowings under the loan agreements are guaranteed by a third party company. The loans contain the following financial covenants: at any time during the loan period, debt-to-asset ratio of Shandong Borun shall not be higher than 70%; contingent liabilities of Shandong Borun shall not exceed 50% of its total net assets; and net operating cash flow shall not be negative for three consecutive years. The Company was in compliance with the above financial covenants as of December 31, 2016.
- *Seven short-term loans of RMB190,000,000 (\$27,389,361)*—The interest bearing at a fixed rate was thereon based on the one year Loan Prime Rate (“LPR”) on the previous working day before withdrawing date rise 0.05% (4.35% per annum as of December 31, 2016). As of December 31, 2016, no prepayment was made, and RMB190,000,000 (\$27,389,361) was still outstanding, of which RMB20,000,000 (\$2,883,091) will be repayable on July 31, 2017, RMB20,000,000 (\$2,883,091) will be repayable on September 11, 2017, RMB40,000,000 (\$5,766,181) will be repayable on September 20, 2017, RMB30,000,000 (\$4,324,636) will be repayable on October 10, 2017, RMB30,000,000 (\$4,324,636) will be repayable on October 11, 2017, RMB20,000,000 (\$2,883,091) will be repayable on October 13, 2017 and RMB30,000,000 (\$4,324,636) will be repayable on November 3, 2017. All borrowings under the loan agreements are guaranteed by third party companies. The loans contain the following financial covenants: at any time during the loan period, debt-to-asset ratio of Shandong Borun shall not be higher than 70%; contingent liabilities of Shandong Borun shall not exceed 80% of its total net assets; and net operating cash flow shall not be negative for two consecutive years. The Company was in compliance with the above financial covenants as of December 31, 2016.
- *Five short-term loan of RMB50,000,000 (\$7,207,727)*—The interest bearing at a fixed rate was thereon based on the one year LPR on the previous working day before withdrawing date rise 0.05% (4.35% per annum as of December 31, 2016). As of December 31, 2016, RMB50,000,000 (\$7,207,727) was still outstanding and will be repayable on November 14, 2017. The borrowing under the loan agreement is guaranteed by a third party company. The loan contains the following financial covenants: at any time during the loan period, debt-to-asset ratio of Shandong Borun shall not be higher than 70%; contingent liabilities of Shandong Borun shall not exceed 50% of its total net assets; and net operating cash flow shall not be negative for two consecutive years. The Company was in compliance with the above financial covenants as of December 31, 2016.

[Table of Contents](#)

During the year ended December 31, 2016, the China Construction Bank granted us ten loans of RMB320,000,000 (\$46,129,451), of which RMB70,000,000 (\$10,090,818) has been repaid during 2016 and the outstanding balance as of December 31, 2016 was RMB250,000,000 (\$36,038,633). Details are as follow:

- *Nine short-term loans of RMB270,000,000 (\$38,921,724)*—The interest bearing at a fixed rate was thereon based on the LPR plus 92 basis point (5.22% per annum as of December 31, 2016). As of December 31, 2016, an amount of RMB70,000,000 (\$10,090,817) has been repaid during 2016 and RMB200,000,000 (\$28,830,906) was still outstanding, of which RMB20,000,000 (\$2,883,091) will be repayable on January 22, 2017, RMB40,000,000 (\$5,766,181) will be repayable on January 29, 2017, RMB20,000,000 (\$2,883,091) will be repayable on March 5, 2017, RMB25,000,000 (\$3,603,863) will be repayable on March 14, 2017, RMB25,000,000 (\$3,603,863) will be repayable on March 21, 2017, RMB25,000,000 (\$3,603,863) will be repayable on April 15, 2017, RMB25,000,000 (\$3,603,863) will be repayable on April 22, 2017 and RMB20,000,000 (\$2,883,091) will be repayable on May 12, 2017. All borrowings under these loan agreements are guaranteed by the subsidiary Shandong Borun, our CEO, and his three family members simultaneously. The loans contain the following financial covenants: at any time during the loan period, the credit rating shall not be lower than 10; debt-to-asset ratio of Daqing Borun shall not be higher than 70%; the current ratio of Daqing Borun shall be less than 0.80; contingent liabilities of Daqing Borun shall not exceed RMB367,930,734 (\$53,038,883); contingent liabilities of Daqing Borun shall not exceed 50% of its total net assets; and accumulated long-term investment of Daqing Borun shall not exceed 30% of its net assets. The Company was in compliance with the above financial covenants as of December 31, 2016.
- *One short-term loan of RMB50,000,000 (\$7,207,727)*—the interest bearing at a fixed rate was thereon based on the LPR plus 92 basis point (4.785% per annum as of December 31, 2016). As of December 31, 2016, an amount of RMB50,000,000 (\$7,207,727) was still outstanding and will be repayable on November 2, 2017. The borrowing under the loan agreement is guaranteed by the subsidiary Shandong Borun, our CEO, and his three family members simultaneously. The loan contains the following financial covenants: at any time during the loan period, the credit rating shall not be lower than 10; debt-to-asset ratio of Daqing Borun shall not be higher than 70%; the current ratio of Daqing Borun shall be less than 0.80; contingent liabilities of Daqing Borun shall not exceed RMB367,930,734 (\$53,038,883); contingent liabilities of Daqing Borun shall not exceed 50% of its total net assets; and accumulated long-term investment of Daqing Borun shall not exceed 30% of its net assets. The Company was in compliance with the above financial covenants as of December 31, 2016.

All the short-term loans of China Construction Bank stated above was pledged by property, plant and equipment and land use rights of the Company with total carrying value of RMB183,987,360 (\$26,522,612).

During the year ended December 31, 2016, the Agricultural Development Bank of China granted us three loans of RMB86,700,000 (\$12,498,198), of which RMB36,700,000 (\$5,290,471) has been repaid during 2016 and the outstanding balance as of December 31, 2016 was RMB50,000,000 (\$7,207,727). Details are as follow:

- *A short-term loan of RMB6,700,000 (\$965,835)*—The interest bore at a fixed rate of 4.35% per annum. As of December 31, 2016, the amount of RMB6,700,000 (\$965,835) has been repaid during 2016 and no balance was outstanding. Borrowing under the loan agreement is guaranteed by our CEO and his family member and pledged by property, plant and equipment of the Company. The pledge has been released along with the settlement of the loan.
- *A short-term loan of RMB30,000,000 (\$4,324,636)*—The interest bore at a fixed rate of 4.35% per annum. As of December 31, 2016, the amount of RMB30,000,000 (\$4,324,636) has been repaid during 2016 and no balance was outstanding. Borrowing under the loan agreement is guaranteed by our CEO and his family member and pledged by property, plant and equipment of the Company. The pledge has been released along with the settlement of the loan. The loan contains the following financial covenants: At any time during the loan period, debt-to-asset ratio of Daqing Borun shall not be higher than 70%; and operating cash flow of Daqing Borun shall not be negative. The Company was in compliance with the above financial covenants as of December 31, 2016.
- *A short-term loan of RMB50,000,000 (\$7,207,727)*—The interest bore at a fixed rate of 4.35% per annum. As of December 31, 2016, RMB50,000,000 (\$7,207,727) was still outstanding and will be repayable on September 29, 2017. The loan is granted under the scope of the Corn Acquisition Loan Guarantee Fund set up by the government of Heilongjiang Province. RMB15,000,000 (\$2,162,318) as a deposit of the loan has been paid subsequently on January 1, 2017.

[Table of Contents](#)

During the year ended December 31, 2016, China CITIC Bank granted us five loans of RMB139,970,000 (\$20,177,311), which are including:

- *Five short-term loans of RMB139,970,000 (\$20,177,311)*—The interest bearing at a fixed rate was thereon based on the prime interest rates on the withdrawing date plus 135.5 basis point (5.655% per annum as of December 31, 2016). As of December 31, 2016, an amount of RMB139,970,000 (\$20,177,311) was still outstanding, of which RMB39,980,000 (\$5,763,298) will be repayable on September 25, 2017, RMB49,000,000 (\$7,063,572) will be repayable on September 26, 2017, RMB19,990,000 (\$2,881,649) will be repayable on September 28, 2017, RMB15,000,000 (\$2,162,318) will be repayable on October 23, 2017 and RMB16,000,000 (\$2,306,473) will be repayable on October 25, 2017. All borrowings under these loan agreements are guaranteed by the subsidiary Shandong Borun, our CEO, and a third party company simultaneously.

During the year ended December 31, 2016, the Daqing Rural Commercial Bank granted us a short-term loan of RMB49,000,000 (\$7,063,572):

- *A short-term loan of RMB49,000,000 (\$7,063,572)*—The interest bore at a fixed rate of 3.50% per annum. As of December 31, 2016, an amount of RMB49,000,000 (\$7,063,572) was still outstanding, of which RMB14,700,000 (\$2,119,072) will be repayable on July 19, 2017, RMB14,700,000 (\$2,119,072) will be repayable on August 19, 2017 and RMB19,600,000 (2,825,429) will be repayable on September 19, 2017. The loan is guaranteed by a third party guarantor, to which we pledged our property, plant and equipment and land use rights with total carrying values of RMB92,953,353 (\$13,399,647).

During the year ended December 31, 2016, the Longjiang Bank granted us a short-term loan of RMB51,000,000 (\$7,351,881):

- *A short-term loan of RMB51,000,000 (\$7,351,881)*—The interest bore at a fixed rate of 5.655% per annum. As of December 31, 2016, an amount of RMB51,000,000 (\$7,351,881) was still outstanding, of which RMB15,000,000 (\$2,162,318) will be repayable on September 30, 2017, RMB15,000,000 (\$2,162,318) will be repayable on October 30, 2017, and RMB21,000,000 (3,027,245) will be repayable on November 30, 2017. The borrowing under the loan agreement is guaranteed by our CEO and his family member, and a third party guarantor, to which we pledged our property, plant and equipment and land use rights with total carrying values of RMB92,953,353 (\$13,399,647).

These facilities contain no specific renewal terms or, unless expressly provided for therein, any requirement for the maintenance of financial covenants. We have historically and successfully negotiated the renewal of certain facilities shortly before they mature. We have been making this type of loan arrangement since 2006. As we expanded our business, our borrowing capacity also increased over the years. This type of financing is very similar to a revolving line of credit and is a common practice in China, particularly in Shandong and Heilongjiang Provinces where our production facilities are located. Amounts outstanding under these bank loans are presented in our financial statements as short-term and long-term loans. Proceeds from these bank loans were used for working capital needs.

On January 29, 2013, our subsidiary, Shandong Borun successfully registered its plan to issue private placement bonds with an aggregate principal amount of RMB500.0 million (\$72.1 million) with the Shanghai Stock Exchange, the PRC (the “Registered Plan”). Under the Registered Plan, Shandong Borun would initially issue three-year fixed-rate private placement bonds with a principal amount of RMB350.0 million (\$50.5 million) on the date of registration, and thereafter, has the option to issue a second tranche of private placement bonds within six months from the date of registration with a principal amount of RMB150.0 million (\$21.6 million). The bonds were fully settled during the year ended December 31, 2016. The proceeds from issuance of the Bonds were used for the purposes of our working capital and capital expenditures.

On November 2, 2016, our subsidiary, Shandong Borun has issued a private placement bonds with an principal amount of RMB300.0 million (\$43.2 million) that registered with the Shanghai Stock Exchange. The proceeds from the issuance of the bonds were used in the purpose for our working capital and capital expenditures. The bonds were issued at face value of RMB100 (\$14) each, bear a fixed annual interest rate of 6.5%, with maturity on November 2, 2021, and RMB 100.0 million (\$14.4 million) should be repaid at the end of each of the third, fourth and fifth year life of the bonds. RMB300.0 million (\$43.2 million) was outstanding as of December 31, 2016.

Net Cash Used In Investing Activities

Investing Activities—Net cash used in investing activities largely reflects capital expenditures made in connection with the expansion and upgrade of our manufacturing facilities, and purchase of land use rights and restricted bank deposits. Net cash used in investing activities amounted to (1) RMB78.5 million (\$11.3 million) in the year ended December 31, 2014, mainly related to restricted bank deposits of RMB20.3 million (\$2.9 million), payment for completing

the expansion of our CPE plants and the construction of our two bams in Daqing of totaling RMB74.6 million (\$10.8 million) and proceeds from sale of our available-for-sale securities in the amount of RMB15.8 million (\$2.3 million) and proceeds from disposal of equipment of RMB0.6 million (\$0.1 million); (2) RMB53.8 million (\$7.8 million) in the year ended December 31, 2015, mainly related to proceeds from restricted bank deposits of RMB62.3 million (\$9.0 million), payment for completing the expansion and maintenance of our CPE plants of RMB22.5 million (\$3.2 million), payment for purchase the held-to-maturity debt securities of RMB98.7 million (\$14.2 million) and proceeds from disposal of equipment of RMB5.0 million (\$0.7 million). (3) RMB0.1 million (\$0.02 million) in the year ended December 31, 2016, mainly related to payment for maintenance our production facilities of RMB3.6 million (\$0.5 million) and the proceeds from disposal of the foaming insulation equipment of RMB3.7 million (\$0.6 million).

100

[Table of Contents](#)

Future Capital Requirements—We had cash on hand of RMB830.4 million (\$127.9 million), RMB495.6 million (\$76.3 million) and RMB795.3 million (\$114.7 million) on December 31, 2014, 2015 and 2016, respectively. Based on the current market conditions, we expect to incur capital expenditures ranging from RMB5 million (\$0.7 million) to RMB10 million (\$1.4 million) for 2017, which related primarily to the payment for equipment of CPE projects and the maintenance our production facilities. We expect to fund the planned expenditures, including our working capital requirements, through cash generated from operations, borrowings through bank loans, and the proceeds from issuances of equity or debt instruments and we believe such cash generated from these activities will be sufficient for our planned expenditures including our working capital requirements.

C. Research and Development

We spent approximately RMB1,580,480 (\$227,833), RMB968,000 (\$139,542) and RMB1,066,400 (\$153,726), during the fiscal years ended December 31, 2014, 2015 and 2016, respectively, on Company-sponsored research and development activities, including, without limitation, all activities in respect of our in-house developed Borun wet process.

D. Trend Information

Other than as disclosed elsewhere in this annual report, we are not aware of any trends, uncertainties, demands, commitments or events for the period from January 1, 2017 to December 31, 2017 that are reasonably likely to have a material adverse effect on our revenues, income, profitability, liquidity or capital resources, or that caused the disclosed financial information to be not necessarily indicative of future operating results or financial conditions.

E. Off-Balance Sheet Commitments and Arrangements

We were the guarantor for certain third parties for their short-term bank loans amounting to RMB298.0 million (\$43.0 million) that matured within one year. Except for such guarantees, we have no material off-balance sheet transactions. We do not have any off-balance sheet outstanding derivative financial instruments, interest rate swap transactions or foreign currency forward contracts. We do not engage in trading activities involving non-exchange traded contracts.

F. Tabular Disclosure of Contractual Obligations

The following table sets forth our contractual obligations as of December 31, 2016:

	Total	Payment Due By Period			
		Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Capital commitment	—	—	—	—	—
Purchase obligations for corn	—	—	—	—	—
Bonds payable	378.0	19.5	139.0	219.5	—
Short-term debt	905.2	905.2	—	—	—
Total:	1,283.2	924.7	139.0	219.5	—

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. Directors and Senior Management

The following table sets forth information regarding our directors and executive officers as of the date of this annual report.

Name	Age	Position(s)
Jinmiao Wang	46	Chief Executive Officer and Chairman of the Board
Bing Yu	40	Chief Strategy Officer
Yuanqin Chen	33	Chief Financial Officer
Hengxiu Song	45	Chief Operations Officer, General Manager of Shandong Borun Industrial Co., Ltd. and Director
Wei Qi	57	Chief Technology Officer
Shunliang Hu	50	General Manager of Daqing Borun Biotechnology Co., Ltd.
Wen Jiang	52	Independent Director
Xisheng Lu	66	Independent Director
Binbin Jiang	42	Independent Director

Unless otherwise indicated, the business address of each director and executive officer is Bohai Industrial Park (Yangkou Town), Shouguang, Shandong 262715, China.

[Table of Contents](#)
Biographies of Officers and Directors
Mr. Jinmiao Wang, Chief Executive Officer and Chairman of the Board

Mr. Wang has served as our chief executive officer and chairman of the board since 2010. Mr. Wang also serves as the chairman of Shandong Borun and has served in such capacity since July 2008. Prior to that, Mr. Wang served as the chairman and general manager of Shandong Borun from March 2006 to July 2008. From June 2004 to March 2006, Mr. Wang served as the chairman and general manager of Shandong Borun Salt Industrial Co., Ltd., Shandong Borun's predecessor company. From December 2000 to June 2004, Mr. Wang served as the chairman and general manager of Shouguang Haihong Salt-Making Co., Ltd. in the city of Shouguang in Shandong Province. Mr. Wang has been honored as a private entrepreneur in Shandong Province, having made significant contributions to his local economy in China.

Mr. Hengxiu Song, Chief Operations Officer, General Manager of Shandong Borun Industrial Co., Ltd. and Director

Mr. Song has served as our chief operations officer since 2010 and served as the general manager of Shandong Borun Industrial Co., Ltd. since 2011. He has also served as the director of administration of Shandong Borun since April 2005. From April 2010 to November 2010 and from June 2011 to present, Mr. Song has served as director. From February 2002 to March 2005, Mr. Song served as the marketing and purchasing director of Shandong Borun Salt Industrial Co., Ltd., Shandong Borun's predecessor company. Mr. Song obtained a bachelor's degree in Economics and Management from the Capital University of Economics and Business.

Mr. Wen Jiang, Independent Director

Mr. Wen Jiang has served as our independent director since January 2013. He has served as Managing Director of an accounting firm, Wen Jiang & Company, PC, aka Wen Y Jiang CPA, PC in Portland, Oregon since August 1993, which has provided services to more than 300 clients in the public and private sectors. From October 1990 to July 1993, Mr. Jiang served as an accountant at Larson, Dowsett & Fogg, CPA's, PC in Portland, Oregon. Mr. Jiang has also served as an independent director of Andatee China Marine Fuel Services Corporation since May 2009, an independent director of China Industrial Waste Management, Inc. from August 2010 to September 2011, and a trustee of Robert E. & Joanne Gillespie Irrevocable Trust since 1994. He is a licensed CPA in the State of Oregon (1993) and a registered member with PCAOB. Mr. Jiang holds a Bachelor's degree of Science in Accounting from Eastern Oregon University (1989).

Mr. Xisheng Lu, Independent Director

Mr. Xisheng Lu has served as our independent director since January 2013. He has served as Chairman and Factory Director of Jin Long Distillery Factory in Qionglai City, Sichuan Province, China since 1991. From 1976 to 1990, he served as Factory Director of the First Liquor Making Branch Factory of Qionglai Sugar & Liquor Factory, the predecessor of Jin Long Distillery Factory. In 2002, Mr. Lu was elected as a standing director of the Alcoholic Drinks (*baijiu*) Association of Sichuan Province and an editor of the Sichuan Province Alcoholic Drinks (*baijiu*) Magazine. In 2007, Mr. Lu received the certificate of National Senior Alcoholic Drinks (*ba jiu*) maker. Mr. Lu is a Senior Engineer in the making of *baijiu* with nearly 40 years' experience in the *baijiu* industry.

[Table of Contents](#)
Mr. Binbin Jiang, Independent Director

Mr. Jiang has served as our independent director since June 2010. Since July 1997, he has served as the general secretary of Shandong Alcohol Industry Association, a member of the Technology Committee of the China Alcoholic Drinks Industry Association, Alcohol Branch, the vice general secretary of Shandong White Spirits Industry Association, the vice general secretary of Shandong Beer Industry Association, and the vice president of Shandong Food Industry Limited. He obtained a bachelor's degree in Fermentation from Food Engineering School of Shandong Institute of Light Industry.

Ms. Bing Yu, Chief Strategy Officer

Ms. Yu has served as our chief strategy officer since January 2012. Since 2010, she served as our chief financial officer and has served as our chief financial officer of Shandong Borun since October 2009. From June 2007 to September 2009, Ms. Yu served as the executive director of Brainzoom Business Consulting Co., Ltd., a business and financial consulting services company in China. From March 2006 to May 2007, Ms. Yu served as the corporate financial director of Cellon International Holdings Corporation in Shenzhen, China. Prior to that, Ms. Yu worked at Arthur Andersen & Co. and as a manager of Assurance and Business Advisory at PricewaterhouseCoopers in Shenzhen. Ms. Yu earned a bachelor's degree in Accounting from the Central University of Finance and Economics in Beijing, China. Ms. Yu is a Certified Internal Auditor, a member of the Chinese Institute of Certified Public Accountants and a member of the Association of Chartered Certified Accountants.

Mr. Yuanqin Chen, Chief Financial Officer

Mr. Chen has served as our chief financial officer since January 2012. Since August 2010, he has served as our vice-president for finance and financial reporting manager. Prior to that, Mr. Chen worked at KPMG Huazhen in Shanghai, from July 2006 to July 2010, where he performed statutory and Sarbanes-Oxley-Act-related internal control audit, annual audit and reporting, and audit for initial public offerings for various companies listed on the New York Stock Exchange, Hong Kong Stock Exchange, and Shanghai Stock Exchange. Mr. Chen earned a Bachelor's degree with a major in Business Administration from Shanghai International Studies University and a Bachelor's degree in Economics from Fudan University in China.

Mr. Wei Qi, Chief Technology Officer

Mr. Qi has served as our chief technology officer since 2010 and as chief technology officer of Daqing Borun since August 2008. Mr. Qi has also served as the chief engineer of Shandong Borun Industrial Co., Ltd. from July 2005 to August 2008. From January 2000 to June 2005, he was the vice president of Shandong Jiujiu Limited, an edible alcohol producer with advanced technologies. Mr. Qi obtained a bachelor's degree in Sciences from Qiqihaer Light Industrial College.

Mr. Shunliang Hu, General Manager of Daqing Borun Biotechnology Co., Ltd.

Mr. Hu has served as the general manager of Daqing Borun Biotechnology Co., Ltd. since January 2014. He served as the administrative deputy general manager of Daqing Borun Biotechnology Co., Ltd. from September 2011 to December 2013. Before that, Mr. Hu served as deputy general manager of Chengming Co., Ltd. in Heilongjiang Province. Mr. Hu obtained a bachelor's degree in Thermal Power Engineering from Shandong Industrial University.

B. Compensation

Compensation of Directors and Executive Officers

In 2016, the aggregate cash compensation to our executive officers and directors was RMB 3,400,000 (\$490,125).

Employment Agreements

We have entered into employment agreements with all of our executive officers. Under these agreements, each of our executive officers is employed for a specified time period. We may terminate his or her employment for cause at any time, with prior written notice, for certain acts of the employee, including but not limited to a conviction to a felony, or willful gross misconduct by the employee in connection with his employment, and in each case if such acts have resulted in material and demonstrable financial harm to us. An executive officer may, with prior written notice, terminate his or her employment at any time for any material breach of the employment agreement by us that is not remedied promptly after receiving the remedy request from the employee. Furthermore, either party may terminate the employment agreement at any time without cause upon advance written notice to the other party. Upon termination, the employee is generally entitled to severance pay equal to a certain specified number of months of his or her then base salary, depending on the length of his or her employment with us.

Each executive officer has agreed to hold, both during and subsequent to the terms of his or her agreement, in confidence and not to use, except in pursuance of his or her duties in connection with their employment, any of our confidential information, technological secrets, commercial secrets or know-how. Each of our executive officers has entered into a confidentiality agreement with us. Our executive officers have also agreed to disclose to us all inventions, designs and techniques that have resulted from work performed by them, and to assign us all right, title and interest of such inventions, designs and techniques.

105

[Table of Contents](#)

C. Board Practices

Board of Directors

Our board of directors is currently comprised of five directors, including three independent board members. Each of our directors was re-elected at our 2016 annual meeting of shareholders, which was held on January 6, 2017, to hold office until our next annual meeting of shareholders, which we currently expect will be held in December 2017. Jinmiao Wang, Hengxiu Song, Wen Jiang, Xisheng Lu and Binbin Jiang were re-elected as our directors. Jinmiao Wang, Hengxiu Song and Binbin Jiang have served on our board since 2010, although Mr. Song stepped down from the Board during the period November 2010 to June 2011. Wen Jiang and Xisheng Lu have served on our board since January 2013.

None of our directors have any contractual arrangements with us or any of our subsidiaries providing for benefits upon termination of employment.

A director is not required to hold any shares in our Company by way of qualification. A director may vote with respect to any contract, proposed contract or arrangement in which he or she has a material interest, provided that the director has made the appropriate declaration of interest in the contract, proposed contract or arrangement. The directors may exercise all the powers of our Company to borrow money, mortgage its undertaking, property and uncalled capital, and issue debentures or other securities whenever money is borrowed or as security for any obligation of our Company or any third party. We have established three committees of the board of directors:

- the audit committee;
- the compensation committee; and
- the corporate governance and nominating committee.

We have adopted a charter for each committee to comply with the Sarbanes-Oxley Act and NYSE corporate governance rules. The charters of each of the committees are available on our website, www.chinaneborun.com. We have also adopted corporate governance guidelines to assist the board in the exercise of its responsibilities, which is available on our website at www.chinaneborun.com. Each committee's members and functions are described below.

Board Committees

Audit Committee

Our audit committee consists of Wen Jiang, Xisheng Lu and Binbin Jiang, each of whom satisfy the “independence” tests of Section 303A.02 of the NYSE Listed Company Manual and Rule 10A-3 promulgated under the United States Securities Exchange Act of 1934, as amended, or the Exchange Act. Wen Jiang is the chairman of our audit committee and meets the definition of an audit committee “financial expert” as set forth under Item 401(h) of Regulation S-K. The audit committee oversees our accounting and financial reporting processes and the audits of the financial statements of our company. The audit committee is responsible for, among other things:

- selecting our independent registered public accounting firm and pre-approving all auditing and non-auditing services permitted to be performed by our independent registered public accounting firm;

106

[Table of Contents](#)

- reviewing with our independent registered public accounting firm any audit problems or difficulties and management’s response;
- reviewing and approving all proposed related-party transactions, as defined in Item 404 of Regulation S-K under the Securities Act;
- discussing the annual audited financial statements with management and our independent registered public accounting firm;
- reviewing major issues as to the adequacy of our internal controls and any special audit steps adopted in light of significant control deficiencies;
- annually reviewing and reassessing the adequacy of our audit committee charter;
- such other matters that are specifically delegated to our audit committee by our board of directors from time to time; and
- meeting separately and periodically with management and our internal auditor and independent registered public accounting firm.

Compensation Committee

Our compensation committee consists of Wen Jiang, Xisheng Lu and Binbin Jiang, each of whom satisfy the “independence” tests of Section 303A.02 of the NYSE Listed Company Manual. Binbin Jiang is the chairman of our compensation committee. Our compensation committee assists the board in reviewing and approving the compensation structure of our directors and executive officers, including all forms of compensation to be provided to our directors and executive officers. Members of the compensation committee are not prohibited from direct involvement in determining their own compensation. The compensation committee is responsible for, among other things:

- approving and overseeing the compensation package for our executive officers;
- reviewing and making recommendations to the board with respect to the compensation of our directors; and
- reviewing periodically and making recommendations to the board regarding any long-term incentive compensation or equity plans, programs or similar arrangements, annual bonuses, employee pension and welfare benefit plans.

107

[Table of Contents](#)

Corporate Governance and Nominating Committee

Our corporate governance and nominating committee consists of Wen Jiang, Xisheng Lu and Binbin Jiang, each of whom satisfy the “independence” tests of Section 303A.02 of the NYSE Listed Company Manual. Xisheng Lu is the chairman of our corporate governance and nominating committee. The corporate governance and nominating committee assists the board of directors in identifying individuals qualified to become our directors and in determining the composition of the board and its committees. The corporate governance and nominating committee is responsible for, among other things:

- identifying and recommending to the board nominees for election or re-election to the board, or for appointment to fill any vacancy;
- reviewing annually with the board the current composition of the board in light of the characteristics of independence, age, skills, experience and availability of service to us;
- advising the board periodically with respect to significant developments in the law and practice of corporate governance as well as our compliance with applicable laws and regulations, and making recommendations to the board on all matters of corporate governance and on any corrective action to be taken; and
- monitoring compliance with our code of business conduct and ethics, including reviewing the adequacy and effectiveness of our procedures to ensure proper compliance.

Duties of Directors

Under Cayman Islands law, our directors have a fiduciary duty to act honestly, in good faith and with a view to our best interests. Our directors also have a duty to exercise the skill they actually possess and such care and diligence that a reasonably prudent person would exercise in comparable circumstances. In fulfilling their duty of care to us, our directors must ensure compliance with our memorandum and articles of association, as amended and restated from time to time.

The functions and powers of our board of directors include, among others:

- convening shareholders' annual general meetings and reporting its work to shareholders at such meetings;
- declaring dividends and distributions;
- appointing officers and determining the term of office of officers;
- exercising the borrowing powers of our company and mortgaging the property of our company; and
- approving the transfer of shares of our company, including the registering of such shares in our register of members.

[Table of Contents](#)

D. Employees

As of the date of this annual report, our Shouguang facility had 714 full-time employees and our Daqing facility had 445 full-time employees for a total of 1,159 full-time employees, which is comprised of 880 manufacturing staff, 240 management and administrative personnel, and the rest, 39 full-time employees in our sales department. We believe we have a good relationship with our employees, and we have never experienced a work stoppage or a labor dispute that has interfered with our operations. At our Daqing facility, we house our employees in Company-owned apartment buildings. With respect to our Shouguang facility, we have chosen a piece of land for the construction of dormitories for our employees in the city of Shouguang and we plan to construct such housing in the future. When complete, we will allocate housing for our employees and provide shuttle bus services to and from the Shouguang facility.

In the PRC, in accordance with the relevant labor and social welfare laws and regulations, we are required to pay, in respect of our employees in the PRC, various social insurance including pension insurance, medical insurance, unemployment insurance, occupational injury insurance and maternity insurance. In accordance with applicable PRC regulations on housing funds, we are also required to contribute to a housing fund for our employees. In the past, we had been delinquent with respect to the payment of social insurance and housing fund payments. We may be liable for the payments and fines arising from such delinquent payments. Total contributions to such funds were approximately RMB9.8 million (\$1.4 million), RMB10.4 million (\$1.5 million) and RMB10.4 million (\$1.5 million) for the years ended December 31, 2014, 2015 and 2016, respectively. We expect that the amount of our contribution to the government's social insurance funds will increase in the future as we expand our workforce and operations.

For the year ended December 31, 2016, we have paid RMB64,260 (\$9,263) and RMB4,870,975 (\$702,173) for group casualty insurance and pension insurance, respectively.

E. Share Ownership

The following table sets forth information with respect to the beneficial ownership, within the meaning of Rule 13d-3 under the Exchange Act, of our ordinary shares, as of April 25, 2017, by each of our directors and executive officers, and each person known to us to own beneficially more than 5% of our ordinary shares.

Beneficial ownership includes voting or investment power with respect to securities. Except as indicated below, and subject to applicable community property laws, the persons named in the table below have sole voting and investment power with respect to all ordinary shares shown as beneficially owned by them. Percentage of ordinary shares beneficially owned by each person is based on 25,725,000 ordinary shares outstanding as of March 7, 2010. All ordinary shares owned by such person, including ordinary shares underlying share options and warrants that are exercisable within 60 days after March 7, 2010 are deemed to be outstanding and beneficially owned by that person for the purpose of computing the percentage ownership of that person, but are not considered outstanding for the purpose of computing the percentage ownership of any other person.

⁽¹⁾ King River Holding Limited is a British Virgin Islands company which is 100% controlled and owned by Mrs. Wang, the mother of our CEO Mr. Jinmiao Wang, however, Mr. Wang expressly disclaims any nominal or beneficial ownership of the shares owned by King River Holding

Limited and shares of capital stock of any of our group companies. Mrs. Wang has sole voting power and investment control of the shares held by King River Holding Limited, the business address of which is Kingston Chambers, P.O. Box 173, Road Town, Tortola, British Virgin Islands.

None of our shareholders has different voting rights from other shareholders. We are not aware of any arrangement that may, at a subsequent date, result in a change of control of our Company.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. Major Shareholders

Please refer to Item 6.E, “Directors, Senior Management and Employees — Share Ownership.”

110

[Table of Contents](#)

B. Related Party Transactions.

Reorganization of Shandong Borun into China High

Shandong Borun, our predecessor company which has been controlled by Mr. Wang and his father since Shandong Borun’s incorporation in the PRC in December 2000, underwent a corporate reorganization between September and December 2008 for the purpose of facilitating investments into Shandong Borun by unrelated off-shore (non-PRC) private equity investors.

In September 2008, Golden Direction, a British Virgin Islands limited liability company beneficially owned by Mrs. Wang, a member of the Wang Family, acquired China High, a Hong Kong holding company, from an unrelated party, whereby Golden Direction acquired the sole share of capital (an ordinary share) and in October 2008, China High issued an additional 7,999 ordinary shares to Golden Direction in preparation of the reorganization. In October 2008, China High acquired all of the equity interests of WGC, a PRC limited liability company, from an unrelated party for cash consideration of \$160,000.

In December 2008, WGC acquired 100% of the equity interests in Shandong Borun. The cash consideration paid by WGC for Shandong Borun was equivalent not to the fair market value of Shandong Borun, but rather to the registered capital of Shandong Borun, or RMB76,500,000 (\$11,027,822). Such acquisition was approved by the PRC governmental authorities and no member of the Wang Family or any other party received any compensation or any return on investment in connection with the reorganization. The result of this reorganization was to maintain Wang Family control of Shandong Borun, while creating a corporate structure which allowed offshore foreign investment in our Company in compliance with PRC law.

The 2008 reorganization enabled us to raise capital through the issuance of China High capital stock to our three previously unrelated private equity investors, including (a) Star Elite, which had made its investment in October 2008, (b) Earnstar, which had made its investment in June 2009 and (c) TDR, which had made its investment in September 2009. These initial investments of approximately \$18 million made by Star Elite, Earnstar and TDR between October 2008 and September 2009 were made at arms’ length after a series of negotiations and performance of due diligence, and the per share value of capital stock in China High issued in connection with each investment was based on the price to earnings ratio at the time of issuance which reflected the fair market value of our business. Prior to Star Elite’s investment in October 2008, Golden Direction was the sole shareholder of China High since September 2008.

Reorganization of China High into New Borun

Effective as of March 31, 2010, our Hong Kong holding company China High and its controlling shareholder Golden Direction, a company beneficially owned by Mrs. Wang, a member of the Wang Family, underwent a corporate reorganization with China High’s minority shareholders Star Elite, Earnstar and TDR (further details of which are set out below) for purposes of listing our securities on a national securities exchange in the United States as a foreign private issuer and for other tax reasons. No member of the Wang Family or any other party received any compensation or any return on investment in connection with the reorganization.

111

[Table of Contents](#)

In connection with such reorganization, Mrs. Wang, a member of the Wang Family, incorporated our company in the Cayman Islands on December 21, 2009 as a result of which Mrs. Wang ultimately received the sole initial subscriber share of our company. On March 9, 2010, Mrs. Wang transferred such sole share to King River, a British Virgin Islands company owned and controlled by Mrs. Wang.

By resolution of the shareholders passed on March 12, 2010, the authorized share capital of our company was converted from shares having a par value of \$1.00 to shares having a par value of \$0.001. As a consequence of this variation of share capital, the initial subscriber share (with a par value of \$1.00) held by King River was repurchased by our company, and one new share (with a par value of \$0.001) was issued by our company to King River.

On March 15, 2010 we signed, and effective as of March 31, 2010 we consummated, a share exchange agreement with Golden Direction and King River, whereby we acquired 100% of the voting share capital of Golden Direction from King River in exchange for the issuance by us to King River of an additional 14,847,810 ordinary shares. Such additional shares were issued to King River on March 17, 2010, following which King River held 14,847,811 ordinary shares, representing 100% of our issued share capital. As of the consummation of the share exchange pursuant to the share exchange agreement, Golden Direction became our wholly owned subsidiary and Golden Direction held approximately 74.24% of the voting capital of China High.

On February 28, 2010 our company and Golden Direction signed, and effective as of March 31, 2010 our company and Golden Direction consummated, a second share exchange agreement whereby Golden Direction acquired the remaining 25.76% (approximate) of China High. Upon closing that exchange, we issued (i) 3,711,952 of our Class A convertible preference shares, which were automatically convertible into 3,711,952 of our ordinary shares upon the closing of the initial public offering, to Star Elite, one of our private equity investors which is wholly owned by Ms. Ping Chen, (ii) 1,065,330 shares of our Class B

convertible preference shares, which were automatically convertible into 1,065,330 ordinary shares upon the closing of the initial public offering, to Earnstar, one of our private equity investors which is wholly owned by Ms. Yibin Wei, who became our director effective April 23, 2010 in connection with the exchange and (iii) 374,907 shares of our Class C convertible preference shares, which were automatically convertible into 374,907 ordinary shares upon the closing of the initial public offering to TDR, one of our private equity investors which is wholly owned by Mr. Ruiping Wang, who became our director effective April 23, 2010 in connection with the exchange.

Such reorganization did not result in any change in control as the previous shareholders of China High received their pro rata ownership percentages in our company upon the completion of the reorganization.

[Table of Contents](#)

Reorganization of Shandong Borun and merger of WGC into Shandong Borun

As of November 15, 2012, WGC has merged with and into Shandong Borun and Shandong Borun has been reorganized into a wholly owned subsidiary of China High.

Shareholders Agreement

In connection with and as contemplated by the exchange agreement described in the paragraph above, we entered into a shareholders agreement, effective as of March 31, 2010, with Star Elite, Earnstar, TDR and King River, which sets forth the preference rights held by each of Star Elite, Earnstar and TDR in our company. The shareholders agreement provided for the automatic conversion of each Class A, B and C preference share into our ordinary shares, and each of the preference shareholders agreed to waive all conditions in the shareholders agreement so that all of their preference shares automatically converted into ordinary shares upon the closing of our initial public offering, which was consummated on June 16, 2010. Therefore, all Class A, B and C preference shares have been fully converted into ordinary shares.

The shareholders agreement further provided that Star Elite, Earnstar and TDR would, upon the closing of a qualified public offering (which includes the initial public offering), retain the right to nominate one director candidate at the next annual meeting of our shareholders, which was held in December 2010, however such nominating right did not guarantee that such director candidate would be elected to serve as a director.

Furthermore, Earnstar and TDR (for purposes of this subsection only, a “Holder” or collectively as “Holders”) retain Form F-3 registration rights, which shall terminate five years following the closing of our initial public offering unless terminated sooner upon the earlier of (i) the completion of a Liquidation Event (as defined in the shareholders agreement) and (ii) as to either Holder, when all Registrable Securities (as defined in the shareholders agreement) held by such Holder could be sold without restriction under Rule 144 within a 90 day period.

Upon receipt of a written request to effect a registration on Form F-3 in accordance with the terms of the shareholders agreement, the Company shall be obligated to effect, as soon as practicable, such registration and all such qualifications and compliances as may be so requested, together with all or such portion of the Registrable Securities of any other Holder entitled to join in such request in accordance with the terms of the shareholders agreement. However, we are not obligated to effect any registration:

- if Form F-3 is not available for such offering by the Holder(s),
- if the Holder(s), together with the holders of any other of our securities entitled to inclusion in such registration, propose to sell Registrable Securities and such other securities (if any) at an aggregate price to the public of less than \$10,000,000,

[Table of Contents](#)

- if we furnish to the Holders a certificate signed by our President or Chief Executive Officer stating that in the good faith judgment of our Board, it would be materially detrimental to us and to our shareholders for such Form F-3 registration to be effected at such time, in which event we shall have the right to defer the filing no more than once during any 12 month period for a period of not more than 60 days after receipt of the request of the Holder(s); provided that we shall not register any of its other shares during such 60 day period,
- if we have, within the six month period preceding the date of such request, already effected a registration under the Securities Act other than a registration from which the Registrable Securities of the Holder(s) have been excluded (with respect to all or any portion of the Registrable Securities the Holder(s) requested be included in such registration) or
- in any particular jurisdiction in which we would be required to qualify to do business or to execute a general consent to service of process in effecting such registration, qualification or compliance.

Form F-3 registrations are deemed not to be “demand” registrations and except as otherwise provided in the shareholders agreement, there shall be no limit on the number of times the Holder(s) may request registration of Registrable Securities.

All registration expenses incurred in connection with any registration (but excluding certain Selling Expenses set forth in the shareholders agreement) shall be borne by us. The shareholders agreement also includes standard indemnification provisions. If we are obligated to file a registration statement, we are obligated to use our best efforts to cause such registration statement to become effective, and, upon the request of the Holder(s) of a majority of the Registrable Securities registered thereunder, keep such registration statement effective for a period of up to 90 days or, in the case of Registrable Securities registered under Form F-3 in accordance with Rule 415 under the Securities Act, until the distribution contemplated in the registration statement has been completed; provided, however, that such 90 day period shall be extended under certain circumstances as set forth in the shareholders agreement.

Without the prior written consent of the Holder(s) of a majority in interest of the Registrable Securities then outstanding, we have covenanted and agreed that we shall not grant for the benefit of any person or entity any registration rights of any kind (whether similar to the “demand,” “piggyback” or Form F-3

registration rights or otherwise) relating to any securities of the Company which are senior to, or on a parity with, those granted to the Holders of Registrable Securities. A complete description of such registration rights are set forth on Exhibit C to the shareholders agreement.

Additional Related Party Transactions

There was no related party transactions in the fiscal year ended December 31, 2016.

C. Interests of Experts and Counsel

Not applicable.

[Table of Contents](#)

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Statements and Other Financial Information.

We have appended consolidated financial statements filed as part of this annual report. See Item 18, “Financial Statements.”

Legal Proceedings

See Item 4, “Information on the Company — Business Overview — Legal Proceedings.”

Dividend Policy

Our board of directors has complete discretion on whether to pay dividends on our ordinary shares. Even if our board of directors decides to pay dividends, the form, frequency and amount will depend upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors that the board of directors may deem relevant.

We did not declare any dividends in 2014, 2015 and 2016. In the future, at the determination of our board of directors, we may from time to time pay a cash dividend to our shareholders. The payment of any such dividend will depend upon our profitability and will be subject to the discretion of our management and the approval of our board of directors. Aside from the payment of such dividends, we currently intend to retain the remainder of our available funds and any future earnings to operate and expand our business.

Our ability to pay dividends depends substantially on the payment of dividends to us by our operating subsidiaries in China. Each of the operating subsidiaries may pay dividends only out of its accumulated distributable profits, if any, determined in accordance with its articles of association, and the accounting standards and regulations in China. Each of our PRC subsidiaries, including wholly foreign-owned enterprises, or WFOEs, is also required to set aside at least 10% of its after-tax profit based on PRC accounting standards each year to its statutory capital reserve fund until the aggregate amount of such reserves reaches 50% of its respective registered capital.

Our statutory reserves are not distributable as loans, advances or cash dividends. In addition, if any of our PRC subsidiaries incurs debt on its own behalf in the future, the instruments governing the debt may restrict its ability to pay dividends or make other distributions to us. Any limitation on the payment of dividends by our subsidiaries could materially and adversely limit our ability to grow, make investments or acquisitions that could be beneficial to our businesses, pay dividends and otherwise fund and conduct our businesses. See Item 3.D, “Key Information — Risk Factors — Risks Related To Operating In China — *We rely on dividends and other distributions on equity paid by our subsidiaries for our cash needs.*”

[Table of Contents](#)

In addition, if our Company is considered a PRC-resident enterprise for tax purposes, any dividends distributed by our Company to our Company’s non-resident corporate shareholders as well as gains realized by such shareholders from the transfer of our shares may be regarded as China-sourced income and as a result, may be subject to PRC withholding tax at the rate of up to 10%, depending on the provisions of a tax treaty between the PRC and the jurisdiction in which the non-resident shareholder resides. See Item 3.D, “Key Information — Risk Factors — Risks Related To Operating In China — *Dividends payable by us to our non-PRC resident shareholders may become subject to taxes under PRC tax laws.*”

Furthermore, pursuant to the Tax Arrangement, Notice 81 and the Administrative Measures, a payment of dividends by WGC to China High Enterprises Limited, which holds 100% of the equity interest in WGC, may be subject to a PRC withholding tax at a rate of 5%, if the provisions of Notice 81 and the Administrative Measures are satisfied and our overseas members are not considered to be PRC-resident enterprises for tax purposes. See Item 3.D, “Key Information — Risk Factors — Risks Related To Operating In China — *Dividends payable by our company to its non-resident shareholders may become subject to taxes under the PRC tax laws.*” and see also Item 10. E, “Additional Information — Taxation — People’s Republic of China Taxation.” We are actively monitoring the withholding tax and are evaluating appropriate organizational changes to minimize the corresponding tax impact.

If we pay any dividends, the Depositary will distribute such payments to our ADS holders to the same extent as holders of the corresponding numbers of our ordinary shares, subject to the terms of the deposit agreement, including the fees and expenses payable thereunder. Cash dividends on our ordinary shares, if any, will be paid in U.S. dollars.

B. Significant Changes

Except as disclosed elsewhere in this annual report, we have not experienced any significant changes since the date of our audited consolidated financial statements included in this annual report.

A. Offering and listing details**Price Range of Our ADSs**

Our ADSs, each representing one of our ordinary shares, have been listed on the NYSE since June 11, 2010. The following table provides the high and low trading prices for our ADSs on the NYSE for the periods indicated. On April 20, 2017, the closing sale price of our ADSs as reported on the NYSE was \$1.16 per ADS.

116

Not applicable.

B. Memorandum and Articles of Association

We incorporate by reference into this annual report the description of our amended and restated articles of association contained in our F-1 registration statement (File No. 333-166312) originally filed with the Securities and Exchange Commission on April 27, 2010, as amended. For further information regarding our amended and restated articles of association, share capital and the Companies Law, Cap.22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands, see the section titled "Description of Share Capital" in our registration statement on Form F-1 (File No. 333-166312).

C. Material Contracts

We have not entered into any material contracts other than in the ordinary course of business, except for the material contracts described below and those described in Item 4, “Information on the Company” and in Item 7, “Major Shareholders and Related Party Transactions” or elsewhere in this annual report on Form 20-F.

We obtained short-term bank loans of totaling RMB250,000,000 (\$36,038,633) from China Construction Bank which were secured by pledges of equipment, buildings and land owned by Daqing Borun and guarantees by Shandong Borun, our CEO and three of his family members.

We obtained a short-term loan of RMB49,000,000 (\$7,063,572) from Daqing Rural Commercial Bank, which was guaranteed by a third party guarantor. Pursuant to the guarantee agreement we pledged certain of Daqing Borun’s property, plant and equipment to the third party guarantor.

We also obtained a short-term loan of RMB51,000,000 (\$7,351,881) from Longjiang Bank, which was guaranteed by a third party guarantor, our CEO and one of his family member. Pursuant to the guarantee agreement we pledged certain of Daqing Borun’s property, plant and equipment to the third party guarantor.

The mortgage and the counter-guarantee mortgage agreements are effective so long as the loans referenced above are outstanding. If we do not pay the loans on time, then the China People’s Court may seize the property. We have the duty to maintain the property and its value. If the property is damaged or destroyed, we must timely notify the banks and the guarantors, and they may collect the insurance proceeds. After signing these contracts, we were required to purchase and did purchase insurance on the collateral and the banks and guarantors were to be named the primary beneficiary of the insurance. They have the right to the collateral if we do not pay on time, become bankrupt or lose our business license. They may proceed with their right through negotiation with us or through the Court. We shall not transfer the collateral to a third party without the prior written notice to and consent from the banks and the guarantors. We must also notify them on all material changes to our business.

[Table of Contents](#)

D. Exchange Controls

See Item 4.B, “Information on the Company — Business Overview — PRC Government Regulations — Regulation of Foreign Currency Exchange and Dividend Distribution” and “—Regulation of Foreign Exchange in Certain Onshore and Offshore Transactions.”

E. Taxation

The following discussion of material Cayman Islands, People’s Republic of China and United States federal income tax consequences of an investment in our ADSs or ordinary shares is based upon laws and relevant interpretations thereof in effect as of the date of this annual report, all of which are subject to change. This discussion does not deal with all possible tax consequences relating to an investment in our ADSs or ordinary shares, such as the tax consequences under U.S. state, local and other tax laws.

Cayman Islands Taxation

The Cayman Islands currently levy no taxes on individuals or corporations based upon profits, income, gains or appreciation and there is no taxation in the nature of inheritance tax or estate duty. There are no other taxes likely to be material to our company levied by the government of the Cayman Islands except for stamp duties which may be applicable on instruments executed in, or brought within the jurisdiction of, the Cayman Islands. The Cayman Islands are not party to any double-tax treaties that are applicable to any payments made to or by our company. There are no exchange control regulations or currency restrictions in the Cayman Islands.

People’s Republic of China Taxation

The EIT Law, and the implementation regulations for the EIT Law issued by the PRC State Council, became effective as of January 1, 2008. The EIT Law provides that enterprises established outside of China whose “de facto management bodies” are located in China are considered “resident enterprises” and are generally subject to the uniform 25% enterprise income tax rate as to their worldwide income. Under the implementation regulations for the EIT Law issued by the PRC State Council, a “de facto management body” is defined as a body that has material and overall management and control over the manufacturing and business operations, personnel and human resources, finances and treasury, and acquisition and disposition of properties and other assets of an enterprise. Currently uncertainty exists regarding the interpretation and implementation of the PRC Enterprise Income Tax Law and its implementation rules and it is uncertain whether we will be deemed a PRC resident enterprise. Therefore, although substantially all of our operational management is currently based in the PRC, it is unclear whether PRC tax authorities would require (or permit) us to be treated as a PRC resident enterprise.

[Table of Contents](#)

Under the EIT Law and implementation regulations, PRC income tax at the rate of 10% is applicable to dividends payable to investors that are “non-resident enterprises,” which do not have an establishment or place of business in the PRC, or which have such establishment or place of business but the relevant income is not effectively connected with the establishment or place of business, to the extent such dividends have their sources within the PRC. Similarly, any gain realized on the transfer of ADSs or shares by such investors is also subject to 10% PRC income tax if such gain is regarded as income derived from sources within the PRC. If we are considered a PRC “resident enterprise,” it is unclear whether dividends we pay with respect to our ordinary shares or ADSs, or the gain you may realize from the transfer of our ordinary shares or ADSs, would be treated as income derived from sources within the PRC and would be subject to PRC tax. It is also unclear whether, if we are considered a PRC “resident enterprise,” holders of our ordinary shares or ADSs might be able to claim the benefit of income tax treaties entered into between China and other countries.

United States Taxation

This section describes the material U.S. federal income tax considerations of the ownership and disposition of ADSs. This discussion does not address any aspect of U.S. federal gift or estate tax, or the state, local or non-U.S. tax consequences of an investment in ADSs. This discussion applies to holders who hold and beneficially own ADSs as capital assets for tax purposes. This discussion does not apply to you if you are a member of a class of holders subject to special rules, such as:

- dealers in securities or currencies;
- traders in securities that elect to use a mark-to-market method of accounting for securities holdings;
- banks or other financial institutions;
- regulated investment companies;
- real estate investment trusts;
- insurance companies;
- tax-exempt organizations;
- persons that hold our ADSs as part of a hedge, straddle, constructive sale, conversion transaction or other integrated investment;
- U.S. Holders (as defined below) whose functional currency for tax purposes is not the U.S. dollar;
- persons liable for alternative minimum tax; or
- persons who actually or constructively own 10% or more of the total combined voting power of all classes of our shares (including our ordinary shares and our ADSs) entitled to vote.

This discussion is based on the U.S. Internal Revenue Code of 1986, as amended (which we refer to in this discussion as the “Code”), its legislative history, existing and proposed regulations promulgated thereunder, published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis. In addition, this discussion relies on our assumptions regarding the value of our shares and the nature of our business over time. Finally, this discussion is based in part upon the representations of the depository and the assumption that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms.

[Table of Contents](#)

You should consult your own tax advisor concerning the particular U.S. federal income tax consequences to you of the purchase, ownership and disposition of our ADSs, as well as the consequences to you arising under the laws of any other taxing jurisdiction, including the PRC.

For purposes of the U.S. federal income tax discussion below, you are a “U.S. Holder” if you beneficially own our ADSs and are:

- a citizen or resident of the United States for U.S. federal income tax purposes;
- a corporation, or other entity taxable as a corporation, that was created or organized in or under the laws of the United States or any political subdivision thereof;
- an estate the income of which is subject to U.S. federal income tax regardless of its source; or
- a trust if (a) a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (b) the trust has a valid election in effect to be treated as a U.S. person.

If a partnership or other pass-through entity holds our ADSs, the tax treatment of the holder will generally depend on the status of the partner or other owner and the activities of the partnership or other pass-through entity. If you hold our ADSs through a partnership or other pass-through entity, you should consult your tax advisor as to the consequences of owning or disposing of such ADSs.

U.S. Holders

This discussion applies only to U.S. Holders. If you are not a U.S. Holder, please refer to the discussion below under “Non-U.S. Holders.”

Ownership of ADSs

A U.S. Holder of our ADSs generally will be treated as the owner of the underlying ordinary shares that are represented by such ADSs for U.S. federal income tax purposes. Accordingly, deposits or withdrawals of ordinary shares for such ADSs will not be subject to U.S. federal income tax. The remainder of this discussion assumes that a U.S. Holder holds our ADSs and has not withdrawn any ordinary shares from the depository.

[Table of Contents](#)

Effect of Uncertainty Relating to PRC Taxation

As described above under “People’s Republic of China Taxation,” there is uncertainty as to whether we might be subject to tax as a PRC “resident enterprise.” As a result, it is not certain whether we would be subject to PRC enterprise tax and whether distributions our subsidiaries make to us, or we make to you, might be subject to PRC withholding taxes. Additionally, if we are treated as a PRC “resident enterprise,” it is not certain whether a U.S. Holder of our ADSs would be eligible for the benefits of the income tax treaty between the United States and the People’s Republic of China (the “Treaty”). Whether and how these uncertainties are resolved may materially affect the U.S. federal income tax consequences of holding our ADSs.

Dividends on ADSs

If you are a U.S. Holder of our ADSs in a taxable year in which are a PFIC (and any subsequent taxable years), this section generally may not apply to you — instead, see “Passive Foreign Investment Company” below. Otherwise, generally, if we make distributions on our ADSs, the U.S. dollar gross amount of any distributions (including amounts withheld to reflect withholding taxes by the PRC or any other foreign jurisdiction) you receive on our ADSs will generally be treated as dividend income if the distributions are made from our current or accumulated earnings and profits, calculated according to U.S. federal income tax principles. We do not intend to calculate our earnings and profits according to U.S. federal income tax principles and, as a result, you generally will be required to treat all distributions on our ADSs as dividends for U.S. federal income tax purposes.

Dividends will generally be subject to U.S. federal income tax as ordinary income on the day you or the Depository actually or constructively receive such income. However, if you are an individual U.S. Holder and have held your ADSs for a sufficient period of time, distributions on our ADSs treated as dividends generally will constitute “qualified dividend income” and as a result will be taxed at preferential rates, as long as we are treated as a “qualified foreign corporation.” A foreign corporation is treated as a qualified foreign corporation for this purpose with respect to shares (including ADSs backed by such shares) that are readily tradable on an established securities market in the United States. We expect our ADSs to continue to be readily tradable on the New York Stock Exchange or another established securities market in the United States, and as a result we expect to be a qualified foreign corporation for this purpose. A qualified foreign corporation also includes a foreign corporation that is eligible for the benefits of certain income tax treaties with the United States. In the event that we are deemed to be a PRC “resident enterprise” under PRC tax law (as discussed above under “People’s Republic of China Taxation”), we may be eligible for the benefits of the Treaty and, if we are eligible for such benefits, dividends we pay on our ordinary shares, regardless of whether such ordinary shares are represented by ADSs, generally would constitute qualified dividend income. Non-corporate holders that do not meet a minimum holding period requirement during which they are not protected from the risk of loss or that elect to treat the dividend income as “investment income” pursuant to Code Section 163(d)(4) will not be eligible for these reduced rates of taxation regardless of our status as a qualified foreign corporation. In addition, the rate reduction will not apply to dividends where the person receiving the dividends is obligated to make related payments with respect to positions in substantially similar or related property, even if the minimum holding period has been met. Distributions on our ADSs will not be eligible for the “dividends-received deduction” available to corporate U.S. holders.

[Table of Contents](#)

Foreign Tax Credit Considerations

Dividends on our ADSs generally will constitute income derived from non-U.S. sources and as “passive income” for U.S. foreign tax credit limitation purposes, although in certain special circumstances you might be required to treat dividends on our ADSs as “general income” for these purposes. If we are deemed by the PRC tax authorities to be a “resident enterprise” (as described above under the heading “People’s Republic of China Taxation”), we might be required to withhold and pay over to the PRC withholding tax on distributions that we make to you, in which case you may be able to claim a U.S. foreign tax credit for such taxes withheld, subject to the limitations on the availability of the foreign tax credit in your circumstances. If, however, the PRC taxes are either imposed on us directly (and not as a withholding tax on distributions to you), or required to be withheld on distributions to us by our subsidiaries rather than on distributions from us to you, generally you would not be able to claim a foreign tax credit for such PRC taxes, although a U.S. domestic corporation that owns 10% or more of our outstanding voting stock, at the time we make distributions, may be eligible for an indirect tax credit for PRC enterprise tax that we are required to pay on our PRC taxable income, provided other conditions are met. Additionally, if you are eligible for the benefits of the Treaty, you generally would be able to claim a foreign tax credit only for PRC tax withheld up to the maximum rate on dividends specified in the Treaty. As discussed above, the application of the relevant PRC tax laws is not clear, and as a result the availability of any U.S. foreign tax credit resulting from holding our ADSs is uncertain. **The rules governing the availability of foreign tax credits are extremely complex and may vary based on your individual circumstances. You should consult your own adviser as to the availability of a foreign tax credit in your individual circumstances.**

Sales and other dispositions of ADSs

If you are a U.S. Holder of our ADSs in a taxable year in which are a PFIC (and any subsequent taxable years), this section generally may not apply to you — instead, see “Passive Foreign Investment Company” below. Otherwise, generally, when you sell or otherwise dispose of our ADSs, you generally will recognize capital gain or loss in an amount equal to the difference between the amount realized on such sale or other disposition and your adjusted tax basis in our ADSs, both as determined in U.S. dollars. Your adjusted tax basis will generally equal the amount you paid for our ADSs. Any gain or loss you recognize will be long-term capital gain or loss if your holding period in our ADSs is more than one year at the time of disposition. If you are an individual U.S. Holder, any such long-term capital gain will be taxed at preferential rates. Your ability to deduct capital losses will be subject to various limitations. Any gain or loss recognized generally will be treated as derived from U.S. sources for U.S. foreign tax credit limitation purposes; however, as discussed above under “People’s Republic of China Taxation,” if the PRC tax authorities were to assert that any gains recognized were subject to PRC tax and you were eligible for the benefits of the Treaty, such gains or losses might be resourced under the Treaty to the PRC, and as a result treated as derived from non-U.S. sources for U.S. foreign tax credit purposes. Please see above under “People’s Republic of China Taxation,” “Effect of Uncertainties Relating to PRC Taxation” and “Foreign Tax Credit Considerations” for further discussions of the uncertainties relating to PRC taxation and the effect of such uncertainty on U.S. Holders.

[Table of Contents](#)

Passive Foreign Investment Company

Based on the composition of our income and valuation of our assets, we believe we were a passive foreign investment company, or a PFIC, for U.S. federal income tax purposes for our taxable year ended December 31, 2016, and we may be a PFIC for our taxable year ending December 31, 2017 or thereafter, although there can be no assurance in either regard.

In general, we will be a PFIC for any taxable year in which at least 75% of our gross income is passive income or at least 50% of the value of our assets (based on an average of the quarterly values) is attributable to assets that produce or are held for the production of passive income. For this purpose, passive income generally includes dividends, interest, royalties and rents (other than royalties and rents derived in the active conduct of a trade or business and not derived from a related person). If we directly or indirectly own at least 25% (by value) of the stock of another corporation (including, for example, our principal operating subsidiaries), for purposes of the PFIC tests we will be treated as owning our proportionate share of such other corporation's assets and receiving our proportionate share of such other corporation's income.

The determination of whether we are a PFIC is made annually. The composition of our income and assets will be affected by how, and how quickly, we spend the proceeds of any debt issuance or other capital we may raise in the future. If we are a PFIC for any taxable year during which you hold our ordinary shares or ADSs, you will be subject to special tax rules discussed below.

If we are a PFIC for any taxable year during which you hold our ADSs, you will be subject to special tax rules with respect to any "excess distribution" received and any gain realized from a sale or other disposition (including for this purpose any pledge) of our ADSs. Distributions received in a taxable year that are greater than 125% of the average annual distributions received during the shorter of the three preceding taxable years or your holding period in our ADSs will be treated as excess distributions. Under these special tax rules:

- the excess distribution or gain will be allocated ratably over your holding period in our ADSs;
- the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which we were a PFIC, will be treated as ordinary income; and
- the amount allocated to each other year will be subject to tax at the highest tax rate in effect for that year and the interest charge generally applicable to underpayments of tax will be imposed on the resulting tax attributable to each such year.

In addition, non-corporate U.S. Holders will not be eligible for the reduced rates of taxation on any dividends received from us as "qualified dividend income" (described above under "Dividends on ADSs"), if we are a PFIC in the taxable year in which such dividends are paid or in the preceding taxable year, regardless of whether we are otherwise a qualified foreign corporation.

[Table of Contents](#)

You will be required to file Internal Revenue Service Form 8621 if you recognize gain on the sale of PFIC stock, receive a distribution from a PFIC, or make a QEF or mark-to-market election with respect to a PFIC. If we are classified as a PFIC, a U.S. Holder of our ADSs also may be required to file an annual information report even if such person did not recognize gain on the sale of such PFIC stock, receive a distribution from such PFIC, or make a QEF or mark-to-market election with respect to such PFIC. If we are a PFIC for any taxable year during which you hold our ADSs and any of our non-U.S. subsidiaries is also a PFIC, you would be treated as owning a proportionate amount (by value) of the shares of the lower-tier PFIC for purposes of the application of these rules. You are urged to consult your tax advisors about the application of the PFIC rules to any of our subsidiaries.

In certain circumstances, in lieu of being subject to the excess distribution rules discussed above, you may make an election to include gain on the stock of a PFIC as ordinary income under a mark-to-market method, provided that such stock is regularly traded on a qualified exchange, including the New York Stock Exchange. Under current law, the mark-to-market election may be available to holders of our ADSs because our ADSs are listed on the New York Stock Exchange, although there can be no assurance that our ADSs will be "regularly traded" for purposes of the mark-to-market election. If you make an effective mark-to-market election, instead of applying the PFIC rules above, you would include in each year as ordinary income the excess of the fair market value of our ADSs that you hold at the end of the year over your adjusted tax basis in such ADSs. You would be entitled to deduct as an ordinary loss each year the excess of your adjusted tax basis in our ADSs over their fair market value at the end of the year, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. If you make a mark-to-market election, any gain you recognize upon the sale or other disposition of our ADSs would be treated as ordinary income and any loss would be treated as ordinary loss, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. Your adjusted tax basis in our ADSs would be increased by the amount of any income inclusion and decreased by the amount of any deductions under the mark-to-market rules. If you make a mark-to-market election it will be effective for the taxable year for which the election is made and all subsequent taxable years unless our ADSs cease to be regularly traded on a qualified exchange or the Internal Revenue Service consents to the revocation of the election. You are urged to consult your tax advisors about the availability of the mark-to-market election, and whether making the election would be advisable in your particular circumstances.

Assuming we are or were a PFIC, the rules described above could be avoided if you elected to treat us as a "qualified electing fund" under Section 1295 of the Code. However, this option would not be available to you because we do not intend to comply with the requirements necessary to permit you to make this election.

You are urged to consult your tax advisors concerning the U.S. federal income tax consequences of holding our ADSs if we are considered a PFIC in any taxable year.

[Table of Contents](#)

Medicare Contribution Tax on Unearned Income

An additional United States tax of 3.8% is imposed on the "net investment income" of certain United States citizens and resident aliens and on the undistributed "net investment income" of certain estates and trusts. Among other items, "net investment income" generally would include dividends on, and capital gains from the sale, retirement or other taxable disposition of our ADSs. You should consult your own tax advisor concerning the effect, if any, of this tax on holding our ADSs in your particular circumstances.

Non-U.S. Holders

If you beneficially own our ADSs and are not a United States person for U.S. federal income tax purposes (a “Non-U.S. Holder”), you generally will not be subject to U.S. federal income tax or withholding on dividends received from us with respect to ADSs unless that income is considered effectively connected with your conduct of a U.S. trade or business and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax with respect to income from your ADSs, such dividends are attributable to a permanent establishment that you maintain in the United States. You generally will not be subject to U.S. federal income tax, including withholding tax, on any gain realized upon the sale or exchange of ADSs, unless:

- that gain is effectively connected with the conduct of a U.S. trade or business and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax with respect to income from your ADSs, such gain is attributable to a permanent establishment that you maintain in the United States; or
- you are a nonresident alien individual and are present in the United States for at least 183 days in the taxable year of the sale or other disposition and either (1) your gain is attributable to an office or other fixed place of business that you maintain in the United States or (2) you have a tax home in the United States.

If you are engaged in a U.S. trade or business, unless an applicable tax treaty provides otherwise, the income you receive on our ADSs, including dividends and the gain from the disposition of our ADSs, that is effectively connected with the conduct of that trade or business will be subject to the rules applicable to U.S. Holders discussed above. In addition, if you are a corporation, you may be subject to an additional branch profits tax at a rate of 30% or any lower rate under an applicable tax treaty.

U.S. Information Reporting and Backup Withholding Rules

In general, dividend payments with respect to our ADSs and the proceeds received on the sale or other disposition of such ADSs may be subject to information reporting to the Internal Revenue Service and to backup withholding (currently imposed at a rate of 28%). Backup withholding will not apply, however, if you (1) come within certain exempt categories and, when required, can demonstrate that fact or (2) provide a taxpayer identification number, certify that you have not lost your exemption from backup withholding and otherwise comply with the applicable backup withholding rules. To establish your status as an exempt person, you will generally be required to provide certification on an IRS Form W-9, W-8BEN or W-8ECI, as applicable in your particular circumstances. Backup withholding is not an additional tax. Rather, any amounts withheld from payments to you under the backup withholding rules will be allowed as a refund or a credit against your U.S. federal income tax liability, provide that you timely furnish the required information to the IRS.

[Table of Contents](#)

Disclosure of Information with respect to Foreign Financial Assets

Certain U.S. individuals who hold any interest in “specified foreign financial assets,” including our ADSs, during such holder’s taxable year must attach to their U.S. tax return for such year certain information with respect to each asset if the aggregate value of all of such assets exceeds \$50,000 (or a higher dollar amount prescribed by the Internal Revenue Service). For this purpose, a “specified foreign financial asset” includes any depository, custodial or other financial account maintained by a foreign financial institution, and certain assets that are not held in an account maintained by a financial institution, including any stock or security issued by a person other than a U.S. person. A taxpayer subject to these rules who fails to furnish the required information is subject to a penalty of \$10,000, and an additional penalty may apply if the failure continues for more than 90 days after the taxpayer is notified of such failure by the Internal Revenue Service; however, these penalties may be avoided if the taxpayer demonstrates a reasonable cause for the failure to comply. An accuracy-related penalty of 40% is imposed for an underpayment of tax that is attributable to an “undisclosed foreign financial asset understatement,” which for this purpose is the portion of the understatement for any taxable year that is attributable to any transaction involving an “undisclosed foreign financial asset,” including any asset that is subject to the information reporting requirements of this legislation, which would include our ADSs if the dollar threshold described above were satisfied.

The rules described in the preceding paragraph also extend the applicable statute of limitations for assessment of U.S. federal income taxes to six years if there is an omission of gross income in excess of \$5,000 and the omission of gross income is attributable to a foreign financial asset as to which reporting is required under the rules described in this section (or would be so required if the requirement for reporting specified foreign financial assets were applied without regard to the dollar threshold specified therein and without regard to certain exceptions that may be specified by the Internal Revenue Service). In addition, the statute of limitations will be suspended if a taxpayer fails to timely provide information with respect to specified foreign financial assets required to be reported or fails to timely provide the annual information reports required for holders of PFIC stock, including PFIC stock for which a QEF election is made. The amendments to the applicable statute of limitations described in this paragraph apply to U.S. federal income tax returns filed after March 18, 2010, as well as to such returns filed on or before such date if the applicable statute of limitations (determined without regard to these amendments) for assessment of taxes has not expired as of such date. **You should consult your own tax advisor concerning any obligation you may have to furnish information to the Internal Revenue Service as a result of holding our ADSs.**

[Table of Contents](#)

HOLDERS OF OUR ADSs SHOULD CONSULT THEIR OWN TAX ADVISORS REGARDING THE APPLICATION OF PRC AND UNITED STATES FEDERAL INCOME TAX LAWS IN THEIR INDIVIDUAL CIRCUMSTANCES, AS WELL AS ANY TAX CONSEQUENCES RESULTING FROM PURCHASING, HOLDING OR DISPOSING OF OUR ADSs, INCLUDING THE APPLICABILITY AND EFFECT OF THE TAX LAWS OF ANY STATE, LOCAL OR OTHER FOREIGN JURISDICTION, AND ANY ESTATE, GIFT AND INHERITANCE LAWS.

[Table of Contents](#)

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Quantitative and Qualitative Disclosures about Market Risk

We are exposed to various types of market risks, including changes in interest rates, commodity price, foreign exchange rates and inflation in the normal course of business.

Interest Rate Risk

Borrowings and Bonds—Our significant interest-bearing financial liabilities are borrowings and bonds.

As of December 31, 2016 all balance of borrowings consists of short-term borrowings and short-term portion of long-term borrowings which will mature at various dates within the year ending December 31, 2017 and do not expose us to interest rate risk. Our interest rate risk arises primarily from long-term borrowings and bonds. Our bonds were issued at fixed rates and expose us to fair value and interest rate risk which will mature at fiscal year 2021.

Other than the above, other financial assets and liabilities do not carry material interest rate risk.

Inflation

In recent years, China has not experienced significant inflation, and thus inflation has not had a material impact on our results of operations. According to the National Bureau of Statistics of China, the change in Consumer Price Index in China increased by 2.0% in 2016 compared with 2015.

Credit Risk

Since commencing our operations in 2000, we have not had to write off bad debts. In addition, we have relatively short accounts receivable cycles and short collection periods, normally, all accounts receivables are collected within one month. As a result, we believe we have no significant exposure to credit risk.

Foreign Currency Risk

The value of the Renminbi against the U.S. dollar and other currencies is affected by, among other things, changes in China's political and economic condition. Since July 2005, the Renminbi has no longer been pegged to the U.S. dollar. Currently the Renminbi exchange rate versus the U.S. dollar is restricted to a rise or fall of no more than 2% per day and the PBOC regularly intervenes in the foreign exchange market to prevent significant short-term fluctuations in the exchange rate. This change in policy has resulted in an appreciation of the RMB against the U.S. dollar of approximately 0.4% in 2014, a depreciation of approximately 6.1% and 6.4% in 2015 and 2016, respectively. The Renminbi may appreciate or depreciate significantly in value against the U.S. dollar. Moreover, it is possible that in the future PRC authorities may lift restrictions on fluctuations in the Renminbi exchange rate and reduce their level of intervention in the foreign exchange market. Because substantially all of our earnings and cash assets are denominated in Renminbi, and we maintain our consolidated financial statements in Renminbi, fluctuations in the exchange rate between the U.S. dollar and the Renminbi will affect the relative purchasing power of these proceeds and our balance sheet and earnings per share. In addition, appreciation or depreciation in the value of the Renminbi relative to the U.S. dollar would affect our financial results reported in U.S. dollars without giving effect to any underlying change in our business or results of operations. Fluctuations in the Renminbi/U.S. dollar exchange rate will also affect the relative value of any dividend we reserve that will be exchanged into U.S. dollars and earnings from, and the value of, any Renminbi-denominated investments we make in the future. We have not entered into any hedging transactions that would reduce or increase our exposure to this foreign currency exchange risk.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

A. Debt Securities

Not applicable.

B. Warrants and Rights

Not applicable.

C. Other Securities

Not applicable.

D. American Depositary Shares

Fees and Charges Incurred by ADS Holder

The depositary may charge each person to whom ADSs are issued, including, without limitation, issuances against deposits of shares, issuances in respect of share distributions, rights and other distributions, issuances pursuant to a stock dividend or stock split declared by us or issuances pursuant to a merger, exchange of securities or any other transaction or event affecting the ADSs or deposited securities, and each person surrendering ADSs for withdrawal of deposited securities in any manner permitted by the deposit agreement, \$5.00 or less for each 100 ADSs (or any portion thereof) issued, delivered, reduced, cancelled or surrendered, as the case may be.

The following additional charges shall be incurred by the ADS holders, by any party depositing or withdrawing shares or by any party surrendering ADSs or to whom ADSs are issued (including, without limitation, issuance pursuant to a stock dividend or stock split declared by our company or an exchange of stock regarding the ADSs or the deposited securities or a distribution of ADSs), whichever is applicable:

- a fee of \$0.05 or less per ADS (or portion thereof) for any cash distribution made pursuant to the deposit agreement;
- a fee of \$0.05 per ADS or less per ADS (or portion thereof) per calendar year for services performed by the depositary in administering our ADR program (which fee may be charged on a periodic basis during each calendar year and shall be assessed against holders of ADSs as of the record date or record dates set by the depositary during each calendar year and shall be payable in the manner described in the next succeeding provision);

130

Table of Contents

- any other charge payable by any of the depositary, any of the depositary's agents, including, without limitation, the custodian, or the agents of the depositary's agents in connection with the servicing of our shares or other deposited securities (which charge shall be assessed against holders of ADSs as of the record date or dates set by the depositary and shall be payable at the sole discretion of the depositary by billing such holders or by deducting such charge from one or more cash dividends or other cash distributions);
- a fee for the distribution of securities, such fee being in an amount equal to the fee for the execution and delivery of ADSs which would have been charged as a result of the deposit of such securities (treating all such securities as if they were shares) but which securities are instead distributed by the depositary to those holders entitled thereto;
- stock transfer or other taxes and other governmental charges;
- cable, telex and facsimile transmission and delivery charges incurred at your request;
- transfer or registration fees for the registration of transfer of deposited securities on any applicable register in connection with the deposit or withdrawal of deposited securities; and
- expenses of the depositary in connection with the conversion of foreign currency into U.S. dollars;

We will pay all other charges and expenses of the depositary and any agent of the depositary (except the custodian) pursuant to agreements from time to time between us and the depositary. The fees described above may be amended from time to time.

The depositary collects its fees for issuance and cancellation of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may collect its annual fee for depositary services by deduction from cash distributions, or by directly billing investors, or by charging the book-entry system accounts of participants acting for them. The depositary may generally refuse to provide services to any holder until the fees and expenses owing by such holder for those services are paid.

Fees and Payments by Depositary

Our depositary, The Bank of New York Mellon, has agreed to reimburse us for certain expenses we incur that are related to establishment and maintenance of the ADS program, including investor relations expenses and exchange application and listing fees. There are limits on the amount of expenses for which the depositary will reimburse us, but the amount of reimbursement available to us is not related to the amounts of fees the depositary collects from investors. For the year ended December 31, 2016, we did not receive any amount from the depositary as reimbursement for our expenses incurred in connection with the establishment and maintenance of the ADS program.

[Table of Contents](#)**PART II.****ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

The rights of securities holders have not been materially modified.

We completed our initial public offering of 5,725,000 ordinary shares, in the form of 5,725,000 ADSs on June 16, 2010 at a price of \$7.00 per ADS. The aggregate price of the initial public offering amount registered and sold was approximately \$40.1 million, of which we received net proceeds, before expenses, of \$37.3 million. Piper Jaffray & Co. was the underwriter for the initial public offering. As of December 31, 2012, we had used all the net proceeds to complete the construction of Phase III at our Daqing facility.

ITEM 15. CONTROLS AND PROCEDURES**Disclosure Controls and Procedures**

Under the supervision and with the participation of our management, including our principal executive officer and our principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on that evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such item is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, for our company. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements in accordance with U.S. GAAP and includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of a company's assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that a company's receipts and expenditures are being made only in accordance with authorizations of a company's management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of a company's assets that could have a material effect on the consolidated financial statements.

[Table of Contents](#)

Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management has conducted an assessment, including testing of the design and the effectiveness of our internal control over financial reporting as of December 31, 2016. In making its assessment, management used the criteria in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

Based on this assessment, management concluded that our internal control over financial reporting was effective as of December 31, 2016.

Attestation Report of Independent Registered Public Accounting Firm

We are a non-accelerated filer under the rules of the Securities and Exchange Commission. Accordingly, we are not required to include in this annual report an attestation report of our independent registered public accounting firm.

Changes in Internal Control over Financial Reporting

There were no changes in our internal controls over financial reporting that occurred during the period covered by this annual report on Form 20-F that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our board of directors has determined that Wen Jiang, one of our independent directors and the chairman of our audit committee, is an audit committee financial expert, as defined in Item 16A of Form 20-F, and that such person is also "independent," as defined in Rule 10A-3 under the Exchange Act. For more information about Wen Jiang, see Item 6., "Directors, Senior Management and Employees — Directors and Senior Management."

ITEM 16B. CODE OF ETHICS

Our board of directors has adopted a code of ethics that is applicable to all of our senior executive and financial officers. Our code of ethics is publicly available on our website (www.chinaneborun.com). We hereby undertake to provide to any person, without charge, a copy of our code of business conduct and ethics within ten working days after we receive such person's written request.

[Table of Contents](#)**ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

The following table sets forth the aggregate fees by categories specified below in connection with certain professional services rendered by BDO, our independent registered public accounting firm, for the periods indicated.

	Year ended December 31,		
	2015 (RMB)	2016 (RMB)	(S)
Audit fees	1,450,000	1,450,000	209,024
Audit-related fees	—	—	—
Tax fees	—	—	—
All other fees	—	—	—

The policy of our audit committee is to pre-approve all auditing services and permitted non-audit services to be performed for us by our independent auditor, including the fees and terms thereof (subject to the de minimis exceptions for non-audit services described in Section 10A(i)(1)(B) of the Exchange Act which are approved by the audit committee or our board of directors prior to the completion of the audit).

We established our audit committee after the completion of our initial public offering in June 2010. All fees set forth in the table above were pre-approved by either our board of directors, prior to the establishment of our audit committee, or our audit committee.

BDO's engagement to audit our consolidated financial statements for the year ended December 31, 2016 were not attributed to work performed by persons other than BDO's full-time permanent employees.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
China New Borun Corporation

We have audited the accompanying consolidated balance sheets of China New Borun Corporation and its subsidiaries (the "Company") as of December 31, 2016 and 2015 and the related consolidated statements of income and comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2016. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2016 and 2015, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in RMB unless otherwise stated)

1. Description of Business

The accompanying consolidated financial statements include the financial statements of China New Borun Corporation (“New Borun”), Golden Direction Limited (“Golden Direction”), China High Enterprises Limited (“China High”), Shandong Borun Industrial Co., Ltd. (“Shandong Borun”) and Daqing Borun Biotechnology Co., Ltd (“Daqing Borun”). New Borun, Golden Direction, China High, Shandong Borun and Daqing Borun are collectively referred to as the “Company”.

New Borun, the holding company, was incorporated in Cayman Islands on December 21, 2009.

Golden Direction was incorporated in the British Virgin Islands on March 28, 2008. Effective as of March 31, 2010, New Borun consummated a share exchange agreement with Golden Direction whereby New Borun acquired 100% of the voting capital stock of Golden Direction. As of the date of that agreement, (1) Golden Direction became a wholly owned subsidiary of New Borun and (2) Golden Direction held approximately 74.24% of the voting capital stock of China High Enterprises Limited, or China High, our Hong Kong holding company. Effective as of March 31, 2010, New Borun and Golden Direction consummated a share exchange agreement whereby New Borun through Golden Direction acquired the remaining 25.76% equity interest of China High.

China High was incorporated in Hong Kong’s Special Administrative Region on July 15, 2008.

Weifang Great Chemical, Inc. (“WGC”) was established as a limited liability company on March 21, 2001 in China’s Shandong Province under the laws of the People’s Republic of China (“PRC”). For restructuring and reorganization purposes, pursuant to an equity interest acquisition agreement, China High acquired all of the equity interests of WGC on September 30, 2008. In December 2008, China High through WGC acquired a 100% equity interest in Shandong Borun, the operating company. Shandong Borun was the predecessor of the Company and operated all of the business of the Company prior to a restructuring in 2008 (the “Restructuring”). Shandong Borun was set up in the city of Shouguang in China’s Shandong Province by Mr. Jinmiao Wang (“Mr. Wang”) and his family members (collectively the “Wang Family”) on December 1, 2000. The establishment of China High and the acquisition of Shandong Borun through WGC has been accounted for as a recapitalization or reorganization of Shandong Borun since the stockholders consisted of the same majority shareholders (no change in control) and there was no change in management immediately following the completion of the transaction in accordance with the provisions of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 805-50-15-6, “*Business Combinations*”.

F-9

[Table of Contents](#)

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

1. Description of Business (Continued)

On July 9, 2008, Shandong Borun acquired all of the equity interests in Daqing Borun, a company formerly called Daqing Anxin Tongwei Alcohol Manufacturing Co., Ltd. (Anxin Tongwei), a limited liability company established under the laws of the PRC on September 20, 2004 in Daqing city, Heilongjiang Province, China. The total purchase price of RMB139,000,000 was allocated based on the estimated fair values of the assets acquired and liabilities assumed at the date of purchase in accordance with FASB ASC Topic 805, “Business Combinations”. Anxin Tongwei began production of edible alcohol in 2005; however, due to operation and financing problems, Anxin Tongwei ceased production and applied for bankruptcy on July 26, 2007. On July 1, 2008, the Court made the verdict to approve that certain Acquisition Agreement between Shandong Borun and Anxin Tongwei on June 26, 2008, and on July 9, 2008 the parties completed the acquisition pursuant to which Anxin Tongwei became a wholly owned subsidiary of Shandong Borun. As of the acquisition date, Anxin Tongwei had been idle for more than one year, with no management personnel or production, employees or revenue. Accordingly, under FASB ABC Topic 805, since the acquired set of assets exclude several key items (employees, processes and customers), the Company concluded that the acquired set of assets does not constitute a business and, as a result, accounted for the transaction as an asset acquisition. Subsequent to the acquisition, we spent more than a year and approximately RMB110 million in facility improvements, including improvements to machinery and equipment, in order to replace the previous owner’s “dry” method manufacturing process with our in-house developed Borun Wet Process and we also changed the name of Anxin Tongwei to Daqing Borun Biotechnology Co., Ltd. (since we regard “corn deep-processing” as a part of the biotechnology field, we named it accordingly).

The establishment of New Borun on December 21, 2009 and acquisition through share exchange between New Borun, Golden Direction and China High effective as of March 31, 2010 has been accounted for as a recapitalization or reorganization since the stockholders consisted of the same majority shareholders (no change in control) and there was no change in management immediately following the completion of the transaction in accordance with the provision of FASB ASC Topic 805-50-15-6. Accordingly, the transaction is treated as a recapitalization or reorganization of China High and the assets and liabilities and the historical operations that are reflected in the financial statements are those of China High and its subsidiaries and are recorded at the historical cost basis. New Borun, Golden Direction and China High are holding companies. Financial statements and financial information presented for prior years have been retrospectively adjusted to furnish comparative information for periods during which Golden Direction, China High, WGC and Shandong Borun were under common control. On November 15, 2012, WGC merged into Shandong Borun, as a result of the merger WGC is deregistered and China High obtained 100% direct control over Shandong Borun.

During the year ended December 31, 2016, the Company has disposed all long-lived assets of foam insulation business segment and exited the business accordingly. The income (loss) before income tax expenses of foam insulation business segment for the years ended December 31, 2014, 2015 and 2016 were RMB1,383,439, RMB(6,891,333) and RMB810,840 (\$116,886), respectively, which represented 1%, (4%) and 1% to the Company’s consolidated income before income tax expenses for the years ended December 31, 2014, 2015 and 2016, respectively. The disposal of foam insulation business does not represent a strategic shift that had a major effect on our operations and financial results. As such, the disposal of long-lived assets of foam insulation business segment have not been reported in discontinued operations as required by FASB ASC Topic 205-20, “*Presentation of Financial Statements—Discontinued Operations*” in the consolidated financial statements for the periods presented.

The Company develops and operates its business through Shandong Borun and Daqing Borun. The Company is principally engaged in manufacture and distribution of edible alcohol sold as an ingredient to producers of *baijiu*, a popular grain-based alcoholic beverage in the PRC. The Company also produces Distillers Dried Grains with Solubles high-protein feed (“DDGS Feed”), liquid carbon dioxide and crude corn oil as by-products of edible alcohol production and chlorinated polyethylene (“CPE”) that are widely used in a broad range of industries.

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies

Principles of Consolidation and Presentation

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“U.S. GAAP”). The consolidated financial statements include the financial statements of the New Borun, Golden Direction, China High, Shandong Borun and Daqing Borun. All significant inter-company transactions and balances have been eliminated upon consolidation.

Foreign Currency Translation

The Company’s financial statements are presented in Chinese Renminbi (“RMB”), which is the Company’s reporting currency. The functional currency of the Company’s subsidiary in Hong Kong is the U.S. dollar while the functional currency of the Company’s subsidiaries in the PRC is RMB.

In accordance with FASB ASC Topic 830, “*Foreign Currency Matters*”, the Company translates the assets and liabilities into RMB using the rate of exchange prevailing at the applicable balance sheet date and the statements of income and cash flows are translated at an average rate during the reporting period. Adjustments resulting from the translation from U.S. dollar into RMB are recorded in shareholders’ equity as part of accumulated other comprehensive income.

Convenience Translation into United States Dollar Amounts

The Company reports its financial statements using the RMB. The Dollar amounts disclosed in the accompanying financial statements are presented solely for the convenience of the reader, and have been converted at the rate of RMB 6.9370 to one Dollar (\$), which is published by the People’s Bank of China on December 31, 2016. Such translations should not be construed as representations that the RMB amounts represent, have been, or could be, converted into, \$ at that or any other rate.

Use of Estimates

The preparation and presentation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

Cash

Cash includes cash on hand, and cash accounts and interest bearing savings accounts in the financial institutions.

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Available-for-sale Securities

Available-for-sale securities are investments in debt securities and equity securities that have readily determinable fair values not classified as trading securities or as held-to-maturity securities. All available-for-sale securities are carried at fair value and represent securities that are available to meet liquidity and/or other needs of the Company. Gains and losses are recognized and reported separately in the consolidated statements of income and comprehensive income upon realization or when impairment of values is deemed to be other than temporary. In estimating other-than temporary impairment losses, management considers, (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for anticipated recovery in fair value. Gains or losses are recognized using the specific identification method. Unrealized holding gains or losses for available-for-sale securities are excluded from the net income attributable to ordinary shareholders and reported net of taxes in the “other comprehensive loss” in the statement of income and comprehensive income, and accumulated as shareholders’ equity until realized. All available-for-sale securities were sold during the year ended December 31, 2014 and recorded a loss of RMB1,965,765.

Held-to-maturity Debt Securities

A held-to-maturity debt security is a debt security that the Company has both the intent and ability to hold to maturity regardless of changes in market conditions, liquidity needs or changes in general economic conditions. If it is not a hedged item, a held-to-maturity debt security should be carried at amortized cost subject to other-than-temporary impairment. All held-to-maturity debt securities matured and settled during the year ended December 31, 2016.

Inventories

Inventories are stated at the lower of cost or market determined using the weighted average method which approximates cost and estimated net realizable value. Net realizable value is the estimated selling price, in the ordinary course of business, less estimated costs to complete and dispose. Cost of work in progress and finished goods comprise direct material, direct production costs and an allocated portion of production overhead costs based on normal operating capacity. From November 2013, the Company initiated a “bill and hold” arrangement with the granaries whereby the Company took the possession of the corn upon purchase and storage of the corn by the granaries. Purchased corn are recognized as inventories when the significant risks and rewards of ownership are considered to be transferred to the Company upon full payment of the corn price made to the granaries and the quantity and quality of the purchased corn had been inspected and acknowledged by the Company.

Property, Plant, and Equipment

Property, plant and equipment are recorded at cost. Significant additions or improvements extending useful lives of assets are capitalized. Depreciation is calculated using the straight-line method (after taking into account their respective estimated residual value) over the estimated useful lives as follows.

Buildings and improvements	20 to 30 Years
Machinery	10 Years
Office equipment and furnishing	3 to 5 Years
Motor vehicles	4 to 5 Years

F-12

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Property, Plant, and Equipment (Continued)

Maintenance and repairs are charged directly to expense as incurred, whereas improvements and renewals are generally capitalized in their respective property accounts. When an item is retired or otherwise disposed of, the cost and applicable accumulated depreciation are removed and the resulting gain or loss is recognized in the consolidated statements of income and comprehensive income.

Land Use Rights

According to the laws of the PRC, land is owned by the state or rural collective economic organizations in the PRC. Companies or individuals are authorized to possess and use the land only through the land use rights granted by the government. The land use rights represent cost of the rights to use the land in respect of properties located in the PRC. Land use rights are carried at cost and amortized on a straight-line basis over the period of rights of 50 years.

Intangible Assets

Intangible assets include production license for use in the production and distribution of edible alcohol and is accounted for under FASB ASC Topic 350-30, “General Intangibles Other Than Goodwill”. The current production license for use in the production and distribution of edible alcohol is renewed in October 2016 with an additional five years. The production license renewal is normally subject to inspection and renewed every five years with a small renewal application fee cost. Based on the Company’s historical experience in producing and distributing edible alcohol, the Company does not expect to incur significant cost to renew its production license nor does it expect any material modifications to the existing terms of the production license, or any difficulties in renewing the license. Amortization expense is calculated on a straight-line basis over the useful life of the production license which include additional five-year expected renewal period. The intangible assets have been fully amortized during the year ended December 31, 2016.

Valuation of Long-Lived Assets

The Company, in accordance with FASB ASC Topic 360, “Property, Plant and Equipment”, reviews for impairment of long-lived assets and certain identifiable intangibles whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Recoverability is determined by comparing projected undiscounted cash flows associated with such assets to the related carrying value.

An impairment loss would be recognized when estimated discounted future cash flows expected to result from the use of the asset and its eventual disposition is less than its carrying amount. The Company records impairment losses of RMB nil, RMB7,020,788 and RMB nil (\$ nil) for the years ended December 31, 2014, 2015 and 2016, respectively. The relevant impaired property, plant and equipment, net of RMB7,020,788 (\$1,012,078) was disposed during the year ended December 31, 2016, the net proceeds from the disposal was RMB3,743,590 (\$539,655).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Value added tax

All the subsidiaries of the Company in the PRC are subject to value added tax (“VAT”) imposed by the Government of the PRC on its purchase and sales of goods, its purchase of property, plant and equipment and the freight expenses being incurred. The output VAT is charged to customers who purchase goods from the Company and debited to trade accounts receivable and credited to VAT payable — output VAT. As of December 31, 2015 and 2016, the trade accounts receivable included the output VAT charged to customers are RMB66,205,852 and RMB53,388,567 (\$7,696,204), respectively. The input VAT is incurred when the Company purchases goods and property, plant and equipment from its vendors and the freight expenses being incurred. The input VAT incurred is debited to VAT recoverable or VAT payable — input VAT and credited to payables accounts or cash and cash equivalent. VAT payable is computed on a monthly basis and payable in the following month based on the difference between the amount of output VAT and input VAT as of month-end. The applicable VAT rate is ranged from 0% to 17% in general, depending on the types of products purchased and sold. If the amount of validated input VAT being aroused by purchasing goods and property, plant, equipment and the freight expenses incurred exceeds that of output VAT for sales of goods during the month, the debit VAT payable balance as of month-end will be carried forward to be creditable against future collection of output VAT in the following months, and will be reclassified as VAT recoverable under other receivables. In addition, input VAT is off-the-price and not included in the cost of inventory.

According to Cai Shui [2012] No. 38 issued by the PRC State Administration of Taxation, since July 2012, the input VAT paid for purchase of corns can only be offset against the output VAT when the required conditions are being fulfilled and validated by the PRC Taxing Authority, otherwise, the input VAT paid will be temporarily recorded as VAT recoverable under other receivables. As of December 31, 2015 and 2016, VAT recoverable consisted of input VAT paid for purchase of corn but not yet validated by the PRC Taxing Authority of RMB50,059,386 and RMB74,986,737 (\$10,809,678), respectively.

According to Cai Kuai [2013] No. 36, sales taxes and surcharges has been replaced with value-added taxes effective from May 1, 2016.

Revenue Recognition

The Company recognizes revenue in accordance with FASB ASC Topic 605, “*Revenue Recognition*”, when persuasive evidence of an arrangement exists, the price is fixed or determinable, collection is reasonably assured and delivery of products has occurred or services have been rendered. Delivery occurs upon receipt of products by the customers at the customers’ warehouse or designated destination, or at the time products are picked up by the customers at the Company’s warehouse.

Revenues presented on the consolidated statements of income and comprehensive income are net of sales taxes and surcharges.

Cost of Goods Sold

The Company’s cost of goods sold includes product costs, shipping and handling costs, and costs related to inventory adjustments, including write downs for excess and obsolete inventory. Product costs include raw materials, production overhead costs, amortization of production license, and depreciation of property, plant and equipment used directly or indirectly for production.

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) (Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Research and Development Costs

Research and development costs are expensed as incurred. The Company did not incur any material research and development costs for the years ended December 31, 2014, 2015 and 2016.

Advertising Expenses

Costs associated with advertising are expensed as incurred. The Company did not incur any advertising expenses for the years ended December 31, 2014, 2015 and 2016.

Shipping and Handling Costs

The Company records all charges to customers for outbound shipping and handling as revenue. All corresponding shipping and handling costs are classified as cost of goods sold for the years ended December 31, 2014, 2015 and 2016.

Allowance for Doubtful Accounts

The Company regularly monitors and assesses the risk of not collecting amounts owed to the Company by customers. This evaluation is based upon a variety of factors including: an analysis of amounts current and past due along with relevant history and facts particular to the customer. Based upon the results of this analysis, the Company did not have an allowance for doubtful accounts for this risk.

Retirement and Other Postretirement Benefits

Full-time employees of the Company in the PRC participate in a government mandated defined contribution plan, pursuant to which certain pension benefits, medical care, employee housing fund and other welfare benefits are provided to employees. Chinese labor regulations require the Company to make contributions to the government for these benefits based on certain percentages of the employees’ salaries. The Company accounts for the mandated defined contribution plan under the vested benefit obligations approach based on the guidance of FASB ASC Topic 715, “*Compensation—Retirement Benefits*”.

The total amounts for such employee benefits, which were expensed, were RMB9,808,692, RMB10,369,297 and RMB10,016,774 (\$1,443,963) for the years ended December 31, 2014, 2015 and 2016, respectively.

[Table of Contents](#)

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)***Borrowing cost***

Borrowing costs attributable directly to the acquisition, construction or production of qualifying assets which require a substantial period of time to be ready for their intended use or sale, are capitalized as part of the cost of those assets. Income earned on temporary investments of specific borrowings pending their expenditure on those assets is deducted from borrowing costs capitalized. All other borrowing costs are recognized in interest expenses in the statement of income and comprehensive income in the period in which they are incurred. For the years ended December 31, 2014, 2015 and 2016, no interests were capitalized as borrowing cost in property, plant and equipment.

Government Subsidies

The Company's subsidiaries in China receive government subsidies from local Chinese government agencies in accordance with relevant Chinese government policies. In general, the Company presents the government subsidies received as part of other income unless the subsidies received are earmarked to compensate a specific expense, which have been accounted for by offsetting the specific expense, such as research and development expense or interest expenses. Unearned government subsidies received are deferred for recognition until the criteria for such recognition could be met.

Income Taxes

The Company follows FASB ASC Topic 740, "Income Taxes", which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each period end based on enacted tax laws and statutory tax rates, applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

The Company has adopted FASB ASC Topic 740-10-25 since January 1, 2007, which provides criteria for the recognition, measurement, presentation and disclosure of uncertain tax position. The Company must recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate resolution. The Company performed self-assessment and the Company's liability for income taxes includes the liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by taxing authorities. Audit periods remain open for review until the statute of limitations has passed, which in the PRC is usually 5 years. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the Company's liability for income taxes. Any such adjustment could be material to the Company's results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. As of December 31, 2015 and 2016, the management of the Company considered that the Company had no additional liabilities for uncertain tax positions affecting its consolidated financial position and results of operations or cash flows, and will continue to evaluate for any uncertain position in the future. There are no estimated interest costs and penalties provided in the Company's consolidated financial statements for the years ended December 31, 2014, 2015 and 2016, respectively. The Company's tax positions related to open tax years are subject to examination by the relevant tax authorities and the major one is the China Tax Authority.

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)***Comprehensive Income (Loss)***

The Company presents comprehensive income (loss) in accordance with FASB ASC Topic 220, "Comprehensive Income". FASB ASC Topic 220 states that all items that are required to be recognized under accounting standards as components of comprehensive income (loss) be reported net of taxes in the consolidated statements of income and comprehensive income. The components of comprehensive income were the net income for the years, the foreign currency translation adjustments and the unrealized holding gain (loss) or any reclassification adjustment of available-for-sale securities.

Appropriated Retained Earnings

The income of the Company's PRC subsidiaries is distributable to their shareholder after transfer to reserves as required by relevant PRC laws and regulations and the subsidiaries' Articles of Association. As stipulated by the relevant laws and regulations in the PRC, these PRC subsidiaries are required to maintain reserves which are non-distributable to shareholders. Appropriations to the reserves are approved by the respective boards of directors.

Reserves include statutory surplus reserves and discretionary reserves. Statutory surplus reserves can be used to offset the accumulated losses, if any, and may be converted into capital in proportion to the existing equity interests of shareholders, provided that the balance after such conversion is not less than 25% of the registered capital. The appropriation to the statutory surplus reserves must not be less than 10% of net profit after taxation. Such appropriation may cease to apply if the balance of the fund is equal to 50% of the entity's registered capital. The annual appropriation of reserves of both Shandong Borun and Daqing

Borun is 10% of the net income after income tax expenses. For the years ended December 31, 2014, 2015 and 2016, the Company made the transfers to this reserve fund in the amounts of RMB7,921,066, RMB12,885,465 and RMB6,371,096 (\$918,422), respectively, separately presented as “Retained earnings—appropriated” in the balance sheets.

Dividends

The Company provides discretionary dividend payments based on the approval of the Company’s Board of Directors. The Board of Directors of the Company had not proposed any dividend payment for the years ended December 31, 2014, 2015 and 2016.

Earnings Per Share

Earnings per share is calculated in accordance with FASB ASC Topic 260, “Earnings Per Share”. Basic earnings per share is computed by dividing income attributable to holders of ordinary shares by the weighted average number of ordinary shares outstanding during the period. Diluted earnings per share is computed using the more dilutive of (a) the two-class method or (b) the if-converted method. Diluted earnings per share also reflects the potential dilution that could occur if securities or other contracts to issue ordinary shares were exercised or converted into ordinary shares.

2. Summary of Significant Accounting Policies (Continued)

Earnings Per Share (Continued)

The following table sets forth the computation of basic and diluted earnings per share for the years indicated:

	Year Ended December 31,			
	2014 (RMB)	2015 (RMB)	2016 (RMB)	2016 (\$)
Numerator:				
Net income, representing undistributed earnings available to ordinary shareholder—basic and diluted	79,210,649	128,854,649	63,710,958	9,184,224
Denominator:				
Weighted average number ordinary shares outstanding—basic and diluted	25,725,000	25,725,000	25,725,000	25,725,000
Earnings per share:				
Basic and diluted	3.08	5.01	2.48	0.36

Operating Risk

Concentrations of Credit Risk

Trade Accounts Receivable—Concentrations of credit risk with respect to accounts receivable are limited due to the large number of customers dispersed across diverse markets and generally short payment terms. Credit is extended based on an evaluation of the customer’s financial condition and collateral generally is not required. The Company evaluates the collectability of accounts receivable based on a combination of factors. In cases where the Company is aware of circumstances that may impair a specific customer’s ability to meet its financial obligations subsequent to the original sale, the Company will record a specific allowance against amounts due, and thereby reduce the net recognized receivable to the amount the Company reasonably believes will be collected. As of December 31, 2015 and 2016, there was no individual trade accounts receivable amounted over 10% of the total balance.

Revenues—Substantially, all of the Company’s revenues are derived from sales of edible alcohol and its by-products, including DDGS Feed, liquid carbon dioxide and crude corn oil and the Company’s chemical products CPE in PRC. Any significant decline in market acceptance of the Company’s products or in the financial condition of our existing customers could impair our ability to operate effectively. None of the individual customers contributed over 10% of the total revenue for the years ended December 31, 2014, 2015 and 2016.

F-18

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Interest Rate Risk

Borrowings and Bonds—The Company’s significant interest-bearing financial liabilities are borrowings and bonds.

As of December 31, 2016, all balance of borrowing are short-term borrowings which will be matured at various dates within the year ending December 31, 2017 and do not expose the Company to interest rate risk. The Company's interest rate risk arises primarily from bonds. The Company's bonds were issued at fixed rates on November 2, 2016 (the "2016 Bonds") and expose the Company to fair value and interest rate risk which will be matured at fiscal year 2021.

The interest rates profile and terms of repayment of the Company's bonds payable at the end of the reporting periods are disclosed in note 14 to the consolidated financial statements.

Other than the above, other financial assets and liabilities do not have material interest rate risk.

Liquidity Risk

The Company's working capital is sufficient to meet our present requirements. The Company may, however, require additional cash due to changing business conditions or other future developments, including any investments or acquisitions we may decide to pursue. In the long-term, the Company intends to rely primarily on cash flows from operations and additional borrowings from the financial institutions in order to meet the Company's anticipated cash needs. If the anticipated cash flow is insufficient to meet the requirements, the Company's may also seek to issue additional equity, debt or equity-linked securities.

Country Risk

The Company has significant investments in the PRC. The operating results of the Company may be adversely affected by changes in the political and social conditions in the PRC and by changes in Chinese government policies with respect to laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, and rates and methods taxation, pricing and supply of corns and coals, among other things. There can be no assurance; however, those changes in political and other conditions will not result in any adverse impact.

Recently Issued Accounting Pronouncements

In January 2017, the FASB issued Accounting Standards Update ("ASU") No. 2017-04, "*Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*" ("ASU 2017-04"), which removes Step 2 from the goodwill impairment test. An entity will apply a one-step quantitative test and record the amount of goodwill impairment as the excess of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit. The new guidance does not amend the optional qualitative assessment of goodwill impairment. Public business entity that is a U.S. Securities and Exchange Commission filer should adopt the amendments in this ASU for its annual or any interim goodwill impairment test in fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We are currently evaluating the impact of the adoption of ASU 2017-04 on our consolidated financial statements.

F-19

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Recently Issued Accounting Pronouncements (Continued)

In November 2016, the FASB issued ASU No. 2016-18, "*Statement of Cash Flows (Topic 230): Restricted Cash*" ("ASU 2016-18"), which requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in this ASU do not provide a definition of restricted cash or restricted cash equivalents. The amendments in this ASU are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. We are currently evaluating the impact of the adoption of ASU 2016-18 on our consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, "*Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*" ("ASU 2016-15"), which addresses the following eight specific cash flow issues: debt prepayment or debt extinguishment costs; settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (including bank-owned life insurance policies); distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. The amendments in this ASU are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. We are currently evaluating the impact of the adoption of ASU 2016-15 on our consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, "*Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*" ("ASU 2016-13"). Financial Instruments—Credit Losses (Topic 326) amends guideline on reporting credit losses for assets held at amortized cost basis and available-for-sale debt securities. For assets held at amortized cost basis, Topic 326 eliminates the probable initial recognition threshold in current GAAP and, instead, requires an entity to reflect its current estimate of all expected credit losses. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial assets to present the net amount expected to be collected. For available-for-sale debt securities, credit losses should be measured in a manner similar to current GAAP, however Topic 326 will require that credit losses be presented as an allowance rather than as a write-down. ASU 2016-13 affects entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The amendments in this ASU will be effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. We are currently evaluating the impact of the adoption of ASU 2016-13 on our consolidated financial statements.

F-20

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Recently Issued Accounting Pronouncements (Continued)

In April 2016, the FASB issued ASU No. 2016-09, “*Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*” (“ASU 2016-09”), which simplifies several aspects of the accounting for employee share-based payment transactions. The areas for simplification in ASU 2016-09 include the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this ASU will be effective for annual periods beginning after December 15, 2016 and interim periods within those annual periods. Early adoption is permitted. The Company does not expect the adoption of ASU 2016-09 to have a material impact on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, “*Leases (Topic 842)*” (“ASU 2016-02”). The amendments in this update create Topic 842, Leases, and supersede the leases requirements in Topic 840, Leases. Topic 842 specifies the accounting for leases. The objective of Topic 842 is to establish the principles that lessees and lessors shall apply to report useful information to users of financial statements about the amount, timing, and uncertainty of cash flows arising from a lease. The main difference between Topic 842 and Topic 840 is the recognition of lease assets and lease liabilities for those leases classified as operating leases under Topic 840. Topic 842 retains a distinction between finance leases and operating leases. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous leases guidance. The result of retaining a distinction between finance leases and operating leases is that under the lessee accounting model in Topic 842, the effect of leases in the statement of comprehensive income and the statement of cash flows is largely unchanged from previous GAAP. The amendments in ASU 2016-02 are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years for public business entities. Early application of the amendments in ASU 2016-02 is permitted. We are currently evaluating the impact of the adoption of ASU 2016-02 on our consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, “*Financial Instruments — Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*” (“ASU 2016-01”). The amendments in this update require all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee). The amendments in this update also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition the amendments in this update eliminate the requirement for to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet for public entities. For public business entities, the amendments in ASU 2016-01 are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Except for the early application guidance discussed in ASU 2016-01, early adoption of the amendments in this update is not permitted. We do not expect the adoption of ASU 2016-01 to have a material impact on our consolidated financial statements.

F-21

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

2. Summary of Significant Accounting Policies (Continued)

Recently Issued Accounting Pronouncements (Continued)

In November 2015, the FASB issued ASU No. 2015-17, “*Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes*” (“ASU 2015-17”). Topic 740, Income Taxes, requires an entity to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. Deferred tax liabilities and assets are classified as current or noncurrent based on the classification of the related asset or liability for financial reporting. Deferred tax liabilities and assets that are not related to an asset or liability for financial reporting are classified according to the expected reversal date of the temporary difference. To simplify the presentation of deferred income taxes, the amendments in ASU 2015-17 require that deferred income tax liabilities and assets be classified as noncurrent in a classified statement of financial position. For public business entities, the amendments in this update are effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. We do not expect the adoption of ASU 2015-17 to have a material impact on our consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-11, “*Inventory (Topic 330): Simplifying the Measurement of Inventory*” (“ASU 2015-11”). The amendments in this update require an entity to measure inventory within the scope of ASU 2015-11 (the amendments in ASU 2015-11 do not apply to inventory that is measured using last-in, first-out or the retail inventory method. The amendments apply to all other inventory, which includes inventory that is measured using first-in, first-out or average cost) at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is uncharged for inventory measured using last-in, first-out or the retail inventory method. The amendments in ASU 2015-11 more closely align the measurement of inventory in U.S. GAAP with the measurement of inventory in International Financial Reporting Standards (“IFRS”). ASU 2015-11 is effective for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The amendments in ASU 2015-11 should be applied prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. We do not expect the adoption of ASU 2015-11 to have a material impact on our consolidated financial statements.

2. Summary of Significant Accounting Policies (Continued)

Recently Issued Accounting Pronouncements (Continued)

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers (Topic 606)” (“ASU 2014-09”). ASU 2014-09 supersedes the revenue recognition requirements in “Revenue Recognition (Topic 605)”, and requires entities to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. The FASB issued ASU No. 2015-14, “Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date” (“ASU 2015-14”) in August 2015. The amendments in ASU 2015-14 defer the effective date of ASU 2014-09. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. Further to ASU 2014-09 and ASU 2015-14, the FASB issued ASU No. 2016-08, “Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)” (“ASU 2016-08”) in March 2016, ASU No. 2016-10, “Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing” (“ASU 2016-10”) in April 2016, ASU No. 2016-12, “Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients” (“ASU 2016-12”), and ASU No. 2016-20, “Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers” (“ASU 2016-20”), respectively. The amendments in ASU 2016-08 clarify the implementation guidance on principal versus agent considerations, including indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customers. ASU 2016-10 clarifies guideline related to identifying performance obligations and licensing implementation guidance contained in the new revenue recognition standard. The updates in ASU 2016-10 include targeted improvements based on input the FASB received from the Transition Resource Group for Revenue Recognition and other stakeholders. It seeks to proactively address areas in which diversity in practice potentially could arise, as well as to reduce the cost and complexity of applying certain aspects of the guidance both at implementation and on an ongoing basis. ASU 2016-12 addresses narrow-scope improvements to the guidance on collectability, non-cash consideration, and completed contracts at transition. Additionally, the amendments in this ASU provide a practical expedient for contract modifications at transition and an accounting policy election related to the presentation of sales taxes and other similar taxes collected from customers. The amendments in ASU 2016-20 represents changes to make minor corrections or minor improvements to the Codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. The effective date and transition requirements for ASU 2016-08, ASU 2016-10, ASU 2016-12 and ASU 2016-20 are the same as ASU 2014-09. We are currently evaluating the impact of the adoption of ASU 2014-09, ASU 2016-08, ASU 2016-10, ASU 2016-12 and ASU 2016-20 on our consolidated financial statements.

2. Summary of Significant Accounting Policies (Continued)

Reclassification of Accounts

The amendments in ASU No. 2015-03, “Interest—Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs” (“ASU 2015-03”), simplifies presentation of debt issuance costs and requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a directly deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments. ASU 2015-03 is effective for fiscal years beginning after December 15, 2015 and should be applied on a retrospective basis.

Certain prior years’ amounts and disclosures relating to the debt issuance costs associated to the Bonds have been reclassified to conform to current year presentations after ASU 2015-03 was effective in fiscal year 2016. There was no change to previously reported shareholders’ equity or net income attributable to ordinary shareholders. The following is the summary of major prior-period information that has been retrospectively adjusted and the effect of the change on the financial statement line items:

Major reclassification of accounts	Effect of the changes on the balance sheet as of December 31, 2015 and the statements of income for the years ended December 31, 2014 and 2015:
Debt issuance costs related to the Bonds reported in the balance sheet as a direct deduction from the face amount of the Bonds (FASB ASC Topic 835-30-45-1A)	Unamortized debt issuance costs of RMB427,908 associated to 2013 Bonds which were previously recorded as prepaid expenses in current assets, are net off with the Bonds payable in connection with 2013 Bonds as of December 31, 2015. Bonds payable in connection with 2013 Bonds as of December 31, 2015 was changed to RMB319,572,092 accordingly. Relevant disclosures about unamortized debt issuance costs associated to 2013 Bonds were amended in Note 14 and Note 18 to conform to the current presentation accordingly.
Amortization of debt issuance costs shall be reported as interest expense (FASB ASC Topic 835-30-45-3)	The amortization of debt issuance costs of the Bonds were previously presented as a separated line item in the statements of income. The amortized debt issuance costs of the Bonds of RMB5,134,902 and RMB5,134,902 for the years ended December 31, 2014 and 2015, respectively, were currently included in the interest expense in the statements of income for the periods presented. Relevant disclosures and presentation about the amortization of debt issuance costs associated to 2013 Bonds were amended in Note 14 and Note 18 to conform to the current presentation accordingly.

(Amounts in RMB unless otherwise stated)

3. Fair Value Measurements

FASB ASC Topic 820, “*Fair Value Measurements*”, defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability.

FASB ASC Topic 820 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument’s categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. FASB ASC Topic 820 establishes three levels of inputs that may be used to measure fair value:

- Level 1—Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company holds. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2—Valuation based on quoted prices in markets that are not active for which all significant inputs are observable, either directly or indirectly.
- Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The Company has adopted FASB ASC Topic 820 since January 1, 2008 for all financial assets and liabilities and nonfinancial assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis (at least annually). FASB ASC Topic 820 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. The Company has not adopted FASB ASC Topic 820 for nonfinancial assets and nonfinancial liabilities, as these items are not recognized at fair value on a recurring basis.

Disclosures of fair value information about financial instruments (whether or not recognized in the balance sheets), for which it is practicable to estimate that value, are required each reporting periods in addition to any financial instruments carried at fair value on a recurring basis as prescribed by FASB ASC Topic 825, “*Financial Instruments*”. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

3. Fair Value Measurements (Continued)Fair value measured or disclosed on a recurring basis

The fair value of financial items of the Company for disclosure purpose including cash, other receivables, advance to suppliers, accrued expenses and other payables and short-term borrowings, approximate their carrying value due to their short-term nature. The Company’s investment (held-to-maturity debt securities) is disclosed using significant other observable inputs (Level 2), because it does not have regular market pricing. Liabilities of the Company for fair value disclosure purpose within Level 2 include long-term borrowings from financial institutions and bonds payable. Their carrying amounts are reasonable approximates of their fair value at the end of the reporting period due to all the long-term debts carry interest rates which approximate rates currently offered by the financial institutions for similar debt instruments of comparable maturities. The Company did not have any financial instruments measured or disclosed at fair value using Level 3 as of December 31, 2015 and 2016.

Fair value measured on a non-recurring basis

The Company reviews long-lived assets for impairment annually or more frequently if events or changes in circumstances indicate the possibility of impairment. For the continuing operations, long-lived assets are measured at fair value on a nonrecurring basis when there is an indicator of impairment, and they are recorded at fair value only when impairment is recognized. For discontinued operations, long-lived assets are measured at the lower of carrying amount or fair value less cost to sell. The fair value of these assets were determined using models with significant unobservable inputs which were classified as Level 3 inputs, primarily the discounted future cash flow. In determining the fair value, The Company used projections of cash flows directly associated with, and which are expected to arise as a direct result of, the use and eventual disposition of the assets. This approach required significant judgments including the Company’s projected net cash flows, which were derived using the most recent available estimate for the reporting unit containing the assets tested. Several key assumptions included periods of operation, projections of product pricing, production levels, product costs, market supply and demand, and inflation.

4. Held-to-maturity Debt Securities

On January 29, 2015, the Company's subsidiary, Daqing Borun purchased 1,000,000 units of private placement bonds (each unit with par value of RMB100 with nominal annual interest of 9.5%, and hereafter referred as the "Borun Bonds") which was traded in the Shanghai Stock Exchange and issued by Shandong Borun (another subsidiary of the Company) on January 29, 2013, at a cash consideration of RMB98,720,762 (\$15,202,778). Upon the maturity of held-to-maturity debt securities on January 29, 2016, the principal amounts of held-to-maturity debt securities of RMB98,720,762 (\$14,231,045) to be received have been offset with other payables of Shandong Borun. The interest income from the Borun Bonds for the years ended December 31, 2014, 2015 and 2016 were RMB nil, RMB9,191,349 and RMB1,587,889 (\$228,902), respectively.

5. Trade Accounts Receivable, Net

Trade receivable consists of receivables resulting from sales of products during the normal course of business. Trade accounts receivable at end of years presented consisted of the following:

	As of December 31,		
	2015 (RMB)	2016 (RMB)	2016 (\$)
Trade accounts receivable	515,520,269	415,621,572	59,913,734
Less: Allowance for doubtful accounts	—	—	—
Total trade accounts receivable, net	515,520,269	415,621,572	59,913,734

As of December 31, 2015 and 2016, no trade accounts receivables were pledged as collateral for borrowings from financial institutions.

6. Inventories

Inventories consisted of the following:

	As of December 31,		
	2015 (RMB)	2016 (RMB)	2016 (\$)
Raw materials	387,319,932	567,751,699	81,843,981
Work-in-process	5,152,109	2,717,584	391,752
Finished goods	46,369,051	32,159,556	4,635,946
Total inventories	438,841,092	602,628,839	86,871,679

The Company did not set up any inventory reserve as of December 31, 2015 and 2016. As of December 31, 2015 and 2016, no raw materials were pledged as collateral for borrowings from financial institutions.

7. Advance to Suppliers

Advances to suppliers consisted of the following:

	As of December 31,		
	2015 (RMB)	2016 (RMB)	2016 (\$)
Advance to granaries (note (i))	343,839,565	245,394,904	35,374,788
Others	1,158,618	582,571	83,980
Total advance to suppliers	344,998,183	245,977,475	35,458,768

Note (i): Advance to granaries represents corn cost paid but related materials and services have not been provided to the Company.

8. Other Receivables

Other receivables consisted of the following:

	As of December 31,		
	2015 (RMB)	2016 (RMB)	2016 (\$)
VAT recoverable (note (i))	52,829,584	74,986,737	10,809,678
Deposit for loan guarantee	2,900,000	2,900,000	418,048
Others	3,302,854	3,169,077	456,837
Total other receivables	59,032,438	81,055,814	11,684,563

Note (i): As of December 31, 2015 and 2016, VAT recoverable mainly consisted of input VAT paid for purchase of corns but not yet validated by the PRC Taxing Authority of RMB50,059,386 and RMB74,986,737 (\$10,809,678), respectively.

9. Property, Plant and Equipment, Net

Property, plant and equipment, net consisted of the following:

	As of December 31,		
	2015 (RMB)	2016 (RMB)	2016 (\$)
Buildings and improvements	642,901,735	642,901,735	92,677,200
Machinery	926,621,646	924,995,666	133,342,319
Office equipment and furnishing	1,468,593	1,468,593	211,704
Motor vehicles	1,715,958	1,715,958	247,363
Total cost	1,572,707,932	1,571,081,952	226,478,586
Total accumulated depreciation	(611,246,250)	(725,365,126)	(104,564,671)
Construction in progress	26,931,306	30,523,703	4,400,130
Total property, plant, and equipment, net	988,392,988	876,240,529	126,314,045

Certain buildings with an aggregate carrying value of RMB89,567,625 and RMB115,614,217 (\$16,666,314), respectively, and certain equipment with an aggregate carrying value of RMB133,059,754 and RMB152,421,561 (\$21,972,259), respectively, were pledged as collateral for borrowings from the financial institutions as of December 31, 2015 and 2016. For the years ended December 31, 2014, 2015 and 2016, no interests were capitalized as borrowing cost in property, plant and equipment.

The depreciation expenses for the years ended December 31, 2014, 2015 and 2016 were RMB118,209,623, RMB119,717,245 and RMB 115,744,856 (\$16,685,146), respectively.

Construction in progress refers to mainly the new office buildings and production facilities under construction.

13. Borrowings (Continued)

Note (i): During the year ended December 31, 2016, one short-term loan of RMB 12,000,000 (\$1,729,854) obtained from the Industrial & Commercial Bank of China (the "ICBC") was still outstanding:

- *A short-term loan of RMB12,000,000 (\$1,729,854)*—The interest bearing at a fixed rate was thereon based on the prime rate published by the People's Bank of China (the "PBOC") for loans with the same or similar terms on the withdrawing date (5.39% per annum as of the December 31, 2016). As of December 31, 2016, no prepayment was made and RMB12,000,000 (\$1,729,854) was still outstanding which will be repayable on October 11, 2017. The borrowing under the loan agreement is guaranteed by a third party company.

During the year ended December 31, 2015, one long-term loan of RMB24,000,000 obtained from the ICBC was still outstanding:

- *A long-term loan of RMB24,000,000*—The total original loan amount was RMB90,000,000. The interest bearing at a floating rate was thereon based on the prime rate published by the People’s Bank of China (the “PBOC”) for loans with the same or similar terms on the contract date rise 10% (6.60% per annum as of the December 31, 2015, and adjustable yearly following the publishing of rate adjustments by the PBOC during the term of the loan and calculated piecewise). As of December 31, 2015, a total amount of RMB66,000,000 had been repaid, and RMB24,000,000 was outstanding. This loan has been fully settled during 2016.

Note (ii): During the year ended December 31, 2016, thirteen short-term loans of RMB353,200,000 (\$50,915,381) were obtained from the Agricultural Bank of China (the “ABC”) was outstanding:

- *Three short-term loans of RMB83,200,000 (\$11,993,657)*—The interest bearing at a fixed rate was thereon based on the prime rate published by the PBOC for loans with the same or similar terms on the contract date rise 5% (4.57% per annum as of December 31, 2016). As of December 31, 2016, no prepayment was made, and RMB83,200,000 (\$11,993,657) was still outstanding, of which RMB43,200,000 will be repayable on January 12, 2017 and RMB40,000,000 will be repayable on March 10, 2017. All borrowings under the loan agreements are guaranteed by third party companies. The loans contain the following financial covenants: at any time during the loan period, debt-to-asset ratio of Shandong Borun shall not be higher than 70%; contingent liabilities of Shandong Borun shall not exceed 50% of its total net assets; and net operating cash flow shall not be negative for three consecutive years. The Company was in compliance with the above financial covenants as of December 31, 2016.
- *Two short-term loans of RMB30,000,000 (\$4,324,636)*—The interest bearing at a fixed rate was thereon based on the prime rate published by the PBOC for loans with the same or similar terms on the contract date (4.35% per annum as of December 31, 2016). As of December 31, 2016, no prepayment was made, and RMB30,000,000 (\$4,324,636) was still outstanding, of which RMB20,000,000 will be repayable on June 30, 2017 and RMB10,000,000 will be repayable on July 7, 2017. Borrowings under the loan agreements are guaranteed by a third party company. The loans contain the following financial covenants: at any time during the loan period, debt-to-asset ratio of Shandong Borun shall not be higher than 70%; contingent liabilities of Shandong Borun shall not exceed 50% of its total net assets; and net operating cash flow shall not be negative for three consecutive years. The Company was in compliance with the above financial covenants as of December 31, 2016.

14. Bonds Payable (Continued)

Bonds issued in 2016 (“2016 Bonds”) (Continued)

Debt issuance costs associated to the 2016 Bonds of RMB7,075,472 (\$1,019,961) represented cost incurred for professional services from the sponsors and other various parties, which was net of “Bonds payable in connection with 2016 Bonds” in the balance sheets. The amortized debt issuance costs of the 2016 Bonds based on imputed interest rate of 6.75% for the years ended December 31, 2014, 2015 and 2016 were RMB nil, RMB nil and RMB244,923 (\$35,307), respectively, which was recorded as “Interest expense” in the statements of income and comprehensive income. As of December 31, 2015 and 2016, unamortized debt issuance costs associated to the 2016 Bonds was RMB nil and RMB6,830,549 (\$984,654), respectively.

As of December 31, 2015 and 2016, non-current bonds payable less unamortized debt issuance costs was RMB nil and RMB293,169,451 (\$42,261,706), respectively.

15. Restricted Net Assets

The Company’s ability to pay dividends is primarily dependent on the Company receiving distributions of funds from its subsidiaries. Relevant PRC statutory laws and regulations permit payments of dividends by the Company’s PRC subsidiaries only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations. The results of operations reflected in the statements of income and comprehensive income prepared in accordance with U.S. GAAP differ from those reflected in the statutory financial statements of the Company’s subsidiaries.

In accordance with the Regulations on Enterprises with Foreign Investment of China and their articles of association, a foreign invested enterprise established in the PRC is required to provide certain statutory reserves, namely general reserve fund, the enterprise expansion fund and staff welfare and bonus fund which are appropriated from net profit as reported in the enterprise’s PRC statutory accounts. A wholly owned foreign invested enterprise is required to allocate at least 10% of its annual after-tax profit to the general reserve until such reserve has reached 50% of its respective registered capital based on the enterprise’s PRC statutory accounts. Appropriations to the enterprise expansion fund and staff welfare and bonus fund are at the discretion of the board of directors for all foreign invested enterprises. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. Shandong Borun is a wholly-owned foreign invested enterprise and therefore are subject to the above mandated restrictions on distributable profits.

F-40

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

15. Restricted Net Assets (Continued)

Additionally, in accordance with the Company Law of the PRC, a domestic enterprise is required to provide a statutory common reserve of at least 10% of its annual after-tax profit until such reserve has reached 50% of its respective registered capital based on the enterprise’s PRC statutory accounts. A domestic enterprise is also required to provide for discretionary surplus reserve, at the discretion of the board of directors, from the profits determined in accordance with the enterprise’s PRC statutory accounts. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. Daqing Borun was established as domestic invested enterprises and therefore are subject to the above mandated restrictions on distributable profits.

As a result of these PRC laws and regulations that require annual appropriations of 10% of after-tax income to be set aside prior to payment of dividends as general reserve fund, the Company’s PRC subsidiaries are restricted in their ability to transfer a portion of their net assets to the Company.

Amounts restricted include paid-in capital, capital surplus and statutory reserves of the Company’s PRC subsidiaries as determined pursuant to the PRC accounting standards and regulations, totaling approximately RMB1,148,685,884 and RMB1,155,056,979 (\$166,506,700) as of December 31, 2015 and 2016, respectively.

16. Income Tax Expenses

New Borun incorporated in Cayman Islands and Golden Direction incorporated in the British Virgin Islands are at statutory tax rate of nil, China High was incorporated in Hong Kong Special Administrative Region is at statutory tax rate of 16.5%. Shandong Borun and Daqing Borun are PRC operating companies and are subject to PRC Enterprise Income Tax (“EIT”). Pursuant to the PRC Enterprise Income Tax Law, Enterprise Income Tax is generally imposed at a statutory rate of 25%.

Pursuant to PRC EIT, the PRC subsidiaries of China New Borun is obligated to withhold income tax on dividends paid-out to non-resident, for earnings retained after January 1, 2008. The applicable tax rate is 5% or 10% on the dividends paid-out. As the PRC subsidiaries are wholly or majority owned by the U.S. holding entity, the Company anticipates no cash dividends in the foreseeable futures, and all earnings will be used to re-invest in the PRC subsidiaries. Accordingly, no withholding income tax was accrued.

The income tax expenses consisted of taxes on income from operations plus changes in deferred taxes for the reporting periods presented:

Year Ended December 31,			
2014	2015	2016	2016
(RMB)	(RMB)	(RMB)	(\$)

Current	26,403,549	44,706,746	19,481,789	2,808,388

CHINA NEW BORUN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(Amounts in RMB unless otherwise stated)

17. Commitments and Contingencies (Continued)

Guarantees and Indemnities

The Company was a party to enter into contracts to indemnify third parties for certain liabilities, and as of December 31, 2015 and 2016, the Company guaranteed the third parties' borrowings from the financial institutions amounting to RMB425,000,000 and RMB 298,000,000 (\$42,958,051), respectively, as a guarantor. In most cases, the Company cannot estimate the potential amount of future payments under these indemnities until events arise that would result in a liability under the indemnities. The Company believes that the liabilities for potential future payments of these guarantees and indemnities are not probable.

18. Segment Information

The Company operates and manages its business as three reportable segments: "Corn-base edible alcohol and its by-products", "CPE" and "Foam insulation". The Company's reportable segments are strategic business units that require different technology and marketing strategies and offer different products and services. The Company's chief operating decision maker, the Chief Executive Officer, receives and reviews the results of the operations of each separate segment, assesses and manages their performance and makes decisions. Most of the businesses were established as a unit, and the management at the time of the establishment was retained.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company accounts for intersegment sales and transfers as if the sales or transfers were to third parties, that is, at current market prices.

NOTES TO CONDENSED FINANCIAL STATEMENTS

Basis of Presentation

The condensed financial information has been prepared using the same accounting policies as set out in the Company's consolidated financial statements except that the Registrant has used equity method to account for its investments in subsidiaries.

Investments in subsidiaries

The Registrant records its investments in its subsidiaries under the equity method of accounting as prescribed in FASB ASC Topic 323, "Investment—Equity Method and Joint Ventures". The Registrant's investments in subsidiaries are stated at cost plus its equity interest in undistributed earnings of subsidiaries less impairment loss, if any, since inception, and are presented on the Registrant's balance sheets as "Investments in subsidiaries" and share of the subsidiaries' income or loss as "Equity in earnings (loss) of subsidiaries", on the Registrant's statements of income and comprehensive income.

The Company's subsidiaries did not distribute any dividend to the Registrant for the years ended December 31, 2014, 2015 and 2016.

2

Party A: Heilongjiang Province Agriculture Credit-guarantee Co., Ltd.
Domicile: No. 609 Shimao Avenue, Songbei District, Harbin
Legal Representative (Principal): Tan Zhiqiang

Party B: Daqing Borun Biotechnology Co., Ltd.
Domicile: Jubao Village, Zhusan Township, Datong District, Daqing, Heilongjiang Province
Legal Representative (Principal): Wang Jinmiao

Whereas Daqing Borun Biotechnology Co., Ltd. (hereinafter referred to as the Borrower) has applied to Daqing Rural Commercial Bank Co., Ltd., Datong Sub-branch (hereinafter referred to as the Lender) for loan and has executed with the Lender a Contract for Working Capital Loan, No. 520011609200056 (hereinafter referred to as the Loan Contract). Party A has accepted the engagement by the Borrower to provide guarantee for such loan, and executed with the Lender a Contract for Guarantee, No. 520011609200056 (hereinafter referred to as the Guarantee Contract) to assume the liabilities for the joint and several guarantee, and executed with the Borrower a Contract for Engagement of Guarantee, No. 00DB16027/1-01 (the Guarantee Contract and Contract for Engagement of Guarantee are hereinafter collectively referred to as the Primary Contract). To protect the legal interests of Party A, Party B agrees to provide the counter-guarantee in favor of Party A for the account of the Borrower. Pursuant to the applicable laws and regulations and through the full consultation, Party A and Party B hereby agree upon as follows for joint performance:

Clause 1 Mortgaged Properties

- (1) Party B creates mortgage on the properties listed in the schedule hereto "List of Mortgaged Properties".
- (2) The items newly added to the Mortgaged Properties as a result of adhesion, mixture, processing and etc. shall also be used to mortgage the creditor's rights of Party A unless otherwise agreed by Party A and Party B or required by the law; Party B shall cooperate if it's necessary to conduct any procedure for registration.

3

- (3) If the List of Mortgaged Properties does not clearly define the Mortgaged Properties or the properties accepted by Party A to be mortgaged are different from the record in the List of Mortgaged Properties, then the properties accepted by Party A to be mortgaged shall be deemed as the Mortgaged Properties hereunder.
- (4) The "value of properties" as recorded in the List of Mortgaged Properties shall not be taken as the basis for determination of the "amount of guaranteed creditor's rights". If there is any discrepancy between the amount defined herein and the "amount of guaranteed creditor's rights" filled in the documentation of application for registration of mortgage based on the "value of properties" as per the requirement of the registration authority of mortgage or the "amount of creditor's rights"/"amount of guarantee" recorded by the registration authority of mortgage on the other rights certificate based on the "value of properties", the amount defined herein shall prevail.

- (5) The fruits accrued on the Mortgaged Properties may be received by Party A as a part of the Mortgaged Properties for guaranteeing Party A's creditor's rights, provided that such fruits shall be firstly used to pay the costs arising from receipt of such fruits.

Clause 2 Scope of Mortgage

All amounts for which Party A provides guarantee for the account of the Borrower under the Primary Contract (including but not limited to the principal and interests of loan, liquidated damages and indemnity under the Primary Contract), the costs incurred by Party A for realizing its creditor's rights and guaranteed rights (including but not limited to the costs of insurance, notarization, authentication, auction, litigation or arbitration, delivery, enforcement, lawyers service and traveling), and the losses and other costs payable incurred by Party A as a result of any breach of the Borrower.

4

Clause 3 Undertakings of Party B

- (1) Party B shall have the full ownership of or right to dispose of the Mortgaged Properties provided by it and be obligated to furnish Party A with such original documents as all legal documents, documents for evidencing the titles and financial vouchers relevant to the Mortgaged Properties, on which there is no other rights, attachments or other dispute existing. If there is any lease of the Mortgaged Properties prior to the signature of this Contract, Party A shall be accurately informed of and provided with the contract for such lease.
- (2) During the Mortgage, Party B shall neither create any other mortgage on, nor lease out, transfer, donate or permit other person to use or otherwise dispose of the mortgaged Properties without any consent.
- (3) Party B has made full and reasonable explanations for the defects in the Mortgaged Properties hereunder.
- (4) The creation by Party B of the mortgage has been approved by the joint owners of the mortgaged Properties or the organ of the company having the power to make decisions, and the procedures are consistent with the provisions of the articles of association of the company.
- (5) In the event that the value of the Mortgaged Properties has been reduced or may be reduced and therefore affecting the realization of Party A's creditor's rights, Party B shall provide new guarantee as per the requirement of Party A.
- (6) Party B's liabilities for guarantee hereunder shall not be relieved, and Party A may directly require Party B to bear the liabilities for guarantee within the scope of guarantee pursuant to the provisions hereof without objection of Party B, whether or not there is other counter-guarantee for the creditor's rights held by Party A against the Borrower under the Primary Contract, or whether or not such other counter-guarantee is provided by the Borrower itself.

5

Clause 4 Registration of Mortgage

- (1) If the registration of mortgage shall be conducted as required by the laws, regulations or agreed by the parties, Party A and Party B shall conduct such registration with the legal registration authority at the expense of Party B within 15 days from the date hereof.
- (2) If there is any change to the items registered, for which the registration of modification shall be conducted by law, Party A and Party B shall conduct such registration of modification with the original registration authority of mortgage at the expense of Party B within 10 days from the date when such change occurs to the registered items .
- (3) The originals of other right certificates, registration documents of mortgage and other relevant certificates of rights shall be under the custody of Party A, and Party A shall cooperate with Party B for conducting the procedures for registration of mortgage.

Clause 5 Insurance of Mortgaged Properties

- (1) Party B shall, at its own expense, conduct the insurance of the Mortgaged Properties covering such risks, terms and amounts as designated by Party A pursuant to the applicable law within 15 days after the signature of this Contract.
- (2) The policies of such insurance shall be consistent with the requirements of Party A and shall not contain any limited conditions impairing the interests of Party A. The policies shall specially indicate that: Party A has priority in compensation (the first beneficiary); any change to the policies shall obtain the writing consent of Party A; and the insurer shall directly transfer the insurance proceeds to the account designated by Party A in case of an insured event. If the Mortgaged Properties have been insured, but the policies do not indicate the aforesaid contents, the corresponding indication or modification shall be made to such policies.

6

- (3) Party B shall ensure that the insurance is continuously valid and shall not cause the insurance to be interrupted, canceled or invalidated for any reason, or cause the insurer to be relieved from the liabilities for indemnity, or change the policies without Party A's consent. If the creditor's rights guaranteed by Party B have not been paid off when the insurance expires, Party B shall renew and accordingly extend the insurance.
- (4) Party B shall deliver the originals of the policies of the Mortgaged Properties to Party A within 15 business days from the date hereof (as to the renewal of the insurance of the Mortgaged Properties, the date when such renewal shall be completed), and reserve with Party A such documents as necessary for the insurance claim or assignment of insurance interests.

- (5) Party A shall be entitled to dispose of the insurance proceeds from the Mortgaged Properties and Party B shall assist in conducting the procedures related thereto.

Clause 6 Management of Mortgaged Properties

- (1) During the period of mortgage, Party B shall continue to take care of and use and concurrently be responsible for the maintenance of the Mortgaged Properties at its own expense. Party A shall be entitled to at any time supervise and inspect the Mortgaged Properties under the custody and use of Party B, and Party B shall give assistance.
- (2) During the period of mortgage, Party B shall be obligated to ensure that the Mortgaged Properties are in sound conditions, and shall promptly take measures to prevent the expansion of loss and timely notify Party A in case of any damage or loss to the Mortgaged Properties.
- (3) During the period of mortgage, Party A may require Party B to cease its act which would devalue the Mortgaged Properties. Party A may require the recovery of the value of the Mortgaged Properties or the provision of guarantee in an amount corresponding to the reduced value in case of any devaluation of the Mortgaged Properties. Party A may realize its rights to the mortgage in advance or require the Borrower to pay off debts in advance, if Party B neither recovers the value of the Mortgaged Properties nor provides the guarantee.

7

Clause 7 Prevention of the Third Parties

- (1) Party B shall, if required by Party A, provide new guarantee consistent with the requirement of Party A, should the Mortgaged Properties be expropriated, requisitioned, forfeited or taken back without compensation, or the Mortgaged Properties be attached, frozen, seized, supervised, taken under lien, sold at auction, deforced, damaged or otherwise disposed of by third parties.
- (2) In case of any of the foregoing circumstances, Party A may have priority to be paid with the insurance proceeds, indemnity or compensation available. Such insurance proceeds, indemnity or compensation may be drawn, if the term for the performance of the guaranteed debts does not expire. The part of the Mortgaged Properties remained after any of the foregoing circumstances shall still be under the mortgage for the counter-guaranteed debts.

Clause 8 Realization of Rights to Mortgage

- (1) Party A may take priority in compensation by the evaluation of the Mortgaged Properties in terms of money or with the proceeds from the auction or sale off of the Mortgaged Properties upon an agreement with Party B, if the Borrower fails to pay off its due debts .
- (2) Party A may reach an agreement with Party B in advance for the evaluation of the Mortgaged Properties in terms of money, or request for the compulsory enforcement of the Mortgaged Properties to protect Party A's interests by the drawing of the proceeds from the auction or sale off of the Mortgaged Properties, if the Borrower breaches the Loan Contract or the Contract for Engagement of Guarantee, or Party B breaches the provisions hereof.

8

- (3) The res accessoria attached to the Mortgaged Properties or the fruits accrued during the period of mortgage shall be sold at auction or sold off together with the Mortgaged Properties, and Party A shall take priority in compensation with the proceeds therefrom.
- (4) The proceeds from the disposal by Party A of the Mortgaged Properties, after the costs arising from the auction or sale off (including but not limited to the fees of custody, evaluation, auction and transfer of title, and taxes) have been paid therefrom, shall be firstly used to pay off the debts under the Primary Contract and the remainder will be refunded to Party B.
- (5) The value of Mortgaged Properties recorded in the *List of Mortgaged Properties* or agreed on by the parties (hereinafter referred to as the "Provisionally-determined Value") shall not mean the final value of Mortgaged Properties, which shall be the amount of the proceeds from the disposal by Party A of the Mortgaged Properties net of all taxes.

If the Mortgaged Properties are used to compensate for the creditor's rights of Party A, the aforesaid Provisionally-determined Value shall not be adopted as the basis for the compensation for the creditor's rights of Party A, and the value of Mortgaged Properties then shall be determined by an agreement of Party A and Party B or a fair evaluation by law.

- (6) Party B's liabilities for guarantee hereunder shall not be relieved, and Party A may directly require Party B to bear the liabilities for guarantee within the scope of guarantee pursuant to the provisions hereof without objection of Party B, whether or not there is other guarantee for the creditor's rights of Party A under the Primary Contract (including but not limited to such methods of security as guarantee, pledge, letter of guarantee and stand-by letter of credit), or whenever such other guarantee is created, or whether or not such other guarantee is valid, or whether or not Party A asserts any claim against any other guarantor, or whether or not there is any third party agreeing to assume all or a part of the debts under the primary contract, or whether or not such other guarantee is provided by the Borrower itself.

9

Clause 8 Release of Mortgage

- (1) The mortgage shall be released upon the Borrower paying off the loan and interest or the debts owed by the Borrower to the creditor being terminated due to other reasons.
- (2) The mortgage shall be released if the Guarantee Contract produced by Party A to the bank is invalid or terminated due to a reason attributable to the parties to the Loan Contract and Party A is not required to assume any liability for guarantee and indemnity.
- (3) The mortgage shall be released upon the realization of the rights to mortgage.
- (4) The mortgage shall be released between Party A and Party B if Party A legally assigns the rights to mortgage to a third party upon the consent of Party B.
- (5) Party A shall cooperate with Party B for conducting the deregistration with the original registration authority upon the release of the mortgage.

Clause 10 Liabilities for Breach

If breaching the provisions hereof, Party B shall, in addition to the liabilities for guarantee as set forth herein, pay Party A the liquidated damages amounting to 20% of the aggregate amount of the principal of the loan guaranteed under the Guarantee Contract, and if such liquidated damages are not sufficient to make up the actual loss of Party A, shall indemnify the actual loss.

Clause 11 Dispute Settlement

Any dispute arising from the performance of this Contract between Party A and Party B will be settled through the consultation of the parties; and if failing, either party may:

10

x bring a lawsuit or request for compulsory enforcement to the people's court where Party A is located.

o request / Arbitration Commission for arbitration.

Clause 12 Effectiveness and Notarization of the Contract

This Contract will become effective upon being signed by and affixed to the official seals of Party A and Party B. This Contract will be notarized by the notary department designated by Party A at the expense of Party B, and Party B agrees that this Contract may be compulsorily enforced upon such notarization. Party B shall voluntarily accept the attachment and compulsory enforcement by the court, if breaching this Contract.

Clause 13 Notices and Service

The contact addresses and liaison methods of Party A and Party B are listed as follows:

Party A:

Contact Person: Li Wenchong

Correspondence Address: No. 609 Shimao Avenue, Songbei District, Harbin

Post Code: 150000 Email Address: 32141995@qq.com

Fax: 0451-58592960 Telephone: 15804609816

Party B:

Contact Person: Wang Jinmiao

Correspondence Address: Jubao Village, Zhusan Township, Datong District, Daqing, Heilongjiang Province

Post Code: 163515 Email Address: borunshiye@126.com

Fax: 0459-6989708 Telephone: 13806477901

- (1) If a party changes its correspondence address or liaison method, it shall notify the other party in writing within 15 days after such change.

11

- (2) The party making such change (hereinafter referred to as the "Changing Party") shall be liable for the effect and loss arising from its failure to timely notify the other party of such change unless otherwise provided by the law.
- (3) Any notice hereunder shall be made in writing and addressed as per the contact method as specified in this clause. Such notice shall be deemed to have been served when the fax machine of the addressor indicates that the fax has been sent out, if sent through fax; and shall be deemed to have been delivered on the third business day after the mail has been posted, if sent by a registered mail or through express courier.

Clause 14 This Contract shall be signed in triplicate with the same legal effect, Party A, Party B and the registration authority (if any) respectively holding one.

Clause 15 Miscellaneous

- (1) Party B shall not assign any of its rights or obligations hereunder to the third party without the written consent of Party A.
- (2) Unless there is reliable and conclusive evidence to the contrary, the documents and vouchers maintained by Party A which are formed during the Borrower handles such business as the drawing and repayment of the loan and the payment of the interest, and the records and vouchers formed when Party A collects the loan shall constitute the valid and conclusive evidence for the creditor's rights and debts hereunder. Party B may not make objections only for the cause that such records, documents and vouchers are maintained by Party A unilaterally.
- (3) Party A and the Borrower and Lender may make any amendment to the Primary Contract without the consent of Party B, except for those aggravating Party B's liabilities.
- (4) As a schedule attached hereto, the List of Mortgaged Properties shall have the same legal effect as this Contract.
- (5) More other provisions: _____

1

Whereas, Party B will conclude and sign (and/or have concluded and signed)RMB loan contracts, foreign currency loan contracts, bank acceptance agreements, contracts on issuance of letters of credit, agreements on issuance of bank guarantees and/or other legal documents with Daqing BoRun Biotechnology Co., Ltd. (hereinafter referred to as "the Debtor") during the period from December 23th, 2015 to December 23th, 2018 (hereinafter referred to as "the Period for Determination of the Creditor's Rights") (the aforesaid contracts, agreement and/or other legal documents concluded and signed during the Period for Determination of the Creditor's Rights are hereinafter referred to as "the Main Contracts") for the Debtor to obtain the credit business in Item (1) as follows:

- (1) Granting loans in RMB/foreign currencies;
- (2) Acceptance of trade bills;
- (3) Issuance of letters of credit;
- (4) Issuance of bank guarantee; or
- (5) Other credit businesses: intentionally left blank.

Party A is willing to provide a maximum amount mortgage for a series of debts of the Debtor under the Main Contracts. In accordance with relevant laws and regulations, Party A and Party B hereby conclude and sign the Contract through mutual agreement, by which both parties shall abide.

Article I The Mortgaged Properties

1. Party A uses the properties listed in "the List of the Mortgaged Properties" to create the mortgage hereunder.
2. If any renewal of the ownership or other certificates (deeds) for the mortgaged properties results in any inconsistency between "the List of the Mortgaged Properties" in the Contract or the encumbrance (mortgage) certificates or the mortgage documentations received by Party B and the aforesaid new ownership certificates (deeds) or relevant records in the register book of the registration authority, Party A may not refuse to assume the liability to guarantee on that ground.
3. Unless otherwise agreed upon by both parties or otherwise stipulated by the law, any addition to the mortgaged properties due to accretion, mixture, processing, reconstruction and other reasons shall also be utilized to provide mortgage for Party B's creditor's rights. Party A shall accomplish necessary mortgage registration procedures in accordance with Party B's requirements.
4. If the values of the mortgaged properties have been or may be reduced, affecting the realization of Party B's creditor's rights, Party A shall provide new guarantees in accordance with Party B's requirements.

2

Article II Scope of Guarantee and Maximum Limit of the Creditor's Rights

1. The scope of guarantee under the maximum amount mortgage covers any and all debts under the Main Contracts, including but not limited to all principals, interests (including compound interests and default interests), liquidated damages, compensations, other amounts payable by the Debtor to Party B (including but not limited to relevant handling charges, telecommunication charges, incidentals and relevant bank charges refused to be assumed by the beneficiaries under letters of credits paid by Party B in advance), the expenses incurred by Party B for realization of the creditor's rights and the mortgage rights (including but not limited to any and all legal costs, arbitration fees, property reservation costs, travel expenses, execution fees, valuation fees, auction fees, notarization fees, delivery fees, announcement fees and attorney fees etc.)
2. The maximum limit of the liability to guarantee under the maximum amount mortgage shall be (Currency) RMB (Amount in Words) Three Hundred and Thirty Million only. If Party A has performed its liability to guarantee under the Contract, the maximum amount shall be reduced accordingly.

3. Even if the loans, moneys paid in advance, interests, expenses or Party B's any other creditor's right under the Main Contracts are actually formed at any time exceeding the Period for Determination of the Creditor's Rights, they still fall into the scope of guarantee under the maximum amount mortgage. The expiry dates for the performance of debts under the Main Contracts shall not be restricted by the expiry date of the Period for Determination of the Creditor's Rights.

Article III Registration of the Mortgaged Properties

Both parties shall go through the mortgage registration formalities at the competent registration authority within thirty working days after the signature of the Contract. On the date when the mortgage registration is accomplished, Party A shall submit the encumbrance certificate, the original mortgage registration documents and other title certificates in respect of the mortgaged properties to Party B who will in turn hold such certificates and documents.

Article IV Changes to the Main Contracts

1. Party A agrees that Party B may conclude and sign the Main Contract with the Debtor or make any change to the Main Contracts (including but not limited to any extension of the period for the performance of debts or any increase of the principal of the creditor's right) without giving a notice to Party A, and Party A shall still assume the liability to guarantee within the maximum amount and the scope of guarantee.

3

2. Changes of the Parties

Party A's liability to guarantee under the Contract shall not be reduced or exempted due to any of the following circumstances:

- (1) Party B and/or the Debtor encounter such circumstances as restructure, consolidation, merger, division, capital increase or decrease, joint venture, joint of operation or change of name etc.; or
 - (2) Party B entrusts any third party to perform its obligations under the Main Contracts.
3. If the creditor's rights under the Main Contract are transferred to any third party, the guarantee under the Contract shall be transferred along with it. Party A shall assist Party B and the third party in going through the change of mortgage registration formalities required by the law.
 4. If any transfer of the creditor's rights or debts under the Main Contracts is not effective, invalid, cancelled or dissolved, Party A shall still assume the liability to guarantee to Party B in accordance with the Contract.

Article V Possession and Safeguard of the Mortgaged Properties

1. Party A shall possess, safeguard and maintain the mortgaged properties properly, utilize the mortgaged properties reasonably, keep the mortgaged properties intact, and pay various taxes and dues in connection with the mortgaged properties in a timely manner. Party B shall be entitled to inspect the mortgaged properties and to require Party A to submit the originals ownership certificates of the mortgaged properties to Party B for custody.
2. If Party A entrusts or agrees any third party to possess, safeguard and utilize the mortgaged properties, Party A shall notify the third party of the existence of Party B's mortgage right and require the third party to keep the mortgaged properties intact, to accept Party B's inspection on the mortgaged properties and not to impede Party B from realizing its mortgage right. Party A shall not be exempted from its obligations under the preceding paragraph. Meanwhile, Party A shall be liable for the actions of the third party.
3. If the mortgaged properties cause any personal or property damage, Party A shall assume relevant compensation liability. If Party B assumes any liability due to any claim or pays any compensation on behalf of Party A in advance, Party B shall be entitled to file a claim of recovery against Party A.

4

Article VI Insurances for the Mortgaged Properties

1. Unless otherwise agreed upon by both parties, Party A shall insure the mortgaged properties in accordance with relevant laws and the types, periods and insured amounts designated by Party B. The insurers shall have statutory qualifications and well-reserved reputations.
2. The contents of the insurance policies shall be satisfactory to Party B, without any restriction that may cause damages to Party B's rights and interests. It shall be expressly shown in the insurance policies that: Party B is the payee of priority for the insurance compensation (the first beneficiary); any change to the insurance policy shall be approved by Party B in writing; and once an insurance accident occurs, the insurer shall remit the insurance compensation to the account designated by Party B directly. If any insurance policy for the mortgaged properties in which the aforesaid contents are not shown, relevant notes or changes shall be made accordingly.
3. Party A shall ensure that the insurances are effective continuously. Party A may not disrupt, cancel or invalidate the insurances for any reason, or result in any reduction and/or exemption of compensation liability assumed by the insurers, or change the insurance policies without consent of Party B. If upon the expiry of the insurance periods the creditor's rights guaranteed by Party A are not paid off in full, Party A shall renew the insurances to extend the insurance periods accordingly.
4. Party A shall submit the original insurance policies for the mortgaged properties to Party B within five working days after the signature of the Contract (or if the insurances for the mortgaged properties are renewed, after the date of completing the renewal of the insurances), and reserve at Party B the documents required for insurance claims or transfer of the insurance interests.

5. With respect to the insurance compensations acquired in respect of the mortgaged properties, Party B shall be entitled to choose any of the following methods and Party A shall assist Party B in handling relevant formalities:

(1) With the consent of Party B, the insurance compensations may be utilized to repair the mortgaged properties and restore the values thereof;

5

(2) The insurance compensations may be utilized to pay off or to pay off in advance the principals and interests of the debts and relevant expenses under the Main Contracts;

(3) The insurance compensations may be utilized to repair the mortgaged properties and restore the values thereof; or

(4) The insurance compensations may be disposed of by Party A freely after Party A provides Party B with new guarantees satisfactory to Party B.

Article VII Restrictions on Party A's Disposal of the Mortgaged Properties

1. Without Party B's written consent, Party A may not dispose of the mortgaged properties in any way, including but not limited to abandonment, lease (including renewal upon the expiry of the original lease contract), donation, transfer, capital contribution, repeated guarantee, assignment, usage changed to public welfare purpose, addition to other objects, reconstruction or division.

2. With Party B's written consent, the proceeds or other amounts acquired by Party A from disposing of the mortgaged properties shall be deposited into the account designated by Party B. Party B shall be entitled to choose any of the methods stipulated in Article VI 5 (2) to Article VI 5 (4) to deal with the aforesaid proceeds or other amounts, and Party A shall assist Party B in handling relevant formalities.

Article VIII Third Party Interferences

1. If the mortgaged properties are expropriated, taken over, demolished, confiscated or taken back without compensation by the state, or the mortgaged properties are attached, frozen, detained, supervised, retained, auctioned, forcibly occupied, damaged or otherwise disposed of by any third party, Party A shall notify Party B immediately and take measures to stop, eliminate or remedy it in a timely manner to prevent further loss; at the request of Party B, Party A shall provide Party B with new guarantees satisfactory to Party B.

2. The remaining mortgaged properties after the aforesaid circumstances shall still be utilized to provide mortgage for Party B's creditor's rights. Any and all compensations or indemnities acquired by Party A for any reason mentioned above shall be deposited into the account designated by Party B. Party B shall be entitled to choose any of the methods stipulated in Article VI 5 (1) to Article VI 5 (4) to deal with the aforesaid proceeds or other amounts, and Party A shall assist Party B in handling relevant formalities.

6

Article IX Realization of the Mortgage Right

1. If the Debtor fails to perform any matured debt under the Main Contracts or any debt announced to be matured ahead of schedule or the Debtor violates any other provision of the Contract, Party B shall be entitled to dispose of the mortgaged properties.

2. The values of the mortgaged properties recorded in the *List of the Mortgaged Properties* herein or otherwise agreed upon by both parties, whether recorded in the register book of the registration authority or not, will not indicate the final values of the mortgaged properties. The final values of the mortgaged properties are net amounts by deducting various taxes and dues from the proceeds acquired by Party B through disposal of the mortgaged properties.

If the mortgaged properties are utilized to offset Party B's creditor's rights, the aforesaid provisional values shall not serve as the basis on which the mortgaged properties are utilized to offset Party B's creditor's rights. At that time, the values of the mortgaged properties shall be determined by both parties through mutual agreement or evaluated fairly according to law.

3. The proceeds acquired by Party B through disposal of the mortgaged properties, after payment of the expenses incurred in the course of sale or auction (including but not limited to the storage charges, evaluation fees, auction fees, transfer fees and charges for transfer of the state-owned land-use right etc.), shall be first utilized to pay off the debts under the Main Contracts and the balance (if any) shall be returned to Party A.

4. If Party A and the Debtor are the same, Party B may apply for enforcement of Party A's other properties in addition to the mortgaged properties, without giving up the mortgage right hereunder or disposal of the mortgaged properties first.

5. Party A may not impede Party B from realizing the mortgage in any way (including acts and omissions).

6. No matter whether there is any other security (including but not limited to guarantee, mortgage, pledge, letter of indemnity, stand-by LC etc.) for Party B's creditor's rights under the Main Contracts, no matter when such other security is established and whether it is effective, no matter whether Party B lodges claims against other guarantors or not, no matter whether any third party has agreed to assume the debts under the Main Contracts in full or in part, and no matter such other securities are provided by the Debtor or not, Party A's liability to guarantee under the Contract may not be reduced or exempted for such reasons. Party B may directly require Party A to assume its liability to guarantee within the scope of guarantee stipulated in the Contract and Party A may raise no objection.

7

7. If the maximum amount of the liability to guarantee agreed upon in the Contract is lower than the balance of the creditor's rights actually occurred under the Contract, and the creditor's rights under the Contract after Party A assumes its liability to guarantee has not been paid off yet, Party A hereby promises that, its exercising (or exercising in advance) of subrogation right or right of recourse against the Debtor or other guarantors shall not cause any damage to Party B's interests. Meanwhile, Party A agrees that the repayment of the debts under the Main Contracts shall take precedence over the realization of Party A's subrogation right or right of recourse.

Specifically speaking, before Party B's creditor's rights are paid off in full:

- (1) Party A agrees not to claim its subrogation right or right of recourse against the Debtor or other guarantors; if for any reason Party A realizes the aforesaid rights, the proceeds acquired shall be firstly utilized to pay off Party B's outstanding creditor's rights;
 - (2) If there is any guarantee by material objects for the debts under the Main Contracts, Party A agrees not to lodge any claim against such material objects or any proceeds from disposing of such material objects either by exercising its subrogation right or for any other reason. Such material objects and any proceeds from disposing of such material objects shall be firstly utilized to pay off Party B outstanding creditor's rights; and
 - (3) If the Debtor or other guarantors provide Party A with any counter guarantee, any proceeds acquired by Party A from such counter guarantee shall be firstly utilized to pay off Party B outstanding creditor's rights.
8. If the Main Contracts is not established, ineffective, null and void, partially invalid, cancelled or dissolved, and Party A and the Debtor are not the same, Party A shall be jointly and severally liable for the debts of the Debtor generating from return of properties or compensation for losses within the scope of guarantee agreed upon in the Contract.
9. Party A has fully understood the interest rate risks. If Party B adjusts the interest rate level, interest accrual method and mode of interest settlement in accordance with the Main Contracts or according to any changes in national interest rate polices, resulting in any additional interests, default interests and compound interests repayable by the Debtor, Party A shall also assume liability to guarantee for such additional amount.

10. If apart from the debts under the Main Contracts, the Debtor owes other matured debts to Party B, Party B shall be entitled to deduct amount from any account opened by the Debtor in the system of China Construction Bank either in RMB or in any other currency to firstly pay off any matured debt, Party A's liability to guarantee hereunder shall not be reduced or exempted in any way.

Article X Liabilities for Breach of Contract

1. Party A's Liabilities for Breach of Contract

- (1) If Party A breaches any provision of the Contract or if there is any false, mistake or omission with respect to any of Party A's representations or warranties, Party B shall be entitled to any one or more of the following measures:
 - A. Requiring Party A to rectify the breach within a stipulated time limit;
 - B. Requiring Party A to provide new guarantees;
 - C. Requiring Party A to compensate for losses;
 - D. Disposing of the mortgaged properties; and
 - E. Any other remedy permitted by law.
- (2) Party B shall be entitled to choose any method from those agreed upon from Article VI 5 (2) to Article VI 5 (4) to treat with the proceeds from the disposal of the mortgaged properties and Party A shall assist Party B in handling relevant procedures.
- (3) If due to any reason attributable to Party A, the mortgage has not been established effectively or the values of the mortgaged properties are diminished or the mortgage has not been realized by Party B in a timely manner or on a full basis, and Party A and the Debtor are not the same, Party B shall be entitled to require Party A to undertake joint and several liability for the guaranteed debts together with the Debtor within the scope of guarantee agreed upon in the Contract.

2. Party B's Liabilities for Breach of Contract

If due to Party B's fault the ownership certificates of the mortgaged properties delivered by Party A are missing, or Party B fails to return the ownership certificates of the mortgaged properties in a timely manner after the debts under the Main Contracts are paid off, or Party B fails to assist Party A in accomplishing the cancellation procedures for mortgage registration at the request of Party A, Party A shall be entitled to take any one or more of the following measures:

- (1) Requiring Party B to assume the relevant expenses for re-application for ownership certificates of the mortgaged properties;
- (2) Requiring Party B to return the ownership certificates of the mortgaged properties within a stipulated time limit or to assist Party A in accomplishing the cancellation procedures for mortgage registration.

1. Expenses

- (1) Any and all expenses incurred due to Party A's breach of any provision under the Contract (including but not limited to any and all legal costs, arbitration fees, property reservation costs, travel expenses, execution fees, valuation fees, auction fees, notarization fees, delivery fees, announcement fees and attorney fees etc. actually incurred by Party B due to Party A's breach) shall be borne by Party A; and
- (2) With respect to other expenses, Party A and Party B hereby agree that:

Unless otherwise agreed by both parties, any and all expenses in connection with the Contract and the mortgaged properties under the Contract (including but not limited to any and all expenses in connection with possession, management, disposal, registration, notarization, insurance, transportation, warehouse, storage, evaluation, repair, maintenance, auction and ownership transfer) shall be borne by Party A.

2. Deductions of Accounts Payable

With respect to any and all accounts payable by Party A under the Contract, Party B shall be entitled to deduct the corresponding amount from any account opened by Party A in the system of China Construction Bank either in RMB or in any other currency, without any need of giving notice to Party A in advance. If any procedure shall be handled for exchange settlement and sale or foreign exchange trading, Party A shall be obliged to assist Party B in accomplishing such procedures and relevant exchange rate risks shall be borne by Party A.

10

3. Usage of Party A's Information

Party A hereby agrees that Party B may inquire Party A's credit status in the credit database approved by People's Bank of China and the competent department of credit investigation or relevant organization and department and Party B may also provide Party A's information into the credit database approved by People's Bank of China and the competent department of credit investigation. Meanwhile, Party A agrees that Party B may reasonably use and disclose Party A's information as required by Party B's business.

4. Announcement of Collection

In case of any default on the part of Party A, Party B shall be entitled to report such default to relevant department or organization and /or to collect the debt through announcement in news media.

5. Evidentiary Effect of Party B's Records

Unless there is reliable and conclusive proof to the contrary, Party B's internal accounting records relating to the contents such as the principal, interests, expenses and repayment records etc., the documents and vouchers made or retained by Party B in the business process during which the Debtor handles the withdrawal, repayment of the principal and payment of interests, and the notes and certificates through which Party B collects the loan constitute conclusive evidence effectively proving the debtor-creditor relationship under the Main Contract. Party A may not raise any objection against the aforesaid notes, records, documents, certificates and vouchers merely because they are made or retained by Party B unilaterally.

6. Reservation of Rights

Party B's rights under the Contract shall not affect and/or exclude any other right enjoyed by Party B in accordance with the laws, regulations and other contracts. No tolerance, grace or concession granted to any breach or default, nor any delay in exercising any right under the Contract shall operate as a waiver of any right or interests under the Contract, or constitute an approval or consent on any breach hereof. No such tolerance, grace, concession or delay shall affect, prevent and/or impede any further or other exercise or the exercise of any other right. Likewise, Party B will not assume any obligation or liability to Party A for such circumstances.

11

Even if Party B fails to exercise or delays in exercising any right under the Main Contracts or Party B has not exhausted any and all remedies under the Main Contracts, Party A's liability to guarantee under the Contract shall not be reduced or exempted. However, if Party B reduces or exempts the debts under the Main Contracts, Party A's liability to guarantee under the Contract shall be reduced or exempted accordingly.

7. Party A shall notify Party B immediately if (1) Party A is divided; (2) Party A is dissolved; (3) Party A goes into the bankruptcy proceedings; (4) Party A is revoked; (5) Party A's industrial and commercial registration is cancelled; (6) Party A's business license is revoked; (7) the mortgaged properties is damaged, missing, infringed upon or go out of Party A's control due to natural factors or any behavior of third party; (8) there is any dispute over the ownership of the mortgaged properties; or (9) the ownership certificates (deeds) are cancelled.

8. Dissolution or Bankruptcy of the Debtor

If Party A knows that the Debtor goes into the dissolution or insolvency proceedings, Party A shall immediately notify Party B of reporting its claims for creditor's rights. Meanwhile, Party A shall participate in the dissolution or bankruptcy proceedings in a timely manner and exercise its right of recourse in advance. If Party A knows or should have known that the Debtor goes into the dissolution or insolvency proceedings, but Party A fails to exercise its right of recourse in advance in a timely manner, any and all losses caused thereby shall be borne by Party A.

Notwithstanding the provisions in paragraph 2 of Article XI 6, during the bankruptcy proceedings of the Debtor, if Party B reaches a settlement agreement with the Debtor or agrees with a reorganization plan, Party B's right under the Contract shall not be prejudiced by the settlement agreement or the reorganization plan, and the liability to guarantee of Party A under the Contract will not be impaired or reduced in any way. Party A may not

defend against Party B's claims for rights by using the conditions stipulated in the settlement agreement or the reorganization plan. With respect to the part of Party B's creditor's rights which have not been paid off in the settlement agreement or the reorganization plan due to Party B's compromise to the Debtor, Party B shall be still entitled to require Party A to assume the liability to guarantee.

9. Dissolution or Bankruptcy of Party A

If Party A is dissolved or goes bankrupt, regardless of whether Party B's creditor's rights under the Main Contracts have become mature or not, Party B shall be entitled to participate in Party A's liquidation or insolvency proceedings and to declare its rights.

10. If there is any change with respect to Party A's mailing address or contact information, Party A shall notify Party B of such changes in writing. If Party A fails to notify Party B of such changes in a timely manner, any and all losses caused thereby shall be borne by Party A.

11. Other Provisions

The Contract will become enforceable once it is notarized and the Mortgagor shall voluntarily accept the enforcement hereof. If there is any conflict between other provisions hereof and Article XI.11 here, Article XI.11 shall prevail.

If there is any change with respect to any item in mortgage registration and a change of registration shall be accomplished according to law, upon Party B's request, Party A shall accomplish such change of registration jointly with Party B and assume any and all relevant expenses in connection therewith.

12. Dispute Settlement

Any dispute in connection with or arising from the Contract during the performance thereof shall be settled through consultations by both parties. In case no agreement can be reached through consultations, either party is entitled to settle the dispute in the way stipulated in Item (1) as follows. During the process of litigation or arbitration, the undisputed parts of the Contract shall still be performed.

- (1) Filing a lawsuit at the competent people's court where Party A's domicile is located;
- (2) Submitting the dispute to intentionally left blank Arbitration Commission (the seat of arbitration is intentionally left blank) for arbitration which shall be conducted in accordance with its rules of arbitration in effect at the time of application for arbitration. The arbitral award is final and binding upon both parties.

13. Validation of the Contract

The Contract shall become effective upon: (1) it is signed by Party A's legal representative (person in charge) or authorized representative or affixed with Party A's common seal; and (2) it is signed by Party B's person in charge or authorized representative or affixed with Party B's special seal for contractual uses.

14. The Contract is executed in sextuplicate.

Article XIII Party A's Representations and Warranties

1. Party A clearly knows Party B's business scope and scope of authorization.
2. Party A has already read the Contract and all terms and conditions of the Main Contracts. At Party A's request, Party B has already made relevant explanations with respect to the Contract and the Main Contracts. Party A has fully known and understood the meanings of the Contract and all terms and conditions of the Main Contracts as well as relevant legal consequences.
3. Party A has legal qualifications to serve as a guarantor. The guarantee provided by Party A under the Contract complies with the laws, administrative regulations, rules and the provisions of Party A's articles of association or its internal constitutional documents, and has been approved by the internal competent corporate organ and/or the competent authority of the state. Any and all liabilities arising from Party A's lack of authority to execute the Contract shall be borne by Party A, including but not limited to compensation for any and all losses incurred by Party B on a full basis.
4. Party A hereby acknowledges that it has fully known the assets, indebtedness, operation, credit and reputation of the Debtor, whether the Debtor has qualifications and authority to execute the Main Contracts as well as all contents of the Main Contracts.
5. Party A has legitimate ownership and right to dispose of the mortgaged properties; the mortgaged properties are neither public utilities nor the properties which are prohibited from transactions and transfer; and there is no dispute over the ownership of the mortgaged properties.
6. There is not any other co-owner of the mortgaged properties, or although there are other co-owners, the mortgage has been approved by such co-owners in writing.
7. There is not any defect or encumbrance over the mortgaged properties which has not been notified Party B of in writing, including but not limited to the circumstances that: (1) the transactions of the mortgaged properties are restricted; (2) the mortgaged properties are attached, seized, supervised, leased or retained; (3) the purchase price, maintenance costs, construction project costs, national taxes, charges for transfer of the land-use right and the compensation for damages with respect to the mortgaged properties have been in arrears; or (4) any security has been created over the mortgaged properties for third parties.

8. Any and all materials and information in connection with the mortgaged properties provided by Party A to Party B are authentic, legitimate, accurate and complete.
9. Party A's provision of the mortgage hereunder will neither impair any legitimate interests of any third party nor violate any of Party A's legal and/or contractual obligations.
10. If Party A or the Debtor fails to comply with relevant laws, regulations or rules on the environment or social risk management, or the construction, production and operations of Party A or the Debtor may cause harm and relevant risks to the environment and the society (including but not limited to any environmental and social problems relating to energy consumption, pollution, land, health, safety, resettlement of inhabitants, ecological conservation, energy saving and emission reduction and climate change etc.), Party B shall be entitled to exercise the mortgage under the Contract ahead of schedule and take any other remedy available to it as agreed upon in the Contract or permitted by law.
